

# **300 Yrs After Newton Particle and Wave Understood - Universe without Boundary - Creation Continues Forever As Wave - 666 -Enlightenment Game - 3I Charges - H Plasma Introduction to 628 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

In a way, today's workshop is an examination of history and discovering where humanity went wrong in the search for understanding how Creation works. More than 3 centuries ago in 1672 Sir Isaac Newton made many discoveries and he is considered to be the father of modern science. No doubt he clearly proved that light is a particle using prisms and deductions from nature. But he would not accept that light was also a wave as theorized by Christiaan Huygens. Instead, he used his power to suppress Huygens theory so he could be the head of the Royal society. In 1801, after Newton was long gone, the 'Double Slit' experiment proved that light was also a wave. Nobody understood why light is both a particle and a wave. That's why Einstein said, 'God doesn't play dice.' Which means it's not one or the other. The reason he is charlatan is because he could not explain why, and to cover his ignorance he made that statement to distract people. The reason it cannot be explained is because Science rejects the true understanding of Creation and that everything is made of plasma and is the interaction of M and G fields. The charlatans only use the term 'God' to their own benefit, they do not want to accept that God is really a Plasma and His Rays are Hydrogen (H), or we can say, it is the M fields that create everything. After 300 years Mr. Keshe is enlightening Science to the Totality of the Knowledge and why light behaves as a particle and a wave.

It has taken Mr. Keshe 20 years of teaching us the basics of Plasma Science just for us to be able to understand today's teaching and not to reject it outright from our belief system. First of all if we don't know that light is really a M field and not the physical light we see, then we cannot move ahead in our understanding. It's only when the M fields interact with something that we get the physical light. Light in Creation comes from the interaction of two fields which release energy in the matter state in a spectrum of electromagnetic fields. A long time ago I explained that when I was sick and bored laying in bed I suddenly noticed that the Sun's light coming through the window was invisible and we only see it when it reflects off of dust particles or the wall. The implication is that the light that comes from the Sun is physical. It's the same with electricity, which is really M fields, but we are taught to think of these energies as separate and different, and from the point of view of matter state. When Newton was studying light he noticed that it reflected off of objects therefore he deducted that it was corpuscle and said it was a particle. When scientists discover something experimentally we never say they are wrong. But we are concerned with how they are interpreting what they find. This is a very serious issue, because what Newton decided by his Ego to promote, has held humanity back for more than 300 years. This is the problem we have when we attribute

knowledge to a personality rather than through self-discovery. This is why in the new World we are building we want all of us to understand who and what we are and how we are created.

We need more background to understand why light is both a particle and a wave. In the past few months Mr. Keshe has been teaching us that a single Ray comes from the Creator and it interacts with itself to become everything. But this is very hard for us to understand. If you remember he drew like a womb, or the boundary of a plasma and when a ray as H enters that plasma it starts bouncing off the boundary and crossing over itself and basically fills the whole plasma with interactions of itself. As the Ray travels through the plasma and interacts with itself, it changes its field strength as it goes along. So in a way, it's the same as if it were interacting with a different field. But it is really interacting with itself, where it was before, but is now it has a different field strength. It's the different field strengths that give rise to the variety of elements and materials.

In this workshop he said, the Ray really has different fields in it. But let's not get confused by that. And it's not just the Ray or fields interacting with themselves, it's far more complex than that. This is why the scientists could not understand it. As the Ray is traveling it vibrates within itself and creates waves. This starts to build up a complex soup of interactions. And then the field interactions themselves create waves and those waves interact with other waves. Now we really have a soup of interactions. This is why it takes time and interest to really study the plasma and not get confused. The way I understood it was that the matter state is not created directly from the fields which are a higher order. Rather the waves, which are reflected interactions and of a lower order lead to creation of matter.

It's the same with the light. The light is made of particles and waves. The particles can interact with each other or objects and create waves. At the same time two waves can interact to become a particle, or photon and another wave, as what we see in the Two Slit experiment, but we'll discuss that later. So particles can become waves and waves can become particles. One is the creator of the other. Without having this knowledge of Plasma, it's no wonder they could not understand what they were seeing. This is the way of Creation and how the Love of the Creator, which is the H as a wave, when it enters the Earth's atmosphere interacts with all the different field forces like Inertia and the environmental fields and becomes a particle, which is the C14, that then becomes the C12 of the body of the Man or matter state of the planet. So the basic pattern of Creation is also how the Light works. It's again all the same. We have been gifted the most amazing understanding of life and it is so simple everybody can understand it, if they want to. I was always wondering why all the organic biological entities on this planet are made of C chains with H attached to them. Are we not a reflection of the Creator? Our instruments cannot see the C14, so to them it is a fantasy. But now we can all feel our way to the Reality. The Creator is the Sun that shines in the center and His love is the H and when it enters Earth it becomes the Carbon of Life on this planet. It's the same understanding for light.

When we understand how Creation is carried out through the light, then we can understand how the plan of the U is laid out. Man first thought the Earth was the center of Creation, then he discovered that we rotated around the Sun. And with the discovery of the telescope, we found out about the Solar System (SS) and that it rotated around the Galaxy and that there were other galaxies. So naturally Man put a boundary around the galaxies and called it a Universe, and then they thought there were other Universes outside in a Unicos. Today Mr. Keshe is telling us that this is not the case. Everything up to the galaxies is fine, but there was no need to create separate Universes. This was a misunderstanding of how Creation works. If we put the Creator at the center of Creation, and understand that His light goes out as a wave of H and vibrates and interacts and becomes particles and waves and more waves and eventually become particles of C14 and manifests as the matter state, then there is no need to put a boundary around Him. He just keeps on creating. There is no end to the process of Creation. So what we called the U and the Unicos is really the Creator forever expanding, then we can drop the boundary of our U and skip the Unicos altogether as redundant. So the next time we think of our U, we'll know that it is really the forever expanding fields of the H of the Creator.

At the same time we can drop the boundary between us and our Creator, as was put there by the Prophets and their concern for their own profit, which of course became the religions with them at the center, instead of God. Then the Professors took the power from the Priests and they created the concepts of the planets, galaxies, and Universes to deny the truth about Creation, and that the Creator is at the center. Together they all abused the Man, because they got him to believe that he was separate and disconnected. They set themselves up as the intermediaries of the Creator and enslaved the Man. They could do this because Man did not understand that the love of the Creator is the H and like the neutrinos it spreads equally across the U and becomes the C14 and our bodies as C12. Humanity has not yet understood what is meant by, I made Man in the image of Myself. The Creator shines directly on the STM and the waves created by the vibrations are of Him, and they lead to continual creation of new cycles of life. They made it a crime for Man to believe that he is part of the Creator. Instead they created a Messiah that was different than the Man himself, therefore Man was to always be a slave to the intermediaries. Now with the Knowledge brought by the Universal Teachers, do we need a Messiah? Or do we understand the Essence of Creation that we are made out of the fields of the Creator and are already connected to Him? When the H shines on us, we give it back as C14 and the cycle of love is completed.

Since the Creator is a plasma the light starts out as a pulse and when it becomes a particle it switches over to a frequency, which creates the matter state. Then we have to learn how to work with the pulses and frequencies of Creation. If we take away all the myths they created for us to believe in, then there is nothing in-between us and our Creator. If we understand that we are made out of the same field, then do we love our kidneys any less than our heart or any other part of our body. It's all part of the same Energy. And when our Soul separates from our P at death we become part of the STP of the Creator and can manifest ourselves anywhere His fields exist and interact. One day Man will understand that the Prophets were nothing but those who got enlightened, but then they abused that enlightenment for their own benefit. I made Man in the image of Myself, because the

Creator shines directly on the STM and through the waves created through the vibration of its existence, leads to creation of new cycles of life. In other words, the waves created through the interactions we have as a STM have the power to create new lives. It doesn't matter that our P is not aware of it. If we enlighten our STP and P, then all three can merge into a single enlightened Being free to serve the Creation.

The ONN Units are getting closer to delivery time. And the Enlightenment Game is progressing very well thanks to Knowledge Seekers (KS) playing it to help find the "bugs." There is a new website setup for KS to register to become an official member of the KF. This is a legal requirement for international organizations and will open the way for using the Keshe Coin (KC) in the future. Remember in the initial stages the KC can only be traded internally through the KF and not outside. It means we can use it to buy the products of the KF like the ONN Units, Flight Sessions, all the products in the Store, and Mr. Keshe is trying to open a channel that as KS start becoming resellers of KF Plasma products and they can trade the KC amongst themselves. And in the future we hope to be able to go into a shop and buy food, and wholesalers will exchange KC for their products. There is a very bright future on the horizon. He let us know that tonight there are 23 million people going to bed hungry or are starving to death in Africa and the world the way it is run now cannot do a thing to help. Of course, they pretend to, but we all know the greed, corruption, wrong thinking and wrong emotions are preventing any true solution to the problem. The implementation of the KF Plasma T appears to be the only solution that will be permanent, as it will bring a permanent change to all Beings on the planet, including the animals. Since the governments are trying to block this path, we are now bringing the T out through the Enlightenment Game where the poorest people and those left behind by society can play the Game and earn enough to feed their family. Then the Mothers won't have to prostitute themselves or sell their children to have enough to eat. When the ONN system gets up and running then while they are playing the Game they will at the same time be receiving the fields of enlightenment. It will be the force of the Poor who will propel the KC into an international form of energy exchange, or what we call money. We have to wait and see how it develops.

There was talk about the Sun as a plasma and that the people at CERN have not understood that since they are trying to replicate a laser that will be as hot as what they say the center of the Sun is. They think the sun is 15 million degrees Celsius in the center and 5,500 degrees on the surface. According to Mr. Keshe the Sun is a plasma and is not hot in the center. All the heat is on the surface where there is a thin layer of matter state that interacts with the inner plasma fields to create that heat. And then he revealed that spaceships like 3I - Atlas use a special technique to download energy from the Sun. They poked holes in the matter state surface and sucked out the energy they needed. The loss of energy created a vacuum in the Sun and the inner fields go to rebuild the lost energy and the field differences create eruptions on the surface. This should affect our weather in the coming weeks. Inside the Sun is pure plasma fields, there is no matter state inside. The matter state is only on the surface where it interacts with the environment.

Years ago Mr. Keshe explained that for Kamala Harris to be Vice-President the Jewish Lobby demanded she marry one of their people to give them direct access and control in

the Whitehouse. Now he said, that Netanyahu's control factor over Trump was that he marry into one of the wealthy Jewish families in Israel because the Zionists are going to make his son-in-law the new Messiah. We have to remember that since they control the Press they can get the public to believe anything. They are really showing the public as sheep, because the son-in-law, or the coming Messiah just bought one of most expensive properties with the address of 666. They don't do these things by chance. Their power comes by creating fear, and as we know 666 is the sign of the Anti-Christ. In a way, they are fitting all the images together.

I was pondering a lot about this question of feeling the H atom and how Mr. Keshe answered. The question seemed to be about the H atom in the way we were taught to think about an object of matter, with a proton and an electron. And he answered about H as the Fundamental Plasma (FP) which really contains everything in Creation, which he always draws as a spiral. The point of the observer is the field strength you take from that plasma, or where on the spiral, at what field strength you tap into it with your own emotion. So the planet is like the FP or that H Plasma, and if you are in the Arctic you take the field strength of a freezing cold experience, and so forth. That's what it manifests as to you. Therefore, what single emotion can you say a H atom is? It is relative to how you tap into it. Maybe it's more appropriate to think of a H atom as an energy pack and through your own emotion you make it to be whatever you desire. Whose emotion was it that created the Earth?

Going back to the Double Slit Experiment, try to see the video we posted on our Youtube Playlist about it. The lady became very enthusiastic to find the answer as to why there are unexpectedly black lines and "white" lines spread out from a point when a laser light is split in two. She has a PhD and teaches Physics, but the only thing they can come up with is that the waves must cancel each other out and that's why it appears black. And surprisingly as a highly trained scientist, she was still not convinced how the light has both particles and waves. Unfortunately, and most likely she would not accept Mr. Keshe's explanation, because she would lose her position and status. According to Mr. Keshe the black lines in-between are actually Black Holes (BH) and plasmas that have been created from the interaction of two lights. This is the same as what happens when the STM and STP interact they create the BH in the center of the brain and the white brain mass around it. But it still needs more clarification and knowledge. In the same way, the light of the Creator will touch the STM and the waves it creates will become the Soul of Mitra.

Emotion is energy reflected in the physicality. Therefore, since everything is made of energy it has emotion. That's why they say, even a stone has a Soul, and if you have a Soul, then you have emotion. The next time you kick a stone remember what and who you are kicking. It may not be biological, but it is still made from the Ray of the Creator. That sound we hear when we kick a rock, that thud is the stone saying, "ouch." In the future will we be able to take a walk in the "nature," or we'll come up with new ways of walking that respect even the atom? It all depends on what we understand about Creation.

Thanks for listening.
