

**America Destroys Plasma Research Center -
Punishment - All Creation Same Process - One Side Lit
- Ca Cell Center - Details of Game - War for Messiah -
Nuke Attack Stopped
Introduction to 634 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

We received very sad news today that the American Government purposely targeted and destroyed the non-Military Iran Space Research Center killing plasma scientists and students of Mr. Keshe. We observed 2 minutes of silence to commemorate those who needlessly lost their lives. This was a heinous act that was perpetrated by the leaders who are publicly known as crooks, murders, and pedophiles. Their intent is to block the Plasma Technology from advancing and spreading out of Iran and bringing peace to the world. But they cannot stop it. Instead they have stopped themselves and their nations from receiving the knowledge, and even if they steal it, they won't be able to understand it. Trump got fooled by the Rabbis of Jerusalem who said, he was the Promised One, and then they staged events to match what was written in the Old Testament. In Isaiah it was written the Promised One will be pierced in the ear, and they staged Trump getting shot in the ear. These evil acts will come to haunt the American people for years to come. Mr. Keshe said, "I am the Messiah." When you play with the Messiah, you get taught a lesson. I will punish your nation beyond your imagination. You destroyed what I built, I will destroy your name off the map of this planet. I deliver my promises. All contracts with American Scientists from NASA and other American organizations who were to join KF research has been cancelled. The Americans easily believe the 7 Jewish men who control about half of all the wealth in the world plus the Media and political sphere, because they think the stolen money and ability to ruthlessly kill others is more real than unconditional giving. Their culture sees love as weakness, and they try to take advantage to dominate. For over 30 years Mr. Keshe has freely taught humanity the Knowledge of Creation and demonstrated the Plasma technology (T) in Energy, Health, Agriculture, and last May the creation of gold from the fields of the Universe (U). This evil action by the Leaders will be responded to and explained in the coming time.

In the meantime, as was promised by Mr. Keshe, KF will teach the nations how to produce 100% enriched Uranium for Space development and they will have to sign a contract not to use it for weapons. And Third World nations will be given systems so they can produce as much gold as they like. This will change the world as we know it. And KF will be the Phoenix that rises out of the ashes of Iran and spread the Plasma Science and T throughout the world and bring everlasting peace.

Mr. Keshe told many historical details of how the Plasma Science started on Earth and especially the work in Iran. It's beautiful to hear how the Iranians gave so much respect to

Mr. Keshe and his Knowledge, that they especially built this Center designing the building for this purpose, and they understood what it means to the world and how it will bring change and peace. Unfortunately, Ayatollah Khamenei made the decision to keep it secret, and that's also one of the reasons why it has not been able to come out in public. This was the place that Mr. Keshe had to sit on the Space reactor to keep it from flying away. Coincidentally, just as they destroyed that place, today he announced that he received the keys to the doors of the new KF Plasma Research Center. It's location has to be kept secret so they don't destroy this one. The bird has flown and nested in a safe place.

The pattern of Creation is the same for all of Creation. The Soul of the Sun interacts with the Soul of Earth and creates the Soul of Physicality (STP) of the Planet and then manifests the physical planet. And the Soul of the Galaxy interacts with the Soul of our Sun and creates the Solar System (SS) with all the planets. However, for the creation of the Galaxy he did not say the Soul of the U, instead he said the Black Hole (BH) of a cluster of Galaxies interacted and created our Milky Way Galaxy. Maybe there is another way to describe the U. Earlier he taught that there was no physical boundary to our U and that it just keeps expanding. It's not really clear how that works. But a cluster of galaxies is still pretty huge. The main point is that this is the pattern of Creation. Then we have to remember that it is a single field that interacts with itself to create the whole Galaxy. The other amazing thing to keep in mind is that it doesn't have to be a field, it could also be a little ray emitted from the center. This goes back to the teaching of some months ago, when it was said, that even the vibration of the field itself creates a wave, and that wave carries the full spectrum of knowledge and field strength to create life. From this we can understand a lot. It shows how limited human understanding is, where we remain at the level of believing that life can only be created by physical interaction and use of an egg and sperm. In the U, life is easily created all the time, just by the fields interacting and moving around.

A lot of problems have been created by nuclear physicists who don't understand the process of Creation. It's especially true with American scientists who want to get a name for themselves and make a lot of money, so they start to come up with all these different names like Up Quarks, Down Quarks, Leptons, and everything else. They see hundreds of particles and other things in the atom and don't understand why. Then they confirm their ignorance by quoting people like Einstein. The Micro is in the Macro, and vice versa. If we want to understand how something will behave we can look at the smaller scale, and for understanding the physical structure we can look at the larger scale. The atom is really the replication of the SS, but we get that through understanding the essence of the knowledge. This means that an Up Quark could be like Earth and a Down Quark like Mars. If we want to understand how an electron rotates around a proton we can look at the Earth rotating around the Sun. Then they might say, well there are multiple planets rotating around the Earth, but H only has one electron. The planets can be considered all together as one energy field. The same structure appears when we look out into the Galaxies and U. It's a matter of understanding the essence of the fields and how they interact.

Today he gave us a new piece of information that we never considered before. We know that the Macro is in the Micro. And we know that the Earth is lighted only on the side that faces the Sun as it rotates around it, which is true for all the planets in our SS, therefore, the same is true for the atom. Only the side of the electron that faces the proton is lit by the fields of the proton as it rotates around it. It has not been disclosed what this means. Then he said, it's the same with the cells in the body. They are only lit on the side that faces the STM. At the same time he started talking about how all the organs only work one side at a time, while the other side rests. So half of the brain works while the other half rests. The same with the liver, kidneys, and the others. When we ponder its meaning we can think of the daylight hours are only when we face the Soul of the Sun. And this is related to the emotions. So if there is a conflict between the father and son, the STM of the father will stop shining on the cells in the prostate gland and it will develop cancer. This is a simplified version for us to ponder about.

In a way, this knowledge confirms that we are connected to our Creator through this chain of Creation. So the Light of the Creator shines on us from the Source of Himself, and it passes through all of His creations from the Unicos to the U, Galaxies, SS, Planet, STM, to the cells of our body. It's all one big connected Creation. We are always receiving the Light and Love of the Creator but we don't know about it, yet. It comes through the emotion of love, which is unconditional to the Whole of Himself. This is the science of it. It is not a theory, this is how it works, whether we are conscious of it or not. The purpose of these teachings are to enlighten us to this fact of existence.

Calcium (Ca) plays a big role as it is in every cell of the body of the Man. He will explain more in the future, but for now Ca is like the Sun in the center of each cell and it reflects the STM. To have such a position, the Ca has to be heavy enough and have a field strength strong enough to be able to hold all the Energies. For some reason the Amino Acid (AA) is 43, and the Ca is only 40. It's not clear why. But we can understand that Ca in the bone pulls and attaches all the muscles, ligaments, blood, and skin to itself. So in a way, it is a center of gravity of the body, and it is somehow connected to the STM by the fields, and brings a balance to the body. In the mechanism we just described lies the secret of how to find our way to the Creator. So we have the STM in the center of the head, and the Ca in all the bone structure throughout the body is directly linked to the STM. It's by the fields, and there is a secret in this if we can sit with it and try to feel its meaning. I think it is related to the field strength of the STM, which has not yet been revealed to us. Another hint is that the Soul of every living thing on the planet also has this field strength. And it is why the Ca in the skull can encage the STM, which is a superior power. And it is the same process from the Soul of the Planet, to the Soul of the SS, Galaxy, and all the way to the Soul of the Creator (STC). This is our key to being able to mutate into any form and transmute across the U. One third of us listening to these teachings have done this, but we have forgotten how we got here. But I think most everyone here came through the womb of our mother, so did we transmute into the womb, or have some of us created a human body from the fields?

There are other hints like why the bone has to be hard and how it came to be our physical structure. The features we have are the result of our bone structure. And if we keep our

bones healthy our Soul and body will also be healthy. But how do we keep our bones healthy is the question that will have to be answered later. The bone is responsible to keep the Soul of the cells in their position in respect to the STM. This is not a small thing since we are always shifting and moving around in time and space. If the position of the Ca shifts then that will affect the field connection to the Soul. Maybe that's why the bone has to be hard to hold everything in place. This same principle applies to all the animals, plants and living things on the planet. All the physical manifestations of different beings on the planet is related to the field strength and how everything interacts with each other. Now we can understand that the Cosmic Rays are really the Rays of the Creator.

In the second part Mr. Keshe talked a lot about how the Enlightenment Game will work. Basically, we will have to register every month and pay a 1 Euro fee and then we'll receive CC or Cash Coin, in our account. When we want to buy something at the KF Store they will convert the CC into KC (Keshe Coin) and we'll pay the 10% taxes on the amount we withdraw. Most of our currency will come through the Game, but we can also purchase KC directly from KF at the rate of 1 KC per 1,000 Euros. The rate of Euros on that day will be fixed as the price for the KC and not fluctuate with the market fluctuations of the Euro. As we begin to find shopkeepers who will also take KC then its use will start to widen and become a currency for us to use to live our lives with. It will take time, and the T will have to be released so we have something to buy. Also the T will provide us with Food or energy, Power, Health, Agriculture, Space Travel and the whole works. This is the new world that we are bringing into operation and we are lucky to be the ones to pioneer it and bring it to the public. When the ONN Units get out and setup it will cost around 5 million a day to operate. KF still needs lots of financial support for those who can help.

Going back to the current situation in the Middle East, if you do some research you'll find out that each of the 3 religions have their own version of the "End Times" and how the Messiah is supposed to come. Some say that the Jews were supposed to stay wandering until the Messiah comes and then they will be given the Promised Land, or what is known as Palestine. In the first century AD after the second temple in Jerusalem was destroyed, some Jewish Rabbis got the idea that they could help bring the Messiah by staging events that were written in the Torah or Old Testament. Of course, this was forbidden by the Torah, but they didn't care. The Jews with the money are paying in the background for these events to happen. One of their scriptures said that they would rule the world and they have done it, because it is very clear that they are making the decisions in America. They have bought up most of the Media, paid off the Congress and Senators, and they control the President. Through Mossad they brought in Epstein to film world leaders and influential people sexually abusing children as blackmail. If you study it carefully you can see that they are executing what they planned to do well in advance. These operations they do to themselves are called, "false flags" because they try to make it look like the others did it and they blame them, so they can do what they want to do.

Mr. Keshe told us that the leak in their nuclear research station was a false flag, nobody reported it until a couple days ago. They are saying that Iran caused it, even though the first reports were that Iran bombed a meeting of nuclear scientists happening near the

nuclear reactor. There was no report that they were even close to hitting the reactor. On the other hand, nobody is saying anything about the nuclear bombs that were loaded on the modified F-35's Monday night at Ben Gurion airport. Had the Iranians not destroyed them, the world would have woken up Wednesday morning to a totally annihilated Iran and radioactive fallout spreading across the world on the wind. The dangerous thing is the Israelis decided this totally on their own. They timed it with the celebration in Iran called, "stepping over the Fire," where everyone would have been on the street and gotten fully exposed to the radiation. Now you can understand how their minds work in a cunning and evil way, without a trace of care for others. We know Mr. Keshe's power and mission, but we have to keep faith that in the end, good will triumph over evil. This is an almost exact copy of the Indian Epic Mahabharat that took place thousands of years ago, where two sides of one family fought each other. At that time, it could be considered a world war. The point of it was that the Dharma, or Truth wins over the Adharma, or falsehood. Today the son's of Abraham are fighting each other. Isaac became the Israelites and the other's became the Arabs and later the Moslems. And humanity still does not learn. Only through the elevation of the Soul through elevating the M fields in the environment can we bring the change. It's foretold this war will last around 6 years, so we have a lot of work to do to get the T out.

The question about how to release trauma imprinted in the memory of the body and the plasma fields was answered in a way to make us think about our life. First, traumas can be a way to bring us to maturity because it causes us to think deeper about things happening to us. In general, many of us go through life blindly and unaware of why things happen, or even repeatedly happen to us. As we search inside ourselves for answers and find ways to get out of the trauma we can find ourselves maturing during the process. Traumas have an emotional M field effect on us and can create an energy imbalance. Through plasma we can rebalance the fields. Mr. Keshe used the example of when he used to create 3 different Gans bottles for people with imbalances. One for the air or breathing, one for the water as Gans Water to drink, and one to spray on the physical body. The effect was to transfer energy and reestablish balance. If the body is holding an excess energy it will get transferred to the Gans, which is lower in strength, because the stronger plasma always gives to the weaker. And if the body is weaker then the Gans's will transfer energy to the body strengthening the deficiency.

What I think might be missing in the description is the emotional process the patient goes through during the field balancing process. Using the Gans's is a physical way that satisfies the field transfer, but the fields of the emotions will also have to change, otherwise the imbalance will come right back again. Traumas are MG field interactions that affect the emotions of the STM, STP, and P and can cause them to come out of balances if we don't understand ourselves enough to handle them. When I used to treat patients with Chinese medicine and acupuncture, which is another way to bring the fields into balance, the patients would come back the next week and tell me what emotions they processed. We changed the energy fields and that changed the emotions, and in my practice I always tried to get people to deal with their emotions, which brought true healing and not just temporary fixes. It is my belief that the same thing will happen when we change the environmental field strengths, the people who change will also go through

an emotional balancing process. And those that don't, are the ones who will say the technology doesn't work. The reason he called the Gans Bottles a gimmick is because the people needed to see something physically, so they could give themselves permission to change their fields internally and emotionally.

We should not be fooled but what the controlled Media is saying and how the Americans are making a fake posture about the closing of the Straights of Hormuz. This is part of their strategy to conquer China. Taking over the oil of Venezuela was part of that. If they can close the Straights they can cripple Chinese economy. Therefore, we might see China invade Taiwan soon instead of waiting until 2027 as planned. American industry needs Taiwanese Microchips or it will be crippled. Trump has made it valid to just invade other countries and the world does nothing. China will be forced to invade Taiwan and then trade Microchips for oil. The Media will present it in a different way. The second beneficiary to closing the Straights is that America can sell 11 million barrels of oil a day at \$200/barrel and make huge fortunes. Last year they bombed the Russian pipeline and Europe they had to buy high priced American gas. The only way to stop this behavior is through bringing the KF Plasma Technology out into public.

There was talk again about the Black Holes (BH) and how it is relative to the observer and what field strength they see the BH. These means that someone, somewhere in our Galaxy, if they have the right field strength would see our Sun as a BH. And that parts of the surface of the Sun or even the Earth can appear as a BH. So it's all relative. The Sun doesn't have magma like the Earth because it is pure plasma inside. It wasn't clear how inside the Earth there is plasma but also magma. It seemed like he was saying there is a boundary where the plasma converts to liquid plasma and that's what we see as magma. It needs more clarification.

It's quite possible that the Iranians might use the plasma technology to defend themselves in this war. But as all 3 religions want the Messiah to come they are somehow preferring not to use it. And if they do use it, it will be highly unlikely that they will report it in the Media. We can only wait and see what happens and keep our intentions in the correct Ethos and have the faith that the Truth will prevail. Mr. Keshe said, in the end humanity will win.

Other Topics:

In the KF Plasma T it's all of us working together to bring the change. And slowly we are bringing it. It is not one person, or waiting for a Messiah that will bring the change. It's educating ourselves with the Knowledge and actually working together to bring it out.

Thanks for listening.
