

# **New Fields to Transmute - Isotopes of Carbon - Shape Shift - Fingerprint Earth - Bombing Iran - Iran Announces Plasma Spaceship - Gamma - Human Species - H to C14 Introduction to 627 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

Today's workshop is heavily loaded with understanding how the MG fields of the Universe (U) create everything. Mr. Keshe summarized that the Universal Line of Connection is the Hydrogen (H) and it comes from the Creator, which is like the M fields, and we confirm our existence through the Carbon 14 (C14), which is like the return G field. The H being the lowest level interacts with the plasma of the body and creates the Soul of the Man (STM), or what we call the Energy side of ourselves. Then the interaction of our C14 with the atmospheric M field conditions of the planet, together with the Inertia of the planet creates the physicality (P) of the Man. The reason we have two arms and legs and look the way we do is because the Rays of the essence of Creation interact with the STM in the conditions of the womb of the Mother, plus the conditions of the planet with its Inertia, and the Inertia of the Solar System (SS). The point of all this terminology is for us as humans to finally understand the truth about our own creation and how we came to be human bodies. If the MG fields would have been different in our process we would have ended up as something else in Creation other than human. And as we learn how to transmute ourselves we can choose to change our physical manifestation into another entity like a stone, plant, another human, our lover, or whatever we want. And when we do manifest as another entity we'll continue to keep our same Soul and emotion. To be able to do all this what seems like magic, we have to be able to create and control our emotions. Recently, he explained that we have already mastered this when we were a child, when we learned to create different emotions to get what we wanted, like temper tantrums and the rest of it. But obviously to us, we were and are not aware of possessing this power. Therefore, we have the KF Plasma Technology helping us.

For the past few months there has not been any Monthly Flight sessions because there was no need for them as they had reached the limit of their knowledge at that time. But over these months the knowledge has again made great advances and remember we had contact with 3I - Atlas and received higher M fields from them together with the work on the One Nation Network (ONN) system. In these next three Monthly Flight sessions Mr. Keshe said he discovered the mistakes Knowledge Seekers (KS) are having with the transmutation and he has added new technology (T) not known by Mankind to the systems. This will be the first time not only Man, but the whole U will experience this new T. He calls it, 'receiving transmission' and it will open the emotions of the Man to be able to transmute easier. What does he mean by transmission? Perhaps it has something to do with transmitting higher Universal M fields, or Cosmic Rays (CR) down into the Earth's dimension (D). We can use these fields to transmute and become a plant, animal,

or anything we want. Later, he said we could also use these fields for self-development and to make changes in our life, as they will touch our emotions in a different way.

In the matter state when we talk about things that have different properties, then we talk about isotopes which have different numbers of neutrons. But in the plasma things become different based on their field strength and that is affected by M and G field interactions. I understood him to mean that the boundary of the plasma and how it interacts with the environment dictates its physical manifestation and gives things their shape, color, and the rest of it. But the interesting thing is that this is preset by the mind. And this is why a burger appears to be a burger all over the world. There is a genetic fingerprint for the planet of how things should appear. The Human race also has a fingerprint of how things should operate. He implied that we all agree to it. So I am assuming this is at the level of the Soul. But more clarification is needed. The example given is that a baby born to a Chinese couple will always come out Chinese no matter where they are on the planet or what field forces are influencing them. That means of course, if they don't themselves introduce another factor through their emotion or behavior. It seems that the STM has the power to override any other M field influence.

The laws of the Soul seem to go even further. He said, the structure of the STM has preset conditions set by the atmospheric conditions of the planet, SS, and Galaxy. The DNA is only for the physical manifestation on this planet, whereas as the RNA is at the Universal field level. In other words, the Universal level can override all the fields below it at lower levels. What DNA do we carry when we are traveling outside the Galaxy in the U? The way I understand is that we'll keep the fingerprint of Earth, but we'll use different isotopes, or does he mean M field strengths to manifest P at whatever destination we arrive in. As DNA is from Earth, it would just be an influence on the fields of manifestation.

The Amino Acid (AA) is the building block of the body of the Man which we know as Mr. COHN. There was extensive teaching on this years ago. Today he wants us to know that the H in the AA is not just an energy source, but it is our direct link to the Soul of the Creator (STC). The H when it is traveling through the U, it is Universal in its field strength. When it enters a planet like Earth it starts interacting with the local field forces and this changes it and creates a unique fingerprint for Earth. How does it change the field strength of H? Is it done by controlling the distance between the electron and proton? Remember that H doesn't have a neutron, it's unstable with only a proton and electron, and as a plasma it makes it the building block plasma to amalgamate together to form other plasmas, which we call elements.

One of the first things we get introduced to when come to KF and Plasma Science is Nano coating. When we put the Nano coated Cu into the saltwater then the magic of Gans appears. The way they draw it, is that the matter Cu gets transformed into individual black balls that are in the plasma state and they create a plasma environment around themselves. In a way, they are like a Black Hole (BH) but with the understanding Mr. Keshe has given us about BH, in that they give and take energy. But since we see them as black they predominately receive energy. What we call Nano coating and make

so easily with caustic, the Scientists call Graphene and can only make it using radioactive materials. And they wanted to keep it that way. So the Belgium's called Mr. Keshe a terrorist, but they weren't able to get rid of him. There is a relationship to Carbon (C) and Nano coating not just because they are black, but also because of their energy state. I don't have enough science background to clarify this. In this teaching Mr. Keshe talks a lot about the Carbon isotopes, which actually are the field strengths of the Energy of Carbon. But in matter state we refer to elements with different properties as isotopes, and he uses that word to talk about the plasma. In this case he stated that Nano coating or Graphene confirms the C14. From past teachings we know that C14 is the Universal Energy and when it manifests P, in this case the AA (COHN) then on the matter side it converts to C12, and on the plasma side C14. It has this dual nature in the body. So C14 is the Nano coating of the U, and C24 is the Nano coating of the Unicos. He then talked about a lot of different Carbon isotopes which we'll go over briefly, but he didn't give much details.

The C12 is the matter state of planet Earth and then C14 is at the Universal Energy level, and is the Line of Communication for the U. So if we transmute in the U we'll use C14. Again this is not matter state, but the Energy and the field strength of Carbon. The C16 is used to interact with the Galaxy, C18 with our U, and C24 with the Unicos. That's pretty much it. The C14 is directly connected to every cell in our body, so this is important for transmutation and medical application. It's my understanding that when the C14 Energy is converted from Universal Energy to matter state on this planet it leaves a fingerprint as the matter state isotope of C14, which they use to Carbon Date things. The C14 and C24 are containers of plasma in some way and the energies below them become manifestation in matter state. So for example, the C14 would be like the skull and the Carbons below that become the organs, cells and everything else in the body. And C24 is the container of the Unicos and the energies below it become the Universes, Galaxies and all the physical manifestation of life. They also create waves and frequencies but we don't have a way to measure them yet. The C14 travels inside the atmosphere of the C24 it's like in a soup of energies. When a U is formed the H in that U will have a unique space gap between its proton and electron, and this dictates the condition of all the matter state in that U including the galaxies, planets and all the matter state. We need to have this understanding when we transmute to other Universes and want to manifest ourselves according to those different conditions. Again this is all controlled through the emotions.

There was a lot said about tomorrow's Flight Session. One of the reasons KS are having trouble transmuting is that the skull has become a barrier for the Soul to leave the P of the body. There is more to it than just the Ca in the bone, because we were told before that the STM is a higher order M field and cannot be stopped by the P. But of course, the M fields of the Fe in the blood, and the functions of the glands are containing the Soul. There was a hint that the C14 through the skull is the container of the P. Is it a matter of just needing higher field strength to compensate for our inability to control our emotions? He said, by using CR fields and a new T unknown to Man he was going to increase the strength through transmission and open up the emotion to make it easier for us to transmute. It's like increasing the intensity of a light to see more. The main point is the emotion of the Soul has to match the emotion of the P to transmute and by increasing the

field strength in the environment adds more strength to the Soul. This is the same process we are doing for the whole planet by adding the ONN Units around the world, plus other KF systems like the Gans's, MaGravs and the others. It works like the satellite communication system. They want to put 50,000 new satellites into orbit, but with KF Technology we can turn every one of the 9 billion STM into a satellite including the ones that have already left the planet. So this makes for a powerful network of Souls that share the Energy of the plasma. And that's why the STM has to be purified of killing before creating such a vast network of fields. Or maybe as we start expanding and increasing the field strength the Soul will automatically become more and more elevated.

There was a long discussion with a lot of secret details of what is currently happening in our world right now without us knowing or being part of the discussion. The World Press is denying that 500 bombers had attacked Iran in the past week or so. According to Mr. Keshe, the Americans sent bombers from their bases in Azerbaijan, the Europeans from Jordan, and together with the Israelis sent 500 bombers to Iran trying to overthrow the current government. But somehow the Iranians knew to change their GPS satellites suddenly to the Chinese system, and the result was that they could not find their target and had to call it off. International observers in the Iran saw the bombers but didn't understand why they could not unload. This act most probably saved many tens of thousands of civilian lives and countless damage. I think it was George Harrison of the Beatles who said, these Elite Rulers are psychopathic killers. I think he was referring to the 'Committee of 300,' which interestingly the Intelligence communities call them the 'Olympian Council,' after the Greek gods who were thought to rule the Universe. And then we have the Israelis paying their agents in Iran \$50 to stab and \$70 to kill people randomly on the street to incite a revolution. So far all their attempts have failed. A man is claiming he has proof that the Israelis owe him \$900K. They are also bringing chemical weapons in and the plan is to blame it on the Iranian government. It has gone beyond the limits of humanity and our Souls must unite and demand a change in the world structure.

None of these things are happening spontaneously like the Press presents it. We KS know the background of what is happening through the guidance of Mr. Keshe who knows what goes on in these secret meetings through his Soul, and his own intelligence gathering as he is responsible to bring the change to humanity. He informs us so that we use our Soul to bring the change through our emotion. He told us in the past that Chinese have stopped most of the silver in the international markets that are needed for the Western industries and weapons manufacturing. We see the price of silver soaring but they don't tell us the real reason. Now Mr. Keshe said, JP Morgan pre-sold billions of ounces of silver that they cannot cover. If they go bankrupt it will damage the American economy, so the government will takeover the company if they cannot pay within 45 days. All these things are putting pressure to start war as a diversion from the real cause of the problems. And we know that in the background we have the Vatican, Rothschild's, Zionists and others that are ruling and profiting from war, chaos, and confusion.

Out of all of this has came a glimmer of hope through the Iranian government. A few months ago on October 15th a member of Parliament went on national television and

announced that Iran has developed and achieved space flight through plasma. They said, it was given as a gift from outside Iran but developed by Iranian scientists. Though they did not name the KF, it was obvious that they are using KF Plasma Technology that was taught to them by Mr. Keshe in 2008. It is not surprising that Google AI denies this report. This was the first time the Iranian government publicly announced the Plasma Technology. The Iranian Parliament signed a contract with Mr. Keshe that the T would only be used for peaceful application, but they are allowed to defend their nation with it. If the Iranians use this so called, 'secret weapon' we'll have to wait and see how the World Press will cover it up. Nevertheless, we are moving closer to public disclosure of the Plasma Technology and the change.

A KS asked how it was determined that the STM releases the energy equivalent to 18 Hiroshima Bombs. He thought it might be from the energy released when H transforms into C14. Mr. Keshe answered that there are a lot of other calculations included that we don't know about. But there is one thing our scientists discovered from their research, and that is, there is a massive surge in Gamma radiation within the structure of the cells at the time of death. Mr. Keshe says, this higher level energy from the lower level physical cells gets transferred to the Soul. This is because the body is actually in the Gans plasma state and not matter state nor is it electricity. There is also CR fields that get transferred but these cannot be measured yet by Man. The cells actually have a lot of CR energy in them. This means that the essence of matter, which we have always said is energy, actually gets physically transferred at death. It is not some mystical idea, rather it's scientific and later we'll be able to measure it. Coincidentally, 98% of the radiation people in Hiroshima were exposed to was Gamma.

There is more detailed information that needs deep introspection. Having a vacuum condition is very important when working with plasma. Again this means having a single M field strength or a narrow bandwidth. The radiation released is at 11.5 cm in radius and that's why the reactors were built at 23 cm diameter for the H to release its energy to the center of the reactor within a vacuum and by the Inertia. This energy plus the Alpha radiation from the smoke detectors is the energy Mr. Keshe used for flight in Iran. Back to the body at death. It explodes energetically like a Black Hole, but there is a central G field force in the Energy of the STM, so that it gathers all the energy back together again and then it travels to its destination in the U. What's interesting is that he said, the body is aware of transferring its energy to the Soul and since the STM is inside the brain the brain cells transfer Gamma radiation to it. Gamma radiation can be used to transmute and doesn't the Soul transmute at death?

Some weeks ago we talked about the different species of Man and the current one is the Homo Sapiens that spread out from Central Africa. We also were questioning whether humans developed through independent species rather than one evolutionary flow. Mr. Keshe seemed to be confirming that today. First of all he said, that the Homo Sapiens were only one of the species of humans. The correct conditions for humans to be spontaneously created out of the fields of this planet exist in other parts of the world like South America, Central Asia, and Central North America, and New Zealand. And that there have been independent species that were more advanced than the Man of today is.

There was one that lived 130,000 years ago and understood the knowledge of the U, but they became extinct. The scientists have found evidence of it, but they don't understand it as it doesn't fit with their preconceived ideas. There was another species that live 500,00 years ago and knew more about the Energy side of life. I wonder if they were related to what people understand as the civilization of Atlantis? One of the AI's is predicting our species will annihilate itself by 2045 and be replaced by machines who will be less destructive than humans. However, through the KF Plasma Technology and the spreading of the ONN Units across the world plus the CR fields and all the other technologies, we are increasing a mixture of the M fields to elevate the whole planet. It is through this higher knowledge Mr. Keshe and the Messengers are bringing, and us implementing it that we will save ourselves from destruction.

The answer to the question of whether C was just the stacking up of H was hard to unravel. What I understood is that we receive the H as the Love of God, everything is created from it. As we receive H it passes through us and we use it to create our existence, and as we interact with it we convert it into C12 and C14 in our AA, which create the cells of our body. That's what he meant by, the C is a reflection of the H in that we change the M aspect of H into the G aspect of C. And we receive unconditionally the H, and give it back conditionally as different Carbon isotopes. Then he went into the interaction of the M and G fields with the Inertia to create the Mass and further the Weight. The Inertia of the planet is needed to absorb the fields for it to become a plasma, or a Mass. This is also the creation of the Soul, further interaction creates the Weight. But this is the same as creating matter. Somewhere in this dimension the STP creates its own Mass and dimension. This is the point when the body is a separate plasma with its own gravity. The body itself has its own gravity, even though as a unit it is under the gravity of the Earth. That's why a bullet outside the body weighs 10 grams and inside the body only 1 or 2 grams. How could we test this, unless the Soul cells of the body have a way to measure weight? The analogy used was that the human body only weighs one tenth its weight on the Moon, as it does on Earth. It means the body as a plasma goes inside the Moon as a plasma and the interaction of the M and G fields with the Inertia are different and they create a different weight. This is because each of the plasmas are in a vacuum.

There is much more science to be understood here. He said our body doesn't lift itself as a 100 kilograms, that weight is only in relation to Earth. The body's Mass is always constant to itself, because it is a plasma within a vacuum. And if we introduce Nano materials into our body we disturb and change the balance of the M and G fields inside it. If we put a Nano material in the toe it will affect the fields in the brain. Bill Gates and those people understood this about putting Nano materials in the body. If Nano particles get in the blood they coagulate it and produce blood clots. The Nano materials create a separate condition of G fields, in a way, they become like a Black Hole absorbing and releasing energy, and this can change the DNA. Unfortunately, the matter state scientists are not wanting to enter this dimension of knowledge.

He clarified how the Carbons are formed. The Carbon amalgamates the fields of the H and through interaction it creates its own center which creates its own atmosphere. For example, if C14 is being formed it becomes a plasma of itself with a Soul in the center.

And just like the planet Earth it creates its own gravity within itself and the MG field interactions it has, dictates its size and everything else. It's possible he meant that the reason C is a communicator is because it has emotion, or works on that field strength.

The only fixed position in the whole of Creation is the Creator. He does not move. He is there to give. If you want to receive you have to open yourself within the 'Fields of My Love.' The Creator is a Ray, and Mitra is a converter of the Love of the Creator into Creation. The Children of Mitra do not even have the thought of war. They reflect the beauty of the Creator, which is giving. You may be shocked to learn that they will be the most selfish generation we will have ever known. But their selfishness is not to hold onto what is theirs. Rather it comes from an inner emotion of wanting to decide where and how to give the best to the Creator. The Creator gives unconditionally. But the Children of Mitra gives conditionally to satisfy the needs of the Creator. They give even by their presence and not through a physical need. Soon you'll understand.

### **Other Topics:**

One KS has been specifically chosen and they will test what happens when they change his fields and how it will affect the others;

Thanks for listening.
