

# **Thorn in Elephants Foot - All About Emotion - Not Renounce Life - Love is Key - Commercialize T - Creating Child of Mitra - Nations & KC - Angle - Why Jerusalem**

## **Introduction to 636 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

Today's teaching continues to take us along the path to the Creator through different analogies of how we are connected to the Creator and everything else in the Creation. The Micro is in the Macro and vice versa, and the pattern of Creation is the same on all levels. Therefore, we can start with ourselves and trace all the way back to the Creator, or we can start with the Creator and trace out all the subdivisions until we end up with ourselves. In the essence of the Energy it is all the same, but the manifestation into physicality (P) makes it look different, and the variety of created things comes by the interaction of the M fields, which is the Plasma Science and the Knowledge of Creation. This is why it is very important that humanity start to teach its children that we exist in both dimensions (D) of the Energy or Soul, and the matter state or P, then accepting the science and transmutation will become easy.

If we think about the huge elephant being brought down by a tiny thorn in its foot in a normal way, it doesn't make much sense. But if we understand that each cell in the body of the elephant has a Soul and it is connected to all the other cells, all the way back to its creator, which is the Soul of the Elephant and sits in the middle of its brain, then it makes perfect sense. That pain response passes through all the plasmas and instantly connects to the Soul in the brain. This part of the analogy shows us that everything is connected together. When the elephant receives the pain signal it will have to react in a way to get rid of the pain. The other side of the analogy is, Man is that tiny thorn and the elephant is the Universe (U). During the past weeks of this war, the killing and destruction have been so huge that it is being felt by the Creator like a painful thorn in His foot, and the time has come to make a change. It has to be stopped. This is why the Universal Teachers are here on Earth teaching the Man about the Knowledge of Creation so he stops the killing.

The Creator is like a womb and the body is the Unicos, and the Soul of the Creator (STC) sits in the center of the Unicos, just like the Sun sits in the center of the Solar System (SS). Inside Its womb, the Universes get created, which each have their own center, and the Cosmic Ray (CR) of the Creator keeps on subdividing into the Galaxies, (SS), planets, then to the Soul of the Man (STM), which interacts to create the Soul of the Physicality (STP) of the Man, and then they create the Souls of the Cells of the body, which manifests our physical body. It's the same pattern, the same flow, the same plasma inside a plasma, inside a plasma, and on and on throughout Creation. Since everything is inside the same womb, then they are all connected to each other. This is the same way the human body gets created inside the womb of the Mother. We take for granted we have

this body because we see it there all the time, but we never really understood how it came to be, or how it was formed.

As humans we are taught to think only the matter state side of existence is real, and everything else is imagination. In this way, we always try to make the biggest material object, or we think the biggest sound needs to be made to be heard across the U. Or that we have to show something physical to be heard by the Creator. So it may seem a little strange when the workshop started out by Mr. Keshe saying, it's the smallest that affects the biggest, hence the example of the thorn in the foot of an elephant. We understand now that it is the weakest field that reaches everybody. When a field is too strong the weaker fields cannot interact with it. Therefore, they have to first lose some energy before they can interact with lower fields. This is also why the Creator has the weakest fields so that He can contain all of Creation. This is what unconditional giving and loving really means and why the Creator is most humble. If you observe carefully you can see this quality in Mr. Keshe. If someone has very strong opinions, which is the same as strong fields, then we might observe Mr. Keshe becoming silent, or he'll start to be very nice to the person, because they are not open to receive. But I have never observed him trying to force his way on others. In this workshop he said, I made Man in the image of Myself, so the Man should try to behave like the Creator. Even the Soul of the Cells of the body should behave like the Creator. We can test this ourselves to see if it is correct. If we are in an aggressive situation and internally we become weaker, or should we say more humble, the person with the aggression may sometimes change if the conditions are right. The main point seems to be for us to change our approach to living life from the perspective of fixed matter state to the fluidity of the interaction of the M fields.

The connection to our Creator is through the M fields of emotion. The example of how when the father feels disappointment in his son, through his emotion he gives himself prostate cancer. It's the same process with the Creator and His creations, which are us. When Man kills and destroys so much, that emotion passes through the rest of Creation and reaches the Creator. There are two sides to the "magnet" of the emotions, the good and bad side. Thousands of years ago there lived a man among the Aryan tribes called Zoroaster in the land that became known as Persia. He was the father of all the religions and he lived the Ethos of Mitra and became an example of correct living. He lived in a way that his thoughts, speech, and actions were good. The emotions of his Soul became in unison with the emotions of the STC. Over time the religions became corrupted and they forgot their roots and changed into separate dogmas, today, of which we see fighting each other, because they think only their limited understanding is the truth for everyone else. Mr. Keshe is reminding us that our roots are one, and we are all one big family. And that we have forgotten the true purpose of life, which is to give and receive love. When we make the emotion of our Soul to be in unisons with the Creator we'll be able to transmute. Years ago, when Knowledge Seekers (KS) came to Linz to transmute they said they went to different places and did different things like going to the Moon, or in the depths of the ocean, or meeting the Soul of Christ. But one thing they overlooked was they could have used that Energy and opportunity to go towards the Creator. This is the enlightenment we are all looking for. When we meet our Creator we realize our own Self, and then the true life of the Soul begins.

One of the ways the Universal Teachers are helping humanity is to bring in this Enlightenment and Peace Game. Humans like to play computer games and when all our needs are met we'll become peaceful. This Game will do both, it will help us meet all the needs of living a comfortable life and in the background through CR the field strength of our Souls and emotions will be elevated and we'll get enlightened to the Knowledge of Creation. Our whole life will change and we'll forget about killing.

In both the first and second parts of this workshop Mr. Keshe talked about the clergy and the religious life. In the first part he said, we don't need to become a monk or a nun to live a good life and that we should remain active in the world. And in the second part he was, in a way, making fun of the village of Catholic nuns he had visited recently in Europe. Nature has put inside every woman an innate desire to have a child and to love another entity. And then he questioned whether it was a crime to deprive a person of love. Each person will unpack what this means to them, according to their upbringing and beliefs about life. Maybe it's appropriate to share my experiences in this area as I almost became a Catholic priest early in my life, but by the grace of God and diligent inner work I was spared the tribulation of wanting to find the Truth, while being in an organization that only wants to maintain their power structure and the status quo.

Early on, I understood that the life society was selling us was not as happy as it seemed on the surface. But there didn't appear to be many options, either it was to live a householder's life of marriage and children, a single life, or to enter a religious life. When I started looking into the religious life, to my surprise I discovered that very few religious people were spiritual, and instead of trying to find the truth about themselves and life, they accepted to believe in certain concepts and dogmas. I understood that following religious beliefs and rules was no different than going to a 9 to 5 job in society. They pay for your food and shelter and you give them your Soul. And the problem with marriage was that we are programmed to remain immature and to accept physical love as the real love, and only pretend to want to understand true or spiritual love. And the thought of waking up after 20 years of marriage and discovering you don't really love that person, and they don't really love you, it was all a business deal to keep ourselves from growing up, was not very enticing.

Having said that, I also know that if taken sincerely and with awareness and devotion, both of these paths can lead to awakening. It all depends on what we understand about ourselves and life. I was married for a short time and I grew from that experience, and likewise I lived in a community of monks and nuns and I received the fruit of that experience. So wherever we are in life, it doesn't matter. What matters is, to live our life in a way that is truthful and honest, and trying our best to become aware of who we really are. Many times Mr. Keshe repeated there are no shortcuts. And I understood this to mean, that our life always remains ours, if we give it away to others, at some point we still have to take it back and live it in an honest and truthful way. The Plasma cannot do it for us, but it can help us through the difficult times of looking in the mirror, by adding to our field strength and satisfying our emotions. But we still have to understand how our life is ruled by our fears and desires. And when we face that fire of our self-created

emotions and pass through them, we'll also pass from childhood into adulthood and be able to contribute to society and serve others. For the most part, religious life was setup as an optional way of life, for a sick society that is not able to understand and heal itself. It allows weaker Souls to exist in physicality until the change on the planet can come about. I hope I haven't offended anybody, this is what has come spontaneously. If we understand our emotions deeper, then we'll understand that there is a huge difference between a spiritual life and a religious life. It very similar to the difference in the Scientific World, between the Energy state and the matter state.

Man should have learned from the vegetation, or what we call, the Vertical People not to kill and destroy. They live by what the environment provides for them. They don't move around and yet the energy they need comes to them. They provide a mirror for how Man should live. But instead, we see their immobility as a weakness and we dominate over them and kill them and steal their energy. Then in our arrogance we make up concepts of how they don't have Souls, so we have the right to kill them, and then we blamed God by saying, He made them for us to kill and eat. This all shows how ignorant we are to the Knowledge of Creation. Man has intellect and feeling and if he develops them, then he'll be able to learn even from a grain of rice.

There is a secret that will be revealed in 2026 and it will help us to understand what Mankind's destiny is. We can prepare for that day by trying to comprehend the purpose of our life. And we should try to overcome our habit of trying to force life the way we think it should be, rather than understanding how it works through the interaction of the fields. We can learn to work with life through our emotions, because they are root of everything. When we can learn how to use our emotions to make an object like a cup move, in the same way we can also learn how to move the heart of the Creator. In today's teaching we learned that everything is connected through the plasma which are the M and G fields. Likewise, the emotions are the way in which we can control the M field strength to achieve the things we want to achieve. When we learn how to create and control the emotions then we can survive, live, and enjoy the experiences of the U. It sounded like Mr. Keshe was saying that something will happen in 2026 where all the fields will match in such a way that Man will mature to understand enough about Creation to be able to change his life drastically, to the point of not having to kill anymore. There will be no need for intermediaries and we'll be enlightened to the truth of our own creation. Then we'll know that the STM is connected to the STC, and in this will be the key to finding our Creator and reuniting again with all of Creation.

Now is the time to start commercializing the KF Plasma Technology and this will bring it out into public. To do this we need KS to be part of it, because we are the ones who love and understand it much more than ordinary people in society. Many people want to enjoy the benefits of the T, but do they want to become part of it, because that will totally change their life? As we gradually increase the M field strength of the planet all will benefit regardless, because we are one unit with countless parts. Therefore, Mr. Keshe made a call for KS who have invented things with the Plasma Science to come forward and work with KF to commercialize them. Please give more details about your invention, what steps you have taken to accomplish it, and what you see as the future, and what kind

of help you need to bring it out. Don't expect that KF is going to do everything for you. You need to be an active part in the process. In the same way KF is looking for KS who know the plasma well enough to be able to guide the teachers in the upcoming schools to teach the Plasma Science starting at primary school all the way to university. You will not be expected to do the teaching yourself, rather you will be advisors to the teachers.

The Children of Mitra is another way to talk about creating children through the fields of the U as opposed to using physical bodies with an egg and sperm. When Man travels the U he will inevitably fall in love with Beings from other planets, but their physical bodies will not match to be able to create physical children. Therefore, the only option is to interact the M fields of the emotions to create a new plasma, which will be a child of their love. There are different options as to how that child will want to manifest in the physical D of the planet they exist on. One is to implant the fields in the womb of the Mother of that planet, and another is for the child to manifest its own P of that Time, Place and Position. The same possibility exists for Gay couples on this planet. There are no limitations, but they will have to have enough plasma knowledge to find a way to manifest the fields. On Earth when a man and woman want to have a Child of Mitra the man has to learn how to release energy down his spine without ejaculation. One will physically feel the energy being released. The women will also have to be receptive to receiving the energy into her womb. The rest of the details were not given, except that one has to prepare the body and the emotions to do this. The Children of Mitra need the spiritual love and devotion to peace, and the understanding of the love of the Creator. It's about transferring the love of the Creator through the STM and the woman has to be in that position to receive it. But it is the same way when we share the True love with the people in our life, it is done on the field level. This is not a fantasy, even now there are some women who can feel when their egg has been fertilized, but that is in the physical D, this is totally in the Energy D.

There was a long discussion which was a kind of follow up to the teaching last week about how the Sun only lights up half of the Earth while the other side remains dark. Mr. Keshe talked about how the light and the darkness bring out each others qualities. This seems to be referring to the STM and the P and how they compliment each other, even though at this time on the Earth the P denies the Soul. The understanding of light and dark is relative to the P manifestation, because in the U they don't use physical eyes to see. They sense the M field strength through the Soul, or the Energy. So when we say the darkness of Space that is only from the perspective of the Man on Earth. To the Universal Community Space is the medium which everything exists, they don't have fear of the Infinite, as we humans do. But what did Mr. Keshe mean, most humans are conceived in the darkness of the night? The brightness of the STM is created in the darkness of P, and Man does everything in reverse. We do it unintentionally out of ignorance. But maybe it has to be done that way because it reflects the truth of our denial of the Soul. And maybe when we consciously and with full awareness create Children of Mitra it won't be that way. Another thing to think about is during the daylight we absorb the rays of the Sun, and at night we dance and celebrate, which is a kind of giving out of the energy we absorbed.

If I remember correctly, a few teachings ago Mr. Keshe talked about putting a Soul in computers and robots and the way he was talking about it seemed to imply that the Soul and consciousness are different. Therefore, a KS asked this time how does the Soul have consciousness? The answer was that, the Soul is conscious by the nature of its own structure and that it is connected to fields of the U, therefore, it is always conscious of its behavior. It's not like the Man who needs to think about what he is going to do. The Soul is always conscious, omnipotent, and omnipresent. In previous teachings we talked about the different levels of consciousness and types of Souls. To be omnipotent and omnipresent he must be referring to the level of Soul equal to the STM, which is directly connected to the Creator. The STP of the Man is a lower dimension and is not necessarily self-conscious, but it can evolve to that level through awareness and an elevation in field strength.

Because of the war millions of people have lost their income and livelihood. Mr. Keshe has offered 1.7 trillion in Keshe Coins (KC) to the Iranian government and to the governments of Thailand, Philippines, and Cuba. If they accept this will be the start of the new change. America has been behind a lot of murdering since the Second World War, and some say it's around 70 million people, probably most of these are women and children. Therefore, when Americans play the Game approximately 60% of what they earn will go to the countries they have damaged. So for example, if an American has 100 KC, only 30 KC can be used to purchase Plasma products. The Israelis will get no KC. For those who think this is harsh please watch the following documentary video on KF Brazil Youtube channel, 'Abby Martin Went To Israel. IT'S WORSE Than You Think.' I hadn't done much research on my own into this matter and had assumed the problem was with a few Israelis who took over the country. But this documentary shows that the average person on the street talks and thinks like Netanyahu. There is a clip of him saying publicly that they have to control the Media, and they are trying to buy up Tik Tok. It's very similar to Nazi Germany in the 1930s and 40s, therefore, the whole nation is responsible for the atrocities and they are done with an evil calculating mind, worse than the Nazis. They use AI to monitor, select, and then bomb people they deem unworthy to live. With the use of American technology they 'drone' the people in their homes. It's horrifying to learn. They proudly do it and they know nothing will happen to them because their supporters control the world politics and media. They have no problem to kill their own people, and then twist the story around. If you do the research into 9/11 then you'll understand how far reaching their power has become. They have almost complete control over the world. Only a Divine power can help us now. When the new Enlightenment Game spreads across the world, then their power will slip from their hands.

The reason for Man's behavior is the combination of a lot of different things and these include the angle of inclination when the Cosmic Rays enter the Earth, Inertia fields, and the position on the planet. Then we would have to understand how the Earth and the STM interact to create very complex energies. We can see the result of these interactions by going around the globe and analyzing the characteristics and traits of the different races on Earth. Keep in mind that if the planet were vertical these varieties would not exist. The varieties exist because of the multitudes of interactions of the fields. Mr. Keshe went

continent by continent pointing out the different changes that occurred to the same Man and he became the different races, not necessarily because of evolution, but because of the field interactions. It was the field interactions that caused the skin colors to be black in the South, white in the North, and brown in the Middle. This is why Jerusalem became the center for 3 major religions in the world and why they are so emotional. It's the concentration of certain fields in that area. Then there was a Russian scientist who could measure the M fields of an area in the Amazon and tell if the tribe would be peaceful or not. This confirms what Mr. Keshe has been teaching us for years. There are a lot more subjects you can explore on your own. In ending the workshop he said, that we will be pleasantly surprised when we see the new KF Space Center, it may not be for us, but for the new generation so that they don't have to experience the wars that we are experiencing.

### **Other Topics:**

We don't need people like Bill Gates and the other ones who steal and then make themselves out to be philanthropists from the stolen money. The citizens of the U are naturally philanthropists through their emotion and Man will understand that when he feels connected to Creation;

The Soul is the hardware, and the emotion is the software. The hardware sits in the center and the software transmits the energy across the U.

Thanks for listening.
