

642nd Knowledge Seekers Workshop May 14, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Entered new D in teachings; Wife is physicality (P) and all its luxuries; Mistress is Soul; When fall asleep all names & titles meaningless; Wife & mistress - Hunters and gatherers for each other - without knowing; Organic food restricts gathering of Carbon (C), coloring, CO2 - missing spectrum for Soul; P feeding Soul - Soul also feeding P hidden fruits of U; Connection to Creator; Death Soul leaves P behind; Scientists - light as Soul leaves body; 2nd Soul leaves - STP; Soul lives own life - own mistress & children in Space; P is nothing & nobody; Fall asleep all names & titles gone; Think about relevance; Soul D totally different & unrelated to P; Soul close to Creator - while P opposite - President killing in secret; P shared by Soul & P; Every cell has Soul - human is collective Soul; STM feeds cells while sleep; Soul & P feed each other; New Headsets only feed STM for transmutation; Old UBESUS - fed P; Souls of Mother & Father decide which sperm reach egg - not chromosomes - already matched right field strength to enter egg; Man's science absurd; Soul exactly like plasma, magnet, star - has polarity - only attracts what matches to it; Soul of egg - collective - every element inside; Destiny set before leaves testicles; Doesn't matter if raped, loved; Woman has affair - pregnant - Soul of egg & sperm - decided when to open her deception; All Souls in U see everything; Redefine fallacies of science; Feed Man through Soul - right fields to cells - no killing; Realize every Soul has destiny already set in D of P; Live in both dimensions - or pretend; Children of Mitra (CM) - Soul of male & female - create Soul of child - no P, attachment, needs, guilt - perfection; Planned for centuries before Man created; Riddle - make child with Creator; STC is Soul of both Mother & Father; CM - throughout U - possess every field in U; UN - original Mother - Mother is within Mother & created by Mother; Collective STM & collective Soul of U - within parameters & strength of STC; Collective STC is STC - I made Man in image of Myself - made by image of Man; Man betrayed Creator - started killing; Creator's revenge - made Daughter of Mitra's - obey perfection like Creator - perfect in D of P; We'll change Man; Essence of Keshe Coin (KC) - Ethos; Every child - KC at birth - perfect child - created & chosen by STM to live perfect life; Soul not tempted by wrong doing of P; Work of KF & Creator; No degrees or religions in U; Soul does not need you; Soul not see darkness - light as STC; KS taught first - purpose of Universal Council - change coming; CM - not as test-tube babies - possess light of Creator; In P - Soul collective history of Man; Next time having an affair - think about burden to create another life; Souls - decide on punishment; P acting by Soul; Like walking with zombie in hand - P; Prepare before sleep - ask Soul bring perfection; Understand yourself - never compare to others; Live life of Mitra; Shake from fear in sleep when see D of Soul in U; STP of Man - covered with blood - can't let free; Watching behind glass when dream; When emotion of P & Soul same - transmute; Systems not ready - nor video new KF Space Research Center - Space City in China; Building most advanced Space City in history - CR & work of U; Many join; Help coming from non-KS - become KS; Soul knows mission; First spin-off - mixing knowledge; Keep Ethos; International structure; Become shareholder - we'll finance; KF belongs to humanity; Fertility clinics - still controlled by Soul - D of P; International surrogacy secret - order foreign egg & sperm - or to surrogate mother; Don't need

husband; Mixed race of Souls in U; New passport rules - half Space children; Every cell Soul - strong as STM; STM as strong as STC - Man makes himself weaker; Feeling Creator within - cry; Creator perfect - reflected in creation; Man dirtied himself; Iranian DNA different than Arabs; 2,500 year ago; ?? Khameneyshs - traveled world - spread Persian blood & culture in S. America, etc; Origins of Man; One tribe conquered other; Millions of years - molecules to AA become cells in Africa - other creatures also born there; 100 different races in Africa - 15 dominant races crossed into Europe & Asia; Where Egyptians came from; Africans also traveled world - life mixed on planet; Creation of CO2 - created STM and P - in-depth research; Northern hemisphere not right conditions - mutations; Very complex race mixtures; DNA very mixed; Different ways life can be created; Cold climate; China used underground pipes; Many cycles of maturity on planet; Youtube manipulating number of views; GMO food dominating; KF growing pure original seeds - use in ONN system; Transmit energy of apple - spectrum of heartbeat - stop eating; Detailed summary about Iran war; Media telling lies and propaganda about; Mental case - Trump went begging to China; Deal with Netanyahu; If America restarts war - sever cables - end of SWIFT & American domination- China take over world finances; America depleted weapons - can't restock - Taiwan back to China; US needs Microchips; British Monarch is German monarch - through Rothschild's; Ayatollah Khamenei in Moscow; US Military ordered 15,000 coffins - estimate 35,000 dead; Half Israelis fled nation; Parents of dead US soldiers - threatened; Grow tooth - connect Soul to nervous system; CR Balls on seeds; Creating conditions - grow things in Space; Eat food - CR inside another & over another CR; CM -interaction P - no egg & sperm - create environment - virgin birth; Plasma windmill - lights in sky; Blow into bubble in water - create light - like eating food; Summaries of KF Brazil - paraphrase teachings; Biochar (charcoal making) - fuse into C; Show in Space City; Indigenous process - burn land - Nano - immense growth; S. American tribes - created fertile dead soils - Ukraine; Forest fires; Create Chat Room talk about T; Fuel efficiency - use Gans; System to cut electricity bill; MaGravs power supply without connections; Research Center - cars without engines or batteries - 2 years - AI & emotion - stack level; Rafael to Space city - do a lot - wait and see; Space Center run by next generation - keep to Ethos; Non-KS learn Ethos; Expert in agriculture from Iran - mix technology; About Game security; Chinese moved into CR AI - control mechanism; Keep KF independent; AI to police AI; Chinese built biggest train terminal - robots - connected by AI - individually and collectively; Many will lose jobs - feed through Soul; Would robots eliminate humans; Use an atmosphere over Earth's atmosphere to deliver energy - building machine - 6 months; End of murderers like Netanyahu; Feed everyone through KC; Second layer of fields in atmosphere; Don't need phones, or KF Apps through ONN - create cluster of energy - continuously fed; Need to complete ONN Units; Next step - CR transmission - cover all life.

ENGLISH TRANSCRIPTION

(:14)

K- Thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to this is a Knowledge Seekers from Keshe Foundation Spaceship Institute.

We entered a new dimension and we understood a lot of things about ourselves, last week. Now, the biggest question is, what's the name of your mistress? The wife has a title, the wife has a name, wife has a dress, wife gives birth to children and wife cooks and cleans. In a physical dimension (D) you're called, Mrs. 'Blah Blah,' you're a doctor you have two children, you live in a fancy house, you drive expensive car because of your education somebody paid for. And if you're born two centuries ago most probably you've been sitting on a donkey and you still be washing by the rivers, which most probably a fifth of the population of this planet does. (:16) So your wife, whatever, you live in a little village, wash by the river, cook from what the wood gives you in the environment and what the hunter-gatherer call, the husband brings for you to do. Hello Doctor and hello Mrs. These are your titles in their physical life. Ask yourself one question. When you go to sleep and the Soul is free, the mistress, what's his name? Does he carry a title? Does he have children? What is his address? Does he go to university? And so many other questions.

Interesting is the wife and the mistress are 'hunter and gatherer' for each other. Without them knowing. But one has a title and one doesn't. In a physical dimension the wife goes around picking, gathering degrees and education, going to the park, eating the most fancy foods, all to be bio (organic) and the rest of it to have a clean body. But in fact that bio allows you, restricts you to gather that Carbon (C) factor which can be given to your Soul that it needs. (:18) Is the evolution in the science of food of the Man, accessing different Carbons from the coal mines, which you fancily play the numbers on the back of the bottles of drink you have and the food you eat, brings that Carbon spectrum which the Soul was missing. Has the wife started feeding the mistress with what it needs. Or the other side is, as the mistress has been feeding the hidden fruits of the Universe (U) to the wife, that's how they knew each other, is getting fed that does not need to consume so much of the Man's food through the combination of the Carbons from the mines, from the woods, which the trees left behind makes that connection which was shortened was not there for the Man of human race to connect to the Creator.

In a way, in a hidden way, the education development and scientific reach of the Man in a hidden sugar-coating colors has start feeding our Soul, what was missing in the dimension of the physicality (P). Interesting enough is, if you go back to the teachings of past decades, always so, I always mentioned, when you die your Soul leaves in Space, where finds its new place. But does it take the physicality with it? (:20) Or does it say goodbye, I'm gone, you are in your own and you do what you like, I don't need you anymore.

In the past couple of weeks, our beautiful Russian scientists have actually, for the first time, tracked the path of the Soul once leaves the life, the physical dimension. It rockets through the Space like a light, but they haven't traced it after the atmosphere where it goes to. But for the first time, now, what we said for decades, that the Soul leaves to find

in Space is physically tracked, physically shown, it's like a shooting star, leaving into Space to find its place. But the biggest question is, now scientifically, we have another proof of what has been taught in past, God knows years, in this 12 years, is where does this mistress go? And the other point is, that the scientist just waited for the second Soul departs for good. What about every night when you go to sleep and doctor so-and-so goes to rest, and the Soul goes to play, the mistress is out.

Now our scientists have to find out what happens in that point. But the question is, what is its title? Is it still Mrs.? Does it still have the same lover as a physical life lover? Has it got children that the wife and the husband doesn't know? (:22) The wife in the dimension of physicality give birth to children, with the mistress having another mistress creating the lovers of children in the dimension of Universe. Now you understand, you are nobody, you are nothing. The minute you put that head down, titles don't exist. What is relevant, sleeping on the stone or the fanciest beds in the Universe of the Man, has no dimension in dimension of the Universe. In the dimension of the Soul of the Man (STM), where the mistress goes, quite possible that the mistress has already have established another house, in another position, with another mistress, another Soul. She plays a game on both side, with the Man in the dimension of physicality, and her and her partner in the dimension of the Soul of the Creation. As the two do not fit, as the dimension of the STM in dimension of the physicality, has no meaning in the other dimension. One is in one side of the Universe, has a house and then the other and the other side. One is close to the Creator and one is the further impossible. One is the head of the army, ordering killing and the ?? president of one nation, I am peaceful but killing thousands, sits in the back end of the row, thinking is good, then the mistress of the wife sits close to the Creator, (:24) where the wife is shared in both dimensions of physicality and in dimension of the Soul.

Now you understand all that you as humans are proud of, the titles, the papers, the money and the clothes and who you speak to, the minute you put your head down, has no value. You are 'misses nobody,' as the mistress is playing the dimension of the Universe. But there is one point you have forgotten. Every cell of the body of the Man has a Soul, and every human has a collective Soul. As much as the Man in the dimension of physicality eats to feed the physicality to give some more to the Soul, the Soul while the physicality is sleep, houses the Universal energy that it brings food home for the wife to live in the dimension of the Soul of every cell. It's not all one way traffic. Then if you understood this, you understand why even the new headsets we put on you for dimension of the transmutation only concentrates on the STM and not the physicality. This is why we threw those big, big eggs you saw in the exhibitions in the doldrums of storage, because you were feeding the physicality and the Soul was not happy. And the new system that you received and you see covers only your Soul in every dimension. (:26) So we don't need to feed you in the dimension of physicality, we feed you in the dimension of the Soul, exactly what the mistress was doing while you pretend to be asleep.

Now you understand the technology of the science is in hand of the Man in a new dimension. It's for Man to accept the both dimensions of existence, the wife and the mistress, and knowing as much as the wife has a fancy car and a house here, the Soul has

its own dimension. Have you ever asked the Soul take me where you want? Can I see your family? Have you children? Do you have parents? And then you understand the big point. As the STM feeds every cell of the Man, during the physical sleep of the time of the Man. When the Man has that urge to create a child in the womb of the woman, the sperm which reaches the Soul of the host of the mother is decided by the Soul, not by chromosomes. The Soul which becomes a child, is already decided by the Soul of the woman, and the Soul of the man. It's not accidental as they tell you, "Oh, the strongest swims." No darling, the Soul of the mother in the egg has already made his match. (:28) You match this, you come in. I don't need any others.

The science of the Man is so absurd about the World of Creation that does not even understand the simplest process of the Creation. You're always told, "Oh, poor sperm, he has to swim all the way and then if it breaks through." Now that you understand that the Soul is exactly like a plasma, like a magnet, like a star, it has polarity, only attracts what it matches it and nothing else. Can you attract copper to steel magnet? Can you attract wood to the iron? It has to match.

So, now we understand another mystery of life, the way you misunderstood. The egg, at the point of even being created, in his Soul, in his collective Soul of every element inside it, has already found collective match with and in parallel with the Soul of the egg. Now, another mystery of science for you resolved. All this rubbish, all the strongest, it loses its tail and it swims all the way. Its destiny was set from the minute before it leaves the testicle of the man. To soon understand the law of physics, you cannot barge your way in. (:30) The cell is tight. Millions ducked in to come get in. How come you get in? The single egg, out of billions. Because the decision of the Soul in what egg will accept which sperm already decided by the two Souls. Does not matter if you raped, if you made love to, if you made a decision to make a child. The egg has already decided the receptive ?? the reason. You have an affair, you get yourself pregnant, then you hide it from the husband, then you think that's it, but you don't know that the Soul of the egg has already plans for you when to open your deception. When the egg and the Soul of the sperm have already set the pattern for deception to be known later on. So you thought you were clever, but in fact it's wide open and all the Souls in the Universe can see.

Then now, you have to redefine the science of Man. In all the fallacies that is made, in everything that he made the Speed of Light to be the absolute limit, to everything that you know and your thought about your Creation. As much as the STM takes from the physicality to mature itself. (:32) The STM brings enough food that he can feed the Soul of every single cell that the physicality of the Man carries that he has not got the capability to nourish. And this is how we feed the Man through the Soul from now on, that he feeds the right fields to the cells, that no Man shall be killed, no Man shall be destroyed, no Man will live the life the present presidents of the Universe live and shake hands on the front pages of the News. One murderer greeting another. One kills officially, and one kills hidden and this is what the pattern of life is. This is what Man has to realize. Every Soul and his destiny is set in the dimension of physicality. Then Man has need to understand one truth about himself, shall I live in both dimensions, or shall I still play the game of hide and seek that everybody else knows.

Now you understand why the Children of Mitra come from the Souls and not from the sperm and egg. Then there is no dimension of physicality to mix in it that it takes the revenge on what is done. The Soul of the male and a female in their inner Soul, inner being does not need to be divided and placed in the little fishy things to swim, but it travels untouched by the dimension of physicality to create the Soul of the child, which has no attachment, no need, and no guilt. (:34) The Children of Mitra are perfection. The Children of Mitra are planned designs for decades and centuries before even Man was created, let alone the future of destiny of the humanity.

Now you understand the riddle. Then who likes to make a child with the Creator? As the Soul of the Creator (STC) is the Soul of both the Mother and the Father. Creator of both and the nourisher of both. And then you understand how Mitra was born. And how the Children of Mitra will run the span of the Universe. Do not forget, they possess every fields that exist in the Universe. United Nations went, found tens of thousands of women taking samples, to find the original mother. But they came to another conclusion, that the mother is within the mother, created by the mother. Now you understand how the collective STM and the rest of the collective Soul of the Universe are all within parameters strength of the Soul of the Creator. The collective Soul of the Creator is the Soul of the Creator. I made Man in the image of Myself, as I was made by the image of the Man.

Now you understand. Man betrayed his Creator and kills. (:36) And the Creator took revenge and created Daughter of Mitra's that they obey perfection and like him and that in the dimension of physicality and now we aware of both, we change Man. Man shall not kill, Man shall live by the Ethos of Mitra, as you don't think bad, you don't need to do wrong, and not doing wrong, you don't need to do anything, you talk good, you act good and you think good. And this is the essence of the Keshe Foundation Coin. When we give the richness to the child from the second (it's) born, to the parents and to the life, does not need to commit suicide. It's the Chinese policy. You do not make the ground fertile for a Man to do a crime, then Man does not need to do a crime. Now you understand why we give Coins to Man on this planet. That from moment of birth, mother does not need to steal, mother does not need to worry about what happens to that child. The child will be born in a lap of luxury and availability, that a perfect child, as it was chosen by the perfect life of the STM, is created. We are not nourishing a hungry child in Africa. We are making sure that the 'Daughters of Mitra' live a perfect life, that they do not need to attempt to do anything wrong, that their Soul will be tempted by the wrong-doing of the physicality. The work of the Keshe Foundation is work of the Creator, but Man does not understand.

Now you understand where we are going, and maybe now you understand, as much as you thought you eat and run, (:38) your new technologies of creating different Carbons, in different colors, which attracts you like a butterfly to the light, is feeding, saying to the Soul, what I need. And then, while you are in your dream, madam, Doctor, you are nobody at all. You have no names, no tags, no degrees of the Universe, no mosques and no universities, is fully graduated itself at the point of birth, does not need you. And this

is why it leaves you when the time comes and you call it death. So, next time you put your head on the pillow, ask yourself, Mrs. Doctor and Mr. Professor, and Mr. Farmer, what is my name on the other side? What position do I hold? Or am I all the same, the light in the night of the skies of the Creator, where even if I had the right strength in my Soul, I will not see darkness. It's as light as it is in the Soul of the Creator.

I hope you Knowledge Seekers (KS) understand the process of the teaching of today, and how you as Knowledge Seekers are the front runners to that point. Now you understand the purpose of the Universal Council members, and then you understand what is about to come. One question I put to you, that for you to understand. (:40) Man in a physical life, nowadays, has become clever and puts an egg and a sperm in a tube, and creates test tubes (babies). Do you think such a thing exists in the dimension of the Soul, that you can create the Children of Mitra? It never shall, as it possesses the light of the Creator. You create Souls, in this planet, in a glass. We create Soul in the freedom of the span of the Universe. Now you have to learn how to nourish it. And now you have to learn how to polish it. To become as good, as perfect as its Creator.

Next time you decide to have a child, think what has been done with the center of the sperm Soul, before you think about, what I'm going to do, is with this physicality. The only thing Man does not understand, is that the Soul in dimension of physicality is a collective history book of the Man in the dimension of physicality printed in the Soul. Next time you're having an affair, next time you cuddle another woman, next time you kiss another Man, and you might carry the burden of the life. Remember, the Souls have decided the punishment, not the physicality. And you're just acting in the hand of mistress, as you thought you feed the mistress. (:42) Man has to learn, has no choice but to understand the truth about the two dimensions he lives. It's like walking on the street with a zombie in your hand. And you are the only one who sees the zombie. Are you walking on the Earth? Or have you traveled the span of the Universe, where the Universal Community can see the zombie?

Next time think of your titles, your names, your positions, and your position. And you'll find out, they'll last as long as that head does not hit the pillow. You have no name, you have no destiny, and you have nothing, if you do not understand that before you go to bed, prepare to hand over, love the Soul, and tell her, "Bring back for me, what allows me to be perfect in the dimension of physicality." Then you understand you need the mistress more than the mistress needs you. Because once it leaves, it has a new life. Does not matter with your physical life, or when the physicality stops to exist.

I hope you understand about yourself, nobody else. Never compare, but try to live the life of Mitra. It is not to be, to own, is to understand that Man has no possession and no position. Say he's a Man, (:44) doesn't matter if you're a king, president, Mrs., doctor, and Mr. street cleaner. Once you put your head on that pillow you have no title, you have no name, and only your Soul knows where they go. And sometimes when they are working and playing in their dimensions of the field of life, you shiver and shake in bed, because you're ear dropping, and ease dropping, to see what they do, and you don't like it, and you shake and get up, but they're already busy playing in the dimension of the fields

of the Universe, and you're trapped, stuck to the sheets, and they're mad, in the dimension of physicality, and the only thing you can do is shake and shiver, because they don't let you in as the Soul of the Physicality (STP) of the Man has got his hand covered with the blood of physicality and destroying others.

Now understand why you shake and when you move and what you see in the dimension of the sleep, in your dreams as you're just a bystander and a Man behind the glass watching what goes on in the fish tank of the Universe. Which your Soul plays and you have no say. We go for a break and I hope I start getting you to think what to say, what to do, and what to think. Leaving the life of Mitra is just a word, it is the act to have the perfect Soul for its dimension. (:46) And when the emotion of the physicality and the emotion of the Soul are the same, then you find your way to transmission in every dimension of the Universe and not the dimension of physicality. We go for a break and we come back and try to answer any of your questions. Rick, take us for a break please.

>> **BREAK** >> 642 KSW May 14th ... (:51).

K- Thank you very much. A couple of points, as you are all aware, we were still to have a session for the transmutation, the last of the series. (:52) Our systems are not ready yet and we won't do this session till the system gets ready, hopefully in next couple of weeks. Everything is set up for our experts to do their job and hopefully once they complete, we invite you back. The date is set for tomorrow is not there, it will not be a session until the what we call, technicals is resolved. In respect to our Chinese friends to give us the video for agriculture, I have not received at the moment yet, still waiting for it, I was hoping we'll have it today and they'll come to it. If you are on the Chinese website, you should be able to find it. It's already promoted in Chinese from products you can order.

We're building one of the most advanced Space Cities in the history of the Man, using the Cosmic Rays and the work of the Universe, than the rocket fuel and the rest of it. And I'm sure many of you gradually join us to build the city, to build the structure as some of you already have. And in the past two or three days, strange things has happened in this with the people who are involved in this what I call, journey. Very interesting. Knowledge Seekers and not Knowledge Seekers are traveling back and forth without even us knowing. In trying to be there to make sure things happen perfect and the team of Knowledge Seekers who work on this, just go in, it's a job to do for the rest of humanity. No one asks, no one requested, it's just their mission to be done. (:54) And it's taking shape. I hope we can show it to you soon. One of the most peaceful, advanced places for science and technology.

Even though it's been going on for a short time, we have located the first spin-off from a non-Knowledge Seekers who became a Knowledge Seekers and he wants to keep the Ethos. So the Spaceship Institute of what we call Keshe Foundation Space City has got its first commercial spin-off structure on the ball, not by request of the Foundation, but by the request of the person who himself was not a Knowledge Seeker and we came to see how he could mix his knowledge and the knowledge of the Keshe Foundation to bring more beauty to humanity. And so, as I said, we're structuring the thousands, hundreds of spin-offs, comes from the Knowledge Seekers with the technology that we keep on requesting from you. Let us see what you have. You don't need to be a Knowledge Seeker. If you know elite scientists, we are there to serve and I'm proud to know the first structure, the first case, the first move for a spin of international spin off the Keshe Foundation is taking shape.

In a way, it's not Chinese, it's the work of the international structure. Knowledge Seekers who come, they see they can mix it with their knowledge and technology and go back to their nations to benefit their nations on the banner of the Keshe Foundation. Soon you will see the videos of this work. The first spin-off of the Keshe Foundation. As I said, even the worker in what we call in our system comes up with a way, technique, (:56) new technology that can help, we give them the right to be part of, to be the shareholders in their own new adventure. We finance it, we support it and we develop it with them. For those of you who are on the plane back to the Space Center and those of you who flew out to get your things sorted out to come back in, I wish you both safe journey with you and your family is on the whole. The structure of the Keshe Foundation belongs to all of you and not just the man who knows or the woman who knows about the knowledge. Once you commit yourself to us, we look after the whole family as we are doing and it's part of our work to do. If there are any questions, try to answer them. If not, we have a very quick short session today.

Q: ... Mr. Keshe, I have two questions. Everyone, when you talk about the sperm and egg and then how the two gravitate toward each other, nowadays we know there is a fertility clinic that is very popular. I saw it that is very popular even in Iran. So how those babies, because there is a third party involved, so how that gravity decided in that term?

K- Everything, once the Soul choose each other, was set to be together, set to be, the rest is dimension of physicality. (:58) Surrogate mother, growing up in a test tube, is irrelevant. This, as we a lot of know now, is very... What is very interesting which is coming up, which is not in public as such, is international surrogacy and international what we call test tube babies. The woman from East Asia decides that I want to have an American looking child, or a North European looking child and they import the egg to the country, or they take the egg and the sperm from two different nation to a third nation to have the child. This process is taking place now. We are seeing not just because my husband and I couldn't, or I want the husband but I don't want to be, I mean I want the child I don't want a husband. Now is becoming a very, very complicated. You want to have a mixed child? You are quite welcome. You never need to travel your country outside, or look around for, you can order the North European looking child to be. So,

now you can imagine how the Souls work in the background, to fix that one. And then, the two cannot be there, so they pay somebody in Africa to surrogate. (1:00) It's becoming Chinese takeaway in England. You know, in England you go to a Chinese takeaway, it gives you a base of a pizza, gives you the Indian curry sauce taste, and you can have a Chinese topping. And this is what is becoming the life of the Man, reproduction of his Soul.

But don't worry, very soon we'll graduate from this and we've won the child which have a Soul from planet Zeus can be imported, the Soul import. Because planet Zeus does not export eggs. That becomes more complicated. I was talking to somebody in the world of the, what we call, diplomacy. He said, you know something is going very bad, you keep on talking about the aliens, and now we're speaking about creating Man into Space, and creating children of the Man with the others. Do they need a passport, they don't carry any physicality? Or, are there's going to be new rules and regulations, for children which are half-Space child? Work that out, for your leaders who are fighting for nothing...

Q: Mr. Keshe, in terms of... When you talk about the Soul, and then every Soul has a... every cell has a Soul too. Is the strength of the Soul of the cell is as strong as the Soul itself? Because...

K- You break a magnet, you break a magnet, does the strength of pieces of magnet changes? (1:02) ... The strength of the STM is as strong as the Soul of the Creator. It's the Man who lets himself down. Now you understand what it is.

Q: I believe that. I believe that. Because you know sometimes, you know, because you know it's feeling the Creator and then acknowledging it, acknowledging that we are as strong as him, sometimes it's very overwhelming like you know like you cannot contain it.

K- Can I ask you a question, or think about a question? The word, I refer to this a lot because it covers all aspects. If it says I made Man in the image of Myself, if you see a the dents on the face of you, does it not appear on the mirror? So he has to be perfect, and the STM is perfect. He has no indentation, and he doesn't wear cosmetics.

Q: Yeah, but you know, I think, you know, it happens that, you know, when you, when you, you know your the image of God, I mean, get to a point, I don't know, because it just brings, I mean, sometimes feeling the Creator, I don't know if it's the, if it's the Soul of Physicality (STP) is crying or the feeling the Creator, suddenly you can start to cry so much. As if you're feeling it, and sometimes you don't know what is happening. You know, why am I going through this? Like suddenly it has happened like you, (1:04) suddenly like name of the Creator come to your head like when you think about the Creator. It doesn't matter where you are. You just burst into so much mayhem of crying and you don't know what happened. You explode. And then, and you're wondering what is the interaction happening between your Soul and Soul of physicality. You get into those situations and I couldn't, I haven't figured it out yet.

K- Many people can't figure that out. I explained this once in a different way and I try to explain maybe you understand it. The Creator is like that beautiful, gorgeous child. Immaculately dressed. From top to toe. And the Man is that child which goes, you're ready to go for a party, puts ketchup on the clothes, puts dirt on the shoes and mud and everything else, that the mother made for the child to be perfect. The child is a Soul and the rest, how he got messed up is the child itself. And it's the behavior of Man. The Creator gives us a perfect Soul. It's us who puts the mud and the dirt on it. Inside never changes. So next time you want to do something wrong, think one thing. What mud am I going to put on the Creator.

Q: Mr. Keshe, there was a, you talk in the past that we originally came from Africa and then we start traveling and then each part of the earth we are occupied, (1:06) we change to a different group of people or different shape or form, tall, short, fat, or different kind of eyes, shape and everything. So there was a study done, I was thinking if we came from one palace from Africa, so DNA should be the same, but then they took a DNA of people, because they did a DNA test between Iranian people and Arab people, it's totally different DNA.

K- Different.

Q: Why?

K- Originally, the DNA is slightly different on the mother's side. I'll explain to you something very strange, something you talk about. I'm sure you don't know, but I tell you, you'll know. As you, as you know, during the (?? Persian King Xerxes) 2500 years ago, the Iranians even attacked Greeks with hundreds of thousands of ships with 250,000 soldiers at that time. At that time the Iranian fleet was the same as what in decades, centuries later became the British type thing. And the Iranian ?? Khameneyshs traveled to Australia. They moved into Central America and they found this path. They used to make this trip. A few ships made this trip. And people of Iran, the Iranians are actually in a part of Central America where they carry with the same tradition as us. (1:08) They are ?? , they look like Aztecs. They don't look like what you call South Americans. They have features of the Iranian, especially the women, and they have more structures the same as Persepolis. And the strangest thing is that they celebrate 21st of March as their New Year.

Two and a half thousand years ago, they traveled. And then we say Christopher Columbus found the what you call America. We have traveled this planet and we have mixed very well. But the origin all comes through two or three spots in Central East Africa. And these they mixed and even in the historical biological we know they were the last two, were two tribes, one conquered the other one accordingly and the rest of it. But the pattern of life, the condition of life was available, was created that the chemistry of the life could take shape in the warm waters, constant temperatures and everything, millions of years for the cells to come together to create life. Man was not the only creature which was born in Africa. Life could take hold in that pressure and place.

And then you had the same in South America. There is a tribe, there is a race. So they got mixed up. (1:10) But the original molecules which set to become the Amino Acid (AA) of life, scientifically comes from Africa. Even in Africa, before the African moved into Asia, according to scientific data, they had over 100 different races. Which this has opened our eyes, that there were 100 different creatures were born under the condition. Condition was fertile and life took place. Then what we have up to now, there's more research going extensively is, out of this 100 mixture, whatever they fought, they mixed, whatever, 15 of them as a mixture have crossed into Europe and Asia. What we see scientifically is that the ones who traveled on the East Coast of Africa through the Straits of Hormuz were the more ?? power dominant one, which we trace back to most of the races in what we call Central America and South America. We trace back to China and the rest of it.

There is something which we know and that is, I explained this before, there is a river which creates on the top of Nile into the Central Africa. It comes from Central Congo and down that way. And this river appears every two or three hundred years. The belief is one tribe or one group of this mixture traveled that side and settled by Nile and became Egypt. The other traveled by the East Coast which went up. (1:12) We have tracks of record that partially, knowing becoming fishers, some traveled into South America, some traveled into Australia and the Pacific. But at the same time, these places had what we call the conditions to generate life. So there is a mixture of life between these two. We have a full data on this Iranian tribe, 2,500 years ago. The culture celebrates all what used to be Mitraism in South America. That in a region of Paraguay, ?? Peru on that side. They are well documented. You can go and find them. But they don't tell you how Iranian looking women's are in this part of the world. We never know what they've been there for. They go back to the Aztec time. They, they, so they were there long, long before Christopher Columbus ever found America.

And this is not the only one, the Africans did the same. The pattern of the mixture of life, we should look, is three continents. The America, South America, Brazil, and that part. Africa and part of Australia. They had the condition for when a CO2 mixture got into the system to be produced on this planet, then life took shape. The Amino Acid could be produced. Creation of CO2 is one of the main factors of creating the physicality and the STM. I've done a lot of research on this and it is very much in depth, we are very mixed. (1:14) The condition of the North at the moment, what we call hemisphere, was not there to create life. Maybe, maybe it created life, but due to the turn of the planet, could not support it, or has supported a new type of life which we see from northern Europeans as they mutated.

We are a very complex race. It's not just, but origin what is left is indicates we all come from maximum mixture of 15 races of Africa and their DNA is very much mixed. In Africa we have scientific data there are 100 different DNA's at the moment plus. But when it's traced into the Europeans, the Chinese, and the North Americans, we see 15 of these DNA's dominantly, what you call it, dominate. But we have to see. The eyes are opening up to the fact in a different way. We see a race of Man in north of Russia, created in cold. But then there is a structure. They tell us the history of the Man goes back

to 10 ?? years. In Northern China, pipeline has been discovered, exactly the way we have it, going back over twelve and a half thousand years. They carried, they produced pipes, they buried it on the ground and traveled there, they took water from one side of China to another. These are scientific data we can... (1:16) And what they said Man was 5,000, 6,000 years ago and this is all rubbish. Man has gone through the cycle of maturity many, many times.

Q: Thank you Mr. Keshe. Funny you said Peru and then Central America. One time I was in ?? and then a gentleman asked me if I'm from Andes in the mountain in Peru. So, probably I look like them, so...

K- They are ?? Khamanisiens. They still carry out the traditions of our ancestors. Actually, they kept more than the Afghans and the ?? Pashtuns and the Farsis kept. They have some deep-rooted of Mitra's tradition with them.

Q: Thank you Mr. Keshe.

K- You're welcome.

Any other question?

K- ... Because I want to tell you something very interesting came up. The... for you to understand as Knowledge Seekers, how much game played in the background while you're listening. And I.. this, this teaching is international. Tens of, tens of thousands of people listen to it. And when you look at the Youtube numbers, it's a few hundred. Look at it, they are destroying, that the figures does not show, hundreds of thousands of people listen to the teaching. This was set up years ago by the Belgians and the European community, to stifle the Keshe Foundation. But the funniest thing is, we teach in such a structure, and we have the Chinese, the Iranians, (1:18) the Africans, and everybody else, the Europeans, and it shows 100, 200, 1000. And the Brazilians, which is a small division of the Keshe Foundation, and their weekly is over thousands of people attending. Now you can see how knowledge is restricted. The whole world is less than a thousand. A small nation in their weekly teaching gets over a thousand, two thousand and the rest.

So, you have to understand that knowledge is well spread. It's just those who play games of politics have to keep their face. And it'll be very interesting to what we always said, the actual figures of the Keshe Foundation is hundreds of thousands, millions of people listen, overall. But logarithmically, as Mr. so-and-so increased his numbers, that every time he speaks one word, millions listen, because he owns the company. The same way logarithmically, Keshe Foundation listeners have been downloaded, that it doesn't show its expansion. Enjoy your time. Carry on.

Q: ... Lately it's been hard to find non-GMO food. Almost everything contains genetically modified ingredients. What can we do to avoid the consequences of eating these foods?

K- Not much you can do. (1:20) We are growing seeds. I'm going around as I said before, original seeds and in our agricultural side we'll grow these very rapidly and we'll see what we can do. We need these non-GMO seeds, original seeds, because once we produce these seeds in the plasmatic ?? strings for the Apps, they have to be pure. This is the, we're not doing it for any other purpose but to make sure the next generation receives not adulterated energy packages. And that's the reason for it. So at the moment there's not much you can do. I'm going out for lunch, one of the most beautiful Knowledge Seekers I know, just to get some seeds. I invited myself for a lunch, to get some seeds from lunch and then the rest of the humanity in time to come. And this is what we do. I received a package from another Knowledge Seekers very recently. He actually bought it for us and I'm carrying with me hundreds of original seeds in our laboratories, in the most advanced research centers in the world. We grow them and we need their seeds to produce perfect energy packs once we go in the dimension of the transfer, transferring energy through the ONN systems.

R: And that eventually becomes the way to avoid the genetically modified ingredients. You avoid the food totally.

K- Yeah. (1:22) We are 95% in position now to start releasing the first, what you call, the ONN's. And then in that position then we have to complete the (plasma) antenna side that you don't need any international connections. Then, maybe by middle of next year, we'll be in a position to transmit continuous energy on the Apps. And how it can be done that you can access to it.

What will be interesting is, once we locate this, what we call, 10,000 units across this planet, and we know how to attach it to your physical energy side, would any of you start buying food? Would any of you feel hungry because this will cover the span of this planet? Would a child go hungry ever? Because we can transmit. We did that last Friday test, we transmitted in the bandwidth that hits the heartbeat of the Man. Those of you attended the addiction, know exactly what I'm talking about.

So, if we transmit the energy of the apple with the spectrum of the light of the heartbeat of the Man, then would any of you stop eating? Would the supermarkets have a lot of rotten foods? This is what I'm looking forward to. That no Man or child goes hungry, does not matter where you are. The first 22 units, which is hopefully, hopefully it gets loaded this coming week or two, (1:24) will go to every corner of this planet. It will not all go in one place. From North America to South America to Africa, to China, to Australia, Iran and the rest of it. No nation will hack because it knows the rest of humanity will suffer. And we are on that course. I need to raise funds for the 8,000 Units and somewhere we'll find the funds for it.

And when we feed the Man, Man should not kill, Man should not do anything. When a mother give birth to a child in Africa she doesn't have to worry about hunger because we take the responsibility to do so. Somebody in a village near you has an ONN in his hand and his house, which does not need no energy and does not need no Internet, but it's connected to what we call old web world and it feeds everything, everyone's Souls and

physicality. It's not a dream. When I see the developments in different research centers of the Keshe Foundation. I used to think maybe we are 20% there, but in the past few weeks, I think we are 80% there. And we are just about ready to go. Maybe in a year time, we'll feed the world, without a single Man ever going hungry. Sometimes when I used to sit, when I sit with my children, when they were young, and they come and say, "Papa, 10 o'clock at night, 11 o'clock at night, I'm hungry, can I have something to eat?" You spill my heart. (1:26) How many other children, this time around the world, tell their parents, "I'm hungry." They cannot feed them. "Go to sleep, tomorrow morning we'll have something." In my time, no child will go to sleep hungry. I feed them.

Any other question?

Q: ... Greetings Mr. Keshe, Rick, Universal Council, and Knowledge Seekers throughout the Unicos. Mr. Keshe, I just wondered if you could comment on what's happening in the background on the geopolitical situation. Is, is the war going to be finished or is it still ongoing? I don't really pay attention to any of the social or other media so I always appreciate your commentary on the subject. Thank you very much.

K- Maybe I'm the wrong person. Ask this question in detail. But from, you have to understand we are closely tied up to Chinese, we are closely tied up to Iran, and on the other hand we operate through United States. We sit in Europe and we watch the scene. The reality is that the American public has been told a lot of lies. (1:28) And as I just mentioned, there are hundreds of thousands of people listen to the teaching, and the ??, they make sure we don't, the people don't see such a popularity, is the same as they are doing with their broadcast. The President of the United States claimed that they've destroyed all the Iranian forces and everything else, and we know they haven't even touch 10% of it because Iran 90% of missiles, intercontinental missiles now, are usable. And that's the biggest fear America has, if they unleash it. So 95% of what we hear from United States is nothing but lies and propaganda. We know this now, everybody has agreed on it. We are dealing with a 'mental case.'

On the other hand, we see today American presidents in China, and you got to understand the world of politics, as I explained many times before, even when you see them standing. Today's arrival of President Trump to China was the lowest way they could insult him. In a way he was treated like a piece of whatever you know. President Xi did not attend his landing. He is met by very much in a different way which is not traditionally the way President Xi greets high level close friends. So you think you are big, you are treated as second class citizens of your president. (1:30) So, and the rules of the engagement is the weak always goes to meet the strong. This is the international law. Chinese president did not go since he was elected. He is going there to see his boss. These are a lot of factors which you have to watch. Iran will not, under no circumstances, will give up its nuclear weapon, what you call nuclear material, to the United States, because a deal has been made between Trump and Netanyahu that he will get a percentage of the nuclear fuel from Iran, that's their payment. And then he drag it, you see, we got the nuclear material out of Iran, and it's ours. Iran will give it to China, Iran

will give it to Russia, but not United States. They can bark and shout as much as they like.

The only problem, which has risen, which is critical, is that if the America breaks the war, Iran will literally sever all the communication cables under the sea, in Persian Gulf, which controls a chunk of the world finance, goes through it. There'll be no cash in the ATMs, in majority of the countries, Swift will go to the wall, has no value, and the Chinese love the Iranians, cut this line off. It'll be the end of Swift. Because nobody can use the Swift, no banking can be confirmed. Chinese system will take over. This is the biggest fear at the moment, in the hand of the Americans. The what they did, cutting Swift, Iran caused this on the... There is a massive amount of cable, goes from Saudi, Dubai, Iran, Iraq. Part of the European intercontinental lines goes through this. (1:32) If they blow these lines up, they we (won't be) back by at least five years, Swift has no control and somebody has to replace it. This is the biggest fear at the moment. Not what happens, how much oil it's going through.

If we look at the other side, Iran is well equipped to last at least five years of war, even at the scale of 30 days, because Americans don't have any weapons left. They cannot produce that many. They depleted all their weapons, and if they deplete any more, Taiwan will go overnight. There is a deal on the table today between the Americans and the Chinese, how are they going to hand over Taiwan. Americans are begging that the Chinese will guarantee to them that the Chips from Taiwan will be continued. This is a begging plate Trump is in China with. Make sure Taiwan, if they take over, the Chips are there. Because if the Chips from Taiwan are not there, in America you'll be eating out of pots and pans with a fireplace as a wood. This meeting set up is the biggest what we call begging pot of the Americans to the Chinese. They stopped the rare Earth material, they can't produce weapons anymore. All these weapons we saw being used or in the stockpile cannot be reproduced because the rare Earth material, if it doesn't exist, is not there and the Americans realized they have to beg for the Taiwan. It's not if China is going to take Taiwan.

Let me explain to you. We are very close, extremely close to the Chinese administration. (1:34) One day I'll show you the pictures who we deal with it. The plan was by 2027-28 Taiwan will be handed over to China on the agreements that everything is there. What they call Hong Kong Taiwan type of program which the on the ?? this agreements the Chinese guarantee the follow-up Chips to the West at a certain percentage for a certain period of time. To build the Microchip producing factories cost billions and nobody has that money in the West to do it. So, Taiwan is the oil well of Microchip. And what Trump comes out of this meeting is how much he can beg and how much he can borrow, than what he can give.

And the rest of it sits in a very crucial way how the Canadians will deal with Americans. America is really screwed up by the Canadians. If you're not a Canadian, or if you're outside you do not know how the claims have got them President Trump by 'short and curly's.' Massive problems for them there. Chinese are on the other side and what you call the Ukraine war has drained everything from Germany and Europe. A lot of Italians don't

even go to work, because if they want to show we cannot accept the way the government works. By work withdrawal they say you generate your taxes, we are not paying for it. And we see this right across Western Europe. So there is no money left to start the war. (1:36) And the other hand you have to understand, you have the British Monarchy, but you are of the late generation. British monarchy is a German monarchy, and they are hidden in the background with the Rothschild's, which are the, what you call it, the Germans. The British monarchy changed the German name. It was just around the Second war, first World War, not to be connected to the Germans, but they are German blood. There is not a single drop of English blood in the, what we call, British Monarchy. So, you have to see how they're supporting the German government to stay in power, through Rothschild's and themselves.

The British Royal Family name is the name of the house they lived in, because the (their original) name was too German, in the previous war. Not to be kicked out, but in fact they only operate through Berlin. So then you can see a lot of money has gone out to the war in Ukraine, and a lot of money has gone to other places, and it's not coming back. British, Monarchy and Rothschild's are running short. Then you have to see, you look at the overall international, they might use another war, but America cannot sustain another 30 days. Within 15 days, they'll have nothing. Trump tried to get hold of the nuclear code, they won't give it to him. He changed the head of the military, they won't give it to him. Israelis don't have access to weapon, nuclear bombs, because in the first days of war, Iran destroyed all the American planes, which are adapted to carry nuclear warheads. So they're relying on the British, what you call it, Americans, to do it for them. Americans doesn't have the thing to do so. (1:38) Israelis now have turned up bringing soldiers into UAE, trying to attack Iran ground level, when Iran is fully aware of it. They welcome it, like the other 172, to go back in coffins or in prisons.

So, we see a big moves in the geopolitically... the war could happen, but this time it'll be the end of the Swift, it'll be the end of American domination and the only winner is China. And what they claimed that they destroyed, there's nobody else left. There's a very big question mark, I'll put it to you, we'll have to see it later on. Nobody has seen the Ayatollah Khamenei of Iran since the first day. Rumors have it he's in Moscow. Now we have to see if it is true. The name of his son is used as a cover. But we'll see and how it will take shape. And we have to see how things are played, how the game is played. The Americans are negotiating with, not the Pahlavi family, they're negotiating with Qajars to bring them back in, as the new monarchy they appoint, and the Chinese don't accept it. And the, what we call, the crown prince of the, what you call, the previous Iranian monarchy, attended in ?? Munich and Berlin meetings. (1:40) And he's appointed by the British and the Americans to become the next king of Iran, when they get rid of the Ayatollahs, and that is in the wall at the moment. So, what they used to choose the world leaders, has gone to the pot. And it's not going to happen, and Iran is exporting huge amount of oil daily, using international laws.

There's a law if you... American can block the Indian Ocean, but every day, tens of ships go out of Strait of Hormuz, without Americans having a say in it, because they stick to, the International Guaranteed Water Rights, which allows them to stick to the shores of

Iran, Pakistan, and deliver oil to India and China. What you hear, that they blocked everything, Iran is suffering, is the same as the other lies you heard from the American Administration. And the Indians and the rest pay the charges in Yuan or Rial to Iran. Actually Iran is making more money, before the war, openly, directly into Iran national reserves. They can stop the ships sailing into, out of, Strait of Hormuz into Indian Ocean. But there's a maritime law. There's a couple of kilometers that you cannot touch. Because if you enter it, it's like entering a border and you start a war. The Americans don't dare to go in the Indian and the Pakistani side, because they bring the nuclear weapons out. And Iranians are exporting tens and tens of... only ships, oil is getting through. Very, very few commodities. Very few, very few. Iran Petroleum is still going through the same channel. (1:42) They stick to the shores, and by law it's covered, it's the border of the nation. Your border doesn't sit on the shore, your border sits a couple of kilometers offshore. And all the ships stick to this line, and Iran, last week 23 tankers went to India. And everything else.

So, this will be very interesting to see how Americans come back humiliated. What I call, begging pot. The only reason for this, with meeting, it was different before when it started. But now is, Trump is begging for China not to stop. And when they take over Taiwan, let them have some Chips, because their fishes run out. And, more or less, we've got to wait and see. Iran will annihilate, there won't be a state called Bahrain. Bahrain, you have to understand, we had a very incompetent king, the Shah and his father, extremely incompetent. During the Shah, we gave part of our nation away for no reason, we never understood. A lucrative for a beautiful city north of Iran was given to Russians. A big district on the east of Iran was given to Afghans, nobody understood. Bahrain was part of Iran, suddenly became independent nation, nobody asked for it. And then we have the same in ???. The Shah decided to give the rights to the Iraqis, which was Iran.

And during the past 40 years of the Persian regime, we have not given a single centimeter out. (1:44) Stayed loyal to Iran. So, this has brought a lot of things. What you hear outside is not what's inside. Hardship because of the Swift, yes, but don't forget in 1970 Iran was 32 million population, now it's about 90 million population. It's tripled in 40 years. Nobody knows how, but they've been very active. They locked them. They can't go anywhere. They made children inside. And you don't see hungry children on the street. You don't see... we see a lot of Afghans begging on the streets in Iran. We don't see Iranians begging. We feed our nation. We look after our nation. So whatever you hear outside is not there. And secondly, with the new 'One belt, one road' trains, Iran exporting most of his oil through land to China, doesn't need the waterways. And delivery at the moment is 11 to 14 days from China to Iran. And the rail track is busy.

So what you hear in the news, what we see from our side is a nation claiming a very British, they would say, 'fur coats and no knickers.' This is the position of the Americans at the moment. And if they go to another 30 day of war, unless they use a nuclear warhead, America will have nothing to defend itself. Mexicans can just walk and conquer half of the Texas back again, because they have nothing to defend on. America has lost over 15,000 dead soldiers. The data will come out. Estimate is 35, but 25, 15,000 coffins are confirmed. 16 air bases most advanced with all Americans, (1:46) no foreigners were

allowed in, are wiped out, nobody killed. What happened? They are angels, they go back home when they come back, when the bomb is gone?

All the radar system by the most trained officers have gone. They don't even have officers who they train 10 or 15 years, gone. The American losses is in tens of thousands and in hundreds of billions. So, 15 more day of war with Iran, you'll run out of ammunition. But it'll be annihilation of most probably the whole of Western Palestine. One of the reasons Iran doesn't destroy the whole of Israel is that it says it's the land of Palestine. If we destroy it, they have, they need to come back and live in it. Israel now is less than 2.4 million Israelis left out of 5 million. And these are the soldiers kept by pressure and the beggars cannot afford. You go to Cyprus, Cyprus becomes second Israel. You go to California, Florida, all going. Most of the nations have banned Israeli passports to come in. European nations, Italians have done that. In Japan, no Israelis are allowed in, because they come in and then they ask for a refugee and they don't want them there to create the next cycle of problems. South American companies, countries have banned them, Asian countries are banning them.

So, a lot of the... I was talking to a diplomat, he says, "If you go to supermarkets in Tel Aviv and you go to ones in Dubai, they're all the same, nobody in it, hardly anybody in it. The reality is different than what is there. But war starts, America won't last more than 15 days, but the losses will be heavy. (1:48) There's one consideration that the Dubai and the United Arab Emirates will become part of Saudi Arabia, quite possible, it will not, UAE will not exist, that's 90% on the cards. And Bahrain will go back to Iran. And there's a lot of other things with it, don't forget Iran has parked all their air forces which none left, all the Iranian fighters are parked in Afghanistan and in Pakistan on the border. Americans don't dare to touch. So we destroyed all the air force. They said they destroyed the Tehran Central Airport. Now it's working as 100 times more than 70 days ago. You hear a lot of propaganda about Americans have achieved nothing except 30,000 dead.

Don't forget when they give the bodies back or they bring people back to America, they tell the parents if they talk, they'll be this and that. But you ask how many bodies have come back. There's a report that there's more carriers are carrying bodies back to America than actually bringing things in on the cover of the delivering arms, they're taking bodies back. In one quote, "America has lost more in 30 days than they lost in all of Vietnam." You watch when the figures comes out. But Vietnam war was all illiterates. They got it off the grounds and put the uniform on them. This time all the experts, radar, communication, pilots, all gone. All gone. On tangible assets, trillions. (1:50) Takes years to train scientists. Israelis the same. 1,400 nuclear physicists, scientists, ?? some more. Iran built 500 below. Israelis they thought they would recover 20. We'll see. Look at the real figures and then we'll see when it comes.

Any other question?

<< Knowledge Seeker raise hand but do not open the microphone. >>

Q: ... How does Plasma Technology work in dentistry? How can it be used for tooth regeneration?

K- That the Japanese have done. We've done a lot of work on this tooth thing. You know Azar is a dentist and my sister is a dentist, I have been hammered for years what we do. (1:52) There's a lot of things we tested, we do. It connects to the Soul and how it's done. We've shown a little bit of progress in the young girl during the Corona. But generally, it should be able to be done. But at the moment we don't have our balls on that, our eyes on that ball at the moment. But in a way you can regenerate tooth. And genetically now the Japanese are very successful in the past year or so. But, plasmatically, you can create a condition of it, doing it. It can be done.

You have to regenerate, reactivate the nervous system, which Gans technology is the best for it. We, hopefully, will access to some medical hospitals very soon, which a lot of these things can be done. We will operate out of ?? (China) Southern Coast, what you call, Island of where we came to Sanya. In the hospitals in there, very soon Keshe Foundation will operate in these hospitals, specially designed for new technologies to become part of the Chinese operation. We are establishing heavily in that area, that we will do tests in hospitals there, with different part of the Keshe Foundation technology, as part of our operation in China. It's on the card, it's just... it needs a few more months and we are in it. And then there's a lot of things to test.

But you look on the banner, it's all licensed. It's a very beautiful way the Chinese have set this island up. (1:54) In this island there are clinics that you can test any new medicine in any new way. And Keshe Foundation being actually a Chinese company has started that way. We are actually talking and working with one of the owners, the hospitals. He is a partner in one of the leading hospitals. And what you call it, we are working on it very clearly. Dentistry, cancer, the education of the Alzheimer's through simple technologies. It's on the card, it's getting done. It's strange how things come. This guy just happened to be my neighbor. We start talking and he said, "All my facilities, I can give you everything in my hospitals." He just sleeps a few doors away from me, without me paging. So we see, God brings things together.

Any other question?

Q: ... How the Cosmic Ray (CR) Balls can influence seeds? If I take some seeds and I let the seeds rest close the Cosmic Ray Balls. How this...

K- Try and tell us, something we haven't done.

Q: I'm doing this but I just want to know if... Did you know anything more or did you have already? (1:56)

K- We work in our agricultural research center. It's actually ongoing today, it was getting done yesterday. We are working on a new dimension, we should partially cover Cosmic Ray technology. We'll have a data within a week. The team who's finishing their job is

getting done and it's very fundamental to see how the growth and how the other thing changes. And that is not the Cosmic Ray material but it's Creation of... It's the first time directly be involved in this kind of research. There's a reason for it and actually on our production and agriculture I think even today are busy with it or being busy with it. Let me tell you how it affects and what it is. We are creating a condition very much is a pre-test to the Space technology (T) growing things in Space. But we are doing it in what you call it ground level and it's a first and then we see how Cosmic Rays, how the environment we create we do, will affect us and how it will change.

There are a lot of knowledge that you have to understand deep before you get involved in these things. And one of them is, when I explained to you, when you eat the food, the minute it enters your mouth, it's not a matter of state anymore, it's in the environment of the field of the body, it becomes a Gans state. Now we're treating this in that position. (1:58) It's very important to... when you do this, do it holistically. Cover all aspects. And now we're creating the same as the ?? food we eat, we are creating Cosmic Ray inside another Cosmic Ray, over another Cosmic Ray, and we testing this actually, teaches a lot about our defense technology at the same time. We look at the agriculture part. In a way, we make a tent of a tent of a tent, which we control all the three tents. And Cosmic Ray is part of that test which is going.

I have good news for you, because as you know, with our research Space City, it is getting shape, developing in a beautiful way. We have come now after more or less four or five months of operation, that we are discovering more and more things actually, just in two or three fields and new things. And I have asked the head of the Keshe Foundation to reopen the Plasma Times, which we stopped with Corona. In the next few weeks you will see the Plasma Times to be published again, only by the research development of the Space City. We become the publication of, as Plasma Times is a scientific journal registered and is the number for it. Try to get hold of the new Plasma Time. It'll become within the next two or three months, because the data coming up from research centers and other things is so in depth that, only we who are in can publish it. (2:00) So people like Rafael, people like, who are collecting information and data, we'll ask you very soon to come back in, and people who helped us with setting up the pictures and the things of the, what you call it, Plasma Time will become only to publish the data on the research of the Keshe Foundation. Very soon. I asked the head of the Keshe Foundation to see to this as soon as possible, because the data coming from our research centers is amazing. Not all success, failures, but it allows you other people thinking. And so, one of the benefits of it is this, what you call, sharing knowledge, especially on the agriculture, we're very happy to the other aspects of the Space and everything else is completed. So your Plasma Times, totally bound to research, will appear in a short time, hopefully, because there's so much data we need to share with the rest of the humanity.

R: That's great news Mr. Keshe. In fact, I was just pondering that in the last days and week or two and how lovely the articles are in the Plasma Times. In review, they were quite technical and very well put together, lovely pictures and images and so on. Has a very nice publication, so have to...

K- Yeah, we have the French Knowledge Seekers who tries to push his journal through, because he gets financial benefit from it. We'll ask them to stop once we come into operation. He's been helping, he's very... he's done a lot of beautiful jobs, but the publication for Keshe Foundation will come from center from now on. And we have a lot of things. (2:02) I was puzzled how the team has taken shape in the Space City, I call it. It's growing up with a core of people who are actually doing things, the most amazing things. As we are setting up a new Space, and I was yesterday in a position, they are deciding even the screws, which is going to be used in labs, to be homogeneous right across all the labs, in the future. Everything ISO standard. At this stage they are planning everything to the screw. That when you go in any labs of the Space Center, going from one lab to another, there is no difference. And it's amazing what is getting done. And I thank the whole team behind it. It's an international cooperation and it's amazing what it's developing, what it's becoming. And it takes a lot of time and effort. People are working around the clock, getting this done. And hopefully, very soon we'll take you across this beautiful research center, what we call the Space City, is getting shape. And it's thanks to a lot of Chinese supporters, a lot of work is done by the CEO of the Keshe Foundation in China. And our other CEOs and attached teams too, in the way they are taking shape. Step by step, no rush, very slow.

Any other question?

Q: ... How were these hybrid children fabricated? (2:04) Through Man-made manipulatory intervention, or spontaneous combustion, or through possible natural direct physicality's match?

K- What are you talking about? I'm lost.

R: I think she's talking about the Children of Mitra that you speak of, that are made in a different way than through the physicality way that creates.

K- You see, you... When you create a Child of Mitra, as a human, you will know the difference between a child, a human child and a Child of Mitra. You know it yourself. And if both are not in the same way, both partners, you cannot create it. It's a process that... first of all, when you create Children of Mitra, in the dimension of physicality of the Man, you still have the interaction of the physicality, but you have no egg and sperm. That comes from the Soul. In the future, it'll be proven and it'll be shown by the world of science. The way now you can monitor how egg and sperm is transmitted and how the child is conceived, you will not be able to create a test tube Children of Mitra, impossibilities. Somewhere somebody has to create a dimension of the environment for it to grow. (2:06) And secondly, it is the energy of the Soul, which leads to the Creation of the Soul of the child, that then the environment created, the size, the physicality of the child. And those of you who create the first Children of Mitra, you know exactly what I mean. You will feel it, you know it.

R: Mr. Keshe, is this what the term "virgin birth" is? Is that the same?

K- Yeah, more or less. It comes not the physical virginity, we call it from its virgin Soul, untouched, pure. And as I said, you can be 100 years old and still give birth. This, you, first of all you have to create the condition of the environment of the birth to match the Soul. And no knowledge in the Universe has reached that position. The, what I call, the womb of the Universe is unique. And cannot be replicated. Cannot be replicated, it's such a spectrum. So, Children of Mitra, when... when humans created Children of Mitra, they both know. It has a process, in the future I explain the process. And then it has understanding. The women will not go through ovulation. (2:08) You don't produce any eggs for weeks and months before. Man will have no sperm, that the physicality doesn't get involved in it. You'll know it. And then has to be the connection of their Souls. Then both Souls have to agree the position of the womb. To you is fairy tale, but some of you will start experiencing. The more you become mature in the understanding of transmutation, the closer you come to it, you understand it. Doesn't count on age, doesn't count on Possession and Position. And you will see the Children of Mitra, they are like Sun in anywhere they walk in. Their love, their joy is untouchable, but it has a lot of conditions to reach that point.

Any other question?

Q: ... Good morning, I'm from Poland. Last week I had an interesting experience. I built a plasma windmill with Gans and started it outdoors. I pointed it at the sky at an angle of approximately 45 degrees. (2:10) After some time, balls of light began to appear in the sky. I saw four in total, and one of them turned metallic and slowly flew upwards. What are these balls and where do they come from?

K- I'm not there I don't know.

R: I knew you were going to say that. That's your classic answer for that.

K- When you're not there you can't explain, or you can just make up. We're not in that making up things. But it's amazing. It's a very interesting experiment. But try it again and let us know. It's a very interesting experiment. I tell you, we'll have hundreds of Knowledge Seekers making plasma windmills now is fashionable. Somebody's done it.

We know scientifically, you have to understand the atmosphere is moisture and scientifically we know this is a puzzle in the world of physics has been I explained this somewhere it's not a puzzling, but it's still in 95 percent of the world of physics is a puzzle. If you have a bubble air bubble in the in the in the water any water and if you allow the bubble to come to the surface and it goes plop, plop. You hear the noise. But if you blow this bubble in the water, it creates light. I explained that to a world of science, very recently. (2:12) Because even it's a water, it's a condition of its own MaGrav position. And the air inside is different. And when you collapse that air inside, the two energies have to balance. And the water has to absorb the energy which is inside the ball. And that creates light.

And we will release a toy like this very soon, in the next few months. That children can watch and the light just comes up in ?? the bubble. But it needs a lot of understanding and it's not shooting, you can't shoot and it becomes, you can't burst the bubble. In what they do, they use high laser and ultrasonic at the same time and the bubble bursts. But always creates light and they couldn't understand why. And I explained this is what it is. Then you can imagine what happens in your stomach when the food gets digested, it's full of light. This is the ?? axis of physics, you can't change it. And your atmosphere has that moisture, you mostly create a bubbles, create a plasma, that plasma has to manifest itself, and if it's going up, it doesn't have the ... Inertia, compared to it come down. And if you get one of them come down, and if you can put a tissue paper or whatever, see what does it convert to.

Any other question?

Q: ... (2:14) I haven't called in for a while. Good to be with you.

K- You've been gathering kangaroos?

Q: I have, and after last week's teaching, and reading Rafael's summary, which I always enjoy, he talks, he paraphrases what you taught about how when a tree is burnt, Carbon remains, but when the human body is cremated, there's no Carbon to be found. And I wanted to take you through an analogy with the process we use here on our farm and it's the Creation of ?? biochar. And so it's the heating up of wood at 700, 800 degrees Celsius, without oxygen in ?? pyrolysis, and it crystallizes the wood, and then we break it down into a powder form and put it in a bathtub with a dead kangaroo. And as the kangaroo break, and then we fill it with water and put in a whole pile of herbs and of course, Gans. And as it breaks down over the next six months or so, the aerobic anaerobic processes, fill into the charcoal, and under a mag .. magnifying glass. Microbes grow and breed and feed nutrients into the char. (2:16) So I was always interested...

K- How long have you been doing this?

Q: Five or six years.

K- Would you like to join us in the agricultural Space City and show us?

Q: I'd love to, yeah. And another example of this, I think I might have mentioned before to you, is the Indigenous process of coal burning, where at certain times of the year we use fire to burn in the land to keep weeds at bay. And of course, where this burn goes through, the grasses, the natural grasses come back really strongly and the growth is immense. And so I'm wondering whether there's an element of Nano coating embedded in this whole process.

K- Yes, we have taught this before. In our agricultural side, I have asked that none of the plants or whatever is pulled out of the ground is to be discarded, all to be changed into, burned into charcoal, or into ash, and spread back on the ground. This is something we

do. I tested this twenty years ago and the what you call the South American tribes lived in one of the most fertile dead soil in South America, but they noticed where they were burning wood for a heat or whatever and they're throwing the ash out, the... they're growing... things growing on it. (2:18) And now, when .. Europeans went to South America, Bolivia and the rest, we see black soil, half a meter, a meter deep. This is what they burnt. They actually went out, cut the woods, burnt and put it on the land and became the cultivation. When you go to Africa you see red soil. When you go to Ukraine, Moldavia and that part you see black soil. This is why Ukraine is a bedrock of food. When you burn the grass now becomes Nano material it absorbs energy from environment, it's a natural, what you do with a fertilizer you give energy to plants. It is the most natural way to feed. This is why when the forest gets fire you see a bigger fire a forest, more mature forest. You're doing what is scientifically, you create Nano material and you feed it. When we used to have wooden, what you call it, heaters, all the ashes were collected and put in the garden.

I was teaching this to a farmer very recently in North Europe. I said, don't burn, don't destroy your things, you create weed and everything, even end of the season, the stems of tomatoes or whatever, just put it back in. I've asked the research centers, you discard roots of the lettuce or whatever, they have to be burned, they cannot be discarded. (2:20) The process is getting set up for converting our waste products into actually fertilizer. It's part of our work here and you are very correct. It does that. When you start talking about the charcoals and crystallization, I know exactly. I want you to come and teach our people what they have to do.

Q: Well, I love the sound of Space City and I love the sound of plasma people coming together. I need a Plasma 'Pen pal,' who I can speak to every now and again, to keep me focused and moving forward. I'm sure there are plenty of other people who live in...

K- What are you talking about?

Q: Well, we listen to your talking, but I don't have someone I feel comfortable to speak to and can joke around and laugh about some of these things, as I work in my lab all by myself. It would be nice to have someone to hang out with and talk with. And we used to have this thing back when I was growing up that you'd have a Pen Pal. Oh. And you'd be able to write. How do we have a pen pal?

K- In agriculture?

Q: I work as an economist, but this is my side project, yeah.

K- Yeah, the Australians ones, you have Jim and some other people there I presume you know, and agriculture you can find with Joel in France. We, oh there is Jim in Australia near you.

Q: Yeah, yeah there's Jim, Lisa, Antonio we hear of. Yeah, we need to hang out more. (2:22) But yeah, it's just one of those things.

K- Do you want me to hangout a chat with Jim, what do you call, for you lot. I'll open a hangout chat. After the session I'll open one and connect all of you. You can chit chat. We have no problem. The structure is there. Very soon I think this kind of chat type things for the Knowledge Seekers will appear. Most probably it will be sorted on the, what you call it, the Game which is set up. The Enlightenment and Peace Game. There's a lot of things happening there. We start recruiting professionals to do this job with the help of our people in Keshe Foundation. We start resourcing from outside. So the, what you call it, the process will start. This is why if you go on the Keshe Foundation, what you call, sales side, we have opened one for teaching that you teach yourself, or we support you to learn but allows us to support what we call, the expansion of the ONN's. There's a thing there, it's like a donation, but it goes for training and development of the ONN's. You can participate on that side to help us to expand this. But I think the people in the background hear you, and most probably a chat will be set up in the Games.

Q: Okay and usually when there's a crisis in the world there's a Keshe pact that comes out or something like that. (2:24) But I wonder have you got anything coming together regarding fuel efficiency in particular for diesel. But back on Lisa and Jimmy's teachings the 12-part series they did years ago there was an Eric from Denmark who turned up and talked about putting some Gans on kitchen paper towels and putting Iron Gans, eight drops, CO2 drops, two on one piece of kitchen paper towel, putting in a Ziploc bag, cable tying it to your fuel line, and then putting the inverse of eight drops, CO2, two drops, Iron Gans on another paper towel and putting that underneath the driver's seat. And for me, I saved 20% at least on my fuel bill for a good couple of years there. I think I replaced it once. But have you got some sort of, I know you're always doing things, but has that process of thinking evolved? Because it was so simple and so effective. Is there anything else like that coming through?

K- At the moment we are concentrating on our research center. We realized, I mean our directors realized, we're spending a lot of money on electricity. And one of the Knowledge Seekers who is part of this work, is actually I think has arrived today, that we will be testing developing new energy system for our use. The electricity cost is colossal in some of the research centers in Space City. (2:26) And as of this week, yes, we might release some of the technology. I was with some of the Knowledge Seekers recently and I explained how we change the feature of MaGravs and we're going to test it. Hopefully it's going to be tested very soon. MaGravs which become the power supply themselves without any connection. And we're going to test it in the next few weeks, and we'll replace it.

You have to understand there is a target in Keshe Foundation, 27-28. We enter through the Research Center, maybe sooner, it just depends how we bring people in to do it. The introduction of the cars without engines, without battery. This is on the card, we were showing, we were trying to show this in 2011. And very soon, with the, what we call, you will see cars without this, it's just a shell. You can literally ?? fly Persian carpet, as I call it. So, instead of finding a saving fuel business, we are introducing a Cosmic Ray Technology. And that's maximum 2 years. This will annihilate the present automotive

industry and all the investments going into batteries and electric cars and the rest of it. That's... say 90% is on the card. You will see this, these vehicles. (2:28) It's part of the Space Technology, we can't avoid it.

It'll be sold in a package of 5 and I reckon, it should be around about 2 to 2 and a half thousand dollars. It's one of the, what you call it, it's part of the Space lift and motion, part of the Keshe Foundation. It's just perfecting the art. It cannot be done, it's not... it's there. It goes like an AI and an emotion. Without AI we cannot run it. It needs immediate decision making, like what you see in the self-drive cars nowadays. We need a system at least 100 times more efficient. You can stack level it, so you travel on a meter, two meter high, ten meters high.

I remember when I asked the Belgian authorities if they can give me... there's a stretch between ?? Kortrijk and Ghent, it's a straight motorway. I asked the Belgium authorities to give me one Sunday afternoon free, that I could test. And the excuse was there were bridges there. I just wanted to test. It's not the knowledge, it's not the knowledge we have. Now we're in the Space City, building up in China, we'll be testing this. And we have a straight lines in China. I was looking, going down one very recently. I thought, "Hmm, that makes good sense to make it test it here." So, yes, just play with that diesel and the drops for a couple of years, maximum. You won't need the engine. (2:30)

Q: Excellent. All right. Well, thank you very much Mr. Keshe. I really enjoyed the teachings. And we need Rafael to come on. Come on. Why doesn't he come on and ask you some questions? Because when your teaching today was very advanced, and I'd love someone with advanced knowledge to be able to reiterate what you were saying and tease it out with you.

K- He likes his ground in São Paulo (?? Rio de Janeiro). He doesn't want to move. He loves where he is. He's a true Brazilian. We tried to put him into a Space city, he's not moving.

Q: But he could speak to you now, is what I'm saying.

K- Oh no, he actually, he communicated with me this morning. He's an amazing guy. He'll do a lot if he makes his way to the Space city. But we got to wait, we don't really... I think we're going to get him married first, and then move the wife. He'll move with it, but we can't move him on his own. But we'll see what happens.

The beauty with the Space Center is managed, run by a young Keshe Foundation team. The new generation has taken over and it's beautiful to see them growing. I enjoy seeing them battle. And it's beautiful the way they keep the Ethos and they work on that. It's amazing how it's difficult for the people who are not Knowledge Seekers, gradually to turn and believe in what they do is correct. I've had the, what we call, and the running of the ship to this young generation, and they need to be there, and I hope that when the time comes, they do the same, pass the ?? (baton) to the next generation.

Any other question?

Try to, if you like to, (2:32) to show our team how you do it, and if we see in your charcoal business, what you do and what it does, we are very interested. If it uses the Gans technology, and I'm sure our team will invite you, they'll pay for your tickets and everything to go and have a couple of weeks of fun and teach. Let me know what... Send me a detail of it, I'll send it to them to study it, and if something we can add to... join them for a couple of weeks, two or three weeks, and then we can go back. And if there is any commercial earning from it or commercial benefit from it, we'll set a spin off for you.

Q: Very good, thank you.

K- Thank you very much. We learned from one of the, we brought a non-Knowledge Seekers who became a Knowledge Seekers, and he brought a vast knowledge in agriculture for us. He's an expert in Iran. We brought him. He stayed with us for 2-3 months. He taught us a lot. He took the technology back. And he used our technology with the technology they have. And it's resulting in amazing, amazing things for us. We're learning a lot. And we added to the knowledge. It's very strange, the people come in touch with technology, even as an outsider, after seeing it, and they see what they can do in a mixture of their technology, it just changes them. The beauty is that they carry the Ethos of the Foundation.

Any other question? (2:34)

Q: ... How can those first generation players, whose accounts have been banned, participate in the Game to discover vulnerabilities? How do you identify spies to stop them from creating more vulnerabilities and slowing down our progress?

K- It's the job of the people who are setting the Game up. That's their job. They are aware of the shortcomings and they are aware of what happens. And I think they are what I call, the AI part of this needs to be part of it. We have to develop an AI which actually monitors the AI, and all the other things on it. It's amazing, I was in Chinese, one of the AI centers a couple of years ago. It's amazing how they invested in this thing. A city for a few hundred thousands of people just working on AI. And now they moved into Cosmic Ray AI's in the past two or three weeks using our technology and the words we use. And the binary zero one is totally gone out of the game. We have to teach them how to control it, because there's a control mechanism how you control it. And most probably in the new research center will come with that very soon. (2:36)

We need a lot of support from Knowledge Seekers, especially on purchasing this ONN and allow us to spread the technology to even the people who don't know. And this is a crucial point for us. in the next 12 months, to be able to do it. Keshe Foundation has to do it itself, through itself, that we don't get controlled. And the rest will come with it. It's not easy. Even creating the AI here, is causing problem for our team. Their own AI works ?? against their own work, and they have to re-do the new AI. But it's part of the policing AI with the AI police, it'll be very interesting.

R: That seems to be the challenge, is to have an AI baby-sit the AI that you originally set up to do the work.

K- That's what it is. It's...

R: On top of that, baby-sit that one, so they're each watching each other.

K- The interesting thing is, the Chinese have built the biggest train terminal in the world. It's opened up in past few weeks, or it's just about to be opened. Unknown to public, a lot of the work was done with the robots connected to each other with AI. They closed the city, nobody could see when they're building this huge, what you call it, the station. It's the largest ever you can put, God knows, so many of the central stations and biggest stations in the world into it. It's mind-bobbling what they built. They destroyed the mountain, flattened it, and they built a station on top of it. (2:38) And most of it is made by robots. And the robots, not only individually controlled, but collectively controlled to do the same thing. And their power and their precise work has been amazing. More and more information is coming out, how they build this thing with partially with robot help. But what they say, the next generation of train stations or whatever it be built, learned from this or construction, will use 10% human workers and 90% robots.

Now imagine, how many more unemployment will come up and how many people have no jobs. But we have to feed them, nations cannot keep on feeding and looking after people. And it'll come to alternative, the source feed through the Soul is the alternative, the only way. The more and more we advance, the more people will have no jobs for. Even now the Chinese are looking at armies without humans. Now you can imagine what's the next step is, you don't have an army, so what happens to the soldiers. You don't have any factory workers, dark, what we call, factory is now is a known, it's a common things in China. They're producing thousands of cars a day without a single Man, all done by robots. So, but we still keep on producing humans, would the robots decide we can't feed so many humans, Humans need to be eliminated, or we bring the alternative, we feed as many humans as we like, through the new technology. (2:40)

It is possible. There is a possibility that we can use an atmosphere, over Earth atmosphere, which means in this atmosphere we deliver the shortcomings of the Earth, cannot do like the food energy, health. The air you breathe in the fields of the plasma enters this. This is not a dream, I hope the machine will be able to be built in the next six months, which then, in a way, even the cat, the dog and the tree will benefit by it. Then there is no need for next generation of murderers like Netanyahu, any nation has a nuclear, it's my enemy, going from one country to another, will die, because everybody is fed, everybody is happy, they all get a Keshe Coin (KC) and they all use the system to feed themselves. And this making a second layer of fields, I think about few years, is in the reach of Man. We don't need to use, what you call it, mobile phone or what you call Apps, through ONN's, we create that cluster of energy. Hold on to, continuously fed, everybody gets what they need, what they... energy wise, there is no hunger, there is no medicine. And this all connects to ONN, it has to be done. Because then we can transmit

from the center to it. (2:42) And it's like if the currency nobody can destroy, because they can take 10 Units out that there's other thousands there. Because we don't look at the present coverage of 10,000 ONN's covering 1 million or 1 billion. We work on this next step, which is a Cosmic Ray transmission, which the 10,000 will cover the whole humanity to feed the fish, the rest. Because it creates that condition.

Any other question? Shall we call it a day?

Q: ... Mr. Keshe, with the Cosmic Ray Balls, when the container is closed, will it still have an effect, or does it need to be open?

K- The same, doesn't matter, it's just a cosmetic. The box is just a cosmetic. And the new ones don't have a box because we don't produce them anymore. And the last one we received batches, I think the last few left, it will have no boxes. Because we don't have the boxes for them. It's not worth producing them. Time it takes and the rest of it. Then it gets produced in Ukraine and it takes time. But, whatever we have of, I don't know if we have any more Cosmic Rays left Balls, that's the last of it, for the time being. We need all our materials in all our systems. (2:44) Thank you very much for today, and hopefully we see you next week.

642 KSW – May 14th, 2026

End
