

# 634th Knowledge Seekers Workshop March 19, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

US Government purposely bombed Iran Space Research Center - destroyed historical Plasma T Center killing plasma scientists - first Space flight of Earth; 2 minutes silence for dead; Historical information on research; I'll punish America - beyond their imagination; Bunch of murderers, crooks, pedophiles; I am the Messiah; Ayatollah Khamenei kept T secret; Center made specially for KF Plasma T; Silence NASA - Lockheed Martin & rest; Try to eliminate Iran for advancing Plasma; Cancelled all agreements with American scientists - not allow to kill with T; Warning given; KF - another hidden research center - give 100% enriched Uranium & Plutonium to every nation - not for weapons - Space; Give gold producing Units - to Third World nations; Jews fooled Trump as Promised One; You are worth nothing; KF is Phoenix - rise from ashes of Iran - science & T; Understand Cosmic Rays (CR); Soul of Sun interacted with Soul of Earth created STP of planet & physical planet; Soul of Galaxy interacted with Soul of Solar System (SS) created SS - same pattern; Single field interacted with itself - created Galaxy; Nuclear physics not understand - nonsense names - Leptons, Up Quarks, Down Quarks; Atom replication of SS; Earth - Up Quark, Mars - Down Quark; Micro in Macro; Electron - Earth rotating around Sun; H atom like SS; Light on side of Earth faces Sun; Same - light on side of electron facing proton; Light on side of cells facing STM; Half of organs works - other side rests; Ca in center every cell - same as Sun center of SS; Fields of planet interact - nearest MG field fractions as energy - can become Soul of cell any life form, plant, animal, mineral; Life set up based on Soul interactions; Ca in center; Plants have Mg in center; Emotional conflicts - STM stops shining on cells; Father-son conflict prostate cancer; Fields of Creator transferred all way to Soul of cell - always connected - created from emotions; Love is gift from Creator; Unconditional giving led to our creation; Don't need intermediaries - block; Ca in cell - like Sun - reflects STM; Replicate fields of Creator; Ca heavier & stronger field - hold all energies of body; Soul of cells attracts fields of Ca - connected to STM to balance fields - key to finding Creator; Why skull & bones made of Ca; Field strength of Soul - every living thing on planet; Why skull encages STM; Knowledge to mutate and transmute in U; Those listening not from Earth; Why bone is hard & Ca is Soul of cell; Bones healthy - Soul & body healthy; How fields manifest as variety of life; CR - Ray from Creator; Every cell connected through field strength of Place, Position, Possession of fields of Creator; Physiology - field strength and emotion of fields; March 21st open Game worldwide; Game use CC (cash coin) converted to KC (Keshe Coin) - have to be member KF; How Game works; Transfer CC to KC pay tax of 10% - 8% government, 1% KF research, 1% Administrative costs; 1 KC - 1,000 Euros; Register as individual, company, (?? government); Company - sell products; KF give governments loans - KC for services; Register every month - 1 Euro; Win 2 CC per month maximum; Buy KC directly; Belgium, Ghana, American scientists cannot join; Not a Cryptocurrency; Third World nations receive 1,000 KC for lifetime - end poverty; Encourage Africa to play Game - learn peace - enlightenment; Teach T through Game; All plasma teachings on AI - not teach to kill; Make plasma Uranium & Plutonium; Decentralize financial structure - hands of citizens; New babies - 1,000 KC; Americans cannot destroy plasma T; Dollar

finished; KC - currency of peace & prosperity - can't stop; Get shopkeepers to accept KC; Iranian New Year tomorrow - remember Saddam using American bombs - father killed; Bring back true blooded Persians; Out of Africa; First plasma crops harvested - KF brand; Belgium - get rid of monarchy; Millions killed by American structure since 1940s - bring end; ONN Units coming; KC transparent - no corruption; Israelis fleeing - back to Palestinians; Jews gassing themselves - bomb shelters; Israelis secretly loaded American F-35s with nuclear bombs to attack Iran - Ben Gurion airport destroyed - stopped; Humanity will win; Prices become same around world; Trauma - bring maturity - start thinking - energy effect of emotion - release; Need millions in donations; You have to spread Game; Cost 5 million a day; About Black Hole (BH) - relative to observer - on Sun and Earth; Plasma center Earth - liquid state of plasma - magma; Observation depends on angle & field strength; BH everywhere in body - center of head - AI of Man; How speech made - Souls agree on what said; Brain and Soul opportunistic; Prophets made mistakes; Man created situation for himself - religions made up; A. Khamenei refused to show T - waiting for Messiah; All 3 fighting to bring Messiah; Iran 7 more secret T; Show Plasma; 8,500 bombs on Iran - destroyed historical sites; Israel has no defense; Be prudent - not good news; Will others accept Messiah; Americans secretly blowing up oil fields & want Hormuz closed - like in Ukraine to sell their own oil high priced; 10% commissions; Bring down Chinese with oil - invade Taiwan - Microchips for oil.

## ENGLISH TRANSCRIPTION

(:21)

K- Yes, thank you very much. Good morning, good day to you. Or I should say, good afternoon and good day to you, wherever and whenever you listen to the series of Knowledge Seekers, from Keshe Foundation Spaceship Institute. Before we start the session, we ask for a minute or two of silence, (:22) for the most heinous act by the government of United State on what touches the Keshe Foundation directly. I share with you in Farsi, and I'm sure I'll explain to you what it is. It touches you, it affects every one of you as Knowledge Seekers (KS). We keep a silence for one or two minutes, and then I explain what the heinous act has been done by the nation of United States, its Army, on what is important to me personally, and affects the future of our cooperation with all the American structures. And in many ways, it's the loss of one of the most historical things for the Keshe Foundation. We'll keep it silent for a minute or two and then we'll come back and explain. (23:27 - 25:05)

<< Period of silence >> (:24)

Let me translate to you what it says. It says, at about 10 o'clock last Friday, near the Space Research Center in Iran, and gives the address, the American Air Force has destroyed Iran Space Research Center. And some of the documents you see, the paper on the side is when they blew up the center. This center is where I started the research. It is deliberate, it is nonmilitary, and this building was built by Ayatollah Khamenei of Iran for my return to Iran. (:26) And it was empty. Just on the top floor, two or three

secretaries and a couple of people managing the seven, eight story block. Extremely beautiful, built uniquely. And I put the first structures. I walked into this building, empty. I was told, "Whatever you need, it'll be built." There wasn't a single screw in this building. It was furnished with one of the latest modern technology equipment within seven days. And because we did the first flight in this building, it was changed to Iran Space Research Center. Which is Plasma Technology of Space, which is my technology.

And, last Friday they blew it up, and I'll punish America for this, beyond their imagination. I'll punish every single structure of American technology (T). If you have a war, you don't kill the scientist. This is a systematic to turn the country back to 200 years. I'll take revenge on American government because of this, and I'll explain what I do. You destroyed what I built, I destroy your name off the map of this planet. I am the Messiah, and I deliver my promise. (:28) You don't destroy research centers, hospitals, and everything else, in the name of what? Bunch of murderers, bandits, crooks, pedophiles, trying to enforce their way.

I tell you exactly what this place was. There was nothing in this building. The head of office of Ahmadinejad told me, "Choose which lab, we furnish it." I chose a lab which looked back into the garden. It was full of parrots flying in and out. I said, "It's a nice place to look." Many experiences, many flights, many dreams came true in this building. This should have been the museum of the Keshe Foundation, where the first flight took place, where I asked Ahmadinejad to deliver to United Nations that we bridge the line of the science into Plasma technology. Ayatollah Khamenei responded, "This technology stays secret of Iran."

One day, if you walk, if you walked into Linz, you see, or you must have seen, the pictures are there, (:30) those reactors, the metal one and the blue one. It used to take us about a year, year and a half, to design, test and bring the system to a level of flight test. 12 months was normal. The Iranian reactor you see, which I left and many of you are familiar with, which was built in this building, I asked after the first flight test, it exploded because I sat on it. I didn't know how to handle it. It was flying off and I sat and the pressure blew the bottom off. It was a Tuesday afternoon. I called the office of Ahmadinejad. I said the reactor has blown, be flown, the flight, they came and said to be seen because they are monitoring inside. I said, "I need a new reactor, it takes month." He said, "Give us the new design, it'll be with you." Seven days later, reactor built to all specification, was on my table in this building on the lab. I was amazed how it was done. Sometimes, later on, I needed every time I need a piece, part of the system to be adjusted, I just knocked on the door. A figure came in, he says, "What can we do for you, what you need now?" I said, "I want this piece." Door gets locked, two security officers behind the door. This gentleman disappears, (:32) and the next or the day after, exact specification was delivered to me.

One day, on a Thursday about the afternoon, which is the beginning of the weekend in Tehran, I wanted a piece. And it was Ramadan and there was all sorts of things, it was all sorts of situations, and I knocked on the door, the guy came. He said, "There is nobody, I have to speak to the office, that this piece can be done." I went upstairs to the Secretary, I

said, "I want to speak to the officer, I need this piece, that will be ready, it's essential for a second flight. They said, "Wait, there is a procedure, but we have to bypass it, because it's Thursday, and usually everybody goes for a weekend, but..." I said, "What's the 'but'?" He said, "There is something we don't want you to know." I said, "I have to know, because I want this piece." He said, "Mr. Keshe, do you know when you come through the front door, and you go through the lift?" I said, "Yes." He said, "Have you noticed there is a door in the back of that corridor?" I said, "Yes, I've noticed, it's a big door." He said, "Please go to the ground floor, go through that door, and what you want, it will be made for you." I thought, "Okay." I went down, ground floor, instead of going through the swing, what we call it, the doors to go out, I went to the back door. (:34) I entered a heaven for engineers. This building is more or less circular, they were built, tens of machines, the latest you dream in a workshop, the latest you dream in electronics. Every, let's say, 5 or 10 degrees, one machine, one Man sitting, a specialist next to it.

I was puzzled. I walked around. There must have been about 20 people, all specialists, sitting in their chairs. Each one, central ?? LED, ?? CMCs, systems, fully electronics, testing, electrical circuits, everything. I asked, "What's this?" They said, "This is all set up for you, that the minute you ask for anything, it gets done. And you were not supposed to see what we put behind you." I said, "I want this piece." They showed me the Man who's responsible to make things like this. We learned drawing, computers, done. Within an hour or two, it was in my hand. And then I knew how my technology was backed. There was nobody else in that building except me.

The silence I ask for, is for the scientists who died in that building. And American government will pay for this silence. I silence NASA. (:36) I silence every operation of the Lockheed Martin, and the rest of it. I have time, they don't. You don't destroy the scientists of a nation, unless your plan is a total destruction. An excuse of change of government, is just an excuse.

Keshe Foundation latest research center was handed over to us this morning. Those who are involved, they know what I'm talking about. And from this research center, I break American government's scientific organizations ?? with enemies. Since last Friday I cancelled all the agreements with the American scientists who I invited to join us in research. The head of NASA Space Operation Mars 2030, he lost his job with the Keshe Foundation. Heads of organizations and NASA scientists, and any Space scientists, from Boeing, all the contracts with Keshe Foundation was cancelled this week. Not a single American scientist will ever put foot in Keshe Foundation research centers, that they use our technologies to kill others. No, what a single American scientists, or a specialists will be allowed in research centers of the Keshe Foundation under no circumstances. That's your punishment. You use our technology to kill more.

When I entered Iran on 6th of June 2008, on two crutches with a broken leg, (:38) just coming from meeting, just about six weeks before with the Samsung family in South Korea, giving lectures at South Korea's nuclear center, meeting with the ministers of the government of South Korea. I was told in Hamilton Hotel in Seoul by the American heads of operation for South Korea, in a meeting with a number of American scientists

flown in to speak to me, that don't go to Iran. And I was in Iran 6 weeks later. When I landed 1 o'clock in the morning in Tehran, I was taken to north of Tehran, 15th floor and the 14th floor of most prestigious hotel in Iran was emptied that nobody comes near me. I signed a contract with the Iranian Parliament, and Iranian nation after three weeks of negotiation. And the agreement was my technology will not be used to harm a single Soul but can be used in defense of the nation of Iran. And I was the promise which was kept up to today by Ayatollah Khamenei of Iran, while he was alive.

From that hotel, I went to this building. After signing the contract, the day was sealed, signed, and if those of you who get access to the Iranian Parliament, the last week of June of 2008, (:40) you'll find an agreement, the last two digits of it is 1 - 3, signed between the Mehran Tavakoli Keshe, Iranian nation, through the Parliament, signed, to a transfer of technology. And the day after signing this contract, in the offices of the Ahmadinejad, I was taken to this building. They said, "This was built for you, and we were planned for you to come to Iran." And this became the Iran Space Research Center.

The smoke you see from this building, it will be the smoke will burn in the heart of every American scientist, they'll wish this did not happen. You can use our technology, but you'll be just slaves to it. You touched Iranian nuclear physicists. I did not touch you. I touch people who use my technology, I touch you. Two Thursday's ago, I told Ayatollah Khamenei, "Your term is finished because of what you agreed you didn't do." On Saturday, he wasn't with us. I give the same warning to those who know what I can do. No American scientist will be allowed to enjoy the development of the Keshe Foundation Space research. Doors closed because you used the technology to kill. (:42) You lost. You lost heavy. And when I finish my work, job, I'll tell you why and how.

This morning we received and we entered one of the biggest research centers of the Keshe Foundation for development of the Space Technology. Those are, who are with us, they know what I'm talking about, because they did it, not me. And I hope one day Americans won't blow up your Space Research Center, which you just with proudly took the keys today. We banned the Belgians, we don't sell them a single thing, and soon will be the same with the American scientists, developments, and research.

I asked the Iranian government to directly make the announcement. As the Iranian foreign minister announced, the 440 kilos of Uranium, it reaches 60%, is buried under. Keshe Foundation, through the structure of another research center, which is hidden in public, will produce 10 Kilogram of 100% enriched Uranium, delivered to every nation which needs, as a cost of a 100 Dollar a Kilo. (:44) We sell the machinery as gift, for 1 Dollar to governments. 100% enriched Uranium, Plutonium, costing about \$100 a kilo to produce, will be given to every nation by Keshe Foundation as a gift. The only contract we sign in giving the gift and the technology, cannot be used for weapon.

By end of 2027, I make sure over 100 nation can produce pure Plutonium, 100% enriched, for scientific Space development, to be able to conquer Space. Now, destroy a hundred nations. Not a single Unit will be given to the American organization. In 2026, over hundreds of Units, producing pure Gold, will be delivered to the third World

nations. They can produce as much as they like. There is no value to gold, no value to Plutonium. And Mr. Trump, Jews managed to fool you to tell you that you are a 'Promised One,' (:46) because your digital number matched with the one which was supposed to be the devil, and you played the fool. Play with Messiah, I teach you a lesson. You're worth nothing. You destroyed the most precious thing to me, for research and Space development. That smoke will come from the White House, from your hearts, not from the building. You killed those students which are working in the field of my technology. I kill the love in your nation, to end with the knowledge. As I said to diplomats in past few days, Keshe Foundation is that Phoenix, which will rise from Iran through science and technology. And this is the worst thing you could do to yourself. Military and the other factors, nothing to do with us. You can battle yourself. You touch my students, my researchers, I touch you. You burn the building, I'll burn the nation.

Going back to the teaching. Rick you can change the screen.

R: Okay, just bear with me a second here. (:48)

K- Now your Knowledge Seekers (KS) understand my place, my position. How many in a scientist meeting, usually summertime. The top 3,000 top students, scientists of Iran gather together. In one of the speeches he said, "The jewel in the crown of Iran scientists is Mehran Tavakoli Keshe." That jewel will shine, ?? and not the ?? other direction, United States.

Going back to the teaching, as we talked about the Cosmic Ray (CR). As we explained, now we have to understand everything in depth, of the knowledge, of the work of the Cosmic Rays. I explained in last week teaching, that we have a connection, between the Soul of the Planet and the Soul of the Man (STM). And we have always to think and understand the right way, that the process is not exclusivity. (:50) The Soul of our Planet has a connection with the Soul of a Star. In a way, the manifestation of itself is from the interaction of the fields of it, which leads to manifestation of our physical planet. The Soul of Earth become the Soul of Physicality (STP). And the environmental condition in this part of the Solar System (SS) gives a physical condition of the Earth. But, it's the same with the Soul of the central position, we call it the Black Hole of the Milky Way, which in interaction with the Soul of our star, leads to the creation of the solar system, which within it is the Earth and the Mars and everything else we see in it. And again, going a step further, the interaction of our ??, what we call our galaxy, with the, what we call, central point of the cluster of the galaxies, leads to the manifestation of our Galaxy. Now you can see the process.

But to understand how this works, in reality in interaction of one field, one single field, leads to creation of a galaxy. (:52) No more. This could be directly from the center or this could be from the ?? little ray, which is emitted from the center and in a process of interaction and reflection and reflection from the environment of itself, lead to creation of this Galaxy. In a way, in the world of nuclear physics, we listen to a lot of rubbish talk. That in the neutron, or in the electron, or proton, all the fancy name of ?? Leptons, and Up Quarks, and Down Quarks, and everything else we say, there are hundreds of

particles in one atom, in different things we hear so many names built for it. My dear scientists of 'nonsense talking never understood' and mainly American. You stupid people, American scientists of physics never understood because you listen to another a crooked guy, like Einstein. That, what you see in an atom, what you see in a neutron or electron or proton and with all your fancy Up Quarks, and Down Quarks, and everything else, is the replication of a Solar System. Is Earth Up Quark? Is Earth Krypton (?? Leptons) or whatever or is Mars, down Quark, and blah, blah and the rest of it?

In a larger scale is our solar system in the Galaxy of Milky Way, (:54) Down Quark or something else? What is in Micro is in Macro. If you don't understand it, look at larger scale, or in the smaller scale, see the behavior, look in the larger scale, to understand the physical structure. What we see as a behavior of, let's say, electron, is exactly the same as Earth rotating around the Sun. When you look at the Hydrogen (H), with a single central system, and then you see one electron, the collection of all the stars we see is the same, the collection of all the galaxies we see the same, then you see in the structure of a solar system that proton is the Sun, and the collection of all the planetary system around it is a collection of that electron. In a way we see one atom of Hydrogen as solar system. Single singularity in the middle, a proton and so many electrons. (:56) We are used to seeing one electron with a proton, but how come so many planetary system? Because we have to look at the collection of the planetary system in respect to the center, and we see if we look at it they are actually one system energy.

In nuclear physics we know there is a proton in the middle, but that was for a long time and still in so many way is. We knew the presence of this proton by the fizzy fuzzy rapid moving energy around it, we call it electron, confirming the existence of proton. That fuzzy ?? ride is Earth rotating around the Sun. As it interacts, we see it creating the daylight. Same process. We don't see a proton, what we call electron, lit all the way around. We only see the light of the proton on the facing side of the electron side. Which means when we see the light on the electron, which is buzzing around crazy, is on the side of it when it interacts with the fields of the proton. Exactly what Sun does in respect in interaction of its fields on Earth. We see the daylight. And we are fuzzing (buzzing) around it. 365 days it take us to come back. (:58) And collectively all the planetary system do that.

Tomorrow at three o'clock is the Iranian New Year. We come to the cycle of spring. And again, it starts again, another cycle, another dimension (D), rotation around the Sun. Exactly we see the daylight, daylight and night time, but the light is always on the side, it's just us, depends where we are, we see the light. But if you look at it from outside, it's only one side which is lit, and the lit side is facing the Sun. Interesting enough, in a way, as the Soul of the Sun, in interaction with the Soul of the Earth, makes manifestation of the physicality of the Earth, and it transfers its energy to, then the Soul of the Earth in interaction with the STM creates the physical manifestation of the Man in the dimension of the field of the Earth. Then the STM in interaction with the Soul of every single cell, creates that light in that cell.

In the world of science, they tell us that half of the brain works half of the time, half of your lung works one hour, the other half works the other, your heart works in the sequence, your liver works in sequence, and everything else, even your ovaries and your testicles work on the cycle of one month on, one month off, (1:00) your heart does exactly the same one side contract one side does the what we call, expansion. And then you have the same with your lung, and the rest of it. But every single in this single cell in these organs and the rest of it do exactly what the Earth does with the Sun. The STM shines, interacts with the Soul of every single cell body of the Man. If one day our scientists look at the ?? refraction (?? reflection) of the lights, they will see every single cell is shining towards the STM. As our daylight does to the Sun, as the electron does to its proton.

But what is interesting, when we look at that cell, as we saw in the cell of the Solar System, Calcium (Ca) is in the center, as an energy, so the Calcium become the Sun of that cell, in a plasmatic condition. And then, every particle in that cell, now go and see the scientists, they open it up, they say this is this and that and that, the cell, whatever they talk about it, change it to Up Quark, Down, Quark, Lypton, blah, blah, blah, or to the Moon and the Earth and the Mars, it's all the same. What we see in Macro, we see in Micro. (1:02) This is important for us, because in the dimension of life on this planet, in the interaction of the field of the planet with the Soul of the living thing, which is based on the condition on this planet with the nearest magnetic gravitational (MG) field fraction of dimension in energy, allows you to become the seed or the Soul of a cell of a living thing in a dimension of the life as a vertical, horizontal and mineral. How things set up, how the Soul interacts, then you understand why every single cell in every living thing, which is based on the amino acid (AA) protein of living motion has a Calcium in the center.

In so many ways, in the dimension of the vertical people, we see Magnesium (Mg) more. (1:04) And then we understand how the STM interacts with the Soul of every single cell in the body of the Man. This is why when the STM touches the emotion and matches with the emotion of the Man in the brain of the Man, equal to the emotion of the STM, and the Sun bothers me, I caught life from where I created that life. I don't send light in that direction and this is why the Man gets cancer. This is why when I know in the emotion of me as the STM in connection with the Soul of the guy whose adulterous and the wife knows I cut life through the right breast, through the dimension of the fields, to create cancer that there is no touch to life. Now you understand how we have step by step transferred the field of our Creator to the Soul of the Unicos, to the Soul of the Universe (U), to the Soul of a Galaxy, to the Soul of a Star, to the Soul of a Planet, to the Soul of a Man, to the Soul of the cell of the Man, and it's still ongoing.

Then you see how in one line, every second of your life, a Man is connected to his Creator. (1:06) I made Man in image of Myself, because Man is created from field of Myself, in interaction with the field of emotion of ?? Myself. The only thing that Man fooled himself with was the emotion of love, which he thought is exclusivity of, but it was the gift from the Creator. As giving unconditionally led to the creation of, but being blind to what I have created, brought me to understand the love of me, for me.

This is part of the structure of understanding how simple the process of Creation is. How simple every possible way, every step of the way, every cell within the body of the Man, every second of his life, connected to the line of the connection of the life of the Creator. So, you as a cell, collectively as a Man, are a collection of the reflection of the light and the rays of the Creator. (1:08) Now, do you need rabbis, ayatollahs, mullahs, and Vatican's, and bishops, and archbishops, and Buddhists? You're all together as an intermediary, when you know you have the gift of being part of the actual, what is the created out of Me, through Myself.

The reason that Calcium is part of, I will explain in a future what connects Calcium as a plasmatic field Center of a cell of the Man, that becomes the Sun, for the reflection of the STM. And if you understand this connection field strength, how you can replicate the fields of the Creator. Remember, you have to be heavy, or ?? field stronger, that you can hold every energy, and how come that Calcium is the center of every cell within the body of the Man? Where the Amino Acid, you're call it atomic blah, blah, is 43, and the Calcium is 40 and it's supposed to be heavier than the Amino Acid. But it holds the Amino Acid with its capture, be it the muscle of the Man, be it the connection ligaments, be it the blood of the Man, be it the skin of the Man, and the rest. (1:10) And if the Soul of the cell of the Man in attraction of the fields is the energy of a Calcium, so has to have one in connection to the STM, that field energy balance.

And if you understood the gravity of the last two sentences, you have found your way to your Creator. Then you'll know why the skull of the Man is made from Calcium. The bone. Then you'll understand what is the field strength of the Soul of every living thing on this planet. And if you understood that connection, and you understood why the skull of the Man is the cage for the STM, then the same process you will understand, the field strength of the Soul of the Planet, the Soul of the Galaxy, the Soul of the rest, and up to the Soul of the Creator (STC).

Once Man gains this knowledge, (1:12) Man will be able to mutate, transmute to any shape anywhere in the Universe and live amongst the men as they are. The way one-third of you, even part of you listening to this teaching, you are not from here. You have forgotten the knowledge, how you got here. If, as Knowledge Seekers, you understand the potential of the existence of the Man in the dimension of Energy, in a way of the connection of the whole, then you understand why even Man has bone as his physical structure. Why bone has to be in his hard condition, as a bone, where every cell has a Calcium as a Soul. Then you understand how even the feature of the Man is connected to the structure of the bone of the Man, and nothing else. You keep a healthy bone, you keep a healthy Soul, you keep a healthy body. Because it's the bone who keeps the dimension of the Soul of the cells in position in respect to the STM. (1:14) It does not matter if you are a dog, cat, a Man, a tree and the rest. Principle is the same.

We see Man, tall, short, black, brown and the rest. Then you understand the field strength of the STM. So is the same with a tree, you get a tall tree, small tree, and everything else. It's like the Japanese, the black, the white, Chinese, and the rest. We call it the apple tree,

the orange tree, and God knows, silver, and this and this, and the rest. We chose a Man nationality and the color and the race, we chose to eat in the name of the food they create. No difference. Same principle. Now, you can see where the dots of the Cosmic Ray comes together. Do we call it the Cosmic Ray or do we call it Ray from the Creator? Then you understand every cell that is connected is the dimension of the field strength of the Position, Place and Possession of the fields of the Creator.

I hope you understood a lot from this and this opens a lot to the other doors. But step by step as we open the doors, (1:16) we partially move into the dimension of physiology of Man, because by understanding the physiology in the dimension of the field strength and the emotion of the field, we open a Pandora box of transmutation of the Man in the dimension of the Universal condition of the Man in this Universe. We go for a very short break and we come back and I hope we can answer some of your questions. And we have a lot of announcements to make after the break.

**>> BREAK >>** 634 KSW March 19<sup>th</sup> ... (1:20).

K- Thank you very much. As many of you know, we promised that on 21st of March, the Enlightenment and Peace Game will open to public. At 12 a.m. what we call, Greenwich Mean Time (GMT), on 21st of March, this game will be opened to public worldwide. Those of you who helped us and joined in past three months in showing the, what we call, adjustments and corrections and whatever needed to be done, that we learned some of the problems, your own numbers, credits you made before, which is ?? 1/15th of a billion, trillion of the 1 cent, the best somebody has done, I think it was told it's about 700, will be that you get some credit for that, that you haven't wasted time playing with us. The Keshe Coin (KC) become official currency as of 21st of March 2026 for those who register through the Keshe registration.

You have to understand when you play the game, you get the CC cash coin, cash as cash notes. (1:22) Then you convert when you want to do anything with your coin to Keshe Coin which is KC currency. For every hundred Dollar or Euro or whatever you earn in the game, when you want in the game to play with it, it's your game. When you want to transfer it into a currency that you can live with it, work with it, whatever, you get 90 Dollars. Or you get 0.9 of a Keshe Coin. The other 0.1 or the other 10 Euros, 8 (Euros) of your system, it will go directly to your central bank of the nation you register yourself

with to us. So if you are resident of, let's say, China, but you are British and you pay your taxes to the Chinese, \$8 for every \$100, or Euro, or Yuan we change with you, will go directly as a payment from the Foundation to that government. \$1 will go to Keshe Foundation for further research, and \$1 stays for expenses of running the operation.

You have to register. And in the registration, you have it's categorized in three ways. You're individual, you're playing. (1:24) You're playing, or you're registering as a company, because somebody comes to you and says, I have one Keshe Coin, would you accept? You can only accept it if you are part of the structure of the Keshe Foundation and Keshe Organization. If you are a company, you want to sell your products through us, you have to register. Your company registration is your registration with us. Your passport, your ID certification in the application, your ?? film becomes ours, so we know where you are, which country we have to pay for. And it's the same, a number will be given to each government, which means governments can exchange their coins with us for any services or loans we give to them.

Be very much aware what's going on. You want very soon, in next few weeks, you will see that the, for example, you buy a Unit from the Keshe Foundation for 100 Euro, will disappear. The only currency on the Keshe Foundation website is one Coin, 0.1. That's, one Coin is 1,000 Euro, 0.1 is that fraction. So, we start teaching you, people in the background will set up structures how for a lot of you know how to work with the Keshe Foundation in exchange for everything. You can buy products from the Keshe Foundation, our new structure coming up.

We have set up a structure that at 12 o'clock on 21st of March, (1:26) except the Iranian currency, whatever value is to the nearest digit, will become the value exchange for your 1,000 Euro. And it stays that way, which means, if tomorrow night Yuan is 7.9 to Euro, your Yuan for every thousand Euros, 8,000 Yuan will be locked in for years to come, as the value in comparison to Euro. So, you keep your value, it does not matter what happens (in the market). And this will be the trade that you Knowledge Seekers amongst each other can trade, because a 1,000 Euro it'll be always a 1,000 Euros. It won't be 8,100 tomorrow and 7,900. This brings certainty into the market, for Keshe Foundation and those who use our system.

Be very, very clear in what is going to happen after 21<sup>st</sup> of March. For those of you who have registered up to now, you have to re-register. Don't forget you have to re-register every month. Once a month you have to register. And you pay a fee for that registration. It's about 1 Euro. And that 1 Euro goes for expense of running everything else in the background. But allows you to carry your Coins from the month before whatever you played forward, you spend it. This way we keep people who just occasionally just whatever they want to do. (1:28) You can win or with your plays, maximum, hopefully around about 2 Coins a month, which is 2,000 Euros which gives you 1,800 euro because we keeping 200 euro behind. That 180 Euro of it will go directly to the account of your government. And 10 Euro stays with the Foundation for research. And 10 Euro goes for operation to keep. So from 21st of March, you can actually go to the Keshe Foundation website. We start structuring it that way. Buy the Keshe Coins from us and spend it

gradually. We become central operation for us. Or you can go and play the game, earn the Coins, exchange it to, and buy the products. If the seller accepts your Coin, because he has to sell it somewhere, or he has to exchange it to the currency of, you are from Europe, you have 1 Euro, he is from China, he has 8,000 RMB. This secures the Knowledge Seekers, this secures the future process.

So, you can register from 21st of March at 12 o'clock, 12am, beginning of the day, and we go through how much the currency worth that day, and we lock it, and gradually we bring all your currencies into this process. (1:30) Exception to this process is at Belgians through Euros, American scientists to this process will be refused. And if we found a trade, we'll find a way to block it. And those who live in Ghana. We keep the same process.

Sometime in the next few weeks and months, we start explaining to you step by step what goes on. When you register your first registration 21st of March, you'll be given a gift of 100 Euro, which is 0.1 Keshe Coin as a gift. And we structured it in the next few weeks and months as we set up our system, because this needs a lot of setting up. It takes a lot of work to be done. We back in the background allow you to trade with different structures and with each other and then you go to a shop and say, "I have these coins but it's not in the exchange, but this is internal Keshe Coin." Which means we don't touch Cryptocurrency. We are Coins within the structure of K Foundation. That's why you register with us. You only can register if you can use our Coin, if you are registered. And we register you by national ID. (1:32) Where do you live? Fill in the form correctly when you come to it, and then gradually we start setting it up.

When we are everything corrected next few months or weeks or whatever as we plan to do, then we get in touch with individuals, because every one of you, especially in the Third World nation, (?? will) receive 1,000 Coins. Don't forget it's worth 1000 Euro, you all become individually millionaires, but we structure it in a way that you cannot spend it all. We work on a specific way that works on the span of a life of a Man, that you have all the time money to spend. You can't burn it in one day and gamble it or whatever with it. If you receive, we estimate you live a hundred years, you're allowed to cash in 10 Coins a year, which is 10,000. 10,000 dollars in Africa, 10,000 Euro in Asia is a lot of money. The way we take the Coins from you, we exchange it somewhere else, we pay somebody else through our process. This brings stability, this takes hungers away. People, we encourage people in Africa, in third world nations to play the game, to learn the Game of Peace, (1:34) to learn how they can be enlightened and become peaceful. And through the game we start teaching the technology of the Keshe Foundation.

We have entered in a very deep way with one of the most favorable structure of the teaching in the past two weeks. And we follow this through the same coming up, that our teaching has and will become part of the curriculum of the teaching, due to our structure and organization. Which means when we let you play the game, we give you a thousand Coin, you learn about the knowledge, we put you through the teachings. Number of Knowledge Seekers in the background are working with AI so that every teaching can be reached. We connect the two together. The teaching, you go to the teaching, you pay for

the teaching, you learn everything you want to know, the structure we're setting up through the game. You spend, you learn a thousand. You are going to learn how you can make Uranium, Plutonium, and what it can be done for a peaceful application. You buy the knowledge through the game you played. You want to know how to cultivate, you want to buy an apple you're hungry, you go back you exchange. This will take us a year or two to get it all fine-tuned. It is decentralization of the financial structure, which every one of you is a member of that structure. Operation out of the hand of Central Bank, (1:36) operation in the hand of every citizen on this planet.

In further step, sometime before end of this year, we give finances by Coin, the way because now we paid your governments over next year, they are used to Keshe Foundation paying money to them out of nowhere, they have a capital, assets to be spent for your nation. Don't forget, nation is 1 million, 100,000 kids are playing Keshe Coin to earn 2,000 to feed their family and their clothing and everything else. The game, it is through the game to bring equality, to bring peace. A child can earn that. A child is born and the date of issue of his birth certificate, in the next two years or so, will receive automatically 1,000 shares, Coin from the Foundation to that name, doesn't need an account, because he's on the Net. Parents cannot spend it, can be spent for that child, through his connection we set up. No child will go hungry, no child will be without clothing, no child will go without education. We connect it to the AI, children from the young age ask question, "Mom, how the tree is growing?" It's AI, made by the Keshe Foundation, through the teachings, connected for you to enjoy, a child will have the same benefit as a Man, in the most advanced universities, where they don't teach killing. (1:38)

This is the gift from the Phoenix of Iran through the technology of the knowledge to humanity. The worst thing you American did, you thought it touched the nation, but the bird of the nation has already flown away and nested somewhere safe. Dollar will worth zero. Nobody will deal in it. As people learn to deal with the currency, which is a peace currency. In the structure setting up from tomorrow, we'll keep it very slowly going, till we see our problem, we see our faults. And once we bring this into operation, we understand, then we can support it. Sometime this year, we start giving a thousand shares, or thousand Coin to the citizens of the poorest nations first. Children who write, register to play the game, that they can bring wealth to their nations. Nobody can stop. We'll explain more and more in what is going on. We explain as time comes, once we learn our process of development, delivering.

So, Knowledge Seekers, you can play the Game of Peace. If you are Africans, ask your children to play. (1:40) Dr. Gatua, you are responsible for Africa, as a member of support of the Universal Council. Hassan, you're on the West Coast. It's your job to teach the Africans. Lady in South Africa, teach your nations to play the game, and we feed it. We start with Africa. Then, step by step, we go to South America, Central Asia. Those who live in the Philippines, Knowledge Seekers, teach your children to play, and get people to play, the way you taught the knowledge. Get the shopkeepers to accept. And then we'll see. They never lose, doesn't matter if the currency drops, goes up, they're

always safe in that haven of equality. Those of you in India, ask people to play, and let them exchange game.

And those of you who sit in the beautiful nation of Iran, I wish you the most beautiful New Year, tomorrow. We will assess very soon, how to value the exchange rate for Iran. We'll announce it in due course. In 2026, figures are all robbed by those who came to rob us and those who came to bomb us. (1:42) We'll bring the rate to the rate of 1979, where 6 was 1 dollar. You can exchange that. Let us do our work we open to the Iranians. Iranian nation citizens will receive the Coins, one of the first nations to do, to help them not to suffer from what they've been forced into. We got rid of the Arabs for us, we bring the nation of Persians, the true blood of the, every single one of you, it doesn't matter, you live from North America to Europe, China, you carry the Persian blood in you, because that's where he was crossed years ago. We all are the same and we look after you the same.

The whole game is to bring peace and equality, to understand intelligence, and we'll base ourselves in one of the most beautiful places in the world. We work hard, we deliver hard. In the next few days, the first harvest of the Keshe Foundation brand will be in public. Most probably by next week. You can buy it and enjoy it. And it will be something which will be added to step by step as we grow ourselves. You will see in the Keshe Foundation Cosmic Ray products starting from one point and gradually in the next few months spreading around. A lot of work has been done. I thank those of you who supported us solidly and you allowed this to happen. (1:44) Those of you who stood by us solid, we haven't wasted a single cent of you. What you gave us, it goes back to where it came from, to humanity.

Please, register, play the game, ask the people of your nation to play the game and ask those who trade to register, to accept and internally will start working itself. Those nations who we see, especially the young start playing the game, will finance the nations for the next cycle. The nation of Belgium will not receive any process as long as it does not change its position of monarchy. We only deal with democracies and not with pedophiles. The same goes with those who have 'head of blondes' and they play with children. We keep our way clean, we are here to unite but we have to understand what is the cause of division and what is the cause of war. 95% of the people have been killed in war since 1940s, has been due to, because of American Army, Military and everything else. And we'll bring an end to this very, very soon. We'll explain that very soon. Technologically, no wars. We are intelligent people. When you have to fight, you already lost. When you know how intelligent you can keep the Man away, he can battle himself to smithereens. (1:46)

I hope you enjoy the game. Register through the system. Go to Keshe Foundation, what we call Institute. Register through Institute that you are a member of the Foundation, in that way, many of you start doing and anybody does, ask them to do so, because this gives us a huge literacy to be operating through a structure, as much as we do on the game. It's in a way, you have a dot-com on the Internet, you are a company you earned, but you have a company which is actually sitting in the ground as a company. This is

difference between the Keshe Coin on the Net, and Keshe Foundation work operation as a what we call institute as a structure the way we have set it up, and they work hand in hand next to each other as one structure.

We try to explain more and more as we see the problems and the rest. We had a problem in distribution of the ONN not in a way of when it was technical, and hopefully it's sorted we test it in the next few days, and then we start distributing the first phase of the what we call and the ONN systems. In 20s and 30s and the 50s we see the problem, we solved the problem and we'll appoint people who have to what we call monitor correct all the transfer of the Coins, transmutation of Coins from one account to another and many of you have to learn how to handle Keshe Coin as a wallet, as a safe that nobody can do. If your account is stolen or your coin is stolen, (if) we can prove it that it is, (1:48) you'll be refunded we'll give it back to you, as long as you stay straight with us, and we'll see we can track we can monitor where your money goes, or what it's been. So nobody can come to us and say, I lost my Coin. You have a thousand Coin for the rest of your life use that. If it's that bad, and not many people can stash away millions, because you cannot earn more than 2 Coins a month is 24, and if you lived 100 years it's 2,400 Coins which gives you about 2.4 million Euro of today.

We will connect education, we connect health, we connect what we call nourishment, food, everything else gradually over the coming time, into the structure of the Keshe Coin and playing the game. Through the game you can go to the hospital, you pay for the services through Keshe Coin, you receive what you need. Again, through the system we'll build up, through your headphones you receive it and everything else. And the structure is slowly getting set up. We need time. And we have set a structure that we don't look outside for no finances. Gradually in the next 12 months, we'll be self-sufficient internally through the exchange and through the structures we set up.

Researchers, developers and many others, as we need, we call upon. Keshe Foundation doors are closed to any American scientist, computer scientist, Space scientist. (1:50) And this is the only way we can stop our technology to be used for war purposes. We respect the American citizens, we respect all the Knowledge Seekers who come from America. Nothing will change for you. We just don't let those who cause wars to join us. As we believe, the state of Israel will not exist very soon, because there will be no citizens in that country to live as citizens of Israel. Over 400,000 Israelis have been killed in the past two weeks and by the ?? end of this war. Already nearly 10% of the Jewish population of Israel will not be there to live. The others have escaped, so Palestinians will have more numbers than them. And we'll see gradually, as there is no Jews to run, the State of Israel will change to the Palestine in the coming months, as we see. And if the war goes the way we see it, about a million Jewish population will be under the ground, buried by their own.

As I said to two or three diplomats this week, during the Hitler, they created gas chambers, as the Jews claimed. Today, Jews are gas chambering themselves. They start attacking Iran and the infrastructure. As Iran has started attacking the Israeli infrastructure, they knew they built safe homes in their homes, and safe undergrounds.

These undergrounds are more or less crashing on top of safe homes, safe undergrounds, and people are dying in thousands, suffocating under their own CO2. You heard and understand. (1:52) When you build a house in Israel, apartments, you have to have a safe room that you can go in it from any bombs or shrapnel's. 18th floor, 20th floor, crashes down as you've seen in many, many pictures of past few days. These buildings, 20 floors, 8 apartments per floor, that's 160 apartments. Jewish families, Orthodox and the rest, average 3 to 5, let's say 5 to be on the average side, mother and father and three children, much well behind 60. You can see when one of these buildings comes down, how many have been hit. And Israel says only one or two injuries, because they can't even reach the people who've been killed. In one attack, 18 apartments have been crushed, multiplied by 900, you can see how many in one go have gone.

Now you understand when they do it by themselves, they have no airports to run out anymore, they have no port to run, it's just change of time. When ... And the reason that Israel airport, (?? Ben Gurion) airport was wiped out on Monday night, was because in the hangars of this airport, there were a number of F-35s modified to carry nuclear bomb to attack Iran on Tuesday night, were placed. (1:54) As you know by the tradition, the last night of the Wednesday, which is on Tuesday night, in Iran we celebrate jumping over fire that the bad omens of the year past goes away. The Israelis were planning to attack Iran when people are on the streets celebrating the Day of Fire. And F-35 modified with nuclear warheads were set to attack Iran at that night. And every single F-35 was wiped out, already loaded with nuclear warheads. I'm sorry to those who lost their lives, but on the other hand, Iran would have been annihilated with nuclear weapons. Over 1,700 people lost their lives in that attack in Ben Gurion airport. You have to understand, fully manned military control tower crashed down and hundreds of soldiers inside, top officials, pilots, tracking how the day after the attack, to bring a nation down. It wasn't empty, it was full of soldiers, loading up nuclear warheads, adjusting aircrafts to attack Iran.

This war should have not started, but no one will have a last say, except that we can estimate up to today some more than half a million lives have been lost in Iran, in Israel, and over 25,000 American citizens in different shape or form in Middle East. (1:56) German hospitals are full of Americans. Even Germans cannot go to the hospital. Dead, dying, injured are getting shipped in plane loads. Most of the European military hospitals are full with Americans. No airport to run out, no flight to take out. People are paying their blood to cross borders to be able to travel.

My deepest condolences does not matter what color, race, nation or language you lost, your members of your family in this one-sided war. But humanity will win. Today is the night of New Year and tomorrow is a New Year. In 1980s when I was a student in university, we used to cry these nights because Saddam Hussein with the American bombs were sending missiles to Tehran. And some 40 years later we are getting the same from the Master this time, instead of their proxy. Nothing changed. We still wait to hear the voice of our loved ones that are still alive in Tehran or in Iran. I went through this 40 years ago when I was a student, as my father died in a bombing, as my family is still alive, because Saddam Hussein was sending missiles. And now we're getting the same

from the masters who gave them. This time, they are trying themselves. Last time we won, this time we win. And at end up with humanity will win, because the 'card' has changed. (1:58)

Any questions?

R: ... There's the new Keshe Foundation site, keshefoundation.at, and it has the opportunity to become a member, or support member, of the Keshe Foundation. Is that where people sign up for the game as well? Or sign up to the game servers?

K- The game, you sign through the game. The game, you go through the game. This way, the... as you are a member of the Keshe Foundation, automatically goes to us, because we use the same program data back into Keshe Foundation. But, once you register for the game, you automatically become registered for the Foundation and you can register yourself into the institute, KF Institute, and then everything else will be sorted in the background. It's just that we try to give two faces of Keshe Foundation in a structure that allows the institutes and the research and development hand in hand to grow.

For example, any items of the Keshe Foundation, or gradually those who are resellers of the Keshe Foundation will get paid and can accept Keshe Coin and pay Keshe Foundation for the Keshe Coin that we transfer to those who buy the Coins from us to shop around. (2:00) Next week hopefully or so, the first agricultural products of the Keshe Foundation will be available in some countries, and then gradually you buy Keshe Coin to exchange. We put through which Keshe Coins can be used when you purchase Keshe Coin to purchase, or you want the Keshe Coin through the game to come through to support. Gradually we structure this out. And we in a way bring security and stability. It's taken years to get here, we're not going to be tomorrow. And you have to understand the more usage is set up for the Keshe Coin, the more what we call power we have to bargain with the nations in so many ways. We try to, if we know people, students in universities, get them to play, especially in Africa. If they earn two Coins a day, a month, they live a luxury life, believe you me. And we try to support them. They have to go through the process, you have to allow us to become, you ask, you get shopkeepers to accept, like they do Cryptocurrency like they do what we call it every other coin, but this time you can buy from anywhere in the world any services gradually for the same. You can buy your health programs through Keshe Coin and gradually it's getting set up, we just need time and we complete it. And then we'll see how we can do.

R: Okay, so to be clear this site was the keshefoundation.at those who are already playing the game and who have signed up for that, (2:02) don't have to sign up at the keshefoundation.at, they're already signed in?

K- Yes, they're already signed in, we get everybody else's. But when you go to the game, you sign for the game, we ask your nationality, where you live, your passport number, your ID number, on that ID number you give us which you are resident, when you come to ask us to change your Cash Coin to Keshe Foundation Coin, we call it KC, we raise the money for your government. Those of you who work with us and you play the game and

you will have an income from it, please get in touch with your governments and tell them, "Can you give us a number?" We asked already from number of Knowledge Seekers to ask the government, "Where can we make a payment to your account?" We want a national government account. You have to work a little bit to find out. We don't want to pay the... where you pay finances or whatever. We want a national number where we can monthly pay, you're American, you play on the game, and then you want to buy something with it, you exchange the Coin to be able to do, we pay to your government. You're Iranian, we pay to your government. In a way, we subsidize the governments to come up. They don't have income, it's extra income which comes in, and then we have other ways, because when they take our Coin down to spend it.

So we can, in long run, monitor how the finances of government is done, in the long term. Because, they receive so much, we see how they use our Coin, who they pay. Become very transparent, very, very, very transparent, who is playing what game, where. The bribery is, in the long term, will stop, because it'll be very transparent, (2:04) we pay the government, government pays with Coin, somebody else, and this goes. And you can use subdivisions of it, which is you can buy ice cream for 10 cents with a Coin, where one coin is a thousand, the rest is in your account, you have to start learning how to work with, what we call currency exchange on the Internet, which is very easy, it's done every day. And this way, your money stays the same amount all the time, does not matter where you go. And gradually brings prices the same around the world, maybe next 5 or 10 years more and more people use it.

Live in Africa, encourage your student, put posters up for students to play, put posters up for the shopkeepers, for the companies to accept the Coin, to exchange inside your nation. We only support governments, we will not go supporting businesses, to give them whatever. Project by project, Universal Council members become responsible. Earth Council members to be reallocated, they are there to see that the funds are transparently they spend. Those of you who are supporting member councils, your job literally starts from now on. Get in touch with your governments. You are in support of Universal Council. Ask them for the bank account. We want to pay money to you. We pay by Coin. They spend the Coin because they know each Coin is a thousand Euro. Start. We facilitate it. We do it and then you have to take it up. Doesn't need everything go through Keshe Foundation. We just see that the nations receive the what we call the proper way to spend and play the Game of Peace. (2:06) You'll be amazed how children will play. Every day, two, three hours, they learn, they earn. A boy of 10 playing a game, earning one Coin a month, a thousand dollars, is a lot of money in Africa. As they say, "Let the game begin."

Any other question?

Q: ... Greetings and my deepest condolences and compassion for my heart and Soul for your loss and for the Souls, children and families that have lost their physicality at this time. Mr. Keshe, in previous workshops you have taught that the STM exists in a plasmatic state and that everything in creation from the stars to the cells of the body communicates through fields of magnetic gravitational interaction. You have also said

that Man has miserably failed to create children of peace, (2:08) and that the Children of Mitra created through the Soul's field rather than the physicality of the Man represent a new path forward. My question is as follows. When a Soul carries deep trauma, trauma imprinted not just in the memory but in the plasma field of the body itself, what is the field condition required for the trauma to be released? Not through medicine, not through psychology, but through the Soul's own magnetic gravitational interaction with the Universal field. Thank you.

K- Most of traumas brings a maturity, because it brings thinking, it brings to understand, sometimes we ?? (make) ourselves these traumas, sometimes it matures us to find another way to get out of it. The structure to understand this, how to release, or to allow the traumas, or what we call energy effect of emotion, is to create a second balance field. Which is transferring in an equal way that reduction in the field brings a balance.

In early stages of the Keshe Foundation, in the first decade in 2009, 10, 11, around that time, (2:10) actually 11, 12, 2011, 12, in that time, I used to make bottles. Three bottles per patient, that was a standard. One for breathing, which is the air, one for the water and one for the body. But the beauty of it was, it was a gimmick, in a way, and it was so effective, in a way. Because when you give a bottle which is plasmatically set in a specific way, if you do it the wrong way, you can create other problems. While they put that pipe, it's like a Hubble Bubble, to breathe from the container which you set up, the Soul, the energy, gets connected to outside energy, weaker. So, the extra energy is transferred into, you go to balance. If the bottle is stronger, it gives for the Soul to become to balance. Now you understand what I call a gimmick. You use the tool, they are humans, they are believing in what they touch, but in fact you connect the energy fields. And this is a way to it.

I was asked by one of the Knowledge Seekers, barely three, four days ago, "why don't you go back?" I said, "The Gans technology is much more." And secondly, I'm fed up of burning myself with plasma. You have to create a condition, understand the condition, and then set higher or lower balance field, (2:12) or a balance field that the two interacting, if it is a trauma, is created the energies, that's all it is, you balance it off. Cannot be done so easily. In a very near future, in maybe next few weeks, you will see part of this which will come. I'll explain in a way that how it can be and then you structure it yourself to what you want to do with it. And a lot of people like they have a mental condition and they have all sorts, the old system works very good, what I used to manufacture. The new system needs to be adjusted to do. And we are working on it maybe next few months, a year or two, very much replication of what we had.

It's... if you look at it, we marketed this in a very, very strange way with Cups, Pressure Cups, and the other Cups, and Sugar Cups. But the structure has to be you hold the Cup not just to drink. You hold the Cup when you drink. That Cup, the water is just a gimmick to bring the balance. Dr. Gatua did some testing with his people, and I remember he wrote one that most of the people who use CO2 or Cup 1, (2:14) the diabetic reduces. It's very simple because Cup 1 carries a dimension of the Amino Acid of the cell of neural system body of the Man so they connect to it and they see the benefit

of it, because they transfer the energy which cause behind it. Diabetic 2 is always stress-related, it's connected to, not the sugar, it's the stress which brings it out. In that case, you see people, they lose their diabetic. This is what I always say, Knowledge Seekers, when you make things, you have to understand the whole knowledge of it, not just because you do. You see something.

And in next few weeks you will see, we're going, we've gone back, no we're going, it's just that our harvest is ready, it's just, it'll be on a regular basis. You Knowledge Seekers, we tell you what is set up, how it's set up and what you can use it for. You put your order through, and then you use what is developed by us, and then you tell us how you lose your conditions, how you enjoy the pleasures of life. We have already started, and initially it will be open in one nation, in the next few days or week or whatever, and then gradually we open into anywhere around the world. But it all has to be done through Keshe Coin. You have to buy the Coins from the Foundation, and then through that, we transfer, you pick up, and very easy, because we want to control a lot of things, that we don't create a mayhem of the, what we've seen is happening in the world today. We have ?? started at ?? first. (2:16) And through that vegetation, when you get it, hold it, don't eat it. Hold it, and then consume it. And then you see what changes. It's not the digestion, it's before you put in your mouth, the current line of connection, does a lot of work. We embed the emotion of the Man within the structure of the life, and then you know how to play with it. You have to create a condition that that energy has to be transferred into. It's not the magic to do it, but you have to know how to do it. And gradually, we, we, we're coming to that point to do it.

Any other question?

R: So, do you mean that part of that preparation is like a psychological or... or... ??

K- Anything, anything. You see, this is the difference between most of you and me. Especially me. We look at the energy transfer in every aspect. You choose where is the matter and where is the energy, and that's where you run into problem. In the cycle of the Plasma Technology, in the cycle of the Cosmic Ray Technology, you look at the energy which changes to physicality. You lot look at all the physicality, but you don't look what's energy behind it, ?? which does it? Because when you get to that, physical side is already made, you can't change it. (2:18) But if you know how to play with the energy, it changes the physicality. This is why I say, "We feed the Soul to feed the body." That conversion, 99% of the Knowledge Seekers haven't understood, or they go halfway, because then it suits to what they read in the book, they don't look what they know in that ?? time.

Any other question?

Q: Thank you very much Mr. Keshe and thank you so much for this gift to humanity of the Game of Peace and Enlightenment.

K- It's Knowledge Seekers. We're all working together. It's a hard work of, especially one Knowledge Seeker, it's the brainchild ?? ?? work around the Foundation Ethos. Every one of us, I told you, this carpet of knowledge and work of the Keshe Foundation, it's a huge carpet and it needs many people to hold different corners. Collectively, the hard work, we're bringing that change. Made a lot of mistakes on the way, a lot of corrections and we still make mistakes, because that's how we learn. I was with somebody sitting very recently, he says, "Mr. Keshe, you're 68, you should stop retiring." And I said, "My job has just begun." It's a harvesting time. We have sown the seed of knowledge for 30 years. It's time to use it for peace, it's time for bringing the change, but it takes time. (2:20) And the beauty of it is, how we are achieving it, because we've been put under pressure not to be there. And that, as we say, "under the carpet we've grown to be a lot, but when we come out, that carpet will change a lot of music of the ?? world." We have to see, and gradually. It's a collective. This is the humanity changing, not somebody coming.

Any other question?

Q: ... In African townships, high unemployment makes it difficult to afford dependable laptops, cell phones and internet connection. Are there any plans to make affordable strong units to enable playing the game?

K- That is not on our agenda, at all. It's not something which you and me thought about to do, that ?? you don't contemplate.

R: Maybe as people start playing the game that do have the laptops and cell phones, then they'll be able to generate income enough to help others to get them as well, and connect with the game to make more income, to connect with others to play the game, etc.

K- The way I see it, is that 90% of the work will be done through CC. 10% or so of it will be done through KC. (2:22) CC is a Cash Coin, which you play for a game. KC is the currency which is a Keshe Coin, which is belonging to Keshe Foundation. As we say, Cash Coin and a Keshe Coin. And a lot of people would deal at the source, which is the CC. But, gradually we put a lot of things behind it, we monitor a lot of things, how things go. We are learning, it takes time.

R: We'll have to have AI do some learning too, because it's already had a hard time with Keshe Foundation, it's often call it the Cash Foundation' in the past. So, Keshe Coin and Cash Coin is going to be... it's hard enough for us to understand it... coming from AI...

K- It's good to get this guy confused, Mr. AI.

R: Yeah, it gives him something to do. Okay, that's good information. I think that's becoming clear as we go along. So, perhaps the folks in disadvantaged areas will have an opportunity through the game to proceed.

K- It takes time. We have to do a lot of work. It won't go like a wildfire. It takes time. People will start playing with it. They have to earn it, to exchange it. And we have to be ready. We have to get this 8,000 Units out somehow in the next 12 months, a year, two years. That it supports its independence and control. It takes a lot of work. It takes a lot of work. (2:24) But, now what we were planning to do in 2021, where we just got debunked (defrauded) by millions, now we have, in a way, continuing with that, but structurally solid going forward with it, that we take... what's called the knowledge is ours, the research is ours, the development is ours, the manufacturing is ours, the commercialization is ours, the retail is ours, we become a vertical process, literally. And with all the, what we call, public ?? bids cut with us, we become very strong inside. Now adding the financial arms to it, that gives it a very slowly but very fast dimension, because we have contacts through other governments, but when you give money.

Please Knowledge Seekers, play the game, go back, change it to KC, that we pay your governments. Don't pay it for us. By government accepting from money from somewhere, it gives us legitimacy, that they receive money from nowhere, and no government says no. Because you earn, they call it a gaming tax, it's not a gaming tax, it's a gaming earning. This is how it becomes legitimized ... very fast. Please get your people to play as much as possible to earn those 2 and then exchange it with us. Or if you have any funds, invest with us, buy the Coins and hold the Coins, because now the Coins is as a Cryptocurrency, not something in there, you receive as on your network as any other Coin, but belongs to the club of the Keshe Foundation, is not that if when I going to receive, automatically you receive Coins, (2:26) it's done all internal, like every other Coin.

And when the governments receive money from where they are. Governments are always hungry for money. Then we'll see the game. They'll encourage their citizens to play. We don't need to do anything. When a government receives 10 Coins, which is 10,000, where it came from, and we play a game that which government what we paid for how many Coins, they get their citizens to play. This is not going to be hard, but we can't go out and fail in the first weeks. Like the one that was run in January, now we saw the problems, you need about 6 months or so to see what problem comes, explain the government, slowly, slowly, we're learning ourselves and other factors are coming in, and then we'll see.

We still need millions to do it right. We need a lot of research to bring in a lot of other things online. And then we'll see. Once this war situation settles, I structure in a way that all those who are affected, civilians, one way or another will become and be able hopefully to use our system. One way or another. And then we'll come to an agreement with the nations to support it. We'll see what happens. The game, as I say, starts from tomorrow, or the day after tomorrow. And then, we'll see how you... (2:28) Now it's in your hand, we've done our job. You have to take this to people and let people play the game. And let your governments pay them, and they see money, they know they don't have to do anything, they encourage more people to play.

We have enough Coin reserve for next 10 years plus. The way this is done, this way, is that we don't let you mine the Coin, we have already mined it. So now we are owner of the mine, we have the thing on the table, we give it away. And it's for you to spend it, but learn the Game of the Peace. And when you can play something sitting on the side road, and get something to feed your family, then you see how many more people will find money and the thing to pay the ?? phone.

Any other question?

Q: ... Mr. Keshe, isn't it wise to, wherever we are, if you are in Tanzania, Kenya, Iran, wherever you are, just go, get a tablet, go sit in a cafe, or go to Internet cafe, go between young people, and then, actually you have to master this, and then go sign them up, teach them how to play. For example, I can go to Iran, go...

K- Please don't go to Iran, not at the moment, don't move. Sit back. You're good in Mexico, sit there, it's sunny. Have a coconut.

Q: Mr. Keshe, I'm talking about when you go, I can take a space, (2:30) get 10, 15 computer in a place, and then get the young people come in, especially in a...

K- They find a way that's... once this money comes, Man is so greedy, they'll go for it. We are not ready...

Q: No, I mean... I mean, I was thinking, I can go and teach everybody to sign...

K- We can go on the Internet and do it, I mean, because nowadays those things are... it'll go like a wildfire, but we are not fully ready for it. Let's just ?? go away...

Q: Physically I shouldn't go do that? Because I can...

K- You don't need to do physically, no, it's the age of the Internet.

You see, when we started the factory in Ghana, in Atomic, as you understand, they are killing the Iranians, but Atomic, Ghana is the only country in Africa, more or less, putting South Africa aside, has an atomic program, or a nuclear power station, or nuclear reactor, which is the size of a bucket. And our factory used to be wall to wall. When we made the original Gans's was made, given to the soldiers, this place is fully ?? if you're African Ghanaian, you know what I'm talking about. Atomic... it's called Atomic Area, it's got soldiers everywhere, looking after this one bucket. And all of them had diabetic gangrene, because of diabetic and the rest of it. And when they received these waters, they start drinking it, and the others start drinking it, the gangrene went, the pain's finished and everything. The gate where you come into Atomic, to the reactor, I think it's at least, total of a kilometer, 7 - 800 meters. (2:32) The atomic military officers were allowing civilians to walk all the way, all the way to the reactor, we are on one side of the wall, us on the other side reactors, to come and collect and buy Gans water for their diseases.

And more or less I think this raised a lot of alarm that it was like ants, you've seen ants going to the honey pot, they all lined up. People were walking, they took off, security was zero, because the soldiers benefited themselves. And then we learned to our certification from standard board and whatever, was water. But we had little different colors at the bottom of it, which is what, whatever, and we put it there in the bucket. And they, we just went public, if you want for diabetics, the blue one with the green or red one, or if you go for pressure, is the orange one with the yellow one. And people knew, they come and say, "Can I have that one? Can I have that one?" Once we are ready, the word of mouth will go bomb, everybody will use it.

We just set up this morning, we received the first keys to part of our research center. Another 12 months, we'll become one of the largest research centers in Space technology, with its own supporting structure. Then, all this needs to be backed up, to be put up. Once the ONN's work fully, and we go a lot using the Coin, it costs about 3 to 5 million dollars a day. (2:34) Not over a year. 3 to 5 million dollars a day to run such operation. One and a half million. You have to monitor the traffic, you have to be able to have funds available to do the work. You have to check everything is all the time runs. You need at least to sit on the top. Just monitoring the network, don't do. Failures, if somebody fails, how much you have to back up. Nature of the Man, he steals the money, where somebody loses their wallet, somebody lost their Coin, that is their lifeline. All this comes into it.

Q: You know Mr. Keshe, like the story of the monkeys in one island, they opened the coconut, and then the other monkeys in other part of the world, they started to copy the same thing, and... but they didn't see the monkeys in that island. ... I have a...

K- Have you ever... have you ever tried to open a coconut?

Q: No, I have... a guy made a hole in it.

K- Yeah, you try to break in a coconut. Years ago, I was in Bahamas, Bahamas used to be my playground. And I was with my two boys, they were five or six years old, and we were coming to Atlantis, we just learned that, you know, the Atlantis is not a ??, and those days was only for elite. And we went walking, and my youngest son found a coconut, and opposite the Swiss Embassy, Swiss Embassy was a very strange embassy those days. You had to go into swimming pool to sit by the bar for the ambassador to stamp your visa. Because he owned the hotel. (2:36) And he only gave visa if you were in the bar in the water, sitting in his pool. And we went for breaking this thing open, because we wanted to have a coconut inside it. Oh, we bashed it, we threw it up, we did everything comes to imagination of a Man, not from Africa. An African guy must have seen us laughing, "Oh look at this idiot", I said, "I don't know how to open a coconut." After we had a go at it for God knows how long, he came and says, "Do you want to open a coconut?" We said, "Yes." We were so happy, but we didn't know, we tried just to get inside to get a fresh coconut. He sat on the floor, exactly where we were throwing these things up and down, held in his hand, and in a one-second rhythm opened up hammering

it on the floor and he gave it to us with a still juice in it. It needs you have to know the way to get in, it doesn't need a monkey, you understand.

Q: I was thinking about, you know, when you when you think about something because the Soul talk to each other so that way it's going to fly. The whole idea of signing up is going to fly. That's what...

K- Let it happen, let it happen. I mean, if it's... If the knowledge goes, we'll bring you a lot.

And, you know, they say Netanyahu is dead. Let's say he is, whatever. In 2016, I... The guy actually wrote me a message, passed couple of days ago. In 2016, I was on the East Coast, not, 2015, (2:38) I was on the East Coast of Italy, or West Coast of Italy, on a holiday. And the Minister of Education of Saudi Arabia, a friend of mine, we were both in a hotel, with our families. And, I said to him, you know, "I'm trying to get into Netanyahu, to talk with him." And, one afternoon we were sitting with his advisor, having a coffee, talking. He said, "Why don't you, when the talk came, you do, because you have the connections." I went through CIA to Netanyahu that we would like to have a discussion, stop the war which is going on today, in 2010, years ago. The CIA guys they told me that you, we passed a message on that you want to start talking peace. He said seven days, within a week we get a response from the, what do you call it, from Tel Aviv. Few days, it didn't answer in 7 days, few days later, after 7 days, I asked the CIA people, "What is going on? Why don't we get the news from Netanyahu?" He said, "We have a message." Well, we asked them to read it, to reconsider. He said, "So, what was the message? What is the message?" He said, "I negotiated with anyone but Keshe. We talk with anyone but Keshe." Because if he gets into negotiation, he'll... the Iranians will... we are not prepared to talk with him. And he said, "They're afraid of you." And he knows.

I talked to the Iranian government officials, very recently, in past, very recent, recent past. (2:40) I said, "Let me negotiate." They said, "Very simple, we keep you safe, we have kept you safe, but not being in these things directly, even though you, we are in the background." These people are not there, they have one target. And both targets was that, "Messiah comes, they have to get Iran and the rest." Doesn't matter what name it comes into, they are coming in because, by October 2026, they have to have the Messiah on their hand, according to the writing, otherwise they fail. And, this is what we see now in, in Middle East. People are not prepared to talk peace, because we cost them what they planned to do. We wished them, we gave them every support, and everything was done accordingly. We thought about it, but they have to accept it to do it.

We gave the key to the government, you lot bash him to death, he is again like them, he gives everything to government. We gave you the Key, you're still sitting. 10 years later, 2016 I opened the patent. How many of you have made it internationally, known and done with it? None. You made enough to do. According to Chinese statistics, 200 million a year in China, in 2020, was part of the use of the Keshe Foundation technologies, by

Knowledge Seekers and the others. (2:42) 200 million dollars in 2020. And that's what it is.

Q: Mr. Keshe, I don't think, you know, I saw a video, I don't think people in Israel are normal, because they call everybody else, except themselves, "Goyim" and they say, you are the lowest, You're like an animal and you have to work for ?? (them).

K- There is this, the Jews in Israel, the Jews in Israel, they call themselves, the, what you call it, what's the name they use, they come up with it, the 'Chosen One.'

Q: Yeah, and also I see like little kids, if they, somebody passes with the cross for a priest, they spit on them, they, even the old man grabbed the woman's bag and just hit the woman, because she was talking about Jesus, and they're not normal. They're not normal, these people.

K- It doesn't matter. It's the mentality, it's the mentality. I, in 1980, my great-uncle came from Israel to Manchester with his wife, because he is my mom's uncle. Her mom's brother. And this woman is one of the ones you call that. They had to wash the whole house. The kitchen was split into half, four different dishes. And I said to my mom, "Why have you invited her?" And for such a long time, couple of months, for a few days. And this woman, every time we said something, because my other half is Muslim, (2:44) she kept on talking to my uncle that these are 'goyim,' these are, what you call, 'non-believers,' that's what it means. And non-believers are not worth talking to. This is the way they believe.

Q: Exactly Mr. Keshe, you know they just see you as an animal.

K- No, no, these animals are paying every money in the pocket to find a hole to hide it. Let's see, it's not a good situation today. I hope the Americans won't bomb Iran over the years (Iranian New Year). That'll be the 'lowest of the low.' But these people have no dignity, we have to see.

Q: Mr. Keshe, I have a question regarding the two questions, one is about Black Hole. Like for example, Black Hole has been... I mean, it's one of the greatest asset for the whole system, wherever we are, because it actually distributes material through the whole galaxies or the Solar System. But then, sometimes the stars and planets become, they're also being swollen by the Black Hole. So, that's, if it is on the path, and it's on the Earth ..

K- You see, so, Black Hole, even the Earth, in some points, from the point of observe, it looks like a Black Hole.

Q: You mean it's going to look like Black Hole?

K- From some point in the Solar System, when you stand, you look at it, yes it does. Even the Sun does.

R: There's actually a new research about that, that just came out a couple of weeks ago, that they discovered this density in the center of the Sun, (2:46) and they believe it's a Black Hole.

K- It is a Black Hole. It's where to the point of observation, our observation, the energy intake is balanced. That's how they look. This is why we get Black Holes on the surface of the Sun. The internally Sun is very cool. I don't... I think in some points could be even minus. The but, it has a high radiation capacity. This radiation capacity, which is more or less Tritium, as it goes out as energy, at some points, in interacting with other energies of itself, loses that energy and it changes to matter state. It's like we have magma underneath the Earth, in the Sun there is no magma because there is no matter state. Inside the center of the Earth is just a plasma, there is no heat, there is nothing, it's more or less even cold. But when the fields react, radiate, because nothing is changed to matter, internally, that we call magma, on the boundary it changes due to a couple of factors which depends on the conversion, it changes into like a liquid state of plasma. And when this liquid state of plasma interact with the field of the plasma itself which is already transferred, it creates the heat and the light. That's all. But inside it's black. (2:48)

Q: You said it's black because it's very passive .. so the M field ?? .

K- ... It absorbs all the spectrum of the lights. What a body doesn't need we see as the color of it. What it reflects. You understand? And so it depends. You can stand in one point, you look at the position and you see the guy next to you, centimeters away, he cannot see. You say, "Look at this." "I don't see." Till he comes to your position. Understand? And Black Hole is the same. Black Hole is not black, it's just that it depends on the point of observer because what is black to you, I have a different field of strength, is light to me.

Q: Okay now Mr. Keshe when you say now you say okay so I understand what you're talking about now I get the point but now my question is you know when you say everything is a Macro and has a Micro so we our body is like a micro of the macro of the universe so do we have Black Hole inside the body?

K- Yes we are.

Q: Where is it?

K- Everywhere. It's actually the biggest Black Hole is right in the center of our brain. They call it the empty space. We all have it. It's actually, it's not, it is a black because it doesn't interact with anything and it absorbs all the energy in the full spectrum. Your emotions, your thoughts, your fields of thinking and talking. The AI of the Man sits in the Black Hole of the Man, in the center of the brain. (2:50) Because it even predicts what you're going to talk about, and you talk about it and you don't know where it came from.

Q: I can imagine Mr. Keshe, I can imagine how you...

K- Just think, I always say, if you can answer this question, we are halfway understanding the World of Creation. You start, without any idea, telling a joke. Yeah? You've never said a joke before and you're just coming out. Who knows the end result which makes people laugh, except which is... it's already planned, you just blubbing it out, without actually even thinking about it, yeah? Where did this happen? It comes from the Soul, it comes from the Central system. It's already set up, that by the time I say this joke, you'll have this reaction, it's about these people. Your thoughts, how does your thoughts comes and it becomes to words, you never think about it. It's all controlled by the Central system, which is the, what we call, the Soul. The Soul is not just being there, it has a function. Monitors, knows, it's your AI, he knows exactly where everything is and what needs to be done. Even knows the reaction of the people, when I say this, these Souls will give, which is what I'm needed. You know the comedians are the same as the footballers. Opportunistic, and they make from the people. Look at the opportunity last, we'll say last week. The Arsenal player, 16 year old boy, out of nowhere being opportunistic, has now become the hottest thing in the world of football. Youngest ever player scoring a goal in English Premier. School boy opportunistic, the opportunity he made for himself. (2:52) And the same is with our brain. Our brain is a AI opportunist. It connects with the other Soul, it already knows through the Souls, if these words are said from this mouth, it'll create laughter or joy or whatever, in the others. Opportunistic. Soul trained only to look for, it's hunting. So, if you understand this, the rest of it is just a game play.

Q: ... When we go back, we said God, I mean, we said, we say God created all the Prophet, Moses, Jesus, Muhammad, he brought them to the planet to teach...

K- God created a pocket, not a Prophet.

Q: I mean, they came from God, didn't they?

K- You didn't get it, did you?

Q: Let me ask my question. ...

K- A Pocket as a Prophet, not a Prophet as somebody profits you.

Q: No, no, Mr. Keshe, because you know, the Prophet came to, from God. I mean, you said it, God sent him as a Messenger. You said it before, as a Messenger, the Soul was delivering, but the physicality wasn't. Okay, my question from God was, I asked God, He didn't answer, but I will ask you. God created more... okay, so God created these people to give us message to live better, to think, to tell us we are image of God, we should live like God. Then, everything just went south, and then they used whatever, I mean, they didn't become peaceful, and then God now sent you to give us a message, now they are, you don't have to have a middle Man, you should connect with yourself with God. (2:54) So if God knows about everything, why he goes through all those work to bring in messengers and give us all those and stuff, get people stuck to it, now he wants to undo it. What's the point of that?

K- It's not undoing, this is a Manmade situation. You heard about a guy who went to the churches, he said, "Pray." I prayed. He said, "Do this." I did. God said to do this as well. I did. He says, "So what?" He says, "I asked God for money. He didn't give me. So he didn't listen to me. I don't listen to him. I don't go to His church." It's made up for us. We are strong enough. We are clever enough, we have made that, our Soul puts us in touch to understand Totality, but do we need a Prophet? So we, we allow it. We allow these things to happen. It's us who creates the condition and those who understand abuse the condition. Simple as that.

It is, English has a most beautiful thing about this. We have to understand how things work, and what is set for what purpose, and who's behind it, and what school of thought they've been brought up with. (2:56) In 1990s I was a member of a charity organization. I was invited to become because of my position because I used to donate a lot of money to this structure. And they said there's an emergency meeting. Went to emergency meeting. A guy came saying that I... you know, I've been helping, donating, blah, blah, blah, blah, blah, blah. I've fallen in a hard time, I... he was a shopkeeper, he doesn't, you know, "Can you help me just to get out of the trouble, I... it's just temporarily, and I can't go to no bank, nothing, and it's my life, you know." I said to the Chairman, "We approve this, because that's what we have." He says, "No, we are here only to receive, we are not here to give." I said, "What?" I said, "You're a charity, your job is said to do." He said, "No, we are not here to give." I said, "You're like a religious people, on one way only." I resigned. That night I walked out and said, "No, this is not..." And I went to the guy in front of me, he says, "How much do you need?" I said, "I told you, I said, tomorrow morning go to my office, my secretary will give it to you, I don't want it back. When you succeed, come back, give it to my secretary, or give it to somebody else."

1983-84. Strangely, the son of the wife of another member in the board, (2:58) next day, came to my office, seeing my secretary. I said, "What is going on?" He said, "You gave that much money to that guy last night. We want some money as well. If you want to buy a house of ??, that's charity, that's a need. But you understand? This is the way it is. These religions are made, these charities are made to be. It doesn't work that way... Profit. Yeah. I've been through a lot with this humanity, don't worry when I sit here, tell you things I've been through. A lot of it. A to Z of it.

Any other question? Let's answer a question and go. It's nearly 3 hours, past 3 hours.

Q: ... Good afternoon Mr. Keshe, why don't we use one strong magnetic field, in order to disable the American army and all of their apparatus?

K- Don't put your finger on it, because I can go wild with it. I asked Ayatollah Khamenei office for weeks, don't do anything, just show. (3:00) No. You've seen it in past few days. The mentality with this, the Iranians are waiting for this war for Messiah to come. This is why they are all fighting. They knew the Israel is going to attack them. The Israel is ?? going to attack. One is waiting for the Messiah to come and the other one is there when Messiah comes. It's very. This war is the most strangest war and then the Vatican is

putting all the money into it. They're all three fighting to get the Messiah. And they said, "We decide when." And we have so many weapons we don't show. And I was... yesterday, the day before, I said, "Oh God, when they're going to show?" Have you seen what they've shown now? The West is dreaming, they dream about having such a weapon, now they've got a dancer missile. Couldn't you use this at the beginning and just wipe out a lot, it would have stopped? Why did we have to wait two weeks to get this missile? "Oh, this is nothing, we used only what is ten years ago, we have technologies more advanced than this." I said, "Why did you do the whole damage in one go at the beginning?" "No, no, no, no, we have to fight in a way that we get to the point that it brings the Messiah." Now you understand how they're fighting. And I'm sitting waiting to see when they show something to do with something.

And they say this missile they came out a couple of days ago with, 2,000, 2 ton, with 20, 80 heads and the missile is gone. They don't have enough weapon, it's gone. That's why last night they wiped half of Tel Aviv. (3:02) You haven't seen the pictures we receive in security. Tens of thousands last night were slaughtered in Tel Aviv. Tens of thousands. The West is covering the news like hawk. Over 8,500 bombs have been dropped on Iran. All are historical. What historical places got to do with the bomb? They are wiping out 2,500 years of history that didn't exist. And the Jews came, Messiah came, we prayed for it. The most ancient historical castles have been wiped out. What's got to do with the war? 8,000 bombs. And they talk about two missiles. And they said nothing happened. How come one bomb can kill no one and there's 18 apartments, everybody in the house and is gone? What happened? Jews are magic can jump? They were over 4,500 people in Been Guiron airport sitting, waiting at night for the first flight to get out. Terminal 3 is gone. What happened?

You see, the process ?? Israel is using is very good. Who's dead? Who's missing. We can't find the body. This is a policy Americans are using. We have so much fatality, but they don't tell you how many killed because they're wiped out. You see how many missing people will be recorded, after the war. (3:04) This is where they come. This is where new technology are waiting to see what they show tonight, or tomorrow night. Apparently, there's seven more technologies which we have not seen. The funniest one was the hit ?? General Ford what you call it, aircraft carrier. And suddenly happened that there was a problem in the toilets, and they had a bit of internal fire. The day they got hit by the missile. Everything is accidental and has nothing to do with the war. Because they can't say, "We lost two most important aircraft carriers in the American Army."

Q: Mr. Keshe, FATO-2 had a Plasma thing in it. It has... I saw inside of it, it has two... unit has a Plasma, it's created with Plasma, it's called FATO-2.

K- Oh, you don't know what I know, just forget about it. But let's see how they kill each other. They are bringing the latest technologies. The Americans have brought these apparatus, the Israelis have nothing. Israel has totally no defense. I feel sorry. I asked for Iranians to stop. They say, "If we stop, the other ones will slaughter us." Tonight and tomorrow night, if they decide not to stop for the New Year, they're going to show new technologies. We have to be very, very prudent with what is going on, but it's not a good

news. (3:06) I had the same emotion 40 years ago when Saddam was... They used to wait with Saddam, exactly, we have a ?? second the New Year's Day start, New Year, they used to send missiles into Iran on that time. People sitting around the New Year table, you don't do that to your dog, let alone your enemy or whatever in the world. And I'm waiting to see what the Americans do on the ?? time. What do you think? Killing innocent people. Let's see which one finds the Messiah. The funniest thing is, if the Messiah appears to be the Iranian, say, "Were the Jews accepting? Or are they waiting for their own Messiah?" This is the funny part. And now the Messiahs have to fight.

R: It's a very strange time we're living in.

K- It is a strange...

R: Look at what they're doing to the oil industry. They're... Each country is blowing up the others oil fields, and the oil infrastructure. This is going to set back the entire... Oil industry, hopefully forever.

K- Oh no! This is all done by the Americans. Most of the refineries are hit by the Americans. No, no, no, no, no.

R: And they're making, they're blaming it on Iran in terms of...

K- Yes, because America has 11 million gallons of oil, or barrels of oil a day. They are making money out of this. They are bombing the refineries. The Americans are... The Saudis, when they hit their first refinery, and it's American made drone, with all the serial number on it. And they blame Iran, now they don't do. (3:08) Because, now with closing the Straits of Hormuz, they're selling their oil into Indians and to everybody else. The way they did the same trick with the pipeline through Ukraine. They blew the pipe, the gas pipelines, and they forced the Europeans to buy American high-priced gas. That was the game. The American oil industry is minting it at the moment. And the ones which are heavy are selling the new, what you call, the Venezuelan oil. American oil companies should show such a huge profit that all the losses through tariff will cover. That's where it is. Don't be blind into the... yeah, of course America is blind, because now they've become the biggest supplier of oil, because it's theirs. All your fracking is paying out. \$200 a barrel. Oh, American oil companies are praising him and 10% commission on every bank account. Don't get fooled by their bombing and refineries. Of course the Americans are selling their own. They did the same thing two years ago when they blow the pipelines, because the Europeans have to buy American gas. This game is not what you see.

Religious people are making their way through it. The other people are making money under. Ayatollah Khamenei, on his ?? death, has... he is one of the richest Man, 90 trillion. It's reported in different accounts and investments around the world. (3:10) 90 trillion. American debt is 37 trillion. Now you understand.

R: Ok, thank you for that input.

K- Yeah, it's a very... this... The more Americans blow up the Straits of Hormuz, they shut everything else. You see, the next game now is, they hit ?? Khark Island. 90% of oil, which goes to China. And China gives technologies and machinery to Iran, they don't pay. Now, China is going to get tight for oil, because Chinese refiners are sitting there. China became a trading country with oil for past 2-3 years. Now it ?? can't touch, China has about 6 months reserve plus and we have, they have a lot of tankers in the ocean, they ?? wrote black (?? not taxed). What's going to happen?

In next 2 days, most probably even today, tomorrow, maybe next week, China will go for Taiwan. What's going to happen? American weapon technology, American industry, computers, will stop overnight. Taiwan produces 70 to 90 percent, some of them specialized, but they're common chips. That's why they fight over Taiwan. And then what's going to happen? You give them oil, and let you have chips. This is not fish and chips, this is microchips. China will go for Taiwan, to bring American on their knees. And they will do. (3:12) They did with raw material. And we've seen some movement into Taiwan today. But, China is ready to go in. China was ready to hand, to take over Taiwan in 2027, the agreement was made. But they'll go in now. And they go with Taiwan, and then the oil gets caught. But Americans are making money. It's cold winter time in most of the Europe. And they sold the gas, the pipeline of Ukraine. Now the oil. And who's taking? Mr. Trump. His trumpet is very well done. The same with the refiners, which are heavy. They took it to Israel. It's not for America. of selling it in the back black market.

R: I think Trump's has another game in mind because they just invested all of his money basically into a fusion company just before the war broke out. So, with billions of dollars into fusion from his, which is an infusion of money from the cash media company. They're now spinning off from that investment and trying to separate themselves from that investment, with the fusion company. But it seems like, because the oil refineries in the US are not going to last, if this war continues with Iran.

K- They don't need it, they're making it earning. There's so many refineries in Far East, that they're chunking out cheap oil. Cheaper than refining in America.

R: If they can't get it out of the areas where they are, then...

K- Oh, they can, don't worry, they have no problem getting it. They've been doing it for years. (3:14) You know, the Second World War between Japan and America, they all talk about America won. It was all on... about the islands with the rubber in it. It was a rubber island thereafter, because if you had the rubber, you could get the wheels running, the cars and everything else. All the war between Japan and America, second... before Second World War and Second World War was an excuse for it, was to do with rubber island. Now, Taiwan, with 70% of the micro... every microchip... if you have a computer, most probably 90% of the chips on it is from Taiwan. You have a laptop, you have a mobile phone, comes from there. And now they take the island, America can't have any. And you don't have a chip, goodbye Apple, bye, bye.

R: Yes, indeed. Well, then we have to move to a new Plasmatic World that doesn't include chips like that.

K- Yeah, we got to look for the fish.

Thank you very much for today. Sorry about this. To all those who are Japanese, the Persians, the Afghans, the Tajiks, on the Silk Road, Kazakhstan, West part of China, Happy New Year to you all, and I hope this year will be a good one, if there's still anything left for humanity to make it. And don't forget to register after 12 o'clock, with the CC the new games, and start making a living. (3:16) See you next week. And I hope there's still another week that we can be there. Thank you very much, Rick.

R: ... (3:18) Okay, message from the Universal Council. "We, the Universal Council, invite the Keshe and Universal Family, present on the Earth, in unifying at the Soul level every time, every day, at 9 PM, Central European Time, or Central European Summer Time. Giving from our field strengths to enlighten the Souls of World Leaders to negotiate and sign the World Peace Treaty, pledging their nations to everlasting peace on Earth and throughout the Universe."
