

629th Knowledge Seekers Workshop February 12, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Totality of Creation; Summary of knowledge increased over thousands of years - worshipping fire to science; U created exactly like SS; Collection of Universes Creator in center of Unicos; Humans gaining in knowledge; Everything from His Energy- has His attributes; His Energy goes out - creates and gets reflected back - interacts with other Universes; Earth's horizon -17 miles; Space horizon line; Receive directly light & energy of Creator; Don't need intermediaries - understand how Earth works; Don't need fake Prophets, ayatollahs - understand work of Creator; Man's limited understanding allowed STM abused; Connected to Creator - no intermediaries - soup of Creation; Religious people don't want you to understand - can't abuse you - create wars - setup power structure - not let go; Don't pay for Sun's rays, warmth, love, beauty; Abuses of religions; Moses understood - hid Tablets - genocide in God's name; Mature - don't need intermediaries to receive God's love; Seeking truth about U - not made up ideas of Einstein - abused like Moses; Tested Gans's - saw color change; Make materials from energy; Principle of Creation - transfer energy from one to another - transmutation; Fear to understand - can create; STM from another part of U - created Man together with all Beings on Earth; Showed Beijing May 2025; STM transmuted from U; Destroying lots of taboos & concepts; Independent investigation of Soul; STM released at death; Soul understands - don't need charlatans - Ayatollahs, Priests; We don't tell you what to do - understand through knowledge - access Knowledge of U; Universal Teachers - above Prophet; True Teachers give unconditionally - Knowledge; Creator teaches freely; Call you anti-Christ; Your life pivots on strength of understanding - transmute; When Soul gathers enough energy connect to Creator - Day of Judgment; STM tainted with killing can't do; Principle pattern - 2 Souls in tune create new life; Where Creator came from; What created M fields; Within becomes outside - detachment; Keep you from understanding truth; Sun didn't need prophets to shine - why allow abuse; Universal Teachers understand knowledge - not abusers; KF has no temples - not religion; Religion means to abuse and humiliate you - keep from understanding truth; Emotion - be part of Creator - allow transmutation; Waiting for Messiah - never come - abuse forever; Mitra and Zoroaster didn't teach correctly; Suffer over time - mature; Why Prophets charlatans; Against KF -second line abusers; KF not asked believe in anything - teach Creation; Prove message to yourself; Purpose -connected to U; Tune into frequency - knowledge; Hidden knowledge; Proof of enlightenment - babies understand; Dream language; Different positions on planet - races; Soul gets knowledge at destination; Possessing knowledge within; Heartbeat connects whole body - STC connects U; Not about religions - understanding; Valentine's Flight - emotion of loving - change human race; KF call for experts from NASA, CERN, etc; 2026 - deliver new T; Rely on KS - support transition; Announcement March 21st; Register - member of KF internationally; Hawkins scale consciousness - fear 100, love 500, enlightenment 1000 Hz; Spectrum of frequency - resistance; Higher frequency penetrate denser material; Enlightenment dense; Love is both; Fields of U - DC - no frequency; Frequency becomes matter; Big teaching on Frequency; Measure emotion of Soul; New systems to measure plasma; Nano coated Faraday Boxes; Penetrate cell; Fear for survival - outer brain; Emotion, intelligence,

enlightenment center close STM; Different brain density - different frequencies; Tested - Teachers need to understand before helping; Ready to implement; Prophets didn't work; Man chose wrong way; Loving doesn't need P or Soul - creates own D; Don't understand love; After enlightenment; Fall in love; Ban Universities; Use intuition and inner energy; About AI - emotionless systems will be defeated; Emotion cornerstone of Creation; Man will win over AI; Take inside STC; Walk into field - gives all you need; KS overcame stoke - plasma - no paralysis; Old age without pain; Persecution of Iranian scientist - bringing knowledge - kill them - change this; Capitalism change; Unnecessary surgeries for insurance money; Become enlightened - help yourselves; Helped Red Circle stroke; Soul has to accept - not work; Don't hate people; Creator makes available; STM from U transferred to Earth - makes all Beings; Creators love like radar signal - send back confirm; Purpose of life; Become Sun; How stars explode; First emotion - accident; About frequency of love; Americans love to kill; Each type of love own frequency - dog, child, etc; Falling in love; Soul connected to all fields Creation - soup of fields; Spherical pot - cook food from center; Offer to American Government - Iran become supplier of Uranium; Souls are Beings - decide what shape; Soul become cat - not cloning; Twin of Creator; How child created; STM remain in energy until birth; All within STC - don't need P; Where did Creator come from; Iran burnt Jins/Demons on street - back culturally thousands years; Full membership KF; Verifying hypothesis; Choose own way; Cuba boycotted by US; America abusing power; Release T commercially - don't need gas or electricity; C14 - for buildings, communication; Started on massive scale; Need Keshe Coin (KC); Not work to live - enjoy Creator; No need for governments; Japan - new batteries; Containment of H is C14; No engine in car; KF biggest cooperation ever; Defines enlightenment - understanding - no limit; Sections of long corridor - light switch; Enlightenment something new; Religion killed more; When I decide - abolish religions; Dismantling Christianity - Judaism, Islam, others; Hired Iraqis kill 300,000 Zoroastrians; Christians and Jews same; Moses - genocide name of God - profitable market; Teach knowledge - not religion; Religion has no reality; Change done by Soul of people; Ignorance creates religion and beliefs; Religions use fear of death, loss separate people; Best wishes Chinese New Year.

ENGLISH TRANSCRIPTION

(:17)

K- Thank you very much. Good morning, good day to you as usual wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back as usual, and we try to, as usual, understand a little bit more, than before, and maybe connect the dots to find what connects to what. As I always say, somehow Rick finds the right intro to the Soul, that connects to the teaching of today.

And there is no more teaching more relevant than the Intro of today, to the teaching of today, (:18) in what we've done last week and the week before. And what I open to you as a line of understanding, the Totality of the Creation. If you go back onto the cycle of the human race, and understanding of the, what we call, how systems are created, and

how things work on this, what we call, planetary system. We find out that, and we have seen that everything in the Universe (U) has been there, and it's the level of our understanding which brings that change. How much more we understood, and how much more we have to understand. Centuries ago we worshipped fire and we worshipped all sorts of things, we worshiped statues, because we saw ourselves weak. Then our knowledge increased. We came to worship individuals, and then imaginary individuals, and then we came up with all sorts of names.

Principally from the physical structure of the life we understood we are on something and it's always there, we call it planet Earth. We utilize its facilities to guarantee our lives. For a time we called it to be the center of what we ever saw was rotating around us, (:20) we call the Earth to be the center of the Creation. Then, we found out we are part of a system, and we became calling it a Solar System (SS). And as our knowledge increased over centuries we found out we are part of another womb, we called it Galaxy. And we found out there's a lot of us, the same characteristic in this Galaxy. Then, as knowledge expanded, we came to understand, "Oh, these galaxies are part of another structure." We called it the clusters, we called it different systems. And then as our knowledge expanded, we called it the Universe. But this Universe we have created is exactly the same as us in a Solar System. It is another Solar System within a Solar System. And in the back of book three, I explain these as Unicos. Where in fact, the center sits the Creator. And we are just as Universes like cluster of Moons, as we've seen like Saturn and Jupiter.

So in a way the way we see Saturn and Jupiter, in the knowledge we gain and the systems we have we see the dimension of the horizon of our intelligence, not the sight of vision. (:22) And now, we as a human race have come up with a very good understanding of, in a way, we are not the only creatures on this system. So, in a fact, we are this dot, in this cluster of the creation. Which we call, they call it, Unicos. Which means collection of the Universes, with the Creator to be the center. And with his energy every system has his attributes as is created by his, and reflection of back, or interaction of with other Universes. Now that we see beyond the Universe, to understand we are a Unicos, the way we see the light of the stars, from depth of the vision sight of our technologies and our physical sight, not much has changed.

On Earth, we have a horizon line of about 17 kilometers or 17 miles. And that's it. When we look into the sky, we have the same horizon, but ends up in certain dimension and in certain directions. And we see this line. (:24) Now that we understand that even our Universe is again like that Solar System in a galaxy, and a galaxy in a Solar System. In fact, when we understand the truth about ourselves, about our creation, we know one thing. As I said last week, we're sitting directly in line in receiving the light of the Creator. The energy of it. And as it was, now you understand, your expansion of the knowledge has increased, that do you need an intermediary to understand the work of the planet Earth? Have you needed an intermediary, a Prophet, a statue, to understand the work of your Galaxy, your solar system? Then why does Man need an intermediary in a fake name of Prophets and ayatollahs to understand the work of his Creator? There is no room. It's only the limitation of understanding of the Man which has created this

opportunity for the abuses of the Soul of the Man (STM). If it was so hard, we hung the first Man who said, "The Earth is not center of Universe." Go to Italy, see the church, it's there. Now we laugh how idiotic our people were centuries ago. Not thousands of years ago, it's very recent past.

Now we have accepted the galaxies, we have accepted the Universe. The only thing that knowledge Man accepts is that he is connected to his Creator, does not need any intermediary, to understand his work, to understand his power, to understand how he's connected to it. (:26) Ask yourself, as I just said a few seconds ago, do you need a Prophet to understand the work of this planet? Do Man need the Prophets to explain the working of the intricacy of this Solar System? Why Man puts a limitation of intermediary when it comes to understand the process of the Creator of him, which now you understand you are part of the soup of? This part, the religious people will fight for you not to understand, and you're wrong, because then they cannot abuse you. To kill you in thousands, create wars and separation. Who gets his hand on the free food, luxuries, and everything else, in the name of religion? Priests (with) private homes in the name of their family, Rabbis, palaces and companies in the private name of their children. Ayatollahs buying estates beyond imagination. Imams in different countries the same, look at the whole structure. Abuser never stops the abuse and it is a fault of the abused.

Now that you understand, beyond is the same as what's within, does Man need intermediaries? Now that you know and you can see how you are connected to the energies. (:28) Do you pay an intermediary to connect you to the rays of the Sun? To get its warmth, to get its love, to get its beauty? Then, how come you need an intermediary between the Creator of the Sun and the Man? And those who understood, made "Tablets," (10 Commandments) and hid the ones which was not profitable to them. And then, as I said, very simply, in a very, very straightforward way, to Knowledge Seekers (KS) very soon. What do we call a man at age of 57, 58, marries a 7 year old child? And how do we allow it to happen in the name of religion? How do we allow a Man to kill thousands, in the name of God, which he destroyed the Tablets of, because it didn't suit him? Because he understood, he's connected direct, and he can deviate to abuse itself.

If Man does not need intermediary to receive the beauty and the rays of the Sun of this Solar System, how come he needs intermediary to understand the Creator of that Sun, which is the Creator of itself, what you call, the God? If Man matures to understand this, then you understands why is said, "I made Man in image of Myself." Then there is another dimension (D) of understanding for Man to understand further. (:30) You are Knowledge Seekers. You seek the knowledge of the Universe, the true knowledge, not the made up one by false people like Einstein, to benefit himself. There is no difference between Moses who abused the people, and Einstein, abused knowledge. They are both the same crooks.

You as Knowledge Seekers, understand, you made it, you put Gans's together, you've seen the color of the Gans changes, because it transfers energy. You have seen and we have shown you how we make materials, replicate one because we create the energy of. This should have raised an alarm with all of you. If you understand you can transfer one

to another, then it comes one of the most fundamental points of the Creation. And this will bring, what I call, fear, to many of you to understand. You transfer in Gans's energy from one to another, you call it transmutation. You transfer energy, in the depth of Totality, and you create life within. Now comes to you a very direct questions, and it's you as a human race who have to ask this question, not me. Did life started on this planet in the shape of the Man? (:32) Or did the intelligence arrived, and in a condition of the atmospheric condition of this planet, according to the condition of the energy in respect to the Place, Time and Position, gave it the image of the Man. Life, and in different condition of arrangement, becomes animals, trees and the rest. We talk about the creation of... Essence of the STM. Did it start it from here? Or, if you understood the transmutation, as there is one replicating the other, was life created in another part of the Universe? And in creating, matching the environment, was created on the Earth? Are we truly in essence of the Soul from this planet? Or we are replication of transfer of energy within the plasma of the Universe, and the Unicos, matching as matches the others.

In fact, if you understand this, comes to one point, that are we all the reflection of each other, which Totality of the Creation creates the Creator? We spoke about transmutation. As we have seen scientifically, you can replicate, produce another entity in another position, because you create the condition. Which means we created the condition on 10,11, 12th of May (in Beijing), in a concrete building, behind lead glasses, gold, silver, and you took it home. The energy was there. (:34) We created a condition for it to manifest. So, the energy of the STM, is it from this planet, and isn't it just because it's transmitted to the direction of the environment, has taken the shape of the Man.

Today's teaching kills a lot of taboos and it makes you individually to do your independent investigation of your own Soul and nobody else's. And then, the most funny part is that, you are 20, you are 50, you are 80, you are 100, soon the shackles of the fields of this planet will release you in the dimension of the STM. Where are you going to be? And what are you carrying from this planet? More killing, more destruction, or the love of the Creator in the dimension of interaction with the fields of his Universe. And would your Soul create another mayhem of the fallacies of the Prophets for the new generation of your Soul to understand that they are connected to the Creator and they don't need no charlatans in the name of Ayatollahs, Mullahs, Priests, Rabbis and the rest. We don't say anything, it's you who have to understand. Independent investigation of your own Soul, your own knowledge and how if now you understand there is no intermediary between you and the Creator how you access the Knowledge of the Universe. (:36)

Now you understand from the beginning what I tell you we are the Universal Teachers and not Prophets. Position of the Universal Teacher is far beyond, above a Prophet. A Prophet is there to make a profit. Teachers are there to give abundantly, unconditional. How many times you went into the classroom in the university, and the teacher shared his knowledge with you and he said, "Pay me for it." How many time you've gone to school and every time teacher told you something, you said, "Pay me for it." Teaching is the freedom of the knowledge and the beauty of the Creator in understanding the totality the needs of His created. Man does not need Prophets. Man needs to understand the process

of creation. And this is what it is. Next time when you see a religious Man with this in front of it, and see how he reacts. You become anti-Christ, you are against Methi and you are everything else because he cannot rob you anymore.

Then the whole structure pivots on you and the strength of your own understanding of your own creation. And then if you understood this, you understand transmutation is the beauty of understanding the Totality of the Creation. (:38) Now, it has to be easy for you as Knowledge Seekers to see the structure of the Creation. But, unfortunately, on this planet, you have to live. You create something to keep your physicality busy, a job, something else, and the rest of it. Till your Soul gathers enough energy that it has a value to connect itself independently to the Creator. That is the Day of Judgment. When your Soul judges itself, I'm there to reflect the beauty of the Creator in me, that I can create more, that enjoy that beauty of understanding. STM which is tainted with killing, will not go that far.

Now you have to understand. Men and a woman, Soul and the Soul of the Physicality (STP), Creator and the Man. Does not change what name you put on it. The two have to be in tune, the two have to be accepting each others, that then it leads to creation of new direction, new life, new understanding, in creating new dimensions with it. In the future Man will ask a fundamental question. (:40) For that we answer you directly when the time is right. And that question is, where did your Creator came from that created this Unicos? Where and what is a fundamental creator of magnetic (M) field, that their interaction leads to the creation of the plasma, that within becomes without. What is within it becomes without attachment, what we call detachment. Then, Man needs to understand.

At the moment you will struggle to understand a simple principle and the whole mankind and Ayatollahs will kill you, for you not to accept and understand this single line. When Man understands this single line, then Man is mature not to be abused, and with clarity of the Soul, he will understand the Totality of the Creation. Ask yourself a simple question, and I repeat it until you understand. Did Man need a Prophets and magic to be connected to the atmosphere of this planet to create the rain? (:42) Did Man need a magic to be connected to the rays of the Sun? Did our Sun need a magic to be connected to its central position of galaxy? Were there any Prophet connected to any of these? Now, why that Man needs abuser to connect it to what connected all these together, and led to the creation of all these? If you do not need a Prophet to receive the rays of Sun, why do you need a Prophet to receive the Rays of the Creator of the Sun? Unless you allow yourself to abuse.

Now you understand how close the teaching of today is with the Intro which you listened, which was recorded years ago from the same teacher. This is why we are called Universal Teachers. Because we understand the creation of Universe, and we are not abusers. This is why Keshe Foundation has no temples, because it's not the religion. Religion means abuser. And those who abuse, they humiliate you. They abuse you, for you not to understand, but they laugh at themselves. How easily we can abuse these (people)? One day I'll give you an example, how they abused Man, through his lack of understanding.

And now you understand, how you've been abused. (:44) Ask yourself a fundamental question. Did you need a Prophet to receive the Hydrogen (H), or the air of this planet to see, to live? How to breathe? If it allows you to breathe? Did you need a Prophet to allow you how to receive the rays of the Sun? How to receive it? Where to receive it? What to do with it? Because he knows better. Then, why do you allow the Rays of the Creator to have intermediary? Unless, you'd like to be abused.

If you understand this, this creates a emotion within you, that that emotion, wanting to be part of the Rays of the Creator, brings you to the position of the emotion of the Creator allows you to transmute in any dimension that He transfers His energy to. Unconditional to all created within its creation, within the Unicos of the Man. The reason this is important is the Jews are waiting for Mashiach (Messiah). The Muslims are waiting for Methi. Christians are waiting for the return of the Christ to create with the dream of never come, that they can abuse forever. But if you understand, you tap into the energy of the Universe to the Creator, then you don't need any of the fallacies. (:46)

Maybe, maybe Mitra and Zoroaster did not do their job correctly to teach Man the Truth. Maybe, mankind needs to ensure, and this maturity of the Man in this cycle, as we receive energies which led to the creation of the Man on this planet, our knowledge, our suffering of the time, will transfer to the other created things, by transfer of energy, that they do not suffer, the same as we do. They shall not kill. They shall not do a lot of things. Now you understand, where the teaching of the Keshe Foundation goes. For you to understand this process. We extend the knowledge from the Universe to the Unicos and the Creator, and this is so simple. But you had to be made ready. It takes time to change a bent branch back to a straight. Man has been bent so much under different restrictions and religions, that he's forgotten how it is to be a straight branch and ?? be connected directly to its trunk, to his Creator. Let them hang us, the truth does not change. (:48)

Now you understand the principle of Creation, and why I always call the Prophets, and they're ?? a bunch of charlatans, using the weakness of the Man. And those who tell you there is something wrong with the Keshe Foundation, they are the second line of abusers, because they still want to abuse you. You have everything, don't believe in nothing which is within the Keshe Foundation. Understand the structure of the Creation. When they tell you, "You are wrong, there is something wrong with this and that." It's back to hanging the Man who said, "The Earth is not the center of Universe." But this time, individually you're getting hung, because you understood. You become that Man in the church in Italy. Pay a visit to a inclined or declined, the Tower of Pisa in Italy. Near there you find a church where they hung the first man, who gave the same message, but it's proven to be right. Now you have the same message, needs to be proven by you and nobody else, that you understand.

The purpose is not to understand how directly you are connected to the Creator. The purpose is that you understand, that you are connected to the whole of Universe, and the whole of its knowledge. Everything within it, the way you have intuition to understand everything to do with this planet, (:50) with this Solar System, you have access to the

same knowledge. But you have to know, as they say, to which frequency to tune in to understand every knowledge that you are looking for. Every knowledge, hidden knowledge, which is not inside of you, you have to create the right energy for it to tap into. And then what you say, "I've been enlightened." Because this is what you want to do, this is how you want to do.

There is a simple question to ask yourself, how come a child born, learns languages, think in that language, and speaks in that language, and it dreams in that language? Do the dreams understand the language? If you understand that part, do you need to dream in the language and speak that language? Chinese dream, language, emotion is slightly different than Hindu and then English. Exactly the same as different position of the Inertia of this planet has created Man of different races and colors. There is no difference when it comes to the STM. You have to tune in understand the totality of how you became Black, Chinese, White or the others. Then you understand how your Soul understand the knowledge of different part of the Universe, according to what you want. And then, as you speak English, and then you learn Chinese, (:52) you understand the Soul energy of a man, or existence in another position of the Universe, and through emotion you carry, and reach your destination of transmutation and the knowledge of that point.

It says, "I made Man in the image of Myself." It's not the legs and two arms, it's the understanding that I possess the whole knowledge of Universe within me. And so, Man does the same. It's for Man to understand, how to connect. You bend, you touch your toe and say, "This is my toe." You touch your finger and say, "It's my finger." And you know everything about that toe because it's within you. So is the Knowledge of the Universe and your toe is another million years' galaxy light, another position. But it's still connected to you because you're part of it. Your heartbeat connects you to the rest of your body. The Soul of the Creator (STC) connects you to the rest of the Universe. Do you need intermediaries and charlatans? Now you have to understand that. The position of the Man and the new understanding of the process of Creation.

I hope today you understood a little bit more about yourself than the teaching of today, if you understand my question. We go for a break, we come back, and I hope you understand fully what the teaching of today was. (:54) Not to make you, not to believe in religions, but to make you to understand, you need no connection to receive the beauty and the warmth of the Sun, as the same as you receive the beauty and the warmth of the knowledge, and the existence of your Creator. Just because you couldn't see, does not mean it doesn't exist. They made you that way, so that they can abuse you. We go for a break, we come back Rick, and try to answer some of your questions.

>> **BREAK** >> 629 KSW February 12th ... (1:04).

K- Yes, thank you very much. As usual, these products you've seen, some of you have placed large orders, some of you have placed few orders for these things. We try to get everything as what is in the stock will be sent, and the second batch will be the end of, what we call March, which will go, we see what the demands are, that they can be reduced again for that order.

There's something that a lot of the volunteers apparently has been, or have not noticed, there is a session this Saturday, 14th of February, what we call the 'Lover's Day', the 'Valentine Day'. If you want to join us, we are testing something to see how we can change your emotions, or what I call, intention of emotion, with loving. And this is important for us to change human race, and it's something we're testing in the background, especially this, what we call, this week on Saturday, is one of our Monthly (Flight) sessions. And if you like, you can join us. Go to the registration and sign for this Saturday. And for us to see how things are and how we can change and influence the emotion of what we call, the people, (1:06) and how we can bring what we call, the emotion of love, the emotion of understanding. And in so many ways it's part of the process of development of the Keshe Foundation transmutation and transfer of energy. So if you are interested and still believe in the love of Valentine, then join us and see how lovely you become.

In respect to major announcements to Knowledge Seekers, we are looking for Knowledge Seekers, the immediate transfer, who have expertise in plasma Technology (T), Gravity and understanding of the lift and motion. If you work for organizations or you know people who work for organizations like NASA, Iranian Space Agencies, Russian Space Agency, or you work within CERN, we would like to employ you to join one of the most advanced labs in Space technology within the next 30 days. We don't want Knowledge Seekers who (for) testing, we want professional scientists, professional engineers, who have expertise in Space technology, who have expertise in international defense, who have expertise in gas and distribution of gas and communication, wireless energy transfer. (1:08) PhDs, university graduates, undergraduates, from anywhere in the world, we are not looking for enthusiastic Knowledge Seekers.

If you are researchers in agriculture, know exactly how to gather data and to make a project of it. We are looking for that caliber of people. You will be working within the structure of the highly developed structured research and we offer initially two years guarantee employment by Keshe Foundation. Space, technology, understanding of the plasma, gravitational lift and motion. Scientists at the level of CERN, because we know some scientists from CERN are on the move. We know NASA scientists are on the move. We are prepared to talk. And your employment starts immediately. Within next 30 days,

60 days, we can move to position. You understand and have a good understanding of agricultural data gathering processing. We are looking for immediate employment. You send, as usual, your request, your understanding, info@keshe.foundation. We are looking for Knowledge Seekers with the knowledge of AI and computer programming and software, (1:10) very advanced level. Those of you who understand the work of Cryptocurrency, those of you who understand the work of a network that can operate internationally. We are looking with the immediate effect of employment. If our team agrees that you can be part of, and you have the knowledge you carry to be part of.

We're looking for Knowledge Seekers who have a deep understanding and process, of Gans production. Not in just ordinary levels. Everybody can mix. But we want those who have innovative systems, technologies for Gans production. We offer 2 years guaranteed employment within the structure of the Keshe Foundation. If you have any of these or you know any of these, get in touch with us at info@keshe.org. You have to have qualifications, you have to be certified for what you apply. We are looking for advanced communication engineers, understanding transmission of the wireless and those who understand the work of the Space Defense Technology. You'll be working in one of the most sophisticated Space Programs. Full employment for two years and if proven to be capable, the contract will be extended. (1:12)

We are looking for those who can retail the products of the Keshe Foundation worldwide as resellers. You have to be able to support yourself to start with, and then the new products of the Keshe Foundation will be made available. You're responsible for that nation, and what comes out of that nation. We already have in number of countries resellers, but we're looking for resellers right across the world. In any country, any position, and you receive the same discounts, but as usual, you have to be able to pay for your products. You get orders, you sell, we deliver, and the usual pattern. We are talking in the ?? sell of very advanced technologies, which the Keshe Foundation within 2026 will offer into the, what we call, commercial part of the Keshe Foundation.

If you have, if you are a Knowledge Seeker, and you have agencies for, things like electricity, gas, automotives, you have a car showroom, and you are Knowledge Seekers, we are looking to invite you to join us for, as part of your dealership, to sell the new structure of the automotive, to be delivered by the Keshe Foundation, in 2026, 2027. We start now that we have enough people around to be able to do. If you are head of an international company or organization, (1:14) which influences and have retail direction in different countries, or in one country heavily, we are interested to establish a connection, as a reseller with Keshe Foundation.

We are ready to bring the Keshe Foundation technology across, in a different way than you've seen. This is one of the reasons we are keeping, reducing and clearing out the stock, as we are moving our, what we call, process of retail, into a totally different level. Any stock will be offered by Keshe Foundation in the new process will be at least 1 million items in stock, which in a way can be repeated, can be delivered, not to be waited, as has been, as we learned with your support. We rely on the Knowledge Seekers to support us to go through this transition.

On 21st of March, we'll make an announcement, which will change most of your lives in a very different way, but you have to register yourself, through Keshe Foundation structures, that you are here as part, as first stage. We still ban citizens of Belgium and Ghana to join Keshe Foundation in any shape or form. Do not use VPN, because when we ask for your ID, complete certification, and you are from Belgium, you'll be blacklisted forever to join in any shape or form, even when we draw the system, and the citizens of Ghana. You got to understand, Keshe Foundation 2026 is becoming one of the major operators in energy, (1:16) Space, automotive, and agriculture. We will change this year everything that you are used to in the past decades, centuries, and a new understanding which will come in line with what we have shown, we have taught.

Thank you very much, and I hope you can support us the way you have supported us up to now. You need to go through this phase to break and change the course of humanity. Register within the Foundation structure which we have announced, that we'll explain to you on 21st of March, what it means to be, and how it will change your life, and then it's your decision, how you want to move, and how you want to change it. If there are any questions, we're prepared to answer.

Q: ... (1:18) My question today is in regards to the Hawkins scale of consciousness. According to the scale, fear and desire vibrate at 100 Hz and 125 Hz frequencies. Whereas you go up the scale, love vibrates at 500 Hz, bliss and peace at 600 Hz, and enlightenment is 700 to 1000 Hz. Might one conclude that this scale is like a template of the pathway to enlightenment and the Creator, and that pathway is through love and bliss and peace?

K- Hello, you still there?

Q: Yes, I'm here.

R: Did you hear the question Mr. Keshe?

K- Yes, but can you clarify more? You must have thought a lot about this, to raise such a question. It's a beautiful question.

R: Should we have a look at the Hawkins scale of consciousness?

K- Yes, we can. Yes, yes. You bring that in the background and please explain more.

Q: Yes, well, I mean when I look at the scale, it starts kind of down at what they would call so called hell, or shame and guilt, and then the emotions, as you go up at higher, the frequency rises. And so, yeah, I guess I just thought that that was kind of like, almost like a scale of a pathway. (1:20) We have to go through these different phases or emotions on what I would call the game of life even, to reach those higher levels of consciousness. And I guess, the (ultimate), the highest that you can get before enlightenment, would be love, bliss and peace.

K- Go back, in understanding that, what you see as a spectrum of the frequency, has to have a resistance. The denser you become, the material become, or the emotion become, the higher frequency to penetrate, that's all it is. Frequency is a penetration strength, if you understand it that way. Why do we need higher frequency to penetrate into, let's say, enlightenment? And why fear has a lower strength, frequency? And then, try to understand why and what fields of Creator, into the intermediary reaction to the fields of the Creation, Possession, Position, and the strength, changes to fear. Understanding that to reach to what you call, initial frequency of the Creation or the Creator, do we go towards a zero? (1:22) Or do we go towards millions in hertz?

Then it comes another understanding, why and what changes to frequency. We create these frequencies by the matter state machines, but is the frequency different if we use a plasma system? This is what I said in the teaching of couple of weeks ago. Are you a ray or are you the wave? Then it brings you back to another point of the knowledge. Why they tell us enlightenment needs a higher frequency? And what brings physical reaction needs a lower frequency? Fear, being afraid of. Being loved is somewhere that partially is physical, partially is emotional, you go into 500. Then you have to ask yourself another question, is that the fields of the Universe are all DC, have no frequency. It's the space of time, density of the fields, that creates that frequency. And the frequency, if it's given the right environment, becomes the matter state of the Time, Place and Position. (1:24) If you create the right frequency, in a combination of frequencies, you can create fear. We do this now, the... scientifically it's done. But is there frequency of fear within the body of the Man, plasmatic or matter state created. Is frequency of fear inside the cell of the Man, let's say a hundred? Don't think so. Man is measuring from outside, not inside the cell.

Then it comes to understand even the aura. Does our aura dictates our intelligence? We never measured these things from the field point of view. This question raised for me a long time ago when, if you remember the girl called Nela and the test we did with the, in conjunction with the University of Tel Aviv and Cambridge University, one making the system and one writing the program for it, some years ago in the Liege University in Belgium. Are we measuring the emotion of the Soul inside? Or are we measuring the, what we call, the field strength of the physicality of the brain that creates that emotion?

Then, as I said in past few hours, we need, Keshe Foundation needs, to bring in scientists, Knowledge Seekers, which can make measurement, (1:26) new measurement systems, that measures the strength of the field of the plasma of the Universe and not mechanically generated. Then what you ask is actually what in past few days has been on my agenda, to find scientists who can bring new measurement tools. If you're instrumental with somebody who knows can create instruments we need to. We'd like to bring you in to work with us to develop systems which can measure the strength of the plasmas in the dimension of the real life, not Man after interaction of. This question was raised years and years ago for me, how come Faraday Box works one way, and how come Dr. Professor Meyl works the other way? It's the same material. What decides the penetration? What decides the frequency? When you pass through a material, you have to have a frequency. Why? You can make a Faraday Box. And our Knowledge Seekers to

answer this. We have made Nano coated Faraday Boxes in our laboratories. We have a few of them. But, do we need frequency to transfer through Nano material? Or, if you produce a... because we Nano coat in the center is a matter, we need a frequency to pass that matter state to get to the other side of the Nano material.

And then, at what position we can penetrate the cell of the Man? (1:28) Why as you say, the fear is so easy to vibrate through the sounds. Isn't it a sense of survival? Because when you have a fear, you run, you create a physical ?? motion. When you have intellect, when you have love, you sit there and enjoy the time because you feel the... you feel as an emotion. You don't run like a rabbit out of saving the physicality. Why? Why physical ?? emotions are sitting in the bottom range? Those of the emotional wavelength sit at the higher level. Man has created to be alert first to save the life. Fear creates reaction. Danger creates a reaction. Because you have to save that physicality, otherwise, there's nothing left for you to have the intellect and the love with.

Man has chosen this dimension of the frequencies for the survival of the physicality. And when you look at the position of where the fear in the brain is, and then you look at the structure of it, you see, the structure of the brain, is different than where intelligence, emotions appears. Because, with emotion and intelligence and enlightenment, you need to absorb the full spectrum of everything, otherwise you're going to get enlightened, you just know one thing, you become a professor in the idiosyncrasy. But, when you understand everything, you're enlightened. And you have to understand the fear, the knowledge, the love, everything else. (1:30) The higher frequency. And if you look at the structure of the brain, this exists more to the center than outside. The more physical dimensions of your brain, physical dimensions, fingers, hands, arms, control, sits all on the periphery of the brain, next to the skull. We know that, we use it.

The more important part in the structure of the physicality of the Man, goes more to the center. It's a copy... (Sorry Rick, I'm going to take this away from you and bring it back again, I do apologize). When you look at the structure of the brain of the Man, I'm not a very good sketcher, as you know, over the years, I'm a most useless painter. Your hands and your fingers are here, this is your ears. Your hands and fingers are here, fingers are here. The hand is here, your lower arm is here, your upper arm is here. When it comes to your shoulder and your heart and everything else, you come to here. This is why when you have a heart attack, when you have a stroke, this goes paralyzed, because the energy from the heart hits this part, and this gets your fingers to twist and the rest of it. So, the higher energy, the denser energy sits here (?? center), which carries the intelligence, enlightenment, because you're near the Soul. (1:32) Your physical part, fear, to survive, to protect this, sits outside. Need the lower, because the higher, literally, is absorbed. And this has an interaction from outside, which interacts with the lower energy. Cold, fire, brings you fear, so you run.

If you understand these things and analyze it in a true way, you understand why you need the higher frequencies. Because the high is already filtered by the center. You get a brain of a, what you call, a lamb, and, or brain of any animal, and you cut it. Cut it by feeling it, not cutting it, just cutting it. Let the knife drop in, and let's see how you feel the weight of

the knife. This is why the brain of the Man is different colors, every brain is different colors. The density of these ?? brains is like your liver, your kidney, you have the same thing, a structure here. It tells you how dense it is and what frequency it creates. And you see where does the denser part sits, it's here.

I have tested, because you have to... I always said, to understand the Man, we have to understand everything about the Man. We come to these situations like Earth, and we become teachers. But you cannot become a teacher when you don't know, you want just to bring somebody, something from outside and enforce it. You have to understand what's the culture, how you can transfer the knowledge to that culture that is acceptable to. This is why we taught for 13 years, 12 years, 20 years, and now we put the truth on the table. Because we have to understand, when it's taken us thousands of years, to bring the Man to understand his stupidity, (1:34) with the name of the Prophets, that now he can see the truth. Because Man chose to go the wrong way. And, the brain of the Man is the same. I have tested many brains. You feel the emotion of the animal, which part is what? We make structures to understand, and this is part of it. Then you understand, why it's the lower energy, because you have the lower frequencies, it's here, you have to protect this thing, this ?? slot here. The emotion of love, where it's in the brain, where it sits. But even that, you have to understand the structure of physicality. Why you have them?

Why do we fall in love? Why do we fall in love with different things? It's the most powerful emotion of love, which connects the Soul with the physicality. It's in between, that's why it says in the 500 range. And most of the time, if you get it right, loving someone in a correct way is the best way and is the most correct way. Doesn't need physicality, doesn't need the Soul. Creates its own dimension, which is more pleasurable than both. Man has not understood the gift of loving and this has entangled, as I said, the Creator of itself. Look at the range, understand it. (1:36) You go from the Soul, let me clean it out, that you understand it. If you look at the... if you understand it.

You're increasing the frequency this way. Fear, love and then enlightenment. And from the Soul, you go, you enlighten the Soul, and then they become more physical, you become the physicality (P). And somewhere in two, they balance. So, this is your love. When you're falling in love, it's the most beautiful feeling. Does not matter, what do you love? Because you respect the existence, the physicality, as much as you respect the emotion of the Soul. This is why we give up, because the emotion of the Soul takes over our physical physicality, doesn't matter, because we know it has something much stronger behind us, which comes from the center.

And the lesser dense, the deeper the emotion of the Soul reaches, this is how the Creator radiates. And when you come the other side, the higher you come in, you need the higher values to penetrate through. If you understand what the frequency is, and you understand when you need a frequency to be. You need more energy to cut this, than this, this is a free flow. You need to repeat it more. (1:38) The phase of this is that much, that's the span. Phase of this. How many of these you need to cover this? Which means you need extensive material. But, which way you go? And secondly, our systems are matter state

still, we haven't measured the frequency in the plasma state. And this is why we have the, what we call, Gans Technology and knowledge of the Man. I hope I answered you as best as it could be done.

Q: Thank you Mr. Keshe.

K- Thank you very much.

Any other question?

Q: ... First, thanks a lot for all the work done, it brings clarity within me. I noticed that as religions, the medical field, especially psychology and psychiatry ones, are extremely abusive with human beings. While they mostly become like that because of the abuse being done to them from their early ages. They tend to keep patients in suffering for both material benefits, and confirmation of existence of themselves as healers. The society pushes them as dictators of some approved rules. What can or will be set up as a condition to fix this madness? Thanks again. (1:40)

K- Ban the universities, who teaches them. When you put a physical structure Man relies more on that, then accepts abuse, then when you leave it open for Man to understand the natural process. And this is where again, plays another game. And the Universe is a part of it. If Man now gets to a point that uses an intuition, and its inner energy, Man will survive. Man will understand, does not need anything. If you look at what we'll be heading with, like for example AI. And we have building systems, physical systems, robots or whatever, to do this. The only thing which most of these systems will not ever carry, in a full understanding of, even though our technology puts it in much closer to it, is the full emotion of Creation. And this is where all these systems fails. Emotionless system will be defeated, because the emotion is the cornerstones of Creation. And this is where the problem sits. You can replicate as much as close as you can, but you cannot never reach it. And that's where the Man will win over the ?? new intelligence game played, emotion. It does not matter what, you cannot replicate it. It is not a chemical structure. It is a field structure which itself creates its own matter condition and mechanical system robots will never be able to do this. (1:42)

Then you understand more, in more depth. As I said, as we explained in the past 3-4 weeks, we entered a new dimension and maybe if Man matures enough by the time I like to get it there, I'll take you within the Soul of the Creator (STC) to understand. Then you see the beauty of the Creation. At the moment you just understand you are connected, you don't need intermediaries. If you mature enough I take you inside. By this means you see the mechanism and the way the Soul works, the Creation works, and how your Soul in the future becomes a creator of life. Where does it get it from to become. And then you understand more.

In the coming time, as technology develops and our scientists understand more, we will create a field that you walk into it and it gives you what you need from the energy of the fields of the emotion, even subconscious emotion, and then you understand. You cannot

show electrical, electronic systems to a child of three because he has no understanding of it. Even if the system works and he plays with the computer to use the electronics. So is the Man, Man is that three year old child. Even the systems are there, you don't see, you don't know how to use. It's how it works internally. One day I'll take you inside the Soul of the Creator. And then you'll understand. (1:44)

Any other question?

Q: ... Good morning Mr. Keshe. Fear is located in the gray matter and has a fairly precise frequency, resonance and energy. I had a stroke 110 days ago. I have now recovered with the use of plasma fields. Thanks for everything you taught me.

K- If you understand it, you can. There should be, as we say, there should be no paralysis with the new technology. Keshe Foundation in the coming year, 2026, will open an operation to this effect. That will demonstrate the works of it. We have already setting up the systems for it. That our, what we call, Wellness application, the medical application, will be registered through rapid response without side effects, which will cut through all these FDA certification, and the rest, very, very quickly. And you will see the first stages of these within the next few months.

This is where we show these things. Why should a Man suffer? Why should an old person suffer with the old age and the pain, till the Soul satisfies or receives enough with the STP, Man does not need to suffer with the physicality. And when you take that suffering away, the life extends. You will see this as a product in one of the major countries in the world in the next few months. Trials have been done, and we go through stage and most of it through certification of it. (1:46) That the physicality does not need to suffer. And as you said, with a stroke, you have seen yourself recover. We already done this and this is what we can do because we've done it over decades.

There is something very interesting I was explaining to a diplomat very recently. Iranian scientists when they become nuclear physicists the worst thing to be, and you have to kill them. Iranian scientists when they show a path through medicine and you can grow brain and take somebody coma is the worst thing you have to destroy them. This is a philosophy and the path of the Western world and it has to be destroyed. Capitalism is the backbone of this. Destroy that we can earn, destroy as much as you like.

One of my closest relatives, because of the position, even though Knighted by the Queen of England, Queen of England, was appointed or invited to become a board member of Ethic Committee as a medical person in one of the most advanced nations in the world. After a few weeks, resigned. I asked why. He said, "You know Mehran, they are creating operations to earn money, even though there is nothing wrong with the patients. In the hospital, which is one of the most advanced nations in the world, they are creating fake diseases with the patients and operations to be able to be paid by the insurance companies and the people, even though it's not needed. They open and close people for nothing, just to earn money. This is not medicine." (1:48)

And this is where we are stuck with. And you have the knowledge, you understand the knowledge, and in a way, you were enlightened enough to help yourself. And this should be the same in every man on this planet. And it's the purpose of our work. What you say you've done, I did to Dirk Laureyssens, 2011. 2010 he had a stroke, he gave me the poison, but he drank the poison and he caused himself a stroke. He said to me, "I see stars walking from one cafe to Kwiks, which is Belgium equivalent of McDonald's." And then that was it. I had to meet him the next day in one of the most advanced hospitals, twisted arms on the life support with a stroke, twisted everything else. Six weeks later I had to take him out. I invited him for lunch. It was the first day out of the hospital, because even his family would not take him out of the hospital. I sat in front of him, put a spoon by spoon, food in his mouth, because he couldn't use it. A few weeks later, he typed like a rabbit, Book number two and three, the one is computer designing the pictures you see.

Knowledge is a gift, but when it's Iranian, it's the biggest crime. (1:50) We'll bring this practice to an end very soon. So you help yourself, is exactly the way it should be with everybody else, cancer, stroke, any other disease. The Soul has to accept it. You can do anything you like. When the Soul doesn't accept it, you cannot do nothing. Cancer will kill you, stroke will keep you paralyzed, and everything else. The light, the enlightenment has to come within. Then Gans's are just the tools.

Any other question?

Q: ... Will simply upgrading human software, without touching the hardware, allow humanity to eliminate killing?

K- This is part of the process, which as Knowledge Seekers you have started. Don't hate people. Let them hate themselves. You cannot take away. You can always make it available. It's the way the Creator works. His love spreads the whole of the Unicos. It's Man who takes it and changes it.

Any other question?

Q: ... Good morning Mr. Keshe. Like you said, we humans are transferred energies, or Souls, so is there a limit in the numbers of these energies, as in how many times would our Souls get transferred in this lifespan, and what's the end goal, or purpose? (1:52)

K- Purpose is simple. When you're ?? not a fields.. I explain to you, you understand easier. When you send a radio wave, it's a radio wave, it goes out, nothing. If you put an aircraft in front of it, it reflects back and it says, "I'm here." But it comes back in different frequency or different wavelength or whatever else. There is no sign of that wave going out, unless it's reflected back. And this is what the creation from the Creator is. He sends a field of what we call, whatever, creation. And when he sees something, absorbs some of it, and then reflects back, in different energy, this confirms I am here. It doesn't come back exactly in the same energy and the frequency of ?? ??

In a way, not only the plane is there to reflect, to confirm the existence, but it's there from the ?? source to say, "I can send something and then get it back." The creation of the STM is that aircraft. To receive from the rays of the Creator, absorb and reflect back to it. And in that process you absorb some of it, that it's so big, so powerful, that gradually you absorb more and more, the more you feed back, depending on the color of your absorption, as our friend said, "Grey brain spot". And what they reflect back, then in interaction with others, to be to creation of next cycle, next cycle. (1:54)

So, creation of life, the purpose of life, is for the Creator to confirm, his own love and his own existence. In a way he tests to see, "If I made something, if my system works." That's all. But in the process, you absorb some of the energy which comes, when you get more energy, you become a Sun, you create life, and then ... , next cycle, till your energy in a certain given spectrum dilutes. This is how stars become, they say, explode or disappear, or the Black Holes. .. Their energy is become balanced with their environment to extend. You call it the White Dwarf's, you call it, Red shift, or whatever you call it. Knowledge has no name, it's just to understand. So, it's very simple, as simple as that.

Your Soul, you're born, your Soul is created, that when he finds a new position to say, "Hi, I'm here." And in that position, the shining of the light of the Creator on you, leads to him receiving confirmation of, "I still receive love." That's what love is, when you reflect back, because you're giving. And then you absorb some of it, which starts a new cycle of the bigger fields, of himself, back to himself. You know, as I said in one of my talks years ago, God created the Universe, and the all objects of it, for them to reflect back to himself, that he gets confirmation of, "I exist", and no other purpose.

Any other question?

R: It brings a question to my mind in terms of... (1:56) you mentioned earlier today, in the first part, the emotion of. The creation of the emotion of wanting, to become Rays of the Creator, I believe is what you said, or something similar of the Creator. And it's important to create that emotion, is that it leads to the emotion of the Creator. Now, could you explain more about that? And how, how can we experience, get closer to experiencing that emotion? Because it seems to be the, the direct connection that you spoke of. And, another part of my question is, how did the first emotion come about?

K- By accident. You see, you call it the frequency of the love, and love to our language is when you give. Why you have that 500, for example, between the zero and a thousand? That love is where... This is your brain. It's got what you call it, MS, it's not very ?? nice. You radiate from the Soul, at the frequencies you are talking about, from 0 to 1, 1000. And then you have this. (1:58) You know where the Weight and the Mass comes when we talk about creation of the Weight, when the Magnetical Gravitational become to balance, type thing? And that is at 500, around 528. This is where you touched by, you receive back, and in a way, it's a reflection. And that's the reflection back.

This is the region, the borderline, and round about 500, where the emotion is equal both in or balance with the Soul fields and the environment, or what touches you as energy of

another person. It's not 525, 528, it's a bandwidth of the fields. This is why we love different things. One is 528, 1000, 521 million and the rest of it. So, the emotion of the love is wearing in a bad way of depending on the cycle, the energy, the emotion comes from the energy comes and what goes from outside.

The Americans love to kill. No nation loves more to kill because they did not exist than the Americans. We see it now. Killing, if you got American blood with you, is a victory. We kill and we are powerful. This love for them sits very, very further than what we call, you come to an Italian with a romantic life. (2:00) This is 527 for the Italian is 530 for the Americans. And this is, it's a variance, it's a balance, it's where we say, where the magnetic field and the gravitational field of a system balances, creates the surface of the planet, the boundaries ?? of it. Where I can share and receive, lead to the creation. We call it the surface of the planet, that's all it is.

So your brain, your emotion, comes where frequency comes from, where the two can reflect back both sides. That's why you fall in love. And if the frequency at this level is the same frequency as your heart, which in a way balances with the Soul, in another dimension, then the heart touches, physicality touches, it's your bandwidth of your love. Where both side resonate at the same strength. This is why we love with Soul, with heart and physicality. And what it means, this comes in, reflects back, we become a giver, the Soul is satisfied and the heart is satisfied and 'da-da.' If your frequency of your Soul, not your physicality, is at this strength, and it touches this, you fall in love. You feel it, you emotion it, and physicality you go for it. And it's never wrong. And Man has, same Soul, the same physicality, (2:02) have a different spectrum of 528.0001 is loving a dog, 528.002 is for my children, 5.000 is for the wife, and then the fear, my managers, my mother, each one ?? sits at a different ?? strength. It's a spectrum that's why we love different way, differently.

Any other question?

Q: ... I have several questions, please. Number one, can Mr. Keshe explain more about our Souls connecting, coming from or originating from another system across the Universe.

K- We are connected to all the fields of the Creation. We are not immune to it, we are not special. And we are a zig-zag, we are created out of zig-zag of energies which goes through and the atmospheric condition in the field of this planet absorbs certain fields. The rest go through it. What the scientists call neutrinos, we've never seen because it goes zip. And so we are not something special. And we are all, all of us, are within the soup of the, what I call, the fields of the Creator. (2:04) It depends which part of the soup we sit. Make a lot of meatballs, pour them in the tomato sauce. Is there any difference between the meatball, which is at the bottom of the pot and the one is on the top? And somewhere when you're boiling it, gradually the bottom one comes to the top? That meatball is the Soul of the creation, the Man. The heat, the love, the temperature, whatever, comes from the bottom up. It's in the center of it.

Now one of the things which is very funny, years ago, I said, "If Man could make a spherical pot." Now we have the Chinese box, which is, what do you call it, half of the sphere, or a quarter of a sphere, because. If we could make a pot which cooks from the center, and everything in is all around, like another circle ?? around, would be a fantastic creation of Souls. Because the pressure and the energy from outside will push what is the heat from inside, and you find out nothing needs to be cooked. Nobody has ever managed to build such a thing, but to sustain its energy. The closest we come to is some of the nuclear reactors, but again that's the field contained and contaminated with it.

Something very interesting, totally irrelevant to what we're talking about. We have put a proposition to both the Iranian government and Americans, in solving the problem with Iran nuclear technology. (2:06) Iran is prepared to negotiate to sell its nuclear material to the highest seller, not dictated to be given, but to the highest seller with the full supervision of the IAEA, and the independent monitoring system, which means the Americans can't take all, who get bids higher will take, because it will be beneficial to the Iranian nation, we spent billions on it. Same time, we are prepared to negotiate to produce Uranium as 2, 3, 4 or 5%, but become the supplier of the raw material, as a base material to rest of the nations. Iran is prepared to negotiate on these terms. We are prepared to consider diluting our material to, what we call, fuel grade, for power stations, but to the highest bidder, will not be given allowed. But this gives us a ground to become an international supply of nuclear material, based at 2, 3 grades, that the others can use for power stations, or energy development.

We saw the boycotts and everything else, and the Americans are prepared to talk peace on commercial basis. We are prepared to negotiate Iran nuclear technology on the same basis, but as a new developer of the raw material. We mine it, belongs to us, we process it, the Africans do not let their Gold to go out as a ore, they now process themselves, they get more benefit. The same will be with Iran, with one proviso. When we sell the fuel, as once you use a Gold, it's used, when you burn the gas, it's finished, and in the European countries, buying gas from Russia goes with much, how much energy, (2:08) electricity produces, at the end of it, the nuclear materials sold by Iran, will carry 20 years of life. A percentage of what it produces has to be returned back to Iran, as a contractual basis, as intellectual rights, or whatever you call, as a supply lines, back to Iran as international, as national asset.

Our call goes directly to the White House. We are prepared to negotiate on these terms. This will become, in response and understanding of the both side, You are prepared to give up, or not to give up, we become supplier of nuclear material, to the Americans, Japanese and the rest, when they proviso so that, we are prepared to go down to 2-3 arrangement, 4%, 5%, but as supplier, not just for Iran only, for the rest of the world. French are short of raw material, we have it, we process it, you can buy ?? it directly with materials. This is the biggest peace offering to be made by Iran, and... in that process, the fear of missiles becoming nuclear will go away, and missiles are non-negotiable. This is the voice, and the conditions we are prepared to negotiate with American side, as we call, we consider Israeli irrelevant into this ?? warmongering. You can return your answers to our negotiation team in Doha, or back in United States.

Is there any other question?

Q: ... (2:10) Question number two, are the Souls non-human in a human form, but unaware?

K- What?

R: I think he's referring back to the Souls that might be originating from another system across the Universe. Are the Souls...

K- Souls are Beings. No, Souls are Beings, they decide what shape they manifest themselves. Non-human, everything doesn't finish with the humans. The Soul is a energy pack, yeah. If you... Sorry, just one second. If you create, if you manage to create the energy, not just ?? all energy, but the structure of the energy, within a system of a cat, you'll create a cat. You don't need to clone it. We do that with gold, didn't you see it in May? We create the Soul of the gold and it rains gold. It's just ?? creating the condition.

Q: It kind of leads to question number 3, which is, if everything has a Twin, so where is the other half of the Creator?

K- That's a question which answers in two ways. When you transmute, you're in the condition of transfer, your STP sits within the structure of the Soul. When the Soul moves outside, like body of the Man, in interaction with its environment, has to manifest itself, in, what you call it, showing what it is. That's what happens. (2:12) We have a STP, egg and the sperm of the mother and the father, and when they come together, they create a Soul. And then that STP is still there, with the interaction, between the two and the fields of the womb of the mother, which has its own condition, it has to have two legs, two arms, that it can live in the atmosphere of the bigger world, which is the atmospheric condition of the Earth, leads to manifestation of the child. But, as long as you do not match the, what you call, field strength of the STP and STM, the child is not born, because it does not manifest itself. This is the period time, at the moment, in the world of science, it's saying 6 weeks, 8 weeks of, 10 weeks of ?? decision. So, does not need to manifest itself, to confirm its existence, as it's in the form of the energy.

We see Universe in the form of energy. And then you, you see the Soul of the Creator, which is the STM and all the created things are within His Soul, so it doesn't need, have to have physicality. But, the question goes back, where did this come from originally? What is the egg of the Creator and what was the sperm which led to creation of the Creator? Which in the world of the fields, not in the matter state, has a totally different meaning. And then, you don't have the physicality to confirm physicality. Then it comes, what joined together that it made the Creator such a huge amount of fields, that it leads to creation of the Unicos.

The riddle of life in the Universe, will take Man millions of years to understand, if he ever understand the Totally. (2:14) When you travel with the physicality, you die, and

your Soul takes into the Space of the Universe. It still carries part of the fields of your Spirit, STP, but has no dimension of manifestation. Till it meets a position which matches its field strength and then it manifests itself. And then the STP has to show dimension in respect to the environment, and then you see the Soul changing position of the STP. And we are in that stage. And you need to bring, to create higher, to lead, to creation of unified fields which is the STM.

Q: ... What about the creatures known as Jin or Demons? Do these things exist and are they active on this planet?

K- Demon to who? Jins to who? Maybe, maybe, maybe we are the demons and Jins to them.

R: I was going to say one man's demon is another man's god.

K- It's very interesting. I was just watching something very interesting in Iran yesterday, or the day before. They made one of these, and they put the nation back by a thousand, two thousand years. They burned this on the street. (2:16) They're going back in the culture, than going forward in understanding. Go on the Internet, you'll find it. They actually put the statue of this, what we call, Jin, or whatever, Demon, on one of the streets of Iran and they burned it. I've never seen this before. Why do you burn it? And then put the flag of Israel on top of it to burn with it. The nation's going backwards by thousands of years.

Any other question?

Q: ... What are the greatest benefits of this product (Cosmic Ray Twinity MaGrav)? How should it be used and maintained?

K- I .. They have run some sessions with these, and those are the people you can ask. There are people in Austria, who have run some past sessions. Ask those people who've been there and how they use it. It has a lot of things for people. It's done a lot of... for some, has created a lot of emotion. Because you twin with the system. In it there is a structure... Actually, there is more advanced system of these coming out very soon. That connects with you as your... you become like a twin set. You are part of it, you connect to it and it connects to you. And these units only to be used by one person. In a way you open a wave to receive higher order fields. Or to be in the environment of the higher order, in the matter state and the plasma state. (2:18) That's what it... it brings a lot of people see things, because they get enlightened. They receive it. It's just like... you have more energy, you can run more. You have more in the environment of... and then you see you... it's opening of a vision. You don't get fat, but in the ?? the ??. You got to listen. I've heard a few people who used them and what it does or what they have has changed in them, what they've seen. It's a tool for what you have to be, how you should be able to connect to. A very more advanced version of this will come into the market very soon.

Any other question?

Q: ... We should register for ?? at the keshefoundation.at. What does the full members mean? That the Knowledge Seekers choose the right membership?

K- These are part of structure of the Austrian regulations and rules. You can participate in the board meetings and everything else. Read the Association Charter of, what you call it, of the Association and the Austrian Association. It's legal terms within the definition of the government association. (2:20) It's detailed in Rules and Regulations of Association of the Austrian Organization.

Q: ... Great Professor Keshe. Science is done by exploring discoveries and verifying hypothesis, right? Do you have a preference for one of these paths? Could you also tell us which path is best for a Knowledge Seeker?

K- Everybody has to choose their own, we cannot recommend.

R: What about the idea of exploring discoveries and verifying hypothesis? Is that your technique or would you say you follow a different path? In your lab experiments? I'm thinking in terms of lab experiments and he's thinking in terms of, how science is done. And whether you have a preference for a certain path and...

K- No, we understand... our path is understanding the work of the Universe. And not, what you call it, not...

R: That's always at your central core, so you don't have a particular while you have, you know, certain effects and outcomes and so on, that occur of course, but your main thing is... keep it as close as possible to direct to the source...

K- Working of the system... the working of the system is important. (2:22) And somebody copies magnetic fields and they make generators, some people copy and do, making a God knows, a system for life. But, if you can do the same thing through the fields, energy, the working of the Universe, then you don't need to make the matter state of it. But, we make tools to bring you to see that position of creating the fields of Universe. We use the matter state to confirm the existence of the energy. In the real plasma condition, not in the Man's condition of electricity and the rest of it. That's the difference.

Q: ... Hello Mr. Keshe, thank you for your contribution to humanity. My question is, Cuba is currently under a fuel blockade by the US, people and factories lack Gasoline and Oil, electricity is cut off everywhere. In my opinion, this is a good opportunity for plasma Technology to demonstrate, a positive signal, perhaps just a household energy generator, that will become symbolic, letting many people and countries around the world know about alternative technologies, such as plasma technology, that can generate electricity without Oil in the future. Please tell us your opinion on whether this is feasible at this time.

R: And I could also add that, for example, (2:24) Canadian flights to Cuba have been stopped, because they don't have any fuel for the jets to go home?

K- The answer for it, I think I'll back to it later on in the second part. We have to make... First of all, Cuba is not the first one. We saw it with Venezuela, we seen it with Iran, we see it with the African nations. America is abusing its power, and soon, it'll be shown, it has no power. You will understand very, very... we have to be very ?? careful .. sitting outside the ?? touching side. The shortage of electricity is not exclusive of Cuba, is not exclusive of Venezuela, is not exclusive of... In America, the Canadians, you stop energy going South, unless they pay the money for it, and you see, you create some chaos in American side. The most, what you call, underdeveloped nation, bringing others to develop it, is kicking on those who developed it. This is what the bottom line is. And we see that in Cuba.

In the very near future, I wrote to one of Knowledge Seekers, actually not Knowledge Seekers, but somebody who's been trying to set up a structure, of the production for Keshe Foundation, this morning. We will release technologies as a commercial structure this year, that Man does not need no gas to buy, (2:26) and no electricity to purchase. It's not a Solar System, it's a Cosmic Ray System, and our people are setting up and working to that direction. The only problem is, once we release this technology, so we (?? it will be) copied heavily. And, you got to understand, when you say, sending fuel to Cuba, or gas to another country, they can do. We've shown this to, the same as now, they are playing with the price of a Gold and Silver, and we can produce tons of Silver and Gold as you've seen in China, and last year.

We have technologies, we can produce as much ?? gas as you don't need, so you have technologies that can do lift and motions and the rest of it. This year, 2027, starting within next few, literally, handful of days, Keshe Foundation is setting out to bring the total technology of the Keshe Foundation under one, what we call, workable unit. Our team, starting next few weeks, will set out to develop a system, in that... how we use, how we produce Gas, which we have shown to the Chinese Gas Corporation in 2023, and the academician abused it. We've shown the production of the material in China, we have shown the production of water, many of you went through our system and you were flooded, and you created rains and everything else. (2:28) We are integrating all the technology of the Keshe Foundation, within next few days, coming up weeks, that's why if you heard earlier on, I asked for your specialty, if you are specialized, you have a degree, professor, whatever, join us. A system, that is a Central Integrated System, produces water, energy, lift, and everything else, that can be handled, by every nation.

No one can boycott no one anymore. We estimate the first hundreds of thousands will be out within next year or two. When you make it available, it'll be there. It's not that we make it, well, we didn't do energy, what happened to our energy gas system, the minute we talk about it, what happened to our energy? You have to wait, now it's becoming the knowledge of how we produced gases, becomes the fuel of the Space Technology to move, and then how we manage to create Carbon 14 (C14), that becomes the structure of building, the structure, communication, and whatever you call it, the rest of it. So, it's like

we built the radiator, the engine, the seat, the carburetor, and the cooling system, now it's time to put the machine together. 2026 is the time when we put the whole of the Keshe Foundation technology together. And it's not a talk. Those who are around us, they know we have already started the process. In a massive scale. And you will see coming up. Then do we need... can you boycott the energy, the line to C14? Can you cut the energy to Hydrogen? Can you cut the dynamic structure of the plasma to create the water? No nation can boycott no one and the matter state will have no value. (2:30)

It's not something we talk about because, when you helped us to understand the work of the fields, the emotion of it, the... when we offered you different systems, now the Communication System, all comes together. Now we're going to production of the most unique system Man ever know. Do you need cars which have engines? Do you need a Boeing to Africa, digging out and bringing material to America to melt it, where you can produce the material 100% pure on the table? Then you understand why there is a need for Keshe Coin (KC). Nations, people, will deal with each other according to the pleasure of existence, not the need of existence. Man should not work to exist, Man should exist to work to enjoy the Creator. And this is what we gradually put out. We've done tests for years, and this year you will see. All the technologies of the Keshe Foundation, all the parts of the car has been done, tested. Now we are putting it together to be assembled. Then, can we boycott?

And then, our proposition is very simple. Our term, our finance terms, our technology terms, no need for governments, because we'll be governed by ourselves in a very correct way. Nobody can steal, nobody's more powerful than the other, because we all eat from the same pot. And the process for this has already started, it's not something we're going to start. (2:32)

As many of you, I'm sure you heard, in Japanese, have destroyed the Platinum, and everything else that big companies, corporations were waiting for. They have come up with a battery which charges 5 minutes, 1000 kilometer, and it's just made of Aluminum. What happened with not selling rare Earth material? Japanese have shown it last week, it can be done, but still you need an engine. Do we need the battery? What about if you put the limitation on Aluminum? Nobody can put the limitation on the Hydrogen. But, in a way that the containment itself, is contained by its own structure. Containment of Hydrogen is C14. Do you need a material when the fields can control? Then, do you need a car? Do you need an engine in the car? All come together. This year we start putting all the pieces we developed over 20 years, together to produce, and we are moving the scientists to do so, and you heard us earlier on. We're asking for experts to join us. The biggest cooperation on this planet is on the verge, not on the verge, it's already started, it's taking shape. Microsoft, Google will be peanuts. The total assets, beyond the total assets of the whole the nations put together, by its own structure, for all mankind, not for one person. The promised time is 26, we deliver 26.

Any question? (2:34)

Q: ... Could you please explain simply what the enlightenment is? Does it have a meaning?

K- Understanding. According to your intelligence, and intelligence has no limit. You cook in the kitchen, you cook in the kitchen and then you say, "Why don't I mix the egg with the tomatoes, because they do this and that, and then why don't I mix together this with the banana, and they do this and that, and you come up with something new." That's enlightenment. You come up with the new dimensions where up to now you never ate the banana with the tomato and you never knew what the effect will be, or the same with whatever you put in it. It's understanding of it, endeavoring to understand what are the new limitations. But it can be anything, Knowledge of Creation, knowledge of medicine, knowledge of agriculture, cooking. When the Man pushes the limit, he gets enlightened. He wants to understand what are the boundaries. How much more I can do. Not necessarily physically, but even understanding how much more I can understand about Creation.

Enlightenment is a corridor which has a very, very long ?? one. It has a single switch per point. (2:36) You have to switch that light for that point to see, to go to the next steps of corridor, otherwise you'll be walking in the dark. That's what the enlightenment is. All the lights doesn't open all the way to the end for you to see, it's for you, the light is on. If you have a different vision of different lights, it's all the way lit, according to your sight. Which light, how deeper you can see, it's the same thing. It's exactly the same, there's nothing... What depends? Somebody says, "Oh, you can't put this switch on because..." and then you don't touch it, so you don't get enlightened. What about if you jump that and go to the next light, and it comes on, the guy's got no control over it. That's what enlightenment is. It's just understanding more of. It has no limit.

Q: So it goes by degrees of...

K- No, by the level of your own intelligence and your own limitations.

Q: Yes, and then is it temporary when the person reaches enlightenment in one thing?

K- Temporary for that point of understanding, yes. Or permanent because you don't want to move anymore. There is no limitation in enlightenment, it's the Man who ?? puts it.

Q: Yes, thank you. (2:38) You opened some doors today as far as Prophets, because I think that Prophets have done their job at the time, and now they are outdated because there has been so many changes added to every message. So, that becomes more dis-guiding instead of guiding. So, it's liberating to know that we, with your knowledge, we can start from scratch, and independent from what's, who says what, about what religion, etc. And it's very sane at the same time, like nothing to regret, because at the same time we replace with the knowledge of Creation.

K- You see, when you look at religions, religions, doesn't matter which one, were created to save Man, but nothing has killed more than religion. More men have died in the name

of religion than anything else. Nationalism comes second to religion. One form or another, more men on this planet have died and killed in the name of the religion. It doesn't matter if that religion was in the name of the emperor, because he's taken a point of position of people believing it and worshipping it, and then you have others who became imaginary. (2:40)

It takes me, when I decide, one minute, one sentence, to abolish Islam. Using the Koran, nothing else. It takes me the same minutes to abolish Christianity, Judaism. What do you do with the man who lost their hope, what they believed in? Unless you build a structure that they understand, there is a 'bigger picture.' If you listen to the teaching of past, especially two years, step by step I have dismantled Christianity, in a very different way you can see it. The same with Judaism, the same with Islam, the same with the others. It's just you don't want to hear, people are not open to understand, they... Now, maybe with the teaching of today, you have access to the origin, why do you build people in the middle of it? Even those who are supposed to keep you straight.

In Islam you were supposed to bring to unite, peace. 300,000 people killed in one day, in the name of Zoroastrian. (?? To kill Zoroastrians). Where is the peace in it? In the name of Islam, we just paid bunch of Iraqis, tens of thousands of dollars, to come to Iran and kill in the name of Islam, 300,000 Iranians. In past few weeks. What is the name of the religion? Is it peace? (2:42) Now, the same. It's just about one nation. What happened? The Christians did the same in Crusader's time. The Jews did the same thing in their time. Did anybody ?? ? If you go by the ratio of the Man in the environment, has anybody killed more than Moses? He himself, in the percentage of population, killed more than anyone else in the history of Man. So, do we need religions? Or are the religions just made up to abuse the Man, because it's a profitable market.

So, we leave the Man to be enlightened, and man will teach the man about the Creation, that the Man walks (himself in). Because fighting takes too much. You make too much enemies, but enlightening people, understanding, they don't need. When you understand the truth, you don't need to go to mosque, to church, to synagogue, to whatever, then there's no money to run, a few people will be there and gone. How many religions have disappeared because there's nobody believing in it anymore? We have that the recent one in Iran, Babi's (Bahai's). How many people believed in Bab and then gradually nobody believed in it, there's nobody. Do you know anymore Babi's left as a religion in Iran? No, gone. And it's the same, the knowledge enlightens the Man and the Man decides himself. And our job is teach the knowledge. (2:44) We are not religion because religions, there is no reality about the religion.

Q: I think the Man has always, always reached for something higher than himself, some kind of Soul connection, something that gives him more force and gives peace to his material life. And then sometimes it was deviated, most of the time, because Man has always had this greed and love of power, which no religion survives. And now that we learn with your teaching about the Soul, about Creation, about STM, and the power of STM, I think it just replaces all those needs of Man to get that knowledge and peace inside and also gives the Man another mission to kind of either teach or having this

knowledge to elevate herself himself, give some peace inside. So, it's just replacing all those non-functional, all the time, teachings of Soul, by a Soul teaching, which is kind of scientific, because you can create devices with it. So, it should be kind of technology. And it's the right time for it because all other religions are subdued by power and greed. love of power, love of greed, and no exception. It seems like Man has not changed spiritually, really, just getting more information and Internet. (2:46) So I think it's the right time to succeed this time, because there would be no special power to give to anybody but our own Soul and our own power. You said if you are detached in your need, when you have a need, you can create what you want. So why do we need all these interceptions, intercession of people, gods and mullahs and other things, spiritual teachers to teach us, because we can create what we want if we take care of our Soul as you taught us during these years. So I feel like that's the right time and I hope humanity doesn't miss this time because everything is ripe to get this fruit out of the tree of knowledge for humanity.

K- It just depends how we would like to do and how fits the others to be. I have a very... I put this to diplomats in the past few days. We are Iranians. Nothing to do with Iraq, nothing to do with Israel, nothing to do with everything else. And how come our negotiating team is a Man which carries the name ?? Aragchi? He's from Iraq, how can an (non) Iranian negotiate just for a nation of Iran, unless there is something in it for them? Do you understand? (2:48) This is the hypocrisy of religion. How can an Iraqi negotiate with Americans for the best interest of Iran, unless it's in their own best interest? We have not a single Iranian, true Iranian, in any of the negotiations. And then it tells you how religious works, how people accept these kind of positions.

This has wondered me a long time. We see the same. How many... you watch how this ISIS group are arresting native Indians to show us we are Indian, and then put them to prison. Guys, we were here long before you come. We have allowed abuse, we have allowed people to abuse us, and by threats or whatever. So, we have to see, we have to understand. Goes right across. If you remember, two years ago I told you the war between Ukraine and Russia is a religious war. Have you seen what's the proposal of Putin? The last, but the most important thing which is connected to it, is that all the religious positions of the Church of Russia and Ukraine has to be returned. What the, what you call, nationalism's got to do with religion. Stuck its head out, read the final negotiation papers. Do a government negotiate for a religion? So religion was started ?/ got the hold of the war. And it's the same with everything else. (2:50)

Q: Yeah, I hope it finishes well. And I think maybe at the end, Man learns something, I hope.

K- This year, when next year, thanks to Knowledge Seekers who were creating the conditions for us, and the guidance we get from all the Knowledge Seekers around the world which are setting us, with us, this structure. The financial gain, the material gain, all will come to a very nice halt. Because, it's not done by a corporation, it's done by the Soul of people. We see it the birth of the Keshe Coin and now, the Peace Game, the Enlightenment Games, and the creation of the different technologies which all come

together. And then gradually moves to the next step, which is the enlightenment of the Souls of the Man. This is one of the purposes we work this way now. With these ONN (One Nation Network) Unit's when we bring the Souls, many of you getting enlightened in different ways, is the story of the plasma. Slowly Man gets what he needs that Man become peaceful.

This is one of the problems. And gradually we are moving in that direction. It takes time. Ignorance creates religion and beliefs. When you are enlightened you don't allow, you're not ignorant, so you see the truth. You don't let religions to dominate you. (2:52) And you have to understand the truth about it, otherwise it all goes from one thing to another.

I saw the truth at a very young age in ?? Firuz Bahram (Zoroaster school). I understood the message. And nothing deterred me from that day. It was very strange when you are born in Iran, you know, we always had a religious session. You had to have a, what you call it, a ?? Diyanat. We have, you had to read Koran or whatever. You ?? had to teach in Koran. it was compulsory. In Firuz Bahram religions are all respected. So that reason, as I said before, you heard, Muslims in the school, when he came to the religious session, had a Mullah coming and teach us (them). The Zoroastrians went to the... the priest came to teach them. Christians went across the road to the mosque, to the church. And Jews were the only one, because they were not in many, they were handful of them, they had to hang around and have a playtime, because they couldn't go in any of the three. And, I thought, how come they don't teach each other and separate each other, because they're all making money out of each other, and because of the opposition to each other.

When their religious time was finished, we were all there, Jews, Christians, Muslims, and the rest, all playing together, in a way, forget about what the guy said in there. We're all, we're all friends, we ate from each other. (2:54) And it was very funny, because the Jewish boys, the Muslim guy, the Christians were... all the boys were getting invited to each other's house. It was a birthday, it was going playing football. And in these families, religion had no meaning. Mehran was there, it doesn't matter what his background was, in what Jewish, Yusuf guy come, Joseph is there, the mother doesn't look, if it's just a friend of my son, they come, they play and they go. And I saw how easily with the love of our lives, children, we forget about religions. So religion doesn't exist, it's us who allows us to abuse us.

Q: Yes, I remember also in my youth, we had friends, colleagues of my father who were Jews, because we were going to their house and the other one was Armenian, Christian, which were neighbors, and there was no difference, nothing, nothing at the time. And I wanted to say also, I noticed in dangerous places, for example, here, people are, who are in the coast and fishing, and in the sea which is dangerous in the North, they are more religious, they have their own prayers for the fishermen to come. Maybe it's the misery of Man who brings it to needing some other force to protect.

K- Fear, fear of death, fear of loss. Yeah, and if they can use that fear to your (their) benefit, you are done. You know, we lived on the coast of Italy, for some times. (2:56) And I lived in a village, literally on the coastline. Ten meters, I was in the sea. And in

these villages, one small village had three, four, five churches. Little, little towns, right across the coastline. And I explained it to Knowledge Seekers, because if you remember, those of you who were with us at that time, when we were in the Desenzano, every Tuesday, the teaching was done by the lake, ?? the Garda. We... it wasn't in the structure we set out. We always had lunch together, we set out, 10, 15, 20 of us, we Knowledge Seekers came from all over the world to join us in that Tuesdays.

And, this small villages had so many churches. And I explained to Knowledge Seekers, you see, the guy before he goes out, goes and gives something to the church, because he's a fear of dying. He comes back, he gives something from his fishing to the church. And then, while he's away, his wife goes and gives something to the church, and he comes back alive. And then when the sea takes him, for the rest of their life, they pay to the church to keep his Soul alive. So, it's a bank, the guy doesn't need to do anything, just build a fake church and the rest will come in. People pay you for it, doesn't need to be a religion. And they built 3, 4, 5, 6 churches, very good ones, in their village, because each one believed in, "I set up a church, you pay me." And they have nothing to do with each other. And now they don't have the priests. The business is so good, that they sell these buildings to the Africans. (2:58) And the Africans collect money to find a priest to go to Italy, or to Belgium, and then take a seat, because it's a good company. Money making, out of fear of people now, is become a business. They sell it to the Africans, and I've seen how many of you are Christian, going to churches in Germany, Austria, in Belgium, in France, you have black priests. It's a company, they sold. You take certain part of income, the rest comes to us. Religion doesn't exist, it's just a business nowadays. Doesn't show, doesn't pay any taxes, and it's not accountable to no one. It's a good way. I wish they allow the same thing to all the companies, to run their churches. I tell you, would have been, everything would have been profitable. Nobody would go bankrupt.

Q: Thank you very much, sir, for your time, for your knowledge and your patience. God bless you.

K- Thank you very much. Shall we call it a day? We've been here long enough. Thank you very much.

R: Yes, sure Mr. Keshe.

K- I hope you enjoy yourself. I would like to say my best wishes, and the most luckiest and prosperous New Year to our Chinese community. I hope this year will be prosperous for all of you in the nation, and those of you who are Chinese. And we hope to see you each other next week, next time. And join us for the day of lovers on the 14th of Saturday. It's a special session. (3:00) And see if we can make your lovers go to love more in living and existing. Thank you very much and please listen to what we requested. If you are any of those specialties, fall within our limit. And you've been waiting to be with the Foundation, now we are ready to move on, and take people of that caliber on. See you next week, and hopefully we'll have some more to learn from each other next time.

R: ... (3:02) From the Universal Council, I should say... it's an invitation, and just let me share that here. It says, "We the Universal Council invite the Keshe and Universal Family, present at the Earth, to Unifying at the Soul level every time, every day, at 9pm CET to give from our field strengths to enlighten the Souls of world leaders, to negotiate and sign the World Peace Treaty, pledging their nations to everlasting peace on Earth and throughout the Universe."

629 KSW – February 12th, 2026

End
