

**Summary of Man's Development - Don't Need
Intermediaries or Fake Prophets - Frequency Scale -
Time to Mature - Inside Creator - Permanent
Enlightenment - Emotion
Introduction to 629 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

Today's teaching was a big push to get the Man to accept that he has grown in knowledge over these past thousands of years and it is the time for him to mature and understand that the higher Knowledge of Creation is within himself. In a way, Mr. Keshe summarized the evolution of human development of knowledge where we started out worshipping the fire and then went to other things like animals and with the start of agriculture came around to building statues and temples and started forming religions. Humans saw themselves as weak and they needed something bigger to believe in to feel safe. This culminated into believing in individuals, which became the Prophets of the major religions we have today. The religious development kept itself separate from science, which started around the 1500's in Europe. Of course, there was huge scientific discovers in China, India, Persia, and the Islamic world but that gets overlooked by the so called, Colonialist scholars.

In that way, Man started thinking about the physical structure of the Earth and how it rotated and then he looked up into the night sky and started understanding he was part of a bigger structure. He progressed from understanding that everything rotated around the Earth, which he considered to be the center, and as his knowledge increased he kept moving the center from the Earth to the Sun, to the center of the Galaxy, to the Universe (U) and eventually a Unicos. This is where we have reached in our development, but still Man does not know or accept that the Universes revolves around the Creator as the central Plasma, nor does he know how Creation takes place. Therefore, in today's teaching Mr. Keshe is showing us where we are in our evolution and what the next step is. For Knowledge Seekers (KS) studying Plasma Science as taught by KF we don't have this problem. But we are trying to bring elevation in the knowledge to humanity so that we can take the next step into becoming a part of the Universal Community and begin Space travel.

When he says, the limit of what we call our U is not based on what we physically see, but rather how we interpret what we see through the level of our knowledge. If knowledge is like a flashlight, then that how far our flashlight is shining out into space. And we just showed how our knowledge is evolving and changing. For example, when we look out over the Earth, the horizon line is only 17 miles wide. That's not even a speck in the dimension (D) of the U. And then the U itself has a horizon line, or what is visible to us, but we don't really know what that is yet. This is all in the limitations of the matter state. The important thing for us to realize is that the Creator is at the center of Creation and we

are directly receiving His light as H or the Fundamental Plasma. Obviously, we don't know it and that's why we got stuck with all these intermediaries called, Prophets and we are allowing them to abuse us because we don't understand this knowledge. In a way, it is not our fault as we were born into a particular belief such as atheism, materialism, Christianity, Buddhism or whatever. These beliefs and concepts in many cases were forced on us. If we wanted to have the love of the "tribe" then we had to accept them. For those of us who dared to question our beliefs out of the love to find the truth, we usually had to pay a heavy price emotionally. It's like in that old movie "Wizard of Oz" where Dorothy in her innocence peers behind the screen and discovers the so called Wizard, was an ordinary human like the rest of us, but had a little more knowledge. In the case of the Prophets they had access to a higher knowledge and may have gotten enlightened to some degree, but then their STP and P took over. Mr. Keshe said, the Universal Teachers are above the Prophets and they teach unconditionally and do not abuse the weaker Souls.

The idea that we don't need intermediaries to receive the fields of the Creator was hammered again and again throughout this workshop. We didn't need a Prophet to explain to us the intricate workings of the Solar System (SS). And do we have to pay someone to receive the rays of the Sun? Since now we have been taught and shown how we receive the fields of the Creator, even without us knowing it, then why do we need intermediaries to put themselves between us and what we have inside? Then he explained all the corruptions that we as humanity have allowed to be perpetrated against the Soul of the Man (STM) in the name of the God of different religions. We have the example of Moses who got the enlightenment, but then let his Soul of Physicality (STP) and physicality (P) takeover and he hid part of the Ten Commandments so he could commit his crimes. Even as a child one could easily understand that he committed genocide to steal the land he wanted from the others, and then blamed it on God. The strangest thing is that thousands of years later we still have these Fundamental Christians forcefully preaching that this is the absolute truth, but when questioned, they cannot explain the reason for it. Then they start to attack you for questioning it. Even a child with a pure heart can figure out that something is wrong.

Once I saw a video of a Jewish person asking their Rabbi why these Fundamentalist Christians are more zealous about believing the Old Testament than the Jews are. And he replied, let them, what do you care, we are benefiting from it. It's when you witness things like this that you realize in the background of the religions, they are fighting and lying to get more people to believe in their concepts, because then they get more money and power from it. Sometimes I have met people whom I could feel they had a deep spiritual awakening and they had been touched by the Truth. But you had to be careful not to talk about religion, because since childhood they were conditioned by their own religious concepts and they have not reached the point of questioning those. This is where we as KS have to have enough discernment to make the distinction between what is spiritual development, and what it means to blindly believe in religious concepts, or even scientific concepts. Because we can do the same thing with the KF Plasma Science. Of course, we have to start somewhere and it's okay to start at the physical level. But we should be aware that there is a difference and we can have the desire to want to receive the Emotion of Knowledge. Even looking at how Mr. Keshe started teaching us about the

plasma is a good example. For the first 5 years or so he never talked about the Soul. And when he started talking about the Soul many KS left. It didn't matter and it didn't make him stop, because these teachings may not be for this generation, unless we get an elevation of the Soul. The point is that humanity is beginning to mature and is ready to go beyond just believing in ideas, to actually experiencing the reality of the plasma and how it works. And that the time of being abused by intermediaries is over and we are ready to take responsibility for our minds and our emotions and open to the enlightenment. In the end, we'll find that the Truth has always been within ourselves we were just afraid to look.

The question about whether the STM originated from this planet or came from another part of the U was asked and left for us to think about. We now understand about transmutation and that the same process that happens with our Soul at death, when it separates from the P and goes to another place in the U where it matches with the field strength, could very well be how life on this planet started. The STM was living in P on another planet somewhere in the U and had gathered enough field strength so when it separated from its P, it ended up here. The same STM interacts with the different environmental MG fields, and Inertia and manifests as all the different varieties of life we have on this planet. The different species are not different Souls. They are copies of the same Soul manifesting a different field strength according to how it interacts with local fields. This is how we can change ourselves to a dog during transmutation if our Soul wants to. The Fundamental Plasma is like that Spiral Mr. Keshe always draws, it depends on what field strength we tap into it for manifestation in the physical D. That makes us even more intimately connected to every living thing on this planet. In a way, when we kill and destroy other life forms we are actually doing it to ourselves through the essence of our Internal Energy.

It makes one wonder, when he said, maybe Mitra and Zoroaster did not do their job correctly in teaching the Man the Truth. Maybe they were not at the level of Universal Teachers and did not have enough experience with M fields to handle the conditions of this planet. Or is it that Mankind needed this time to mature through experience? It seemed like he was saying that by going through the current suffering of human life, Man will receive the energies needed to elevate and that will spread to all the other creatures on the planet and they won't have to suffer this terrible cycle of killing as we have done. This is the work of KF to teach humanity the Knowledge of Creation. We had to be made ready to receive the higher fields. The religions and all the restrictions put on Mankind by its Rulers have made the 'branch' of humanity very crooked. It will take time to straighten it, and to understand that we are already connected to the Creator which is like the trunk of our Tree of Life. Even if they hang us for speaking the truth it will not change it.

The purpose of the KF teachings is for us to understand that we are not only connected to the whole of the U, but also to all of its knowledge. This knowledge is a kind of intuition we have inside us. For example, we know everything about this planet and SS, it's a knowledge we have inside us, but we have to learn at what frequency to tap into it. It's like when we put our whole heart into learning something and we keep pondering and yearning to discover it, and then suddenly it opens up to us. That's how we access it and

then we receive a kind of enlightenment about it through the strength of the fields. We can see this in new born babies in how they learn the language they are born into without having studied it. We do the same thing in our dreams. It seems that since dream is when we are living the Soul it doesn't use language, but translates the emotion of the experience to the STP. Each of the languages dreamtime has a slightly different emotion. For example, the emotion of Chinese is different than that of Hindus. The field strength of the STM is the same but it translates to P based on the MG fields and Inertia of the position on the planet. At one field strength we become Chinese and another Indian, and so forth. The Soul tunes into the field strength for the knowledge. This is how it will be when we travel the U, we'll tune into the strength of the position and receive the knowledge of the culture, language, and everything needed to live in that position.

This is what it means, "I made Man in the image of Myself." But it's not about the P, rather knowing that we possess the whole knowledge of Universe within ourselves. In the same way we have the knowledge we are also connected to everything. For example, when we bend over and touch our toe which is way over there on the other side of our body we know everything about our toe. That knowledge is already within us. Now imagine if our body was the U, then how many millions of light years away would our toe be, and yet we would still know everything about it? It's through the Soul of the Creator (STC) that we are connected to the rest of the Universe. Now that we understand this, do we need intermediaries and charlatans to come between us and this knowledge? Please understand that we are not trying to make you, not believe in religions, rather it is for you to understand, that in the same way that you don't need an outside connection to receive the warmth and beauty of the Sun, you don't need intermediaries between you and the love of your Creator. Just because we can't physically see something, does not mean it doesn't exist. They made us that way, so that they can abuse us. Now that time has come to an end.

The question about the Hawkins scale of consciousness puts fear at 100 Hz, love at 500 Hz, and enlightenment at 700 to 1,000 Hz. Mr. Keshe explained that it has to do with the density of the brain mass and that the survival emotions like fear, that make the P to move, are less dense and require less of a frequency to penetrate. But for enlightenment as it is more in the center of the brain closer to the Soul where it is more dense so it needs a higher frequency to penetrate. I understood that, the reason enlightenment is 700 to 1,000 Hz is because we have to understand many things and therefore need to have a spectrum of frequencies. If enlightenment is too narrow of a bandwidth, then we wouldn't understand very much. Generally, those whom we recognize as enlightened have a lot of knowledge, even though some of them didn't even physically study. It's because they have access to the Knowledge of Creation.

I understand why you need a higher frequency to penetrate a more dense object. But why is enlightenment more dense? Is it because it contains more knowledge and this requires more M field memory? It seems the brain converts the plasma into a physical emotion or feeling that then causes the body to react by movement or whatever. But we need a lot more knowledge to understand what's going on. He said, love is 500 Hz because it is partially physical and partially emotional. This is interesting because when I have felt a

deep love and connection for another being, I actually felt it as a physical sensation or pressure in the heart area. Whereas with physical love it's more of a superficial excitement with a lot of energy, but doesn't have much depth. And remember physical love changes every 5 years because that's how long it takes to replace all the cells in the heart. We don't yet have an instrument that can measure the plasma fields of the emotions. This is a very interesting teaching and requires more time to study it thoroughly.

When Universal Teachers come to help planets like Earth they can't just download everything into the Beings here. That would be like forcing the change on us and the U doesn't work that way. So first they have to learn the culture and how the Man functions, feels, and thinks about life, and all aspects of his life. That's why the Soul of the Creator that is currently manifesting as Mr. Keshe has been here for thousands of years. He had to learn all about how the human mind and emotions work. They tried to help by bringing in the Prophets, but it did not work and the Man chose to go the wrong way. Then a couple hundred years ago they brought in the science to advance Man in that area. Now after 20 years of teaching and preparing us he says, that we are ready to accept the changes that are about to happen in 2026.

Over the past couple hundred years Man has slowly advanced the matter state science through study and research. Currently there are almost 9 million scientists engaged in research worldwide. When the change comes those 9 million are going to switch over to plasma research to find all the M field strengths to create the things we want to have. The same way we researched matter state, we'll research the plasma. The plasma is not some magical solution to all our problems. It's the natural process of Creation and we have to learn to integrate it into the human way of life. But it might be that the Homo Sapiens may end and a new species begin that will start its life through the fields of the Soul instead of P. We have to wait and see how it will develop.

We have a big incentive to try to mature ourselves more. He said, he would like to take us inside the Soul of the Creator. What could that mean? At the moment, the highest experience the spiritual literature talks about is enlightenment, which they call great peace, being one with everything, and being liberated from existence. He says that if we mature to where we don't need intermediaries then he can take us inside the STC, and we'll see the mechanism of how our Soul and Creation work, and how we will be able to create life. Not only that, we'll be able to understand where Creation comes from. If he shows us before we are ready then we won't be able to understand what we are experiencing.

If the first emotion came about by accident, then does that mean the Creator existed before without emotion? Some of the scriptures of the East speak of the Void or Singularity that cannot be described in words, other than nothing happens. Maybe Mr. Keshe is referring to that state of Being. Without a Second there is no confirmation of Existence, then there is no love. As he described it, the radar wave travels through space but nothing happens until it interacts with something. That interaction is Creation and it sends back a signal to the Creator of its existence. Then the Creator feeds it with His love

and at the same time He confirms His own Existence. This is the Mitra. But did it all happen by accident?

It might be confusing for people who read Eastern spiritual books and are told about enlightenment as we defined it in the previous paragraph, and how Mr. Keshe answered the question about what enlightenment is. The dictionary defines it as the knowledge about and understanding of something. This is more in line with how he was speaking about it. Then he gave a nice analogy of a very long corridor that have light switches in each section. When we understand something it can be equated to turning the light switch on for that section. When we truly gain the knowledge of something and the emotion of that knowledge it is permanent for that particular section, or we could say, subject of knowledge. Permanent does not mean we gained all the knowledge for all time. As we continue our journey through Creation we'll keep turning on more and more light switches as we learn more and more new things. The Creator has all the knowledge for everything in His Creation. And our Soul is on its journey towards Him.

The question about permanent enlightenment comes from something else. When we have temporary experiences of deep peace that cannot be explained, they don't last and we go back to our normal consciousness. Therefore, the question about having permanent enlightenment comes from this and the disappointment of returning back to ones daily self. It is my understanding that through diligent practice of awareness, complete devotion to finding the Truth, unconditional giving to others, total surrender to the Creator, by the grace of the Guru, or by whatever other means one does reach a permanent understanding of who they are, or rather who they are not. And that knowledge guides one through life. It doesn't mean you cannot fall down, but you are aware that you have fallen down and you pick your self back up and continue on your path. That's what I think of as permanent enlightenment. Of course, there are High Beings like Mr. Keshe who permanently live in the Reality. That's a different level of existence. He has upgraded the knowledge for us to know that we have three Beings inside us the STM, STP, and P. It's the STP and P that create the problems and need to be elevated. If I remember correctly one time he did say that, that knowledge about ones real nature would be permanent. And with that enlightenment the gathering of new knowledge will continue for eternity.

Thanks for listening.
