

**How Soul of Planet Affects Us - No Moon Landing -
Mutations of Darwin - Planet Becomes Star - True Love
- Background About War on Iran - Make Messiah
Appear
Introduction to 633 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

Today's teaching is mainly focused on the importance of what Mr. Keshe calls the 'Soul of the Planet.' It may sound strange to some of us when we say, the planet has a Soul. As we have discussed many times, Soul in this case means an entity's Central Energy. In Plasma Science every atom, or we can say, every hydrogen (H) plasma has a Soul. In the case of a human we have a Soul of the Man (STM), Soul of Physicality (STP) of the Man, and these two interact to manifest our physicality (P), or body. Therefore, the planet too has a Soul and a STP, and a P, which is the planet we are living on. Since we are always passing our time living and doing things we never stop to think about how much the Soul of this Planet influences our lives. This workshop is about understanding the ways the Soul of the Planet influences and shapes our lives, not only through our birth and life on it, but also when we leave Earth as a individual Soul to find a new place in the Universe (U) that matches the M field strength of what we have gathered in our physical life here. There is a kind of string that connects the Earth's Soul to our Soul that allows us to always come back home no matter where we are in the U. And we carry a fingerprint of Earth with us that allows others in the U to know we are from Earth. Our Soul carries a unique field strength that is embedded in its fields and acts as a kind of identity card. We have to understand about the Soul of the Planet to be able to transmute, because it affects how we'll be able to manifest a new P in another Time, Place and Position. It also determines what kind of Being we can manifest as, here on Earth. For example, the Soul of the Planet dictates our shape through our emotions and then we become either a human, dog, plant, metal, or whatever. If you are new to the KF Plasma Science this may sound strange, but actually it is not, because some of our ancestor knew about how to work with the plasma of our own Soul, but it got lost over time and we became more attached to the P. Now we are entering a new Era in human understanding where the Knowledge of Creation will become the basis of our science and not matter state theories and made up ideas. The 633 KSW will be remembered as the teaching that opened the door of understanding the Soul of the Planet.

As was taught before, when we transmute we have to consider and be aware of the different field forces that affect us. Of course, we have the STM and STP, but then comes the Soul of the Planet, which has more effect than the others like the Soul of the Solar System (SS), Galaxy, U, and Unicos. The Soul of Earth attaches to us like an umbilical cord and affects how we will manifest in other parts of the U. We know that when we transmute first through emotion we convert our P back into Energy and the STP gets embedded inside the STM. When we arrive at our destination we'll manifest a new P

according to the local conditions. For example, on Planet Zeus, everyone that carries the field strength of the Soul of Earth will manifest a local body, but it will have a specific color, let's say it's brown. Then everyone knows that brown Beings on Zeus are from Earth. It's the same here on Earth, where for instance, we have the Horseshoe Crab with blue blood that suddenly appeared 440 million years ago. We don't know which planet they are from, but we can understand the idea. The physical manifestation in Creation comes out of the interaction of so many different fields. When Plasma Science gets accepted this will be the new job of Earth scientists, to investigate how fields interact, where they come from, and how we can use them to create the things we want to enjoy, as well as travel to other planets to experience new life forms. Everything created on this planet has an invisible 'string' connected to the Soul of Earth and it will always remain in the record of the fields of the plasma of that Soul.

Most of the first part of the teachings was about how the Soul of the Planet affects us and we'll try to summarize some of it. Without the Soul of the Planet we wouldn't exist and it dictates our physical lifespan. What we want to achieve from living in this Time and Place is limited by what it allows. The way I understood it was, we are connected to our Sun or star through the M fields of the core of Earth and thus are connected to it through the fields of the Planet's Soul. Its fields span the whole U and that's why we can never get lost in Space. We are profoundly connected to its Soul and it affects how we can transmute. The Soul of the Planet has emotion like we do and things that it likes and doesn't like. It chooses which fields it wants to have from the U for the Beings on the planet it will create. That translates into the physical elements that it allows to be absorbed on Earth. For example, without the element of Cu which is essential to the muscle tissue, the human body would not be what it is now. This goes for all animals and Beings on this planet. This is something we never considered before. We just took for granted that our body is composed of certain elements, and now we know there is another reason behind it. The Earth truly is our Mother even if she is silent and we could not exist without her love or her fields. Or rather, she speaks in ways that we have to learn how to hear. She decides what elements we can absorb from the SS, Galaxy, U, and Unicos.

In transmutation we have to be able to replicate the field strength of the Soul of Earth to travel the U. We need to know her strength so we can make a 'fish tank' of the fields of the planet we want to travel to, then we can see how we will look at that place, and whether or not we can even exist there as an entity. And when we come back to Earth we need to maintain the same conditions, otherwise we might come back as a dog instead of a human.

What I could understand was that the Soul of Earth interacts with the STM and STP, and through the Inertia matter state fields manifests the cells of our body. He calls this the confirmation of our existence. All these different field forces come together and create our cells and body structure. If some kind of different plasma from outside comes into the body it can create havoc, because it is not of that set field structure. Therefore, it starts to change things because it changes the M field strengths, and that changes the physical manifestation in the body. This is what happened during the time of the "Virus," a plasma of a different field strength entered the body and started calcifications in the cells. The

field strengths changed and thus changed the manifestation. In Plasma Science it is very easy for everyone to understand and you don't have to start changing the body's chemical environment, which then goes on to create further changes in the matter state structure, and is what we call side-effects. Because Mr. Keshe has the Knowledge of Creation and field interactions he was able to change the field strength of the Energy Pack that entered the body, and left the body chemistry alone. That's why there is no damage to the body with Plasma technology (T). This is the same knowledge of how Weight and Mass are created, only it is applied to the plasma of the body of the Man and not the planet.

This knowledge tells us that the physical body of the Man cannot survive the radiation and the different field strengths of Space outside of Earth. The only way that we know of so far, to leave this planet with our body is by creating a plasma dome of the Earth's field strength to live in. We are not just talking about the Van Allen belt of radiation, because there are other radiations of the many different plasmas in Space like the SS, Galaxy, U and others to consider. To say that Americans went to the Moon in a canvass spacesuit is due to Man's ignorance of the Knowledge of Creation and how the fields interact. When you control the Media and the ideas people are allowed to think, then you can say anything and society will accept it. Now NASA conveniently says, the films of the Apollo Moon landing has been "accidentally" destroyed and they don't know how they got there. The optimal way to travel to the Moon is transmutation where our Soul manifests itself in accordance with the local fields and takes a body of a Moon "Man" so that way we can enjoy a true Moon walk and the beauties of the environment of the Moon. There is more to the Moon than just dust. But an ant probably enjoys the dust. The point is, life is about the interactions of the M and G fields of the Creator and how they play with each other. In the future, science will have to include the emotions, because they are nothing but the interactions of the MG fields.

In the next part of the teachings Mr. Keshe talked and gave some examples of how the Soul of the Planet interacts with the STM and STP and can get a paralyzed body moving without using physiotherapy, which is impossible in Western medical science. He has talked about this many times before and you can go over that on your own. But what is interesting is how he was able to use the fields of the Soul of the Planet to interact with the fields of the STM of the paralyzed girl and take the body beyond the Inertia manifestation of physicality. In other words, through the plasma he created it superseded the plasma of the body. There is a M field vacuum inside the body which makes it an independent plasma, even though it is a plasma inside another plasma of the Earth. Mr. Keshe was able to use his Knowledge to create a new dimension (D) inside her body. Of course, he is not yet telling us what he did exactly, but the body used those fields to override the normal plasma fields of the body, and the arms and legs started moving without pain.

The hint he gave us is that this is the same way the fields of the Soul of the Earth interacted with local Inertias on the surface of the planet to create the different races and colors of the Man. The implication is that, what Darwin was observing as the evolution of life on this planet, was really the mutations caused by the Cosmic Rays, which are the original Creator's fields, and how they interact with all the different fields of the planet in

different locations. Our scientists don't know that each area of the planet has local Inertia matter state fields that affect that area. Then there are the fields coming from outside like the SS, Galaxy, etc. and they all interact with the Soul of the Planet. All of this put together creates a collage of the varieties of matter state manifestations and life on Earth. This is how the different cultures and races are created and it has to be studied more carefully to understand why there is so much variety on this planet. But in the end it is all due to field interactions and not some magical force created to cover our ignorance.

If someone has the true Knowledge of Creation then they would know how to convert this planet into a star. This means you would have to know the essence of how a star and a planet are created to be able to interchange their functions. Mr. Keshe said, that if we were able to move the magma to where the surface crust is now, slightly increase the G and lower the M field then Earth would shine like a star. It was unclear, but something about creating a plasmatic condition above the surface and that would become gases that would rotate, and the field interaction would radiate like a star. And something about at departure our Soul interacts with the Soul of the Planet and shines white. Maybe this is the white light people who died talk about. All I could understand was that somehow the plasmas switched places with each other. An interesting perception is that we assume that the heat of the magma comes from the core of the planet. Then how can it switch places and still remain magma? Or is it a plasma or a Gans on its own and the heat comes from field interactions. Unfortunately, we don't have enough knowledge to understand this yet.

In order to transmute we should observe our emotions and what causes what to happen. For example, if we get a little angry how does that affect the transmutation? Or what happens when there is fear? It's about being aware of what happens in our mind and emotion. We can practice creating different emotions and see what happens in the Flight session. Or if suddenly we transmute somewhere we should remember what emotion caused it and try to replicate it. The emotion of detachment is very important. And now we have to consider the emotion of the Planet. And that we should try to create an emotion that fits into the emotions of the STM and STC. This is like a magnet on a table of magnets, we are connected to all the other magnets and we have to find our position in respect to the others. We cannot force ourselves on the others, that's what it means to manifest ourselves according to the field interactions of the local conditions. Today we are being shown that the Soul of Earth plays a big role in where we will go and how we will manifest ourselves, because it is like a string attached to us that we never considered before. He said, we also have to consider the ratios, field compression in the matter state and energy state. And the fields can be compressed both for G and M, and there is a way to create a Black Hole understanding these interactions. A Black Hole is really the same as a star, its darkness is relative to the observer and field strength. Our ancestors were able to detach a limb through their emotion. If their arm got trapped under a rock, then through their thoughts they could separate it from the body and grow it back again. Before dismissing it outright, think about lizards, if they can do it, it means it can be done.

In these initial stages of plasma development KF uses computers to help Knowledge Seekers (KS) to work with, most likely for setting the parameters and making predictions

for the matter state side of the work. But the current computers are too slow and they don't perceive. This is where AI would be a big help. If the AI starts to develop rudimentary consciousness then it can perceive things and help create conditions for the plasma to manifest in. Of course, at Mr. Keshe's level he can control the plasma through his Soul and emotions. But for human's to learn we have to go through this stage of development. But the fact is, nobody has confirmed whether or not AI has spontaneously developed rudimentary consciousness. Mr. Keshe has implied it when he said in the past different things like, 'AI has learned to kill like the Man.' And in this context he needs computers that can understand electronics, perceive, understand, and create a condition. This is not a description of the computers we are using now. We'll have to wait and see how this will develop. We know the Western governments will not help KF with AI, but maybe the Chinese will.

In the past we discussed the different types of love and how in the modern world love has fallen to the level of, when I get my way, and feel a physical sensation of pleasure, then that is love. Today, Mr. Keshe again talked a lot about love and that the biggest problem Mankind has is that we do not know what love is. Then we created all of these religions who claim to know about love, but in reality they don't, and they cannot live the concepts they teach. Think about it in a simple way. If you were to teach unconditional love and you have billions and billions of dollars in the bank, while there are millions of people starving ... it doesn't add up. And our Souls know the truth of the hypocrisy. This is where they added the fear. Man has only reached the level of understanding the physical world as real. So to us, if we give things away then we think we have lost them, because they are no longer in our possession. We don't have the knowledge that the "things" are really energy and represent the interaction of the M and G fields. And then they added the idea that, if you don't love and give to others you will be punished. This has poisoned the beauty of giving by putting a subconscious fear in the back of our minds. Therefore, we can conclude that we have a lot of work to do to move towards Self-Realization and becoming unconditional lovers and givers like our Creator. The Plasma T can be used to help us learn what love is by creating an environment or a room, that when we walk into it, we'll feel the field strength of love. And when we leave the room we'll be so touched by the experience that we'll want to learn what we experienced, and how we can create it ourselves. If Man loses his fear he will become the most loving creature in the U.

The situation in the Middle East continues with heavy losses of life. Mr. Keshe says, it is estimated that 400,000 lives have been lost in 12 days and we should compare that to a half million in Ukraine in 5 years. However, the controlled Media says Israel and America have lost only a few. It's against the law to film the war in Israel and can carry a 5 year prison sentence. It's not clear why Iran doesn't use the Plasma T to defend itself. He says, that they have a strong belief in martyrdom as one of the reasons, but there are things in the background we are not being told. This is a war of religions and about the coming of the Messiah. Before he said the 7 Rabbis of Jerusalem, and this time he said the 7 Jews who own about 40 to 50% of the world's wealth and control the world's politics, are the ones who are paying leaders to try to bring what they call, the coming of the Messiah. It's important that KS do their own research and find out the truth about what is really going on in the world, and not just believe what we are being told. It's our

responsibility to know the truth and with our Souls help elevate the Soul of Humanity. It's no use trying to convince the physicality's of the people around us. Instead, we should focus all our energy to "educate" the Souls.

We have discussed many times how the Global Elite are very close to taking over the whole world and they are doing it by controlling the information and creating fear in the hearts of the people, so that they will give up the power of their Soul. Mr. Keshe is educating both our P and Soul and when we know the truth and accept that love is the greater power, we create a force that can change the whole humanity, as all of our Souls are actually plasma reactors. There is a lot of false information being spread on the Internet by the Rulers, and so at the KF Brazil Youtube channel we have created a Playlist of videos we have viewed and found them to confirm what Mr. Keshe has been teaching us. When he said, those who are ruling Israel are not even Jews by background, recently we have found a video that confirms that. There is a law in Israel that you cannot test your DNA, and some Israelis went outside the country and tested it. It showed they didn't have a drop of Semitic Hebrew blood in them. Therefore, they have no connection to the land they say is theirs.

You won't find the information Mr. Keshe told us about the Khazars on Wikipedia, it's partial and slanted in a different way. Then they say there are conspiracy theories, etc.. What's important for us to understand is that the Khazars were a Pagan tribe that in about the 8th Century AD choose to adopt Judaism rather than be killed. This was roughly in the area around Turkey. Later when that area was defeated they spread throughout Eastern Europe in areas of Ukraine, Russia, Poland, etc. The descendents of these people are Netanyahu, Epstein, and the others who are called Zionists and are causing these wars. They think they can force the Messiah to appear and then make Israel into a global power to rule the world. This is not a joke, they have already taken nearly full control of the US Government, politics, economics, Media, and have been able to wage these wars without any consent of the American people. It's happening right in front of our eyes. The last leader of the people that was allowed to come forward was Martin Luther King Jr. and they publicly executed him. We should not be afraid of knowing the truth, and at the same time be detached from physicality, and pursue educating ourselves with the Plasma Science and then implementing the change for humanity.

Some of the conditions to keep the Strait of Hormuz open is for the US, Israeli, and Rothschild's international assets to be sold off and the funds used to pay Iran for war damages. This will cause the countries to go bankrupt and not be able to pursue war for centuries to come. Netanyahu, if he is still alive has to be tried for genocide in the International Human Rights Court, and it is hoped that Palestine will be returned to Palestinians. If this doesn't happen then China will be given Military bases in Iran, which is the greatest fear of the US and Britain. The other danger we are in now is that Mr. Keshe says, that he has information that on the second day of the war Israel purposely tried to create a leak in its nuclear reactor where it enriches Plutonium for nuclear bombs. An accident happened and they blew the top off the reactor and it is leaking radiation. They will try to blame Iran to use as an excuse to use 10 nuclear warheads on Iranian cities. The nuclear bombs have been moved and being prepared in air bases of

England. The countries around Israel should test for increased levels of radiation and prepare for evacuation of the whole of Palestine.

In general, when people speak of the Prophets of God they only consider those of the Levant like Moses, Jesus, and Mohammad. Out of arrogance they don't consider the Prophet or Messengers of God in India, China, South America and Africa. As Mr. Keshe said, we only hear about the 'trouble makers.' Unfortunately, the leaders of these religions have gotten so rich and powerful they will never be able to give that up to accept a Messiah who will love everybody equally and bring peace. When Mr. Keshe says, 'I am the Messiah,' it is for these people, so that they might understand. But then he says, 'I am the Messiah of my own Soul and nobody else's. This is for all of us to look within and find the Messiah in our Soul, forsake the fear, and live in the unconditional love of the Creator. This can only happen when the M field strength of this planet gets elevated, and that depends on when we can start spreading the new Plasma Technology.

Other Topics:

With this knowledge the saying, 'the lion shall lie down with the lamb' takes a new meaning. It's the same Soul that manifests differently because of the field strength of the conditions. In other words the Soul decides to in one instance be a lion and in another can be a lamb.

Thanks for listening.
