

630th Knowledge Seekers Workshop February 19, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:21)

K- Thank you very much. Good morning, good day to you, as usual wherever and whenever you listen to this series of knowledge from Keshe Foundation Spaceship Institute. As usual, we welcome you back. And we are here to share the Knowledge of Creation.

As we understood, due to our knowledge and understanding more of the structure of the Creation we realized that we are part of the soup, not part of single system. And in that process we found out and we have seen that, as we said last time, as we have no intermediary, when we stand on a beach and absorb the rays of the Sun, shines on us, we feel the warmth, it touches our emotion, it touches our Soul. (:22) So, on the dimension (D) of the Soul of the Man (STM), the STM is the object, or the entity which receive the light from the Creator, not the physicality (P) of the Man. And as we said, the STM in interaction with the Soul of the Physicality (STP) of the Man, in the condition of his environment, gives manifestation to physicality of the Man. So, what we understand, if the Soul of the Creator (STC) shines or interacts with the STM, so what environment is the STM and the STC that this creates part of that entity?

In a way, which cell, in the structure, the embodiment of the Creator, do we create with our Soul? And, if you think of it, we have a recycling system in our body. Our blood cells recycles every 28 days, our skin does the same, part of our bones changes every 9 years. So, if we put the Totality of the STC on this planet, we are not any different, we just recycle every 88 years of the life of the Man and some of us are short term use at the time of birth, few seconds or few days, we go through that process. We have short term cells in the body of the Man. We have the short term, what we call confirmation of existence in the embodiment of the Creator. There is no difference, unless incapacity to understand the process of creation brings animosity and division and prejudices. (:24) If Man stays open in the Knowledge of the Creation, Man will find out that it's all the same.

In a way, what does the light, the energy, the field, the Ray of the Creator interacting with the STM, creates which cell in the embodiment of the Creator? Are we a cell in the kidney? Are we a cell in the heart? Are we a cell in the bigger structure? And isn't the Man habit of killing is that cancer that was moved in the system will damage the rest and it needs to be chemotherapy, or laser beamed, or radiation therapy, that it does not carry that habit across? In a way if we understand this, we come to understand a lot more. We have to open the dimension.

Because one of the biggest problems for Man to understand is emotion. The emotion of the Man. How the interaction of the STP and the STM creates that emotion as energy that when it gets in touch with the brain structure of the Man creates the physical reaction. You get the emotion of fear, transfers into your physicality because you're in a fight, you run. You get in another position, it's an emotion of joy and you cuddle and hug. So if that emotion is out of the interaction of the STM, and the STP of the Man, what emotion, how does the emotion between the Creator and the STM is absorbed, observed, and how do we look at it? (:26)

This is important, because what we need to understand, how does emotion work? What's the basis of emotion? And what gives us a reference point that it creates that condition? Reaction is different than emotion. Emotion is need to be created, that the physical reaction comes out of it, or a physical reaction is created that creates an emotion. But, then, this is the physical emotion. What happens between the Creator and the STM, that's the creation, the what we call, the essence of the emotion of the Man.

Have you ever thought, have you ever sat down and think, "How do I know a sentence is a structured, a condition is a structured, and then my body just talks it and does it?" Do you know what the next word is? Or, is the scenario played between the STP and the STM, through the dimension of the emotion, and then the thoughts and the words are created out of that? You give a, what we call, an information to someone. We have brought this to say, "Oh, it comes out from memory, we stored it." But what that memory in interaction with the condition, creates the emotion that you alter it, change it, to what you want to explain, what you're trying to do, or what you're trying to explain as an emotion. We have to understand where our thoughts come from. Man has no dimension, Man has no point of reference. (:28)

In a way, what will come to understand are thoughts. The information we gather is backed in our Soul, in its connection to the World of the Creation of the Creator. Where we just, in a way, put it in a sequence of what we want. We think we want to say something, but we need the emotion of it to create a condition to go to a reference point in the STM, to get a backup for it in the dimension of the STP for us to utter that emotion as a touch, as a look, as a word, as a sound, as emotion of dimension of fields. Because, there is something that we, most of us know, we never considered. They tell us, "We have five senses." In fact, we have many more senses. We sense without anything the impression of a person. We sense our children, thousands of miles away, their joys and their happiness and their pain. Where is the sixth sense? We deny it, because that is in the dimension of Soul. It's the dimension of the fields, interaction with the Soul of, interaction in conjunction as the intermediary with the STC field, allows us to feel it. We have denied a lot of things in our lives, but the most important thing for us, to become the traveler of this Universe, we have to understand how the emotion is created.

First of all, emotion and dimension of physical body of the Man, or a dimension between the STP and the STM. (:30) And then emotion between the STC and the STM. That in reference point, it allows us in interaction with other Souls, create the same. If we don't understand this, we will not be able to transmute. We have given you every dimension,

most of you have tried everything, but you don't understand part of the structure, and this is how we come to understand the reason of the Creator, interaction with the STM fields, in corresponding with each other, in conjunction with the Soul of the mother or the father, allows understanding the position that you as a child remember, oh, my father, what he told me, is now I have to go in the memory of my physicality, create the emotion of it, for it to be called back. This is how we call our memories, through emotion. Every memory we have, the key to it is an emotion, pain, happiness, joy, something we needed, we suffered for it, we gain it from a joy.

So, if we understand all this together, we will understand, we have to understand the Magnetic (M) field, to feel the strength of the emotion. How it's created, and how that emotion creates reaction. Be it in the dimension of the STM, be it in the dimension of the STP of the Man, be it in the dimension of the... us being a cell in the body of the Creator, and us being in the cell condition of our own body. What this means, what, how we feel between the STP and the STM, in interaction with the Soul of the cell, in a given position of the structure of the brain of the Man creates reaction on that cell in a bunch of structure of Totality. (:32) You have a fear, that fear comes to you throwing your hand trying to get rid of the bee. That's the fear, which is translated with the information of the sign, the sound, what we had in the memory, what the bee can do, that we create that.

So, for us to transmute, which is the backbone of all the teaching, we have to understand how emotion is created. What is the field strength of the emotion? How emotion translates from one to another? Every emotion has Gravitational and Magnetic field pattern and structure, and nothing else. Most of you today, and couple of you who've been told in advance, are subject to this test today. The systems are on. We are testing you with a very high, powerful emotion, in the dimension of the Soul, and not the dimension of the physicality. How do you feel? We perceive, we present, we structure emotion in the dimension of what we receive and what we give. And we have the capability to change the two, very rapidly. We want to receive. We bring our level of the fields, magnetic fields, to lower level, in the dimension of Carbon 14 (C14), that we absorb the energy, the field contraction, interaction with the STC in dimension of the Soul. And we immediately transmit in the STP and we react.

But, what happens when we are not in charge of the physical body and we call it, we are in the stream and we dream? How does that emotion creates the condition? (:34) Why do we see in the dream, we cuddle, we kiss, we fight and everything else, and we wake up and it's not there? It creates the emotion to us and then we act on it. For Knowledge Seekers (KS) to become the traveler of the Universe (U) is not how you perceive emotion in the physical body. Man has to understand the process of creation of emotion in the dimension of the physicality of the Man, or in the dimension of the STM. And then the two, how they interact, what is the common denominator?

The only common denominator in the emotion of the physicality of the Man's Soul, and the STP of the Man, is the magnetic field of the Creator. You have the common line. It's what you add to it, of which strength, lower or higher, and whatever, that is the, in essence, in the dimension of the STP, of the Creation of the Creator, in the dimension of

the Soul, or in the dimension of physicality. In the physical dimension of the magnetic field of this planet, we have two legs, two arms, and everything else, we need the lung, we need two eyes, we need ear, that we cover five of the senses. But, we have a sixth sense, we call it, we always denied it, it's the dimension of the field. It's like in the world of science, they do everything, but they deny the magnetic fields. The sixth sense is the factor that brings all your four, five, six, seven senses together. It's the creator of your emotion, and it's the connector of you to the STC. (:36)

If Man, one day, fully understand this, Man can transmute anywhere in the Universe, because he creates that emotion, and go back to the teaching of the past. The emotion of the STP, and the emotion of the STM, is where you interchange when you transfer your physicality into the dimension of energy and transfer and transport, and then when you bring the STP out to interact in the dimension of environment, then the environment decides how you look. In this environment you want to manifest yourself in the ocean, you have to be a fish like thing. But, sorry, you are in the sea, but in another planet, there is no oxygen for you. In there is acidic, so you take the shape, construction, structure to survive, to understand the both emotions, entity, the way life is in that position.

Many of you have done this, but you don't understand it, because it was 'monkey see, monkey does.' Look at the processes, look at how you produce Gans's. We gave you a different environment. See how condition, how does a Gans which you produce, at 5%, 10%, 15%, 20% salt, interacts. Then you understand, even you call it all Gans of CO₂, it's not the same. I use 20% which gives you the dimension of pressure for this condition. I do that for another condition. You look at the texture of the Amino Acid (AA) on the CO₂ of 5%, 10%, 20%, 50%. (:38) That's all you do. You create different gravitational (G) Inertia condition in the water. If you understand this, and you understand the interaction of the STC with the STM, gives the dimension of the Universe to Man to travel. Where the interaction of the STM with the STP of the Man, gives the dimension of environment he is in. This is why we can't match the two, this is why Man calls it a dream, because in reality he cannot flip flop anywhere and see what he likes. He needs a car, he needs a fuel, he needs everything else, he needs food to have the energy.

Where through the dimension of the Soul of what we call, Creator interaction with the STM, you have access to knowledge of the Universe. In the body of the Man you go to school, you have to learn alphabet and different languages. In the dimension of interaction of the STM with the STC, you have access to all the Knowledge of the Creator. Now you understand. The only way you can access into that is the dimension of the two emotions. What is the frequency of the emotion of physicality? What is the information and dimension of the Soul of the Creator? And how the two emotions creates the same dimension in the body of the Man, as it ?? does in the embodiment of the Creator?

Now you understand why the Creator fell in love with Mitra, because for the first time he felt the dimension of the love, unconditional giving. This is where even the emotion of the STP of the Mitra, touched the emotion of STC in interaction with it, and matched, and led to the creation of what we call, the 'Love of Creator.' (:40) We have to understand

this if we want to become the passengers of the Space, in true way. Otherwise, you can do exactly what NASA did, send Man to the Moon 50 years ago, and say, "We lost all the movies, we don't know how we did it." That's what NASA tells us today. There is no record, all the films about how Man landed on the Moon in 2,000 (?? 1960s) was disappeared (in 2009), and we don't know where we lost it. There is no such a thing in the memory, in the emotion of the Creator, with the STM. Because, as you say, it's become the knowledge of the Universe.

We talk about the love of what we call, in different languages, different lovers. And that, in the Universe, is known as a love of the Creator of the Mitra. Where He felt, the first time, the love, through the interaction of the emotion of the physicality, and the emotion of the Soul of Mitra with the Creator. In a way, when the two match, the Universe is your oyster. And it's the job of the Man to find that dimension, and it's the job of the Man to know how to transmute. And it comes only through detachment. I'm not attached to this planet, I'm not attached to this physical body, but I use it to give pleasure to the others. I use it to bring comfort to the others. I use it to give for the planet I live in to be a peaceful place, and in interaction with it, I find a matching peace with its Creator. And that's when the two emotion of peace come together, Man gets access to the Universal dimension. (:42) I made Man in the image of Myself, because I gave the same emotion as me, to my Creator.

But then the question comes, do we need Prophets to create this emotion? Do we need Messengers? Or the message is us, what message we send from our STP to our Soul, to match for the interaction with the STC? As Knowledge Seekers (KS) it is your job to find the strength of the emotion of yourself and nobody else. And nobody to be criticized. You don't understand it. It's done this way. It's done in every dimension and strength as there are stars in the Unicos. There is no single path, there is no single way. It's for everyone to understand how he creates the physical emotion, how he creates the interaction of the emotion of physicality, that with interaction with the STC, with his Soul, gives him the dimension, access to Universe, the Unicos and the rest of it.

Mankind needs to understand this process. And all comes without fail, through the combination of the fields of the wave of the Creator, and the fields of the Creator, and the waves of the answer, the gravity of the feedback of the waves of, the rays of collection of the interaction of the fields of the Universe. In a way we split to gain more, (:44) and in gaining more we become Gravitational towards the matter, where the dimension of the Creator stays in the dimension of Magnetical or weaker. It gives, it's there to give, to be attracted by, and in that process, as a strength in the Gravitational field of the Creator. "I give enough to you that in receiving you collect and give back to me that I can give more." For you Knowledge Seekers, it's important to understand this phenomenon. Understand it, not just talk about it. And once you understand it, you'll be enlightened to the process of the transmutation. It's not ticket to buy, it's not a condition you can put yourself, force yourself into. It is the enlightenment understanding the true Love of the Creator. Unconditionally.

There is a big difference, and this is what has come for those who deviated Man, who pushed Man to the boundary of abuse. When they say, "The strength of the love comes from suffering." Creator never suffered, He created the joy of living. Those who confirm and they say, "The more you suffer, the more you appreciate." Are those who try to put Man away furthest possible from the Creator. And understanding the emotion of the Creator with the emotion of the STM, and dimension of the STP. There has never been no suffering. And those who created suffering for Man, have pushed Man further from the Truth. And if you understand this, as Knowledge Seekers, you come to understand one simple principle. How does your Creator love? And, if you understand that love, how does the STM creates? (:46) Then, if you understand that, then you understand how even the speech, the reaction, the thought of the Man are created.

Stand still, as I said before, and think, "How does this word comes from me? Where does the thought come to me, that I speak it, and it's there? The next sentence. I don't know what the end of the conversation is going to be. I don't know what the end of the joke, but I know I want to get there." And my emotion, in interaction with my physicality, make the sentences and it gets you to that point. It's the same with the Creator. The interaction, the language between the STM and the STC is no difference. It's just, it's not verbal, it's dimension, field, interaction, strength, and the wave, emotion of the Totality.

Try to understand, that your existence on this planet, is according to the confirmation of the light of the Sun. What gives, that you are made of. This is your dimension of physicality. It's the same, what shines from the Creator on the Soul of you, that allows for you to be created, to be manifested, in the dimension of the fields, in the World of the Creation. If you understand this process, then you understand the language, you can speak the word of the Creator, because, is the emotion, without the word, without the voice. When you hug your child, the emotion you give to it, when you hug your lover, when you give your emotion to it, there is no word. (:48) You squeeze, and that squeezes back, and the tear comes from both eyes. There is no word. It's the transformation of field, the waves of interaction and what hits the dimension of physicality of the brain of the Man manifests itself in the dimension of physicality of the tear, hug, kisses and everything else. And this is how we hug and kiss our Creator, once we understand what he's given to us, in the dimension of the access to Universe, and we have denied ourselves for the pure dimension of physicality.

I made Man in the image of Myself, even at the level of emotion, and not just the physicality confirmation of existence. Try to understand what creates in you emotion, and what emotion field strength is. It's not that that makes me tear. You're not an actor on the stage that they tell you, "Now you have to cry and make something that the tear comes and it looks real." You cannot fool your Creator. And if you understand this, then you understand you cannot cry, unless you embrace the beauty of the Creation, to the fields that you receive from His beauty.

We are teachers. As I said to one of the religious leaders, in a message very recently, in the past few days, Messengers, Prophets, they were all illiterates, had no knowledge. And they made things and they tried to get, become a teacher, when they had no Knowledge

of the Creation. This time we have full Knowledge of the Creation. We are not Messengers but the teachers, (:50) to teach you how to get to, like trying to solve a problem, we show you the way, the formula and the process. It's you who have to sit the exam for yourself and nobody else. This is the job of Universal Teachers. We are spiritual for ourselves, we are not the Prophets for the others. But, we teach the essence of the Knowledge of the Creation. It's for you as the students to understand. You like to translate in dimension of physicality, or you want to translate it back in dimension of the energy, STC. Where you interact with ?? that dimension, where in the dimension of physicality, physicality is restricting you from doing.

In a way, if you think of it, the dimension of the emotion of the Creator always interacts with the dimension of the STP of the Man, one way or another, because the reaction it creates, then it touches the STC too. This is what was understood by the Creator when He fell in love with Mitra. The process of the Creation that I gave unconditionally, and for the first time I received back unconditionally, and what I received is more powerful in breaking down the love, which I gave in every dimension. You are lucky when you come across the Daughters of Mitra, because they carry much more power than Mitra. Their love will cover the whole of created, where the love of Mitra was just for the Creator. The time for you to understand is the essence of the emotion, the field strength of the emotion. And then, understand the field strength composition, which is a common denominator between the STM, the STC, and the STP of the Man. (:52) And then the emotion becomes one, and Man can transmute.

We can create the dimension of the field of the Universe, that even the STP becomes at the strength of the STM. Then you can imagine what shall be. Mankind has become a slave to his limitation of physicality and joy and suffering. And if mankind can move on and just take the joy, as there is no suffering in the life of the Creation, then Man will understand when is the time for it to move on to become another part in the process of Creation. Man makes his own cancer, and Man can remedy his own cancer through emotion, if he understands the cause of the emotion to create the condition of the attraction and interaction, and creation of the point, place, time, strength.

Understand the teaching of today. I opened a very fundamental teaching for you to understand, and we'll teach it over the next few weeks and months. You learned about the Soul, deep enough. Now you have understand, have to understand how the emotion of the Soul works, that you understand how the emotion of the Man is created, that in bringing the two, you become the, what we call, the traveler of the Universe, as you have a common denominator, and the knowledge of the Universe is open to you. The way every cell of you has a knowledge of what you gain in physicality, don't touch the fire, it burns, the foot doesn't go in the fire, the finger doesn't go in the fire, the body goes, because every part knows that burns. (:54) Then, another dimension of emotion, it says, you see a lover, throw yourself at it, because it gives you so much back that you'll be immersed in the love of the creation, and the knowledge is in. The same is with the Knowledge of the Creator and the STM.

One day, gradually as we teach you, you find out during the course of teaching, you are transmuting without knowing. Some of the Knowledge Seekers have reached this point, but they have the fear of confirming to themselves. Transmutation is not packing and going and coming somewhere else. It's understanding, seeing the beauty of the Creator, through the field strength of His Creation. I've made Man in the image of Myself, in every dimension, even emotion and manifestation.

We go for a break, and we come back. We try to answer some of your questions, if you understood the teaching of today. You have access through the dimension of the Soul to the library of the Unicos, and you have chosen to love yourself in an 'illiterate land,' library of the Man. Rick, take us for a break and we come back.

>> BREAK >> 630 KSW February 19th ... (1:04).

K- I think you received some things on your other link, link to new products.

R: Yes, I've got them.

K- We can put those up. These are what was old and new, and is partially, is available to reseller section, and if the Knowledge Seekers would like to access to it, it will be put on later on, for the Knowledge Seekers.

R: Let me get those open.

K- Until you find them. We're still looking for scientists, who can join Keshe Foundation, for this one aspects of the Space Technology, Agriculture, Medicine, Environment, Materials. We putting our, what we call, our request out to international companies, to join us in this endeavor. If you are qualified in any shape, or you sent us a request a couple of years ago, or a few months ago, whatever, re-post it back to info@keshe.foundation. We don't want Knowledge Seekers who just do something for a hobby or whatever. We want scientific data. If you have something, you developed something, has to be scientific and has to be for us something which adds to our work in the Space Technology (T). (1:06)

We are looking for doctors, medical doctors, specialized in certain categories. If you are alternative doctor, especially in what we call herbal medicines, we are looking for that kind of doctors. If you are from China, it's always better for us. If you are in herbal medicine from India or Central Asia, we still would like to look into it. We are looking for people who have a Space background, military defense Space background, who know about the flights and the rest. We'd like to bring you into research and development of the Keshe Foundation. We are not talking about interaction or start of the work in months, it's immediate. If we see you fit into our program, we call you in, we make you an offer, and it's for you to join the system. If you are in communication satellite system, we are looking for. If you are specialized in AI and computer programming, especially if you are from Iran, we are looking for that kind of expertise. We are looking for people who can plan and are in marketing, international marketing of products. We would like to hear from you, and see how we can collaborate with the Foundation. If you are running a company in countries with multi outlets, and you have a good base on the Internet, we would like to speak to you on the process of the products which are coming in.

The Keshe Foundation website, as you'll see today, will be wiped out very soon. That's why we put the products to be cleared out. A new structure, international structure, will come into operation, (1:08) which will be delivered in the whole process. We are ready to move, if we see the right appropriate people. You'll be engaged in the laboratories directly, within a few days. If you can move that rapid, we are prepared to accept you. You can go to our Human Resources site, we go through every... Just because you're a Knowledge Seeker, does not give you any priority. And, as we know a lot of you, if you have a structure in the background, we are prepared to look into it, and call, and bring you on the full time employment, on the contracts of 12 months to 36 months renewable, immediately.

I see you're putting a lot of pictures in the background. These are all the, what we call, the ?? precious. They are the new bunch which has been brought out, by the, what we call, product production.

R: I've put the links into the chat here, chats, for the Cosmic Spring 2026 links, and these are some of the new products, yes. So, how is the Gans incorporated into these products Mr. Keshe?

K- It's inside, it's embedded inside them. These are something we've done for 2-3 years now plus. You had the Stars and we had the Sun and whatever. It's the same process, now it's additional. It's done by a lady for us for past years, (1:10) and this is what she's put out for us to do. As you know, these are very limited numbers, these ??. And the same is with the Gans's, now we have put the special Gans packages. Because, a lot of people want to the package, they don't know what to choose from, in the, what we call, the Resin Products. So, that package has been put back on, you can choose a spring pack, or whatever they put on. Make it much easier for people who buy, to buy the packages.

Q: ... A question about the Spring Keshe Gans handmade resin coasters, which we see here... It's said to be used in pairs. Does the price, is that for one item only, or for the two piece set?

K- I think it's a piece...

R: It does mention here, you can ask in the comment section of the product for customization regarding colors for all options or colors and mixing shapes for the two piece sets. So, it seems to indicate that they're two piece sets.

K- Yeah, because it's as one piece, because for example, you put one on the table, you put under the cup and you put the other one on top of the cup. So, it's the way you set up these coasters, or you put two cups on it. But primarily, if you remember, we do these water jugs with Gans material in, is replacing that, because each cup is slightly, is, each plate (coaster) is slightly different. So, it charges up very much the same. (1:12)

In a very near future, in limited number of countries, we will introduce certain products which cannot be supplied to other countries due to taxation and legal terms, where the products will be on a nationwide availability. Not only in the Keshe Foundation store, but in retailers, the way we do now in Europe with the pharmacies, the Keshe products. This is a larger scale operation. We'll explain to you, it could be from food, to water, to other factors (?? products). So, you can actually buy Keshe Foundation product, it's a plasma product, very soon, in supermarkets. As a product, for a specific capacity. Also to be done, and then we inform you, we are, we are just about... in the, we are in the first stages of production. When the first products are ready to be marketed, we announce in given countries, where you actually can purchase these products. It's nation by nation, and then it'll come to the process of, how you get access in different nations to the same, or we set up structures in those countries.

If you remember, we started this process in a very different way, some years ago in a couple of countries, but now Keshe Foundation has concentrated all its efforts in one nation, one country, and all the research and development is pouring into it, and this will be one of them. You can buy literally from plant pots, to fish, to what they call, grocery, developed, marketed on the mass market, under the banner of Keshe Foundation Plasma Technology. (1:14) And it'll be the same for introduction of new, what we call, application in the health, that it'll be coming out, and we're talking in a different scale, as part of the process. But, let's just wait for about, maybe a couple of months, and as the process is completing we will bring you into it, and it'll be only for that nation, or certain nations, which it can be, what we call, shipped.

Any other question?

Q: ... Does the Spring Keshe Gans handmade resin ornaments, specifically, the flat egg with motifs, set of three, could be worn as a gem on a gold, silver or cotton chain around your neck?

K- We advise you strongly not to put anything like this on your skin. These are ornament for environment. We advise you strongly to not use them for holding on your body or whatever, or as a necklace. When it comes (later), we can produce, release such a thing.

R: And to be clear, it mentions the resin used for the figurines is non-toxic, and food safe, and odorless, but you're talking about the field effects of the Gans's on the skin.

K- Field effects of the Gans's, yes. It's taken a lot of research to find this material, as far as we know, only one company in the world produces these kind of resins. And, this, we pay more for it, and just to be safe, and it can be used as a food product, in a way, we can use it later on cups and all sorts of materials. (1:16)

Q: ... Do these ornaments have to be used in pairs or do they have the same effect as the resin coasters?

K- Yes, in a way yes. You can hang them in a drink, you can hang them in a liquid that is in the house. It can be done, but you have to make sure they stay safe. The deliverer brought this out, that it's food safe, it's certified as a food safe product.

R: Okay, so they wouldn't have to be used in pairs, I suppose, but maybe it's better that way?

K- Yep, it was originally done for Christmas trees, but interested in different ways, and that's why it's been expanded this way, for the rabbits or whatever, for the Easter. It's very nice, you know, the tradition, I don't know if you have it in the US. I think you have the same, but in Europe, families hide eggs around the garden and whatever, and children go and find it. This is that kind of structure, for the eggs we put out, was for that kind of thing. Because children find it, they keep it, and then it becomes part of ornament, and it affects the environment of the house, environment of the bedroom they live in.

R: Would it be okay to keep in a pocket for example?

K- Yeah, no problem with it. It's just that don't put it there, don't put anything with the Gans's, long term touch with the skin.

Q: ... (1:18) Does the One Nation Network (ONN) Unit, could it be plugged into the same outlet next to a Keshe Foundation MaGrav Power Universal System, or a MaGrav Power Plasma Generator, for better and faster results?

K- It's all the same. They are different capability and they do different things. They don't interfere with each other as such. They connect with each other, but they don't interfere, because they are set in a totally different way. It's like a different frequency band, different structure.

R: Does the concept of better and faster results, is that part of that configuration somehow, or how do we approach that?

K- In the future, the plan is that all the systems lock to each other. There is a way to do it. And the present systems are not set up that way with it. There is a method which needs to follow all the systems. All our systems coming up, all the 10,000 ONNs going out, are connected to each other irrespective of the Internet. That we connected them, because the design of the plasma antenna is that way. You can't get somebody else coming and connecting into it, it's impossibilities. The 10,000 Units only connect to each other. You cannot bring another... If we set up, let's say, another 10,000, we have to find a tool to work with each other. Because that 10,000 will be set up in another dimension, in another structure. (1:20) By the way, speaking about the ONN's, Hopefully the first ONN's should go out, if we get it all done, before end of the month, and then, once, as I said, the first 25, I think they've sorted some of the teething problem, then the first 25 goes out, we give it a month till, what we call, hopefully, the 21st of March, to see any teething problems, and then this first cycle of 100's, will start going every 100 at a time. Yep.

Q: ... Can the Keshe Plasma fields absorption Butterfly be used on the One Nation Network Unit? Stick on its side panel or hang on the wall?

K- No, do not do it, do not do it, no.

R: Can we put the Butterfly on the walls in the room where the Unit is placed?

K- Do not connect it to the One Nation systems. One Nation systems are special way they are developing the antenna.

R: So it's okay if it's on the walls in the room, but not on the Unit? Is that the idea?

K- Yes, don't put it on it directly in touch with.

Let me explain to you something, bring it to one and one. As I said, we are looking for scientists and the people who are in different fields. We try to set up an environment, all the Knowledge Seekers live with their families in one campus. (1:22) We are building a structure that Knowledge Seekers can transfer knowledge from agriculture into medicine, into Space and everything else. In the next few months, those of you who join us, or people who come from outside, because now we start taking scientists, or people from outside, and now the Keshe Foundation, we're training them, we teach them with the experiments, or exercise, or whatever, the knowledge of the Foundation, you'll be living, or majority of you, in one campus, in one structure, and where we employ anyone we take the whole family. It's not that I'm going to this place on my own. We are responsible for your children, your family, accommodation, and making sure you work with a peace of mind. To my belief, it's no use bringing pain to people, just because others are going to have a good time. I mean, they're trying to keep their family.

So, if you try to understand the process is, a new Space Center structure is getting set up. That you all, all the people who work in this technology, literally work in one environment, live and in a way, we try to make it a bigger family. If you are from

different nationality, we've been trying to get your favorite food, a supermarket which matches your culture. That everything is our responsibility, your job is to create systems which creates peace for humanity. This structure is not something we dream to do, it's already structured. Number of Knowledge Seekers who've been around Knowledge Seekers structure already are working within this structure. It's not the future, it is the present. We do not disclose where the system is taking place. (1:24) We are working with governments and knowledge of the, what we call, governments, what we are doing.

So, when you will hear more and more about this, is that, it's not something that's going to happen in the future. This Space Center, this structure of bringing all the technology, is already structured. There are scientists who are working in this. Experiments, development, commercialization is already in progress. It's not something we are going to do in the future. So, if you have any expertise, if you know anybody in the fields we are looking for, let us know, and then our team will get in touch. And through nondisclosures, you'll never know they join us, you'll never know the research development. But, the future Space Technology Center has already been set up. Small factories, large scale development, trials, is already on the way. It's not something we are going ... But to our structure, we keep everything very secret, very controlled, that we don't hit what we had in the past. It's not in any country you think it could be. We have well protected our structure. And we are looking for specialists who can literally walk off the street into the lab and work with other scientists for Space development, Defense technology, Space research, in all aspects of the Keshe Foundation, material you are expert in it. We want to talk with you. You are doctor specializing in certain medicine, you are agriculturist, you are specialist in desert, in fisheries you can join us as a full time ?? staff of the KF international organization.

Any other news? Any other questions? (1:26)

Q: ... In the case of a newborn, where despite all applied methods, there is no breast milk available for 2 or 3 days, is there a plasma based solution that can compensate, for the lack of Colostrums intake from the mother?

K- I don't understand.

R: Well, the mother has no breast milk available for the newborn, so is there a plasma based solution that can compensate for that?

K- I think you have to understand the reason. It's not just.. Is it psychological? Is it physical? This is a very common thing for the family. There is weeks mothers don't produce milk and suddenly there is a flood of it. Or the brain has a trigger mechanism, that has to be done by the doctors. You cannot just jump in and say yes.

R: So, there will be no specific combination of Amino Acids and so on that can be used?

K- No, no, no. In the coming time, could be a possibility of a solution where you can put a child in the solution, that he absorbs all the energy back. We're testing this in a very

special way, and in the future it will be available, maybe in 6 months, 12 months time. (1:28) Because, this needs a special development, and is that you can absorb energy, what you need from the environment. But you have to organize it. At the moment we are testing some new structures with this. But you should be able to transfer into the mothers in the Space camp don't have breasts. In a way to feed, because there is no food they get that way. So we create environment. We're bringing some of the top specialists for this job.

We have a gentleman from Pakistan who specialized in what we call fetus development. He is a reputable specialist in this. He is joining us in the research center and one of his job is that if we can carry the fetus without the womb, to survive within the structure of the plasma. He's doing some research at the moment. It's the final years of his PhD, final weeks of his PhD, and he transfers back to the Keshe Foundation for this research. And as I asked him to look at that we can create a womb of the mother in the space time. We put the children in incubator, and we look after them from 28 weeks, 22 weeks nowadays, and that's why. What about if we create the environment of the... and he understands. And, if you come to the research center, you most probably see him. And, he will join us in the completion of the cycle.

Yes, it is possible, you don't have to worry if the mother has the right milk. The child needs to receive the right nourishment. This process is not just the feeding, it's supporting the Soul and the energy of the emotion. (1:30) Because we don't look at it, just feeding the children. You look at the European, American children, or most of the children, even in China, whatever, which are bottle fed, because mother goes to work, grandma is there, and the bottle. You see their structure is not normal. And when you see the children who are breast fed, brought up in breast milk, of normal environment are totally different. And, is it because of the not love of the mother, children become so pumped up, as we call it, or it's the lack of emotion, the touch, the love? Can we carry the emotion? This is part of what we taught today. Can we carry the emotion of the mother within the structure, that a child will receive the love and the care, and we create the emotion of love in that incubator.

We are not growing calf and cows and sheep and the chickens in the laboratories. It's a human, this emotion will come later on. And these are the things, I have spoken in depth with the scientists, and what we will do, we create emotion feeding. But at the moment, no. Maybe in the next 12 months, 2 years, we'll introduce these kind of incubators, for tests. If the child doesn't feel hungry and it's in the environment, which is nothing attached to it, but it's available for it to take, and it creates a healthy child, doesn't matter if the child is 24 months old, 10 weeks old or 2 years old. It's the way we will feed the future, but we start with the... with actually the first trials, we start with the animals.

R: What about the idea of creating blood with... sort of artificial blood with the Gans products or some other plasmatic .. ? (1:32)

K- This is already in line for production but in a specific way.

R: It is the way that creates Man that has no aggression, in other words, peaceful blood? And maybe, maybe we could have transfusions for those that need to that peacefulness?

K- The blood we produced was tested by FDA. It's not something random. Was tested by FDA officers. And the way we produce it, that people we showed them, they think they can do it. But the way we produce it, it's been tested by FDA. And they tell us the way we produce the blood matches to every blood, and can help a lot of conditions, including the emotion and Energy. This test was stopped for other reasons, nothing to do with our test, other aspects of the interaction. But we know and in... actually this was on the table with our team past couple of days, and that part of our production in the factory, is production of what we call, Universal blood. But, do we need to give the blood, or can we transfer the energy of the blood across? And we have some tests which are getting done now, hundreds of liters of it, for some experiments.

Q: ... (1:34) Mr. Keshe, my question for this workshop is related to my question from last week on the Hawkins scale of consciousness, potentially being a pathway to enlightenment. In your profoundly deep answer to my question, you talked about love sitting very further apart in regards to, for example, the blood of the Americans and their love to kill, and the blood of the romantic Italian life. And you made the example of the difference being 527 Hertz for the Italian and 530 Hertz for the American. I'm trying to understand how love is wired within the blood of the Man and the deeper meaning behind this. If you could elaborate more on that.

K- The creation on this planet has two dimensions, the blood and the neuro system. And the structure is, one is static and one is dynamic. It's like in generators, you have a rotor and you have coils around it. Blood is a dynamic, neuro system is a static. The blood, the Iron (Fe) in the blood, in interaction with the Zinc (Zn) in the body, creates this condition of what we call love. (1:36) It's very, very carried, it's because it connects with, this is why we get excited in the heartbeat and the blood flow goes up when we see somebody we love. And we react to it that way.

So, we have to look at cycle of the creation on this planet, has such a characteristics. We cannot deny it. And then it comes how these two interact according to the combination of the field they produce, and the field they receive as a wave. As I said many times, you walk down the... you go into a football match, 100,000 people, you don't feel anything, you walk outside the stadium, one person walking across the road, takes your heart and you're gone. You dream, you do everything to get to it. Because, the combination of the field strength within the structure of the blood, which is dynamic, with the Zinc combination of the neuro system, which is static, has certain frequency. And this is how we fall in love. And then this is how we create a field, which looks ?? for matching, we live all life to fall in love, and suddenly out of nowhere it kicks, it's there. How many of you looked for love all your life, and then touches? Takes your breath, you don't know what you want to do, because now, is it you, or matches the other side?

And again, as I said many times, our neuro system is constant, is same mixture. (1:38) Our blood which is Iron content, is slave to the food we eat, so the combination changes

continuously. And then, this is why you need to renew to put the emotion in the condition of the love, with confirmation of love. And we look for it. And some people make a huge mistake between the physical love and the emotional love. They go for, we've seen, you're married with two children, women still look outside, for somebody to love them, even everything is in the house, the same way the men. Because, the composition in the body changes, and it needs confirmation. This is the biggest mistake we make in our living lives. We don't confirm to our partner, "I love you." Because, that word, if it's sincere, it's a synchronizer between the blood and the neuro system. That's it. How simple it is, it's the emotion which connects the two together. And this is what we don't do.

How many of you have walked every morning, every day, to tell to your partner, "I love you"? I do, with a sincerity, because I know it's a key. It's the combination of... It's just when you sit with someone and says, "I don't know what love is, it's yours, not mine." Then you understand. You are in love, not me. But, if you fell in love with a dog, with a person, And, by touch, by word, you confirm your love, you bring that ?? change to the circulation of the blood with the neuro system. You renew it, because maximum three years, the balance in the blood, because of the food we eat, (1:40) the behavior we create, changes that. The coil is constant, the dynamic part is the problem. It's like, you know, when you run a motor, you have a dynamic magnet in the middle, rotating. It's the bearing of that which breaks, it's the, what you call it, the shaft which breaks down or the magnet gets loose. It's that way exactly with the body of the Man.

We take energy from food, that energy affects our blood, and that blood affects in interaction with our solid state of our neuro system, affects our emotion and affects what we create love with. You take the neuro system out of Man, there is no love. You take the blood out, there is no love. Change the composition, it's ?? different, that's why the Creator fell in love. Because of Mitra, in understanding the two. You look at your neuro system, and you look at your blood system. If you look, most of the time, majority of the time, in the structure of the two, your blood coming in, going through the system, blood going back, has got the neuro system in the middle. Neuro system has no return because it's solid. Blood has, and it goes through the system. And combination of the Iron and Zinc, in a specific combination, creates that, and then you have the Copper, which brings the muscle reaction, and how we react physically.

Then you understand, how, when you talk about love, creation of love, how we fall in love, we are with somebody for decades, it's obligation is there, or, and then we meet something, somewhere, a dog, a cat another person, and we feel we've fallen in love with, and we give everything in life for. That's a true love. (1:42) And how we value it, how we connect it. You know, when you are young, you fall in love, as we say in English, as much as you change your trousers. That's a very English say. You know, they say, "The guy falls in love, as much as he changes trousers." Why? Because we are young, we try different food, we defy different energy, we come different community, our blood creates a different dynamic. And that dynamic, in conjunction with our neuro system, creates new emotion of love.

When we become older, we settle down, that circulation, and then, you live with someone, the food is the same, it becomes a grinding, rotating, the same thing. The only thing is left to bring it, not a spice, but, in a way, tuning the emotion, between the love, which is the blood circulation, and the neuro system is the emotion. How many of you get up, wake up, middle of the night you wake up, can you kiss your partner and say, "I love you"? When's the last time you done that? And then you see their... Even they are asleep, they look at the reaction the next day. The next confirmation of love, if it's not done truly everyday ... they scientifically, every three years they say, "You'll find out partner's ?? worn ." They think, they stay together because of the children. They stay together because of ?? convenience, but inside the heart is somebody else's. They yearn to be loved, somebody tell you, "I love you."

You're in a partnership, you live with a woman or a man or a dog or even a plant, tell them, "I love them," once a day, at least few times a week. If it's not misguided, it brings a beautiful time. And some people abuse it, because it's his, who is in love, not me. (1:44) How many times you have a woman and a man told you, "I don't know what love is, it's you who feels it." And you feel abandoned, and you walk away, look for another dimension. Somebody who will truly loves you. And then you find, and then you lose it, because you forget, there is a rule, the emotion has to be leading. How many of you, you wake up at night, going to the toilet, you cannot go to sleep, you go back to bed, you just sleep in. What about just cuddling your partner, saying, "I love you"? She just... that brings that motor blood, with the static energy of physical touch, and then you understand the emotion. What's the frequency of it, it changes everyone.

Any other question?

R: ... I was wondering Mr. Keshe, if you had any results from the Valentine's Day transmission session?

K- Hmmmm... In Valentine's Day session we had an amazing thing, which is good for you to see. And we see it, because we did it last Thursday without you lot knowing, but... I have to go in the... special ?? phone because I specially kept it, I can explain it. If you remember, in the... (1:46) Let me see, I have to find the picture I took specially for this. ...

<< Mr. Keshe try to find the picture of the graph. >>

R: ... And while you're doing that, maybe I can just mention a little bit about my experience, which was, it was difficult. I had a hard time with of all the works, all the transmutation and transmission sessions. This one was the most difficult by far, and because I couldn't find the grounding of that love in my life. And I found that I started to focus on the absence of love, rather than love. And that became a problem. And I'm not sure if others had that kind of experience or not, or if they all had bliss and love and peace in their experience. So, for me I was more... it was disturbing in many ways. I'm still dealing with it. I mean it's all okay, but it's... it was an experience. Yeah, my

experience may be the opposite of what most people had. I don't have no idea. (1:48) So we don't hear you yet Mr. Keshe.

K- Yes, we had different people with different experiences in this session, in the last session. And, amazing enough, the people we saw, what you're explaining is very clear in the image I put. We see clear line, if you remember, I told you there is a point in the brain of the Man, which gives us indication, the break between the physical love and the Soul, love coming from the Soul, and we see the separation, there is a gap, where it reflects how we do outside, if you go to teach from last week. We see this in the graph. I'm trying to put the graph up, but somehow I can't, because you're still in it, and I cannot take over.

...

<< Mr. Keshe tries to share the graph on the screen. >>

K- ... Because, we see the line, the separation between exactly two parts. And it sits on the line of the Soul and physicality. We never had this. And it comes up in every session, since we tested this new combination. (1:50) And, you see it, that... It's a short intervals, but it repeats, even today's graph, because we are running a... we are monitoring in the background, we see this process. We are trying to separate where the Soul sits and the other one comes up.

<< Mr. Keshe tries to share the graph on the screen. >> (1:52)

K- Okay, now if you open it up, you see where the line is? Red line in the circle? You see the two, the love of the Soul and the STP very clearly, exactly what we thought, will separate. The line here, if you look, the horizontal line is the central line. So, it is amazing and this is repeating itself in different ways, in all the tests we've been doing in the background. Last week, the week before, because we run these tests, it confirms how comes a point where the right side is the physical side, the left side is the Soul side. And, you see even the shape of. If I can expand, I don't know I can expand, I might, I cannot expand yours... If you see this disturbance here, and the shape of it, this is what I want you to look at. You see, this has a step in, which means, comes from a higher order from the Soul, steps in, and then it becomes... but you see a clear, clear physical separation here, this point, (1:54) which confirms what we said, the STP, the love from the physical condition, from love from the Soul mate, comes and separates somewhere in the brain. This is physically exactly what we taught, and we received confirmation of it in these tests. And you see very clearly, these are up pictures from the recording of something, two or three hours. We see this pattern, appears, disappears. And this is why people feel the love on the physical side, but they don't feel the love in the emotional side. When the two match, is when the fire starts. When the two emotions receive, because on the left side, which is the physical side, you receive the same fields from the partner, from the one you love. Where the right side comes from the emotion of the Soul of the same.

It'll be very hard, as I said in teachings before, you tell somebody, "I love you" and we put the system and says, "Oh, it's a liar." And then we can see it, it's there. It's not there. It's the same, this is not technology which we have advanced it more. If you remember, a

version of this in 2013, 14 was done with a guy who came to kill me. I sat him in the machine and I said, "He's there to kill." Because, the same way, we can see the pattern of the emotion, you cannot touch, you cannot lie with emotions. It's just a different presentation in a more solid way than the others.

At the moment you go to... they say, if you match blood, that you can get married. (1:56) You have to have a blood certificate in some of the countries, that you know, you match. Very soon, it'll be emotional comparison. Yes, but how long would it be there, because the blood is involved in it, and would the blood change? And, does the emotion satisfies part of me, which the other side doesn't do?

It's very... If you look at the bigger picture, the picture you're sharing, if you look at a bigger picture you don't see anything on the top, as you usually see in this area, or this area, or anywhere else. It's directed, the setup was set directly for the emotion of love, and it's in front of you. And that's why, as you said, there were some problems, because your life is committed to one person, and that is not there, that's why you have difficulty with it. This is one of the problems of the social operation in the new world of the Internet, and of freedom in the West. You live with someone, but you don't know if they actually love you, or your love for them is the same as what you expect it to be.

Nowadays we do. I was watching, as you know, the Chinese in past few days have put the new robots, which breaks all the barrier, all the things we had about the robots. (1:58) The robots, they actually live, walk, jump, dance, exactly like men do, humans do. The only thing they are missing is a true emotion. And part of our new research center will concentrate on giving these robots emotion. How? What happen if we give? Because, I know how to do it. There is a structure, we can give these, into a AI system, emotion. It's, it's complicated, but it's knowledge we have. So, what happen if you give the emotion to these robots? And, as many of you know, this robot situation, industrial robots, now in China, is the only country we have a dark factories. There are factories producing cars that there is no light at all, because it's all robots, they don't need light. And in China, known as the dark factories, there is hundreds of them now. They produce cars without a single person on the floor, only the mechanics, if they fail. And there is no emotion to it.

But now we see on the other side of the industry, they are creating men, women, who become partners, but no emotion, just verbal. You can add a lot of emotion to it and somebody, as I said, I don't know in the past, somebody asked AI, "When would it be that the robots would take over the Man and the Man becomes a slave to it?" And they think by summer of 2045, I mean, once it's come out, maybe summer of 2030, 35 will have robots see us as useless things to be around, with the emotion they create, see human race as an accessory. And we are very much on that point. (2:00)

We developed this, and we do these tests for control systems of the flights. It's not that we see how your emotion change, how would the emotion changes when we trust hundreds of thousands of Souls or bodies, or individuals in the hand of the pilot's emotion. Because we have records of it. Pilots, Egyptian pilots, wanted to end his life. So

whatever he brought, ?? hundreds of people to death. The history is there, true or not, we look at, there is a possibility, because there are recorded . ?? Possibilities.

And these tests are part of them. And this shows love, very clearly, because we tuned it for love, and we targeted the Soul in that, and it's there. The pictures at the moment coming from our research is done in a different way. I get it live, we have it, I'm looking at it even now. We try to see the presentation of the love and understanding of it, more or less, it targets the same. But, we are looking at giving and taking in love. Here was just giving. And we are watching you as Knowledge Seekers, some of you are connected, and if you sit in the panel you see our systems are running, we are testing. We have separated with the new system the Soul side and the physical side totally separate, but on the energy side and the physical side. So, the graph has moved totally to the right, but separated, hardly, horizontally, vertically. We wanted to see if there is possible, (2:02) that we can change the structure of the Soul, we can fall in love with different things at different levels, and you Knowledge Seekers without knowing it, you are confirming it. It's very, very interesting. We have to, we are a Space Technology, we are putting Man in Space, we have to test everything. We don't understand all of it, but the data is there for... When the AI takes over it, we explain this, when the other Knowledge Seekers, Space people come in to say, "This is the behavior, we want to test this."

R: Didn't you say, "love will be the most important emotion in Space"?

K- Of course, if you can't give, you cannot receive, and the giving comes from love. When you love someone, you give unconditionally. It's not, as they say, there is a say, we say, "It's not the American Court (of law)." You know, in America, if a dog is drowning and you go and help him to take it out, the owner says, "You broke my fence, you have to pay for it." It doesn't matter you saved my dog. Doesn't work that way. We have to understand the emotion and the reason for the emotion, we can control it. Keshe technology is not just the Gans's you made and things, we are getting deeper and deeper, most probably in the next 2 to 5 years, we're coming up with the major Space operations. You have to consider everything.

One of the tests was done in a prison, using the Keshe technology, how we affect the emotion of the prisoners. (2:04) They all became peaceful. If you remember, we tested with a hundred children orphanage during the Corona, how they all came out of Pampers together, and increasingly number, and they started learning, which wasn't there. The orphanage was there for decades. You can change collectively the emotion. And all we did was, we more or less blew energy into the environment of the organization. This is why I earlier said, we want to see how we can feed a child in an incubator. How can we change the embryo inside the mother's womb, that it is peaceful. Can we transfer all the knowledge inside the womb before it comes out and chooses a language? If they don't destroy us within the next few months, the humanity is in a very good time.

Any other question?

Q: Respected Professor Keshe, first he's got, it's actually a series of questions, so I'll just read through and you can select how you would like to answer. "If we assume that every event has a purpose, and that in some way, the individual needs, allows and even prefers what they experience. Why do so many people manifest illness, scarcity or personal conflict in their lives? (2:06) It is rare to see the same person simultaneously stable in health, relationships and material life. From the perspective of Plasma Science, do these imbalances indicate that the individual still requires such states to sustain their internal field? Do they function as mechanisms of field adjustment, or as signs that intention and emotion are not yet coherent with what the person wishes to live? And if fields precede physical manifestation, could it be that the present is not producing the future, but rather revealing a future state already established in the individual's field.

K- Can we go for a break and come back for half an hour? (joke)

R: Yeah, there's a lot to unpack.

K- As I explained about love, that are in dynamic ?? motion, everything else is in the same process. We have a reference point created at the point of birth, and that is our nervous system. Even our cells changes, our cells stays .. constant. Is the energy which we get from the environment, the food, the individuals, emotion, because we receive their feeling, affects our process in the blood. That's why blood is so important. And on this other hand, because of that, an Earth magnetic field being connected to the same material, (2:08) we create attachment and we value everything compared to the physicality of the time and place. This is one of the reasons we have different values in different nations, different cultures, different parts of the world. And we export it, because this is how our embryos was done. We go as a, let's say, Turkish mentality into Germany, and Germany has a different food background, different circulation of the emotion and blood, and we have a conflict. We can't mix, because it's embedded in our, not the DNA, but the blood circulation. The food we eat creates that condition.

And we see that this is a problem, or this is the difference we see between nationalities, because of the food intake, we create different emotions. There's nothing as important of what we take in as food, because 80% of which we get as an environmental energy, which comes partially from the ?? initial environment you're in, is all Cosmic Rays. So we receive, there is no prejudice in what we receive. But the prejudice comes in what we receive as a food, which allows which ray from Cosmic Ray we take in, and then it matches in. You eat certain food, you change towards the Amino Acid which that food creates in your body, which body needs to fight to maintain life. How much energy it needs, it dictates how much hunger you have and how you behave. (2:10)

You are used to a different kind of Amino Acid, as a red meat, fish, vegetables, lentils, minerals, which they are Amino Acid, and you'll see how you'll see the behavior changes. Have you ever lived with a vegetarian, true vegetarian, and a true meat eater? Husband and wife? Oh, oh, oh, oh, oh, oh. It's dynamic, the only thing keeps them together, maybe children and their love. Maybe. I live with a couple like this, and it took me a long time to understand where the difference is. Very pleasant, very, very calm. The other one is a

bullet, uncontrollable. And the more she does, the more she thinks is right, the humbler the vegetarian became. It's structure, how we take, how it affects our emotion, how we react.

Shall we call it a day?

R: Okay, sure.

K- We are nearly two hours and something in that ???. We have to understand the process of emotion. There's a lot of teaching in the next few weeks, will be in that process, because we have to understand how we match the emotion of the Creator to the emotion of the Man, to the emotion of the STM, STP of the Man, that using the common denominator of the energy of the STC, what we call, the common denominator of the Universal field, allows us to move in different field strength. And there is a game to it, there is a way to do it. (2:12) Today's test gave us a lot of information in the background, which we analyzed over weeks, and then we see how it is and what it is. And, till we don't get to this data, the way we want, we test on you in the next 2 or 3 weeks, the March session of the 3 sessions which we put out, might be moved further back to April or May, until we are, I'm happy, what I'm looking for is there, that we can translate into a system.

It's very important, that how we change the emotion of the Man, into the direction of the balance that you can transmute from one to another, and we build systems that way, that we give a common denominator, will create a field difference of the position and you can shift into it.

Thank you very much for today, and I hope we learned a little bit more about ourselves. Thank you very much Rick, and see you next week.

R: ... (2:14) A message from Universal Council... It says, "We, the Universal Council, invite the Keshe and Universal Family present at the Earth to unifying at the Soul level every time, every day, at 9 PM, Central European Time. To give from our field strengths to enlighten the Souls of world leaders to negotiate and sign the World Peace Treaty, pledging their nations to everlasting peace on Earth and throughout the Universe."
