

647th Knowledge Seekers Workshop June 18, 2026

(Quick Index 21 pp, Introduction, Topic Index ; Need to do; Key Phrases, Words)

(Auto transcription from Elias)

EYES: Real work of Creation beyond planet; Teaching about eyes - receive CR information to travel U; Many creatures U have sight - or use CR - feel different D; Humans trapped in physical vision - don't use to absorb, feed, control energies; Meaning of Cosmic colors & CR; Evolution of eye color; Connect & absorb U Energies through eyes; Eye sockets - no Ca - Soul connects to U ; Evolution eye color - absorbs certain Cosmic Energies, affects emotions, thinking; Causes eye color; Originally eyes black - from green vegetation & high temperatures - Central African plains - South America, Australia; Man grew as seedling - monotonous environment; Started migrating - eyes changed color with new environments; About migrations; Deserts and green forests of Iran - eyes changed to brown; Biggest change in evolution - STM created diversity for itself - shift body positions - absorb different fields from Inertia, etc.; In Europe - ancestor of all blue eyes in human race - for forests & open farmlands; German dense forests - green eyes; Scandinavian & costal areas - grey eyes; Hazel eyes - dry desert & green lands - Silk Road; Humans change eyes according to environment; Golden eyes; Each color - creator of emotions, behaviors, reactions - absorb from U; Skin of eye, eyelids; Dreams - extension of Soul - vision - extension of P; Close eyelids; Why remember dreams; Eye color dictates bandwidth can absorb - feed Soul; Different colors in U - convert to human color; Gans color - not Earth; U colors mixtures - Book 3; 1,000 shades white; UC - no eyes - absorb - like in dreams - see people through fields; STM feels CR of others - senses danger; UBESUS Headsets help see U colors; Lose life in Space; CR mixtures - how interact; See colors as energy - affects STM; Tune sight - fields of emotion - absorb, feed P with STM; Create new emotions; See through Soul - Energy Packs; Emotion warns body; Learn rules of U - make judgments; Understand motion of fields of U - dogs mono-color; Vertical People use Soul arrange P; In Space eye color & shape change; STM sees full spectrum; Dream is of Soul; STM never sleeps; Brain works 80% STM - transformer; Brain inside STM; Experience when STM elevates - body not feel like yours - shed skin; Shares personal experience - new body - detached - vision sees Knowledge of U; Third time - knowledge of U; Servitude; Eyes for seeing U in dream; Eyes get attached to P; Say traveled with Soul - not dreamt; Soul lives separate life - baby-sits P; Souls arrange Karma; Connect breathing to vision - lymph; Don't need eyes or lungs; You have to save yourself; Meet Creator; Understand purpose of life; UC creatures - 100 senses; No limit on emotions - CR; This teaching - takes thousands years; Mix of blue and green eye- unstable; Ate dream food; Not kill in dreams; Second video Agriculture China - drones; Evolution in T for agriculture; Change environment; Research for Space T getting built; Growing TCM herbs symbiotically with fish - feed from CR - true Omega 3; Fish become medicine; TCM herbs - same strength as 100 years ago; Control operation from seed to market; Herbs used in KF Wellness Center & hospitals - across China - later export; Exhibition in Switzerland 23rd & 24th October; Women heading KF work; New products - Beads - bracelets for Pain & Sugar; Butterfly book holder; First 4 ONN Units on move - keep secret; Addiction test - lost memory of addiction; KF App complete; Need help with sales team, etc. - KF China & worldwide; Apply for export license; Everything certified - Chinese authorities; Plasma T for eye

problems; Treatments through TCM herbs & plasma - fly to Chinese hospitals; ONN system provide everything - KF Apps; KF owns structure from seed to market; Eco doesn't work - chemicals; Cosmo pure plasma; Produce Gans from CR; Not show our factories - don't mine metals; Setup KC & ONN before materials production - not hurt Africa; Every child supported; KF 40 year plan - not change - don't need governments; Eating honey, pollen, milk - stealing - fallen fruit; Same structure of taking - justifying; How cat's eyes operate - not from Earth - ancient writings - banned from public; Messi like cat; Analysis of Soul and P; More on vision - assesses Aura, etc.; Fields tell how behave; Soul sees fields; Judge person - walk - shake hands, etc; Souls share extra strength with opponent - animals in Africa - Chinese herbs; Scared to show love; Some don't deserve to be loved or share feelings - abuse; Cats make arch - defense - connects emotion to brain & Soul; UC members direct Chat to K; Universal Cup - plant or animal; About Earth's Inertia - which materials can produce; Magma - mixes and creates different materials from Inertias; Magma rotates inside Earth like power generator - creates different energies, emotions, thoughts - all M fields; Same generator - produce different amperage; Show Space Flight by 2028; KF T move megalithic stones - spoon move mountain; Earth's M field 'handshakes' with system's M fields; KF UFO - no electronics - Soul fields level; KF teach knowledge of pyramids; About 1G - body has own gravity from its Soul; Astronauts in Space Station float - no Soul of system; Give to Chinese - not float - contracts signed; 1G not measurement - balance of Souls; Brain creates 1G inside; Skin part of brain - collaborates with Soul; Don't float in dream; Walk on Moon - use eyes; Black iris - Soul of eye - color is filter - different behaviors; Eye color creates skin texture; Black skin soft; Brain, lungs, skin same embryonic tissue; Eyes absorb light - feeds skin - decides emotion & skin texture - CR affect us; Observing people in 80 nations; Eyes gatekeeper - U fields - feeds Soul; Ca - restricts CR; Later - why every cell has Ca; Difference between skull & bones; Swiss Presentation - decontamination; Give Governments & Corporations confidential research and data - have solutions; New Monthly Flight Sessions - 30 people - need feedback - feed with fields - for ONN.

Topic Index

Here to understand real work of Creation beyond planet - think P is ruler; Deeper into CR - receive energies from U; Teaching about eyes - receive CR information to travel U; Many U creatures have eyes - kind of vision - others use CR instead of eyes - feel different D - millions of kilometers around them; Human trapped in physical vision - don't use to absorb, feed, control energies; Learn to use Cosmic colors & CR - what they mean; Colors have meaning - red for danger; Where did color of eyes come from - its evolution; Connect & absorb U Energies through eyes; Why do we remember images in dreams - other senses; Eye sockets - hole in skull - no Ca - connect to U - Soul sends out info; Evolution of eye color brought maturity - absorbs certain Cosmic U Energies - affects emotions - ways of thinking; What causes eye color; Absorbing CR through eyes allows maturity - affects emotions & ways of thinking; Originally Man 's eyes black - because lush green vegetation & high temperatures of Central African plains - South America & Australia Man as seedling Man grew in these areas - had black eyes; Monotonous environment with tall trees, high temperatures; Savannas of E. Central Africa - vast, tropical grasslands, scattered trees, shrubs, tall grasses - black eye

environment; Man started migrating - eyes changed color with new environments; Modern migrations - one group left Africa crossed Straits of Hormuz into Asia & Europe; Another group - every 300 years followed flooded river to Egypt and out of Africa; Earlier migrations of 500K years ago - from N. Europe into Africa; Ancient cities under sea from millions of years ago - different life and creatures as humans; During migrations - deserts and green forests of Iran - eyes changed to brown to see more; Was biggest change in evolution of Man & development of STM to be able to absorb energies it likes; STM created diversity for itself - shift body positions from flat, horizontal, vertical; Other animals couldn't; Caused body to absorb different fields from Inertia, MG fields of Earth, and U Energies - brought maturity & intelligence to Man; Evolution of Man started - crossed into Iran 500K years ago; Few thousand years ago, changed skin to brown; Expanded to grasslands of Europe; One person created Blue Eyes - common ancestor for all blue eyes human race - to live in forests & open farmlands; Dense forests of Germany - green eyes - forests filtered sunlight; Historically & scientifically - green eyes absorbed different energies & CR, partially interfered by trees - gave different mentality; Rays interacted with Inertia & M fields of trees - Vertical People - effected why changed to green; N. Europe & Scandinavian costal areas - lived by sea, clouds, etc. - grey eyes - 2% world's population - near to blue, because of environment; Hazel eyes blue & yellow - dry desert & green lands - Silk Road - thousand years ago; Humans can change eyes according to environment; Golden eyes; Those who remained in one area - did not change further; Each color change brings different emotions & behaviors - placid Scandinavians - aggressive killing in Middle East - brought by Nature - continuous fighting to survive in harsh climate deserts; Each group has own behavior traits; Eye color - creator of emotion, behavior, how we react - from what we absorb from U; Skin of eye, eyelids - protect physical D of Earth - not stop absorption of U Rays; When dream pass through skin to D of U; Dreams - extension of Soul - vision - extension of P; Close eyelids - detach from body & interaction with surroundings; Can't stop dreaming - why we remember - not limited by eyes & eyelids - cannot stop waves of plasma T of U, nor CR; Eye color dictates what bandwidth of energy can absorb - feed our Soul with those fields; Eyes feed Soul - ?? independent of Creator; In U - have different colors - we don't know; Take spectrum of U color - convert to human color; KS seen Gans color - color specialist say not exist; Mixtures of universal colors; Showed in Book 3; CO2 cream color - ZnO pure white; PhD in thousand shades of white - don't contain colors of U; Universal Community (UC) don't have eyes - absorb - like in dreams; See people in dreams through fields - not with eyes; STM feels CR another Being produces - knows if in danger, or friend - what it wants to say; Pass through rock; UBESUS Headsets for eyes - help learn see U colors; Lose life in Space if not know what color means; Know basic color combinations on Earth - how to mix; Learn CR mixtures - how interact; See these colors as energy - affect field energy of STM; Tune sight of fields of emotion - to absorb and feed P with STM; Create new emotions; Develop sight like blind man - feel presence of others; CR - another passing body; See through Soul - enter UC; Sight & STM work together closely - eyes see P - Soul sees Energy Packs; Emotion warns body not to move - danger - trust Being - collaboration; Races that do both - unique in U; Learn rules of U - make judgments - felt something wrong - 6th sense - how Soul is in Space; Soul communicates with us; Understand motion of fields of U; Dogs do this - feel danger - because eyesight is mono-color - work with Soul; Vertical People use Soul to arrange P -

remain stuck to ground in storms - move together; Blue Alakai sees & absorbs certain fields through skin - creates emotion; When in Space eye color & shape will change - see full spectrum through STM - not P; In mirror - ask what energy eyes absorbing; Dream is D of Soul; STM gets out of eye sockets - no Ca; Humans already Space traveler - don't accept Soul; STM never sleeps - brain works 24 hours; Stupid scientists - only 5% - put idiot like Einstein higher - mouth talks faster than brain; 80% of brain - not for work of P - energies & information stored by STM for its operation; Brain used by STM as transformer - steps down energies - converts into messages P can feel and understand - do that in Space; Brain will invert inside STM - comprehend different things; Pure energy diluted in fields of U - interact with STM - decisions from that level - feel new dimensions - elevation of Soul - arm and legs don't feel like yours - elevated - access to more Energy & Knowledge; Going through evolution - like snakes shedding old skin - new skin is new D of our knowledge; Soul elevates - P goes through transmutation - fingers feel new - not ours yet; Soul elevated - P has to follow - getting used to new P; He went through this process physically - each time Soul elevates; Describes personally how body feels - get used to new body - knows knowledge but emotions have changed; Feel more detached from body; Vision sees Knowledge of U; Takes few days to get used to new skin - knowledge has changed, understand more; Third time - open to whole knowledge of U; Servitude is salt - catalyst to reach this point; Unconditional love - detachment from P; First time thought he was crazy; No connection to his body or life; At 39 - detached from wealth - tool to teach others - become part of Universal Knowledge - help others understand; If didn't learn leave it behind at death; Understand eye's importance; P of eyes don't matter - Soul still dreams, etc; Eyes for seeing U - see in dream; Creatures attached to P - have this structure of eyes; Many would give life for physical eyes; Say you traveled with Soul - not dreamt; Soul lives separate life - baby-sits P - own friends; Not aware of what your Soul says about P; If do something wrong - arrange with other Souls to balance - Day of Judgment; Vision is for P - but connects to life in U - not a dream - traveling U; Part of UC; If only dream of grandparents - still connected to Earth; Mother tying toddler by ankle - not lose; Sight important - gives Knowledge of U - while P asleep & repairing; P is not owner of the Man; Connect breathing to vision - open new life - bring in lymph - Soul's connection to P - feeds P; Same feeling when die - detached from P - see with eye & energy of U; I made Man in image of Myself - don't need eyes or lungs - enjoy P & beauty of Mitra; Too much attached to P; Detach yourself from P - only you can do it for yourself; Taking you to meet your Creator - even though already within Him; Understand & connect to Him - will understand purpose of your life; Taught you about air - now about eyes - UC creatures have 100 senses - Man stuck on 5; Then comes emotions - without limit; CR will bring new emotions; Gans's were bait to get you interested in Knowledge of Creation; Today's teachings - remain with human race - thousands of years - give Man power to separate from planet - connect to UC - enjoy P on this planet & in U; Realize you absorb energy through and because of color of eyes; What fields are you losing because of this color - cannot absorb that spectrum from U - because skin has decided what fields you needed to be able see in physical D of your environment; That's why you see what you see; When one eye is blue and other green - unstable - which eye for Soul and which for P; Your P is line of connection - allows to dream & become part of UC - have to stop killing, destroying, eating others; It's just the Emotion of it; Food ate in

dream was energies of dream - not physical food - didn't kill for it; Should not even kill in dreams, then, we can handle P; Understand how to transmute; Eyes are door to U - you decide which vision - Soul or P; We have entered new D in teachings - whole purpose; Will open other doors to control through P - live in both D at same time; Bring new D to humanity - key to enter UC.

End of Part 1

Second video of new Space City Agricultural project in China - drones spray open greenhouses; Automatically refills itself with Gans water; Evolution in T for agriculture; Change environment; Research for Space T getting built -invite leaders science and T - different universities; Not here for profit - understand problems & find solutions; Products secondary benefit; Growing TCM herbs symbiotically with fish - both feed from fields & CR; Fish need pleasurable environment to live - not feel hunted; Fish have true Omega 3 - not Omega 6 - poison & cancer from stress; Fish become medicine; Grow TCM herbs - strength of healing of hundred years ago; Observe how plasma crops affect people; Build reputation truly pure products - no GMO; Control operation from seed to market; Herbs used in KF Wellness Center & hospitals - across China; First China - later export; Exhibition in Switzerland 23rd & 24th October - limited numbers - present KF work with environmental contamination, etc; Lady expert in environmental work joins KF; Lot of women heading KF work; New products in KF Store; 'Beads' bracelets for Pain & Sugar; Butterfly book holder - change emotion when read; First 4 ONN Units on move - 28 by July; Keep it secret when receive - don't tell friends or other KS - security; First 28 crucial - tests then release 100 more Units - 500 by December; Plasma Universal Antennas next; Tested addictions - KS lost memory of addiction; KS developing KF App - thank for 10 years hard work - gift humanity; After ONN setup send energy of apple; Need experienced sales team - KF China & worldwide - modern advertising systems - doctors to test materials for medical applications - licensed; Launch 10 products across China soon; Need experts in TCM herbal medicine & medical applications or doctor in China; Apply for export license; Everything will be certified under Chinese authorities; Looking at Plasma T for retinal problems; Anything connected to head - can affect Soul; Haven't pushed developing T for sight - will be included in final Plasma systems; Treatments through TCM medical systems and plasma - fly to China - plasma in hospitals; No plans for international licenses; The ONN system will provide everything through KF Apps; KF owns structure from seed to market; Eco doesn't work - chemicals; Cosmo pure plasma; Produce Gans from CR; Not show our factories - don't mine metals - create Gans environment - produce Cu energy in water; Rare Earth material production - negotiating; First setup KC & ONN - so African nations not lose income; Every child supported - no worries for Mother - not change composition of her milk; KF plan - 40 years - will not change - don't need any government support; Is eating honey, pollen, milk from animals - stealing - fallen fruits; Part of same structure of taking - justifying - expanding; Understand how and what we value; How do cat's eyes operate; Mysticism historical tablets thousands of years ago - cats not from Earth; Writings from tablets about cats banned from public - deep; Cats can concentrate and focus - see through you - only animal; Emotionless - pauses & analyze everything, emotion, feeling of Time & Place in single picture; Football player Messi like cat; Analysis of Soul and P - tells

which muscles to use; Analyzes its weakness, etc.; We'll teach this; More on vision - assesses Aura, etc.; Fields tell how behave; Soul sees their fields; Judge person in meeting - 95% correct - how they walk - shake hands, etc; Look at physical side assess - emotions, Aura - are part of Soul; Cats aware of colors of emotion - explain later; Humans wrestle fight to determine strength; In Soul D - Souls share extra strength with opponent - both get stronger - some animals in Africa still live this way; Our animals become more human; Chinese herbs - share with each other; Scared to show love - talking about what might be; Souls know how to speak; Some people don't deserve to be loved - or share feelings with - abuse it; Others with same strength - build up what share - emotion dictates their behavior - Soul knows if other lying or sincere; Cats only animal makes arch - defense - connects emotion to brain & Soul - works as one; UC members have direct Chat to K; Make energy of plant or animal - Universal Cup - needs knowledge - composition of Soul; No KS at that level; ONN heat; Composition of Earth not able to feed its citizens - animals, etc - Inertia locks what it does in center; Composition of body restricted to Inertia components in Earth; Center Earth - plasma - hollow - same as brain; Magma - dynamic part - mixture of different materials with different Inertias - allows the materials to be created on surface; Magma is dynamic - moves the Inertia - like how oceans mix up temperatures of planet; Warm air travels from S. America warms West coast England - habitable; Magma does same thing - flow pattern dictates conditions on surface - creator M fields & generate energy - like magnet spinning inside coils in generator; Magma is like rotating magnet - Earth's shell is Cu coils; Interaction of magma with solid state Inertia creates different energies, emotions, thoughts; It's all M fields; Same generator can produce 1 volt or megawatts - depends how set it up; Be detached; Show Space Flight by 2028; KF has T to move megalithic stones - Stonehenge; In patents; Move mountain spoon - not anti-gravity - nonsense; Create right atmosphere - Earth's M field 'handshakes' with your flight system's M fields; Need T for handshaking; KF UFO - no electronics; Systems - work on Soul fields level - produce materials; Science not understand difference between solid matter, plant, animal, human life; Move tons like spoon; Man abused knowledge - withdrawn; Knowledge of pyramids - KF teach; Move P; About 1G - body has own gravity from its Soul; Astronauts in Space Station float - haven't created Soul in system; On Earth Soul has balanced itself with Soul of Planet (1G); Soul's GM fields positioning; Americans & European Space Lab disorganized, undisciplined, proud of their disorder; Chinese immaculately arranged - joy to work with - contracts signed - no floating in Space - put reactor in craft; 1G is not measurement - balance of survival; Have to tune into Soul; Brain creates 1G inside; Skin part of brain - collaborates with Soul - both agree; In dreams don't float; Walk on Moon - connect through eyes to CR; Receive energy with eyes; Black iris - balance of fields - Soul of eye - eye color is filter - why different behaviors; Teach later; Specific eye color creates specific skin texture - connected to STM through brain; Black skin soft - from eye color; Eyes absorb CR, interacts with brain; Brain, lungs, skin same embryonic tissue; Eyes absorb light - feeds skin - decides emotion & skin texture - CR affect us; Observing people; Experience 80 nations - observe peoples behavior, colors, etc; Eyes gatekeeper - U fields - feeds Soul; Ca - restricts CR; Later - why every cell has Ca - only way to survive; Difference between skull & bones; Swiss Presentation - decontamination; Give Governments & Corporations

confidential research and data - have solutions; New Monthly Flight Sessions - 30 people
- need feedback - feed with fields - for ONN.

Introduction to 647 KSW - First Teaching on Eyes & Vision - Evolution of Eye Color - Brain Transformer - Experience of Elevating Soul / Servitude & Detachment - Updates on KF - Cats Know - Souls Share - Secret of Pyramids / KF Demo & UFO - Not Float in Space

This is the first in-depth teaching we have received on the eyes and vision in this new phase of teachings. The eyes have far more importance than we ever imagined in physicality (P), where we just take for granted that we see the world. As they say, the eyes are the windows to the Soul, but in Mr. Keshe's presentation today we now understand that we communicate with the Universe (U) through them and together with the breathing they receive the Energies of the U and what we call Cosmic Rays (CR). The Soul gets fed and then feeds the P, but we also can receive energies to fulfill our other needs. When we look at the two holes in a skull, then we understand that the Soul of the Man (STM) passes out of them to travel the U, because there is no Calcium (Ca) in those areas to hold them in. In a way, the eye sockets are the doorway to the U.

In the U most creatures have 'eyes' or should we say, some form of processing vision to 'see' and interact with their surroundings. But seeing with physical eyes like the Man does, is a treasured experience to have. What does this mean? It means that instead of physical eyes, the STM feels or senses his environment. It's like when a person becomes blind, they have to use the other senses to interact with the environment, which become more heightened and they have a better opportunity to become inwardly drawn and develop what we call, the 6th sense. In Plasma Science as taught by KF we know that the 6th sense is really living at the level of the Soul, and in the present times we all have agreed to deny that part. Today's teaching is loaded with lots of knowledge about how our eyes function, how they came to be the color they are, and how that affects our emotions and behavior. Please study this workshop carefully and we'll try to uncover a few gems to better understand how we have been put together and function as a human body, and how we will be living in the U. And of course, that is dependent on us as humans, to stop killing other Beings out of ignorance and to learn to use our eyes to receive the energy and love we need to live.

Let's start by trying to figure out how come our eyes are the color they are and from the point of view of Plasma Science, how do they change color. First we should understand that the Earth is not 5,000 years old like some people believe, using the Bible as a reference. Some scientists say the Earth is more than 4 billion years old, therefore, there is plenty of time to have many cycles of the human race, like the Hindus believe. Different numbers were mentioned today, but let's just simplify it by saying that this current cycle of life started 500,000 years ago. It's my understanding of the teaching that the 'seeds' of humanity were sown in the savannas of East Central Africa, Australia, and South America, and because of the monotonous climate of high temperatures, the green of the grasslands, and the tall trees, but not dense forests, Man developed black colored

eyes. And for the most part he didn't travel but remained stationary in that area for a period of time. We are just simplifying things. Then Man started traveling and crossed the Straights of Hormuz and settled for some time in the mixed landscape of the deserts and green grasslands of Iran. He had trouble seeing in this environment with black eyes. The STM out of necessity changed the eye color to brown to be able to see and live in that new environment. This is a very important step in evolution. It means the STM was able to change his P to absorb the energies he needed from the environment. Even though this sounds simple, it is far beyond what modern scientists can understand, and that's why they have muddled up all these theories about human development.

This would be considered the start of this evolutionary change of eye color in this cycle. The timeline is not clear. Did the eye color evolution start with the ending of the last Ice Age, which was about 10,000 years ago? It seems probable, because then Mr. Keshe said, the Man turned brown, I am assuming in Iran. But some of the human tribes traveled to Europe and those that settled along the Scandinavian coastal areas, due to looking at the sea with its usual cloudiness developed grey eyes. And somewhere in perhaps Central Western Europe where Man started cutting the forest and making agricultural lands was the birth of the blue eyes. Scientifically they determined that there is one single common ancestor for all blue eyes of the human race. The blue color came out of the mixture of the light in the forests and the green from the open fields of farmland. It was by accident that one person decided they needed blue eyes to see properly in their environment, and this is how we got blue eyed people. Green eyes come from the densely forested areas of Germany. And hazel eyes are a mix of yellow and brown that were created by those who traveled the Silk Road between Palestine and Northern China. Those who have golden or amber eyes are those who didn't travel but remained in a stable conditions, perhaps in the Savannah areas.

This is a summary of the knowledge he parted to us for now. There is much more that needs to be understood and it will probably be added to slowly, as we digest what we have been given. I understood that the color of the eye determines the bandwidth of the energies we can absorb, and that in turn feeds the Soul. This in turn affects what our emotions, behavior, and ways of thinking will be. When we say, different races have different traits, instead of saying it is only due to genetics, now we know it is more related to adapting to the environment, which affects the fields our Soul can absorb to create its physicality. This is a lot to comprehend. But we are getting the idea, that in the new Science we are the result of M fields interactions and not physical interactions. Rather the physical part is the result of the M field interactions, and not the cause. He made it clear that the skin of the eyelids cannot block the CR or the M fields from the light of the environment. He said it in a nice way, the proteins in the physical eyelids cannot block the Plasma Technology (T) of the U.

Then there was a discussion about the importance of understanding what the colors in the U mean, as they are different than they mean on Earth. Scientists have studied the thousands shades of white, but these do not match with the colors in the U. For example, the color red for us has the meaning of danger and warning, in the U it could have a totally different meaning. We have to learn what the Universal colors mean, otherwise we

might lose our life by not understanding what the other Beings are communicating to us. Obviously, this is not the physical color, but the bandwidth of M field strength, since most of the Universal Community (UC) do not have eyes. The closest we have come to Universal colors is by creating Gans's. By placing a jar of ZnO Gans next to CO₂ we see they are different, one is a bright white and the other a cream color. If these colors are of the U, then they have been converted into what the Man can see and understand. The other time we see Universal colors is when we dream, because we are actually in the Soul dimension (D), which is the D of the U. If we have one of these experiences we might remark how vivid and alive the colors in our dream was.

The UBESU Headsets are tools for us to learn about seeing Universal colors and to learn how to feel with our Soul. He said, that because animals like dogs see mono-colors they have to work with their Soul to guide them, because they can't rely on their sense of sight. There are cases when a dog suddenly stops because he senses something, and that may result in saving his owner from some mishap. It seems that Vertical People can join their Souls together when a severe storm comes, and by joining through their M field strengths together, they stick tighter to the ground. Beings in the U who have learned to coordinate their Soul with their P have become what he calls, 'unique.' When humanity reaches that level of understanding we will also become unique, but first we have to realize our Soul.

In the past, scientists used to say we only use 10% of our brain, that was because they couldn't measure brain activity. Now they have discovered through brain scans that it is active all the time. But they call it metabolic activity, because they deny the consciousness, and don't want to understand the Knowledge of Creation. According to Mr. Keshe the brain never sleeps and is constantly working, and that 80 % of its work is not on this planet or in the physical D, but is at the level of the Energy. The STM stores natural information and energies in the brain for its operation and connection to the physical D. It also uses the brain as a transformer where it 'steps down' higher energies into P and they are converted to messages that the P can feel and understand. The way I understand it is, when we recognize the Soul as the controller of our life then we'll comprehend things differently. This is because the STM can interact with the pure energy that is diluted in the fields of the U, and decisions will be made from that place of, perhaps, connection. This is the place where he started talking about what it is like when we experience elevation of the Soul, and he used his own personal experience as an example. One way to think about it is like when a snake sheds its skin, and gets a new one.

The following is only my understanding and it could be totally wrong. For those who are going through spiritual evolution through the teachings of Mr. Keshe in the Plasma Science you will want to study this carefully. As we start to gather more energy, like through the teachings, we gradually understand more. It is not like in matter state where you just accumulate more of other peoples information, like reading books, etc. In what Mr. Keshe is teaching us, we actually gain deep understanding of how Creation works, and that knowledge is like Energy. And when the Soul goes through processes of elevation, it's a real physical transmutation of the body, it's not just a thought or concept. We are used talking and thinking about Energy, Knowledge, Light, Cosmic Rays, the

Love of the Creator, etc. as different things, but really they are all from the same Source, or Energy. They are like aspects or functions of the same Essence. In a way, for the Creator to play with Himself he has to pretend He doesn't know anything. It's like starting at Zero with nothing and gradually accumulating more energy. When we talk about elevating the Soul, we mean that we are gathering more field strength, and this increases our knowledge, understanding, and how we experience life changes. So elevation is a real experience and we feel it physically in our body as our energy increases. Therefore, he said, 'we go through a physical transmutation in elevation of the Soul.' The Soul receives more Energy and the P has to follow. Our body gets upgraded to handle the higher strength fields. Knowledge Seekers will experience this, but they might not understand what it is, and we don't want to create images in the mind about it, that unconsciously create preconceived ideas. Mr. Keshe has given us a detailed description of what he went through and that's why we are discussing this.

He said, he physically went through this process of gaining more energy 2 or 3 times in his life, and each time the Soul elevated more. We'll summarize it in a way we can understand. He woke up one morning and right away he noticed that his hands were not his, and yet he knew or remembered that this is the feeling of having hands. They were his hands but he didn't recognize them, because the feeling had changed. The same was for his whole body, he knew it was his, and yet it wasn't. It wasn't the same feeling, something had changed. It took a few days to get used to the new body. The first time it happened it made him a little crazy, but then he understood it was the process of elevating the Soul.

The important thing in this experience is the detachment from P. This is hard for normal people to understand, because being attached to the physicality and its D gives us a sense of security and emotional stability. This is probably the main reason why people in society don't advance spiritually, because we are so identified with the false sense of security of being a body, that it takes a miracle to change. People read about detachment in the Buddhist writings, but they don't really want to know what it means, and that this is where it leads to. If our Soul has a mission it will forcefully take us through this experience, and if we don't have a spiritual background it will become frightening, because we lose that attachment and sense of security of belonging to the others, and we'll feel alone and scared. If this happens as a child and we tell our parents they will get scared and take us to a doctor, and it will get worse. For survival, we will try to bury that feeling and get away from it. But if our Soul has a mission, it will come back again later in our life, and we'll find ourselves exploring different spiritualities looking for answers. Mr. Keshe did not have this problem because inside he knew what it was about. For him it was easy to get used to the new 'skin,' and he saw that he was gaining more and more knowledge. The third time it happens the whole knowledge of the U becomes open to you.

Then there was this phrase, 'servitude is the salt of the basis of that point to reach to it ... detachment.' It's a kind of coded message for those who are pursuing spirituality, or wanting to find the Truth of Life. If serving others is not the basis or your life's journey, then I don't think the 'third time' will be open to you. In all my studies of Saints and

Sages, or if you want to say, Masters, only those with the true attitude of serving the Creator and the created, succeeded and their life became a blessing for all. And those who started going down that path, and started gaining certain powers, but there was a slight defect, or a bit of egoism in their attitude, they may have written many books and became rich and famous, but whatever they built up became flawed. Servitude and detachment are the pillars of living a life in the Soul.

There is another interesting aspect to this part of the spiritual journey and that is whether or not one has to experience Kundalini before they can awaken. Especially in India there is the tradition of what they call, 'raising the Kundalini.' In my studies and with the people I met there was always this experience of the energy flowing up the spine in one way or another, resulting in some kind of awakening. So I used to wonder if that was an absolute necessity and prerequisite for one to get enlightened. Later, I came to understand that it was not the physical experience of the energy of Kundalini that was important, but as Mr. Keshe said in this teaching, the essence of the awakening of the Soul is detachment from P, and the servitude of the Creation and Creator. The energy flowing up the spine happens in the D of P as an experience and is a phenomena within this dimension. People can interpret it how they want.

As Knowledge Seekers we should be aware that as we gain more and more field strength, the doors of the Soul want to open and that energy will affect the physicality in a positive way, but we should prepare ourselves to have the knowledge and right attitude to go through the process in a harmonious way. Part of this understanding is that our eyes are not just for seeing the world. In a way, they are a technology that was developed to help us live in both dimensions of the Soul and P. Through the eyes and the whole apparatus of seeing, and through colors, we absorb energy from the U through CR. But there is something more to this process, and that is, it becomes part of the Soul's abilities. Because he said, that if we did not learn how to use the eyes to 'see' the dimension of the Creation, then we will leave it all behind at death. This ability has nothing to do with being blind, suffering loss of vision in old age, or cataracts. The eyes then, are not just a part of the physical body, they are an intermediary between the P and Energy, because even their position in the front of the head is important. They see into both dimensions, and he implies that somehow the Soul can keep the eyes in some form or another with it. And we keep the essence of this kind of vision in our dreams when we travel with the Soul. Hopefully, he will discuss this further in the future. But we should get in the habit of when we talk about our dreams, that we consider them as actually being and living in our Soul's dimension, and not some fantasy of the P. Otherwise, we'll throw away the elevation that our Soul is bringing to us. And when we dream about our grandmother or our life in P it means we are still attached to the planet, and when we dream about the U we are part of the UC. There is something so special about a Soul being able to develop physical vision, that many races in the U would give their life to have it.

This week we got to see another amazing video of the work at the new Space City and their agricultural production. The highlight was of a drone that automatically refills itself with water, which is then turned it into Gans in the tank, and the drone flies to water the fields and the roofless greenhouses and returns to the platform. KF is working on

growing TCM herbs together with crops. It was explained before how it works. The purpose of KF work in agriculture is not to make profit in mass producing food, rather we are purifying seeds for use in the ONN Units that will feed humanity, and to do research in Plasma Agriculture. The KS are expected to come forward and create start spin-off companies to market the developments around the world. Then he talked about the upcoming KF Presentation in Switzerland in October. And some of the new products include the Beads for Sugar or Pain, and we need KS to buy and test them. There is also a Butterfly Book Holder, try to feel the difference when you put your book in the holder and read it. A new environment will be created. But he didn't say whether or not it would give you access to a different knowledge. It's important the KS give feedback on what they experience. The wonderful news is that the first 4 ONN Units have been shipped to KS, and another 28 will go out in July. When you receive the Units, keep it quiet and don't tell anybody, not even other KS. There is nothing to be afraid of, but we know how certain groups want to interfere in KF work. These first Units are very important because they are setting the foundation for the others to be built on. As soon as you plug them into the Internet, they will automatically appear on the KF network and all the 'bugs' have to be worked out. One of the KS who attended the Addiction session some weeks ago reported that he forgot he had an addiction, even though he is in different treatment programs. It sounds like many of the KS didn't show up for that Flight Session which is a bit of a disappointment. The work of KF is dependent on KS enjoying to help humanity, and we need to have human participation to get out from our slavery. Hopefully, the KS will come forward again in the next Flight Sessions. These will be limited to around 30 people, but we need people who will give feedback. This is vitally important to setup the ONN properly. The Cash Coin (CC) and Keshe Coin (KC) are two different Coins. The CC is an internal Coin for playing the Enlightenment Game, and the KC is for the international work of the KF to bring the T forward.

KF is working on a T that can produce Gans directly from the Cosmic Rays and that will make them totally pure. The way we produce Gans's now always leaves some traces from the production process. This will include making metals, Rare Earth materials, etc. from the fields. There will be no more destruction of the environment. First we have to get the KC and the ONN system working so that we do not damage the economies of Africa and other developing countries that are dependent on mining. KF has a 40 year plan for developing the Plasma T and delivering it to humanity. We are on course and it will not change.

A KS asked about whether taking honey from the hive, or milking a cow is stealing. And then there was some justification about taking apples that have fallen on the ground. There was hesitation in Mr. Keshe's voice when he answered, I understood it to mean he wanted us KS to think about the essence of what we are doing. You can watch videos about how they steal honey from the hives, and they have to wear special protection so they don't get stung. Our Mother the Cow, is put into iron harnesses and painful suction cups are put on her teats and the milk is sucked out with force. Recently, he gave the example of how it's too expensive to harvest the oranges in Sicily, Italy so they fall to the ground and rot. There is no problem. And he said, when we live the life of the Soul we will enjoy the beauty of the orange without having to eat its fruit. Scientifically, we don't

know enough about the M field strength connection of the fruit to its tree to say for sure it is not stealing. The point is we live in a culture of taking, and we make up our own rules about what belongs to whom. And once humans start justifying things, then there is no limit to the crimes we commit, because we have been kept, and are keeping ourselves from the knowledge of life.

If you are a cat lover then you will want to pay attention to this teaching on cats. Thousands of years ago the Sumerians wrote on clay tablets that cats were brought to Earth. Mr. Keshe said, he read lot of these historical writings about cats and some are so deep they are kept from the public. It seems our rulers have certain phobias about humans learning too much. His summary about cats is that they have the ability to analyze whatever is in front of them in a single picture, and from that they can understand the emotion and feeling of the time and place they are in. The implication is that they are doing this through the Soul and not the brain. It's like they have access to the emotions, thoughts, and they know what move the animal or whatever is in front of them, is going to make. We may have noticed that cats suddenly freeze before they are about to do something, in that split second they are processing all the information they need for that situation. They are not born with this ability because kittens don't have it. They learn it from their mother. Our Soul does this through our vision, and we assess the fields of the Aura of someone and it unconsciously gives us the information of how to behave. He gave some examples of how he does this in meetings with people and he is 95% correct.

In the life of the P as it is now, we fight to show who is better than the other. In the D of the Soul it is the opposite. If our Soul has a higher field strength than someone else, it will offer to share half of it so both Souls can be equal. This might sound like a fairytale, but he found evidence that some animals in Africa still live like this. They share with the others, and the Chinese herbs do this too. Unfortunately, the animals in the modern world who have a lot of contact and influence from humans have become like humans. In the human world of relationships it's a battle of the emotions and concepts, and those who are weak end up at the bottom. People have become scared to show their love or even to think about what might be. Because when we are let down or deceived it is too painful to get up again. Part of the process of maturing is to be able to discriminate between those who are worthy of our love, and those who will abuse it. Unfortunately that knowledge costs a heavy price on the heart to learn. If we have proper guidance we are supposed to learn that in our teenage years, then that would prepare us for a healthy relationship from which to start a family. When the change comes, all of this will have to be reorganized so that we start out life with the right knowledge and example from our teachers.

After all these years of wondering how the pyramids were built, we finally got the answer. It was done through MG field positioning and KF will demonstrate that T in the future. He said, with a spoon we can lift tons of stones to wherever we want. KF will also show a UFO, most probably it will fly from the roof of the Space City. And then he will give the Chinese Space Program the ability to walk in their Space Lab orbiting Earth without floating. They need only to put a Soul in their craft and come to balance with it, and they will walk like on Earth. We do this with the Soul of the Earth but we are not aware of it.

Thanks for listening.

Quick Index

(We are here to try to understand the real work of Creation beyond this planet, and how we are connected by an 'umbilical cord' to the Universe (U) with our 5 senses, and our physicality (P), but we think the P is the controller and ruler (of it all)).

(In the past few weeks we have been digging deeper into understanding the Cosmic Rays (CR) and their work and the way we receive energies from the U. Today I will take you to a new dimension (D). (Your eyes is something most of you never think about until you get a little bit older and your vision starts failing. Then you go and buy your first pair of glasses to be able to see. ?? As we get older slowly our vision can get worse and worse. This is what we call, the sight of the Man)).

(The eyes are not just for seeing, they are one of the most important connections (the Man has to directly travel through the U, and through them he receives CR information. Many creatures in the U have eyes, and a process of vision. But many have created the D of Cosmic Rays so that they don't need eyes and can feel the different dimensions millions of kilometers ?? around them. It has been proven that vision has certain advantages, but the body of the human race has fallen into the trap of what we call, 'needing the eyes to see.' Unfortunately, humans don't use the eyes to absorb, feed, and control ?? the energies). It's the one senses that we talk about a lot. (Our day doesn't start until we open our eyes, and if we are blind we rely on somebody else's eyes to tell us what is happening)).

(When Man travels through the Space of the U he has to learn how to use the Cosmic colors, the Cosmic Rays, and understand what they mean. (It works the same way on this planet. For example, red means danger, ?? and green means it is safe to go, or cross the street, and there are the other colors with their meaning)).

(There is another aspect to color that we have to understand, and that is, how did our eyes come to be the color they are. Why do we have blue, hazel, green, brown, and black color for our eyes? Where did it come from? If we understand this evolution, then we can understand the next step of how we can connect to and absorb Universal Energies, and how ?? we connect to them. Our eye socket is not just for our eye. Why do we see (?? in) dreams? Why are our dreams photographic? Why is our dream not just sound, or not just taste, or not just touch? Why do we remember pictures? (?? There is a hole in the skull for our eyes and it's the only common ground, or common path, where the D of P, and the D of our connection to the U are used as one. This is why we remember our dreams, because the Soul sends its information through ?? the eye sockets where there isn't any Calcium (Ca), which is in the skull)).

(We should understand how the evolution of the color of the eye has brought maturity to the Man. (?? The color of the eyes allows the body to absorb certain Universal energies

that matches to it. First we need to understand what our eye color is and why does it become brown, blue, green, etc. This allows maturity of certain ways to absorb Universal Cosmic Energies that also affect our emotions and ways of thinking. Originally, Man's eyes were black. ?? The impregnation of the eye was black. ?? Then the Man started migrating. The black color in the center of the eye is connected to two things. ?? And then the third thing is the emotion ?? which the STM uses to control)).

(Black colored eyes came from being in the lush green vegetation ?? areas with high temperatures. This environment allowed the Man who was at the level of a ?? 'seedling' to grow. In other words, it was the start of the evolution after the seed of Man arrived on Earth. The environment ?? was monotonous with tall trees and high temperatures. We say it was the mono temperature environment of the Central East Africa plains, or the plains of South America, and Australia, where they didn't travel much. (Note: The savannas of East Central Africa are a vast, tropical grasslands characterized by a mix of scattered trees, shrubs, and tall grasses). When Man stayed in that environment ?? he became mono colored. (Or does he mean the eyes were mono colored?))

(The first time humans left Africa they crossed the Straits of Hormuz into the central and southern part of Iran. And then another group that every 300 years or so follows a flooded river up through the Nile and Egypt and migrated out of Africa. ?? These are the ?? more modern generation cycles of Man. There were other cycles of generation of life, that go back maybe half a million years earlier, but they went in the opposite direction. At that time life was based in the Northern Hemisphere. ?? The rotation of the Earth, and the conversion ?? of fields, and gradually everything is ... (This is why we sometimes see ancient cities that are hundreds of meters below the sea level, but that was dry land millions of years ago. At that time life was different and the creatures were different and they were born and brought up as ?? humans)).

(After Man passed the Straits of Hormuz he migrated into the Asian continent. The Straits of Hormuz is so beautifully connected to the life of Man, and we see what they're making of it today. ?? Man moved into different savannah's that created different conditions for him. ?? When he settled in southern Saudi Arabia they stuck to the sea and during that time nothing changed).

(When Man came into Iranian (desert and green forest section of south of Iran, he started to have a problem seeing during the day and night. The problem was in adjusting to the desert and then to the green color. ?? This is when his eye color changed to brown and then he was able to see more. This was the biggest change in the evolution of the Man, and in the development of the STM to absorb the energies it likes). (?? The STM created diversity for itself by being able to shift body positions from flat, to horizontal, to vertical. The other animals like the dog, cat, snake, etc. don't move that much up and down. Changing position by 90 degrees back and forth, ?? causes the body to absorb different fields from the Inertia, MG fields of the Earth, and the Universal Energies. This brought maturity of life and intelligence to the Man).

(The evolution of Man started when he crossed into the Iranian part, or what we call Old Persia, hundreds of thousands of years ago. Then, a few thousand years ago, when Man started living ?? in that area, and due to changes between this combination of ?? the color of light, his skin changed to a brown color. (?? The time came when humans expanded further into the green forests and grasslands of the European continent he changed again. ?? His eyes didn't need the materials used for living in the heat, so he changed his eyes to fit the different green grasslands and plains of Europe. But then accidentally, one person changed the color of their eyes to blue, to be able to live in the green grassland and bush area that were not forests. They actually moved between the forests and he started cultivating the grasslands and cut the forests and turned them into the greenness of agricultural lands, rather than always living in the bush areas)).

(As a note, everyone who has blue eyes everywhere in the human race can trace it back to this one person who changed their eyes to blue. ?? The blue color gave them the ability to live in both D of the forests and the open agricultural lands. Those who lived in the dense forests of Germany, like in the area they call, the Black Forest, developed green eyes because they lived in the shade of the forests where the Sun's light got filtered out through the leaves of the trees. Historically and scientifically, we know that this group with the green eyes absorbed different energies, which gave them a different mentality, and they absorbed different Cosmic Rays, that were partially interfered by the trees. They did not get pure rays. In the majority of cases, the rays had an element of interaction with the Inertia and M fields of the trees. Therefore, the 'Vertical People' had a direct effect on why their color changed to green).

(Moving further up to Northern Europe in the Scandinavian areas of Denmark, ?? and coastal areas of Norway, etc. the people there didn't see the forests with their eyes, instead they saw the sea, and it was darker with clouds and a kind of grey area. This caused them to have grey eyes, and is about 2% of the world's population. The color can be very near to blue, because of the environment)).

(When Man started moving between dry desert lands and green lands he developed hazel colored eyes. We see hazel eyes a lot with groups of people who are travelers, like those who traveled the Silk Road between Palestine to northern China over the past 1,000 to 1,500 years ago. They started creating this combination of blue and yellow, and it allowed them to work both in the areas with deep green vegetation and the dry desert areas. (?? We do this today when we travel in the deserts we buy double glasses (?? or carry sunglasses with us). ?? From this we see how humans can change their eyes according to the environmental conditions. (But it was not taught how long a time it takes before the eyes change color in a group of people, or even individual for that matter)).

(There are people with golden eyes that look like honey. This is a ?? moral energetic system. ?? It covers a percentage of the world population. (?? Those who remained in one area like in the conditions of a Savannah ?? did not change further). Each color change brings different emotions and different behaviors. For example, we see the placid Scandinavians, or the aggressive killing in the Middle East, this is all part of what nature

has brought in. In the deserts there is continuous fighting to survive the harsh climate. Then there are the behaviors of the Europeans, Chinese, and every other group)).

(We thought the color of our eyes was just a color, but now we understand it is the creator of our emotion, behavior, how we react, ?? and it is coming from what we absorb from the Universe. (The skin of the eye, or the eyelids) are the protection of the Man from the physical D of the Earth, but they do not stop the absorption of the Rays of the U. (Realize that when we dream we go through the skin of the body out into the D of the U. Our dreams are an extension of our Soul. Our vision side is an extension of our P. When we close our eyelids we detach ourselves from the physical body ?? and the interaction with our surroundings. (?? But when we dream ?? it doesn't stop, and this is why we remember it. The information ?? is not limited by the eyes or eyelids. They cannot stop the waves of the plasma technology (T) of the U, nor can they block the CR. ?? We created the eyelids. ?? The color of our eyes dictates what bandwidth of energy we can absorb, and then we feed our Soul with those fields. Our eyes are the feeder of our Soul without interference directly to the Creator). (?? Perhaps he means we feed our Soul through our eyes independent of what we receive from the Creator)).

(Humanity is used to the colors of this planet in the physical D, what will happen when we become 'Passengers of the U' where the colors are slightly different and there will be colors we've never seen before? What happens is that we only take a spectrum of the U color, and it makes a color that we are able to see. ?? Some Knowledge Seekers (KS) have seen colors that don't exist. But to you it has become normal. (Does he mean KS have made Gans's that are of a color we don't know?) If we show this new color to a color specialists, ?? parts of it doesn't exist. He tried this before and they say this color of Gans can't be replicated because it doesn't exist. These are mixtures of universal colors, ?? and they are ?? converted to the spectrum of color Man can see. We showed this in Book 3 of a tube of different Gans's. ?? KS have accepted it. If you put CO₂ and ZnO Gans's next to each other they are slightly different. The ZnO is pure white, and the CO₂ is cream color)).

(In England you could get a PhD in the study of a thousand different shades of white. Even in all of these thousand shades of white, they don't contain the colors of the U. In the coming time, we'll introduce more Gans technology where you'll learn about CR, and you'll start seeing colors that others don't see. ?? These are not used in the T. The Universal Community (UC) don't have eyes to see, ?? instead they absorb, the way you do it in your dreams. When you see people in front of you in a dream it is through the fields. ?? You don't see them with your eyes. Your Soul knows there is an individual, or a living thing standing in front of you. The STM ?? feels the CR it produces and it knows if it is a danger, or a friend, ?? and what it wants to tell you. ?? But you can also go through hard rock).

(To help you learn to ?? feel with your Soul we are releasing part of the UBESUS Headsets for the eyes and with it you will start seeing the colors of the U. When you go to Space many of you will lose your lives if you don't understand what the color combinations of the U mean ?? because you have never seen them before. On Earth you

have the basic color combinations and you know the percentages of how to mix them. In the U you have to learn about the CR mixtures and how they interact. The colors are not what Man is used to. ?? You will see these colors as energy, and they will affect the field energy of the STM. ?? You will have to learn how to tune the sight to the fields of the emotion which comes from the sight, with the fields you absorb to feed the P, with the STM. Then you'll create a new emotion which is unknown to Man at this moment in time).

(In the past teachings we said there are emotions that Man is not aware of. In a way, you develop your sight like how a blind man does it. He doesn't have eyes to see, but he feels the presence of others. He knows the street is there, and there is a car passing. This car is a CR and it is another 'body,' which you are blind to. If you do not learn to see through the 'eye of the Soul,' you'll enter the Universal Community (UC) totally blind. This is where the sight of the Man and the STM work together very closely, because the eyes see the physical part, and the Soul sees the Energy Packs, which is the D of the fields which absorb. (?? When we are ?? blind to a certain spectrum in the physical D, our emotion warns us not to move our body because of danger. It's learning to have trust in the different parts of our Being. It's a collaboration between the two. The races in the U who have learned to do this, have become unique)).

(Man with the beauty of the eyesight will learn this, you have no choice since you want to be part of the UC. You also have to learn about the rules of the U, and how to judge to understand. (Sometimes people say, they felt something bad was going to happen and it did. This is how the Soul will behave in Space. Sometimes we have the feeling if we get into that car it is going to crash. This is the Soul communicating with us. ?? We'll do this in Space, live through the fields of the U and understand their motion. We've seen dogs use this capability. They will suddenly stop, because they feel something is about to happen in the space they are in. Animals rely on this ability, because their eyesight is not the same as ours. They only see mono-colors, so they work with their Soul. The Vertical People ?? use their Soul to arrange their P. In the harshest storms they are able to remain stuck to the ground, ?? and they move together. We have to learn, and then to rely on each other. (The blue ?? Alakai sees certain fields that the black ones don't see in the D of P. ?? They absorb certain fields through the skin which is set by the eye. The emotion created by it can help the blue eye)).

(?? When we travel in the U the color of our eyes will change its shape and D so that we can see the full spectrum through the STM, and not through the D of P of the eye of the Man. The next time when you look at your eyes in the mirror, ask yourself, what energies are you absorbing from the U? (And the next time you dream, understand that you are traveling and seeing the U with your Soul. The eye sockets are the only holes where the STM can get out of the body, because there are no interactions with Ca. ?? You are already a Soul Traveler without knowing it. And this is why, as Humans, we have a problem understanding our 'schizophrenic life' as both a P and a Soul)).

(Our STM never sleeps and the brain works 24 hours a day. It's not what our stupid scientists said, that we only use 5% and that an idiot like Einstein uses more of the brain

than everybody else. Actually, he didn't use any of his brain, because the mouth talks faster than the brain. Then you can understand that the other 80% of the brain is not for the work on this planet, or in our physical D, it is used for the natural information and energies that is stored by the STM for its operation and connection with the physical D. In a way, the brain is used by the STM as a kind of transformer where it steps down energies and converts them into messages that the P can feel and understand. When you become 'Man of Space' you'll have a need to do that. The brain will become part of the inside of the Man, and then the Soul ?? will move in and you will comprehend different things. Because now the pure energy diluted in the fields of the U will interact with the STM and the decisions will be made (from that level). Then you will feel new dimensions. (?? This is called, elevation of the Soul and then your arm and legs will not feel like how you are used to. But you'll understand that you have elevated and have access to more ?? Energy and Knowledge).

(Then you understand how we go through evolution, and it really is like how the snakes shed an old skin. The new skin becomes the new D of our knowledge. We have to go through that step, so that we gradually understand more and more, and store more energies of life (or light). (?? The Soul elevated while the P goes through transmutation. ?? It's something that happens to us, and not to somebody else. The experience is that we touch something and our fingers feel like they are new. It's like we haven't used these fingers before. It's like using the fingers for the first time. The Soul has elevated, and the P has to follow. ?? We understand that from now, on this is our new P)).

(Mr. Keshe has been through this process physically a few times, and ?? each time the Soul elevates to a new D. (He described it as, waking up and discovering that the hands he was using are not his, but yet he knows the hands are his. Then one knows the knowledge and emotion have changed. One feels more detached because you know, that if you can lose this ?? identity with the P so easily, then it's not worth attaching yourself to it. If any of you go through this kind of evolution of the Soul, where the D of the vision, or the sight of the Man allows you to see the Knowledge of the U, then you'll experience this feeling)).

(He said, 'I know this emotion, because I've been through it and it takes a few days to get used to being in the 'new skin,' at the same time your knowledge has changed. You ?? understand more and more. The third time when it happens, the whole knowledge of the U is open to you. (?? This is when you know that servitude is the salt), (?? or the catalyst for you to reach this point. (?? As we know salt is needed for Energy to manifest in P. And unconditional love is the same as detachment from physicality, or Egoism. And one understands the worth of the body). When it happened to Mr. Keshe the first time he couldn't understand what it was and he thought he had gone crazy for a few days. He knew the eyes were his, but the feeling of seeing through them was different. He had no connection to his hands or legs, or to the life he was living. It happened to him at the age of about 39, and then all his wealth (?? in the world he was living had no meaning to him and he knew it was only a tool to be able to teach others how to become part of the Universal Knowledge, and to structure it that others could understand it)).

(Your eyes and your sight, and the colors you absorb from the U through CR are your future. (?? When you die you have to leave all of it behind, because you didn't learn how to see through the eyes of the Man, through the D of the World of Creation. Then you'll understand how important your eyes are. It doesn't matter if you're blind, aged, or have cataracts, or whatever. ?? Your Soul is there and you still dream, and travel through the barriers made by the collagens ?? in front of the eye sockets which are the holes your Soul goes out into the U. (Does collagens refer to the protein, or COHN in the eyelids?). Your eyes are not just for seeing the physical world around you, they are an opening to the D of the sight of the U. This is why you say, you had a dream). Do you see dreams through the back of your head? (No, because you don't have eyes back there. Your eyes are physically in the front. We see this ?? structure with most of the creatures of the ?? U that are attached to the P. Many tribes and races in the Universe would give their life to have physical vision)).

(Learn not to say, that you only dreamt something. Rather, say you traveled with your Soul. (When you are in the Soul D and connected to the Cosmic Rays of the U, and somebody suddenly wakes you up in the D of P, your Soul could be talking to other Souls at the time. Then it has to tell the other Souls, there's a problem, he's waking up, I have to go and look after him. The Soul baby-sits the P. This is from the perspective of the other side. But you have never been present, or aware to hear what your Soul says about your P. They might be discussing how somebody's P did something wrong yesterday, and now they are arranging with each other how to make him pay it back, or balance the fields. The Day of Judgment is setup by your Soul and not by you)).

(Your vision is your channel to see your physical surroundings, and it connects you directly without interference to life in the U. Remember the next time you dream that it's not a dream, it's you traveling the U and seeing in the D of the U. This means you have become part of the UC. However, if you travel through the Soul only to see your grandparents and change them, or have a conversation with them, then it means you are still connected to Earth, because you are anchored by the P of your body, which you left under the blankets on your bed. He tells about a mother who was afraid her toddlers would get away and hurt themselves while she was napping so she used to tie them to her ankle while she slept. In a way, the human race are like those toddlers tied up the Mother, which is the P of the Earth. When we grow up and mature we can take the rope off and our Soul will be free to travel).

(We are teaching you today how important your sight is, and how your sight gives you the Knowledge of the U, while your P is repairing ?? itself during sleep. (?? Going to sleep is like taking your car to the garage for repairs. While they are repairing it you go out for a coffee and come back and it is all done. Now you understand that the P of the Man, is not the owner of the Man. Man is like a shell on the back of a snail, it protects it while the snail does its job)).

(When you learn to connect your breathing to your vision, it will open a new D of life. ?? You can try to bring your lymph, which is your Soul's connection to the P into the cycle of your breathing, ?? then it will feed the P what it needs through the Soul. Try to connect

?? it to your vision, then you'll see what you see. (?? This will be the same feeling you'll have when you die, and are detached from the P, because then you'll see with the eye and energy of the U. I made Man in the image of Myself, and I don't need eyes or lungs, but ?? I still can enjoy the D of P and the beauty of Mitra)).

(We are creatures of the U but we got ourselves attached too much to the D of P. (?? And now you know that it is your job to detach yourself from it, and nobody else can do it for you. You can't pay anybody else to love and trust you. This is the same for all the teachings of the KF. We are taking you to meet your Creator, even though you are already within Him. It's you who have to understand this so that you can connect to Him, and that you can understand the purpose of your life. ?? We taught you about the air, and the fields and now about the eyes. There are at least 100 senses ?? in the creatures of the Universal Community, and you muddled yourself up with only 5 in the D of P. Then comes the emotions, which have no limit. Man will know new dimensions of emotions through connecting with the CR of the U. (Our purpose was not to teach you about Gans making. The Gans was only the bait we threw into the waters to catch the fish. But we didn't do it to capture the fish, only to feed the fish to help it to grow. Most of you have taken the bait, and now you can understand how the process has started)).

(These teachings of today will remain with the human race for thousands of years to come. (?? They will give Man the power to separate from this planet and be connected to the UC, so that he can enjoy his physical D on this planet, and anywhere in the U. (Perhaps he means by separation, detachment). (I hope you enjoyed this teaching, and the next time you stand in front of a mirror don't look at the face of the Man, or the beauty of the blue eyes of a woman. Rather ask yourself, what are you losing with this blue, brown, or whatever color, ?? because of that color you ?? cannot absorb that spectrum from the U. It's because your skin has decided that certain fields are needed for you to see ?? the physical D of your environment. ?? And that's why you see what you see)).

(What happens when one eye is blue and the other one green? What does this open up? (He tells about an accountant he knew who had ?? one blue and one green eye. It's seems it made her very unstable and she could not decide what she loved or how she wanted to live. ?? People with this condition have to decide which eye ?? is the reality, and which one is the dream)).

(I hope you learned something today that will prepare you to become a 'Man of the Universe,' and join the UC. ?? You should know that your engine of P is the line of your connection, and that allows you to dream, to become part of the UC. But you have to stop killing and destroying and not eating others. It's just the Emotion of it. (?? In your dream you ate food with your Mother, but it was the energies of the dream that you ate as food, and not physical food. You didn't kill for it, because it has no D of P. This is what we are training you to do, and bringing to the Man, that you don't even dream of killing, then, we can handle the P)).

(I hope now you learned what you have to do to take next steps to understand how you can transmute. You cannot transmute light. Your eyes are your door to the U, but you

have to know if you are going to use night vision glasses and call it a dream, or day vision, and call it P. I hope you have seen that we have entered a new dimension in the teachings. This is the whole purpose of it. Soon we'll open other doors for you, that will allow you to control through the P dimension, but ?? be able to live in both D at the same time. And you should be able to control it, and then you will bring a new dimension to humanity. This is the one of the keys for Man to enter the Universal Community).

End of Quick Index Part 1 - 647 KSW June 18th

(KF shows a second video of the new Space City Agricultural project in China and how they are using drones to spray open greenhouses and fields automatically. This has solved a lot of problems of spraying the crops, because it can be mostly automated and each drone covers tens of thousands of square meters. It automatically flies back to its base and refills itself with Gans water. The next generation will have a preset memory and doesn't need an operator. It will land on the platform, fill itself up, get charged, and then do its work. This is an evolution in the T for agriculture).

(Using drones for agriculture in China is normal. ?? KF owns one of the greenhouses in the video, and it's over 22,000 square meters. We'll show inside of them very soon. The KF operation in agriculture will increase to 300,000 square meters in next 12 months. It was specially designed without a roof so we can use the drones to spray. We can change the environment and the ground level. Those are real KF logos on the buildings. ?? All our buildings carry our logo).

(The Research Center is getting filled and it's in a totally different building then shown in the video. Hopefully by the end of this year an impressive research center specially built for Space T will be unveiled, and we'll invite those who are leading the present world of science and T from different universities to come in and understand the new plasma T. We are not here to make profit, but to understand the problems of agriculture and find solutions for them. If we produce products it will be a secondary benefit to those fortunate enough to receive them).

(?? We are now growing (TCM) or Chinese herbs in a specific way that we developed for this. ?? The irrigation system is done by remote and in the center of the building there are two swimming pools of about 200,000 liters of water. Soon we'll start growing fish without feeding them. We'll provide them with Cosmic Ray T and use our knowledge of plasma. We have to train our staff to not interfere with the fish, because they don't know about this new T, and many have no understanding of how to raise fish. The fish are feeding from the same fields as the crops. We learned from the work Alekz in Nigeria who built a Gans pool some years ago, the KS who worked with the Norwegian salmon industry, and from the work we did in the fisheries in Ghana and Gambia. In these trials the fish did not need food, but they needed to have a pleasurable environment to live in and not to feel hunted. The research we are doing will become the fundamental basis for the aquaculture of tomorrow. We want to show that we can produce fishes with Omega 3, rather than Omega 6, ?? which is a poison and causes cancer in the fish, because of the stress. Let's see how we move forward in this part of the T).

(It's important for us to show that there are no chemicals being used and it's the CR that feed the fish. (?? And if we don't get food we won't die. It also shows that feeding from the fields is a natural process and it will replace the present commercial fishing practices which heavily use and rely on chemicals. It will cost one fourth the price to raise healthy fish, that can also be medicine to Man. The fish and TCM herbs will grow next to each other, symbiotically. The purpose of this project is to grow TCM herbs that will have the strength of healing that they had a hundred years ago. Nowadays, people have lost some faith in the TCM herbs because they don't have the strength anymore. The farmers themselves say that, they are not what they used to be. We'll start mass producing them in tens of thousands of square meters, and they will be energized with Cosmic Rays and be much more powerful).

(?? We are not going to sell these products in the market. We ?? just want to see how they will affect people who use them. ?? We want KF products to have a reputation that they are pure and without chemicals or genetic modifications. We'll control the operation from the seed to the shop where people can buy them. The ?? herbs will be used by our Wellness Center and our medical application products, which will be seen very soon all across China. The herbs will be like medicine and will be introduced in the Chinese market later this year and the beginning of next year in a massive way. We'll cover the whole of the China in one go. This process is getting set up and you will see KF TCM herbal medicines in the Chinese hospitals and other processes. It will all come from these greenhouses. ?? Everything is underway and may take a year to complete. First it will be applied in China and then exported to the rest of the world).

(The KF exhibition in Switzerland is set for the 23rd and 24th of October this year. A limited number of people will be allowed to attend so make your reservations quickly. (We'll present the work we have done in environmental contamination, and then we'll spread it across Italy, France, Germany, and the rest. (?? I'm proud to announce the newest addition to the KF is a lady who is an expert in environmental work and she'll provide leadership in her work between Europe and China. She's a leading scientist and she has accepted the position with KF. This week four new positions have been offered around the world to leading scientists to head their own divisions and bring in the new Plasma T. Language and nationality are not barriers, and nothing can stop us from serving humanity. You'll see a lot of women heading the KF work. We are not allergic to other races and creeds. We are all one and we work as one. Write to us and tell us what you know, and how you can use your expertise to advance the T. You'll run your own laboratories and research, and you can bring in your own team. We'll guide you how to do it, and then we'll get Markray and the European Corporation to bring it across the world and spread very rapidly).

(There are some new products being introduced this week. We have brought in a special material that is expensive and we need your feedback about how it works. There are two different type of 'Beads' in the KF Store. Buy two to interact them. You put one on the left side of the body and the other on the right. They are set up the same way as the Pain Pens. Then there is a Butterfly book holder. You should compare first reading the book

without the CR book holder, and then with it, and notice if you feel a difference. We set this up deliberately this way to understand how the CR affects you. The Butterfly creates a different environment even for the emotion of the product).

(?? The first 4 ONN Units will soon be in the hands of Knowledge Seekers (KS). The ONN Units are on the move. We expect 28 of them to be out in July. We will not announce who will receive them for various reason you all know. Please, do not disclose when you receive them to anyone, not even other KS or family and friends. The first 28 are crucial. We'll run them for a month or two to see what things we need to do. It's a plug and play and box you receive will have a number on it. You don't have to tell us, because we will know it directly through our system. It doesn't matter where in the world you plug it in. If you are one of the 28 people receiving these Units do not tell anybody, not even your friends or other KS. We want to keep it totally secure. You are the first line of test. In August or September we'll release 100 more Units. It depends on what kind of improvements we have to do in the background. We'll see their weaknesses and that might delay it. It's taken nearly a year to put these out. There are another about 15 master control units or whatever working in the background. They've been tested, and they're on. The ?? network will go cross South America, Central Europe, Southern Europe, Asia, and everywhere else. ?? We'll add another 100 in September or October. Then we'll go to 500 by the end of the year. Hopefully, all the tests will come out perfect and we won't get interference. If we do we'll have to adjust it. Then you'll start receiving the Universal Antennas to add to it. Then we release the ten thousand Units over the next 5 years).

(Over the years you have supported us and now we are going through the testing phase. The way we tested agriculture, now we are testing the ONN systems across the planet. We want to see if we can transfer. If we put one of these Units with you, will it change your addictions, hunger, or whatever? Three Fridays ago for the first time we did a single individual test for addiction, because many of you who scheduled for the Flight didn't write to us. Interestingly, after two weeks the person wrote to us and said he never had an addiction. ?? And now there are no cravings. He said, he wasn't addicted, ?? but he is in an institution for addiction and alcoholism. (Does he mean the person totally forgot he was addicted?) This happened in a 2 hour session. His memory of addiction was erased and there are no cravings. We'll test this on the ONN. ?? Let's see how the KS who have the Units will receive the fields)).

(We received a beautiful gift from a KS yesterday who created an App for KF. I thank both of them, these guys worked so hard developing it. The gifts we receive are unbelievable, but in a way, we gave you the gift free in 2016, and it took 10 years for the gift to be returned back to us, so that we can give it to humanity. (We are testing the ONN, allocating, and delivering the Cash Coins (CC) and the Keshe Coins (KC) into the operation, and monitoring it so nobody can hack it and the rest of it. Keep the ONN Unit in a cool place, where air can flow around it. It creates heat like a normal computer. You don't need a fan, just so air can circulate around it. We have to see how the plasma fields will affect the motherboards on these systems. After we test them we can send you the energy of an apple).

(We are looking for an experienced sales team to work in KF China and worldwide. Our sales team needs to be strengthened and we are relying on KS who understand who have expertise in this field to help us. We need a modern advertising systems, that doesn't rely on televisions, or telephone calling. We are looking for doctors who can start testing our materials for medical applications. They will be signed and licensed through the Chinese structure ?? and can work with patients in China and outside. These are all owned and controlled by those who run KF. We expect to launch about 10 different products across China in next few months).

(If you are expert in TCM herbal medicine, or medical applications, or a doctor in China, please get in touch with us. We need your expertise and we'll put you in touch with the sales team. This is totally in-house for the KF Corporation and we will take you into the factories to see and you'll understand how we do things. Then we'll get an export license for these products to be sold across the world. We are going step by step, a lot of this was done in different parts of KF in the past and now all those certifications and materials are coming into use. Everything is under the certification of the Chinese authorities and the products will be simultaneously spread across China. Every structure for this has already been set up by KS and now we are amalgamating everything together. If you have any expertise, if you have developed anything, get in touch with us. We'll look at it. If it is feasible and something we can do, we'll ask you to join us to be part of the bigger expansion and development).

(Those who buy the Beads it's important that you give us feedback. One is called Sugar Bead and the other Pain Bead. We would like to see how you enjoy the product. There is no plan to extend the CR Balls).

Q: Is there a possibility of using Plasma Technology, in cases of retinal detachment or retinal separation?

K- (We look very closely at the eyes or anything that is connected to the head which can affect the Soul. (?? Our systems are being tested for feeding yourself, and controlling everything ?? that goes to your Soul. We expect there to be interaction with the eyes. It's inevitable. This is why we haven't pushed much with developing T for sight, because we are waiting for the final developments with the new systems. The UBESUS Unit is now becoming a Head Unit. I believe a lot of things can be done ?? for the eyes, but we are very careful about this at the moment. This will go to our Chinese medicine section and ?? TCM applications. Maybe you'll have to fly to China for plasma treatment. Everything will be under Chinese licensing and certification, be it for cancer, and everything else)).

(We are testing new materials and we have had some amazing feedback in a short time. We are seeing the application of what we teach. When you fly to China you can bring what you need back with you and nobody can stop you. In China we do everything through the Chinese structure in the hospitals, and most probably it will be sold in their pharmaceutical structures, like chemists, or whatever. At the moment we don't have plans to get international licenses through (international) FDA for our products. We don't see any reason. The world is small and many of you travel anyway. This is the way we look

at it. And secondly, once we launch the ONN Units you can go on the App and choose the materials you want. If you have a headache, you put on your headphones and connect to the KF App, and the headache goes. Why do you need to take chemicals? It's not a dream, this is now in our reach. You have seen in the video how we are controlling from the seed to the growth, to the production).

(After we sow the seed in the plots in China, we monitor it growing and when that seed is harvested it goes directly into our factory and is changed into material for the medicine manufacturing part, and from there it goes directly to the sales. ?? KF owns the whole structure. It's what they call, a fully vertical operation. Then we'll observe the effect it has on people. We have already seen the first changes in agriculture where the harvest was reduced from 69 days to 39, but it was even lower. And then we want to know what difference in emotion the people who eat it experience).

(I asked the team to give more detailed pictures so that you can become part of us, as you have supported us to be here. They show the tomatoes, cucumber, and onions growing. I have asked them to keep sowing right through the winter. Because we're changing everything inside and out. Every week we change and control the environment inside and outside of the greenhouses. We are creating a Cosmo, what we call, climate. It's not Eco, because Eco doesn't work, or rather they have to use chemicals. The Cosmo environment gives us a fantastic opportunity to test ?? everything. All the work is being done by KF).

(Maybe by next year, even the Gans's like ZnO, CO₂, Ca, and everything else will be produced from CR, ?? then it won't have traces of contamination directly into our tanks. ?? We'll absorb ZnO from the atmosphere, ?? where it produces an Energy Package, or what you call, a Gans. Then we'll see the true effect. It's all getting set up in beautiful factories and should be complete in the next 6 weeks or so. We do not show our factories to anyone. What we do is sacrosanct. It's one of the most advanced environments ?? we don't mine the metals. If we want Cu today, we create the Gans environment and produce the Cu as energy in the water. ?? It goes from energy to the Gans of Cu. We have the T but (?? our KS have to go to the next level to do it. We don't mine the metals).

(We are negotiating with one of the major governments for Rare Earth material production and the negotiations are underway. The nation will not need to import a single gram of metals or to damage the environment. You KS are with us, and this is why we are pushing the Keshe Coin (KC) to come into circulation before we introduce the production of materials. We have to support the African nations and nationals who are dependent on mining. We don't want them to lose their income because everybody can produce gold. This is one of the reasons we introduced the KC. They will be supported).

(We have to have the ONN system completed so we can supply a thousand KC, or 1 million Euro the minute a child takes his first breath in the world. The Mother will have no worries and can support her children with all their needs. We don't want that her psychological worries change the composition of her milk, which she freely gives to her child. We are touching much deeper than you think, but it has to be done step by step and in the correct way. The KF plan for the next 20 to 40 years is on course, and will not

change. We don't need any government to support us as you've seen. The people in China are baffled how all the everyday expenses are getting met. We're growing solid without borrowing from the bank. The agriculture operation and TCM herbs will pay for itself and this will allow our researchers to do their work independently. No government will decide on what we can research, develop, or market. It's all done totally by your support over the past 20 years. Every item you buy, session you join, and donation you made goes in one direction and now you've seen it. Soon the Wellness Centers will come into operation. This will be the only place in the world you can find the T being used. You can fly into the KF Space City and use the Plasma T).

Q: A KS asked, who has that huge eye of light that appears to the Soul every now and then? I see it as a Soul, I have noticed that it appears when I sin, as if I have not yet made the expected change. It has happened to me that I was ashamed and looked away, and I immediately got a blockage at a certain point. The intensity...

K- I don't understand. (Next question).

Q: When we eat honey, pollen, or milk from animals, is it considered theft? As I understand, we are not killing anyone.

R: When the fruits fall from say an apple tree, and we eat it, is that theft or harming another Being? Is it actually harming the Soul? Because maybe the fruits made to be eaten, that's how the seeds get around and might find a fertile ground somewhere else. Perhaps a human might even plant the seeds and continue growing the trees. So is that considered okay, or is it still hurting a Soul?

K- (?? That is still part of the (same) structure (of taking. And then if you say one is not bad, you can start extending it to the other actions as well. ?? This is how we start justifying our actions. And then if we start to eat the fallen apples we'll get used to eating them. Then we say to ourselves, well I might as well take one off of the tree, it's so delicious, and I am sure the tree won't mind, because it is just going to fall anyway. This opens the door to eating other things as well. It's about what we can understand, and how and what we value)).

Q: Can you explain the operation of a cat's eyes when they are fighting snakes? I watched my cat kill a cobra snake. The cat seemed to be way faster in his strike as compared to the snake. How do the eyes affect how fast a cat can move?

K- (There is a lot of mysticism about cats. According to historical tablets found from thousands of years ago, it's been said that the cat is not from this planet, it was brought in to do certain things, and there's a lot of explanations about their behavior. People could not understand their behavior, therefore, they considered them as to be brought in from outside Earth. I've read a lot of these historical (writings or translations of these tablets, about cats. I couldn't understand why some of writings from tablets that were around 5,000 years old are banned from the public). They are so deep that they don't want the public to know about it. Why should knowledge about animals be not open to the public?

These writings talk about how cats can concentrate and focus, and they can see through you. It's the only animal which does this. ?? Emotionless. Somehow they can analyze everything through a single picture, where we might need hundreds of pictures to do the same thing. They are so focused, and they take (a mental picture and analyze it). They can analyze the emotion, and feeling of the Time and Place, and whatever they are in. They have to process a single picture very fast (?? in their mind)).

(?? Scientifically, a cat pauses for a millisecond, and in that time they are frozen and analyze that single picture and assess everything from it. They don't run around like other animals or humans. He uses the example of the football player Messi, and how he analyzes the field and all the players for some minutes before he plays. He behaves exactly like a cat. Cats have the ability to do one picture frame analysis of the Soul and P. Young kittens don't have this ability, the mother teaches them later. There is a slight behavior like this in cheetahs, but not lions or any other cats. Then they compare everything else to this single image and that's why they are usually successful. Humans can also do this as we have seen with Messi. This is why cats always land on their feet they analyze from the start where they're going to land and what they're going to do. That one microsecond picture tells them which muscles to use and how they have to land, and automatically their body does it, it's like the Soul sets it for landing).

(I have studied their behavior for a long time and scientifically we know how they do it. They use a single image, the decision is made, and the whole body changes into that ?? information. It sets itself to win over the snake. It analyzes its weakness, and where, and how it is moving, and with in that picture it can decide everything. When you sit in front of your cat and watch it, it sees through you. You think it is asleep or frozen, but it is analyzing your Soul. It sees different images).

(In the next few weeks we'll teach you about this. The vision teaching of today has other parts to be added to it. Your vision, without you knowing, assesses the Aura, and the fields around you. The fields give a lot of information of how you behave. We see people physically with our eyes, and our Soul sees their fields, or their Aura. Even our machines can't make the aura which the Soul sees. And then we assess. The more we understand the work of our Soul then we start living like the cat too. If I walk into a meeting of people whom I have no emotional connection to, and it's just business, then within five minutes I can make a decision about where everything is going, and whether to not to work with this person. ?? I assess his behavior, and that decision ends up being 95% correct. If they do something wrong or take a different action in the middle of things that's different. But the assessment is always correct, because I look at the physical side and at the same time at their emotions, Aura, the way they walk and shake hands, and how they put their feet when they sit with you. It's all part of the Soul and the Aura they create and the cats are good at (?? determining this)).

(?? The cats do the analysis in a flash, and they judge the aura, emotion aura, and the physical body. They can see what the snake is thinking about doing, because they are already connected to it. They are aware of the colors of the emotion. One day I'll explain. When we wrestle or fist fight to show who's more powerful, the Souls see each other on

the strength field and common ground that we all have. ?? The Soul sees what the M field strength is in the other. Let's say, if you are a 5 Tesla Soul level and I'm 6 Tesla Soul level, I don't assert myself as more powerful. I don't need to fight with you and win to say I'm stronger. Instead, I share my extra strength with you, half and half, then we both become 5.5 Tesla. It's a different way of living than humans live. Even some animals live this way. I have observed this in Africa because they have a different way of life there. Here our animals have become more into human matter).

(In Africa, you can still see how they lived in the old way. it's like the Chinese herbs, they share with each other. They say, ?? take from my Soul, and my physicality, we'll go together. ?? Their approach to life is sharing. ?? It's a different way of living. It's like seeing through 'night vision glasses' of the Soul. In the D of the Soul we cannot lie. You feel it, because ?? you are present. You can feel if one betrays, commits adultery, lies, cheats, are deceivers, or if they love and care. Some people are scared to show their love because they're scared of what might (happen. ?? Some people are scared of talking ?? about what might be, because they see something at the level of the Soul. ?? In the Soul you know how to speak. But some people don't deserve to be loved, because they abuse the love). And others don't deserve to (share honestly with, because they abuse it). While with other of the same strength you like to share everything with and they build it up with you, because they see the Soul, and not the P. Because their behavior comes from the emotion, and the emotion dictates the behavior. Then your Soul will tell you if the other person is lying, or is sincere)).

(Watch your cat and see when it freezes for one second, then you'll know why it wins every time. The cat is more or less the only animal that makes an arch, when it goes into a defensive position. This is because it connects the emotion of the physical side, from the back of the spine, and ?? how the spinal cord connects with the brain. It all works as one. There are very few animals who behave this way. They complete the circuit and connect to the Soul. In a way, the tail end of the spine deceives the (?? other animals, because they don't look at the head, they look at the tail. That's how the cat gets them by the neck. Try to video it and see when it freezes and analyses)).

(Mr. Keshe talks with an Indian KS who is on the U Council. They have a private chat to connect to him directly).

(There was a question about dreaming of dead people you don't know, and if you would join them soon. It could not be answered).

Q: Can you make the energy of a plant or animal with the Universal Cup?

K- (In a way, yes. It depends on how you do it. You have to understand the composition of the Soul, and how it is. It's very hard to do it in parts, and to find the exact location that you can take that part. There is a special way to do it, and a special knowledge. I don't think any KS has reached that level yet. Part of our agriculture heads do it that way).

Q: Can we place fans on top of the ONN to draw the heat out?

K- (There is no need for that. It's like any other computer, don't lock it in a cupboard where there is no air circulation. It needs normal air flow).

(In the past we said, that the Earth, due to its composition, has not managed to feed its citizens like the dog, cat, Man, and whatever. (?? Its Inertia locks what it does in the center. ?? The composition in our body is restricted to ?? the Inertia of the components ?? that are in the Earth. The center of the Earth is a Plasma and it's hollow, because that's the characteristics of a plasma. It's the same with your brain. Back to the Earth, its dynamic part is the magma, which is a mixture of different materials with different Inertias. ?? And that allows different Inertias to be created on the Earth. And ?? the magma is dynamic and it moves the Inertia). (?? The waters of the planet move and its heat mixes up the temperatures of the planet. We have the oceans and the rivers, they are not static, they move and mix things. For example, the warm air travels all the way from South America to warm the West coast of England and make it habitable. The magma inside the Earth does the same thing. It has a flow pattern that dictates the conditions above ?? on the surface. These are ?? also the creators of M fields and they generate energy. ?? It's just like a generator where you have Cu coils spinning inside magnets and they create electricity. It's the same process with the Earth, the magma is that rotating magnet and the shell of the Earth is like the Cu coils. The interaction of the magma with the solid state Inertia creates different energies, emotions, and different conditions for thoughts. ?? It's all M fields. ?? With the same generator you can produce 1 volt or megawatts depending on how you set it up. ?? We have to learn this knowledge then we can travel anywhere. We have to learn how to be detached, and when to create a negative position of it)).

(KF will show Space reactors in 2027 or 2028. For sure we'll show the first UFO. The Space agencies cannot solve the riddle of Stonehenge and how they moved 400 ton stones into place. Even the cranes of today cannot move such a thing. How did they get it there? The KF has and is developing a T that can do it. It's in the patents and now we are going to deliver it. We can move millions of tons. We can literally move a mountain with a spoon. KF is developing this T. The spaceships don't use negative anti-gravity, and all that (made up) rubbish. You have to create the right atmosphere so that the Earth's magnetic field 'handshakes' with your flight system's M fields. You don't throw with a handshake, ?? instead you let go loose. But first you have to know how to develop the T for handshaking. ?? You need to create a separation, and a vibration to create it. This T is in our hand, it's not something we're going to do. One of the KS was affected by it very recently).

(You need to understand the process of detachment from the Soul to ?? the dimension. The systems with motors used in the Beijing presentation last May are obsolete. The present KF systems have no mechanical motors. In the coming time, when you see the UFO its communication systems will have no electronics, ?? there won't be any physical thing to see. The first pieces of ?? this system were in my hand in the past few days. ?? It's in the Space Center in China and we just have to put it together).

(To create systems like this, you have to work on the level of the fields of the Soul, and its strength. You can change the Soul to produce the materials you want at the time you want them. The World of Science has not understood the difference between the solid ?? matter, plant, animal, or human life. If you understand this, then you can move millions of tons ?? in a fraction of a second with very little energy. The amount of energy is what you use to pick up a spoon to feed yourself. That's how much energy you need to move a hundred or even a million ton stone. In the past, this knowledge was in the hands of the Man, but he abused it and it was taken away).

(They wrote a lot of rubbish about how all these structures like the pyramids were built. They said, the Pharaohs used slaves. It wasn't like that at all. With one spoon everything can be carried, but it is hidden in different ways. They were scared to share this knowledge and after they made the pyramids they lost the knowledge. Because they did not share it with others. The knowledge has to be taught ?? again and KF research is ?? doing this. They're building the systems for it. If you have aircraft a million centimeters long, it's irrelevant. You can do the same with your body. You can lift yourself if you know how to tune. I'll teach you how to move the physicality. But then what are you going to do with the Soul?)

Q: Thank you Mr. Keshe for a bird's eye view of the effects of Man's eye color on his Being. My question is about the 1G in last week's teaching. How does the vacuum in our body affect the 1G?

K- (?? No, it doesn't work that way. The body is a separate plasma, it has its own G - Force parameter within itself).

(?? The reason the astronauts in the Space Station float is because they don't understand how to create a Soul for the Station. When KF goes to Space we won't float inside the craft, because the craft will have a Soul and we will be ?? in balance with it. Weightlessness in Space means they haven't understood how Creation works. When we walk on this planet, in a hidden way our Soul has already balanced itself with the Soul of the Planet. (?? When you speak about the gravity and M field of the planet, you don't know that there is also the gravity and M field of the Soul of the Planet. ?? The 1 G on our body has to do with the physical body ?? of the Earth. Whereas, our Soul works with the Soul's GM fields positioning. In Space, we learn to use ?? our body ?? and its fields in respect to the environment we create there. The systems will be made through the Cosmic Ray T in the fields of the U. The Space lab and our systems don't have a Soul and that's why the Man is floating around inside the craft. If you create a Soul within these systems, nobody will float)).

(Man doesn't understand the science of Creation, and he is occupied with his 'monkey business.' (Mr. Keshe was commenting on how the American and ?? European Space travel and the Space Labs are so disorganized and when they show pictures there are tubes and wires hanging everywhere and there's no understanding or discipline to their organization. They are proud of their disorder and make it glorious in the Media. Whereas, the Chinese are totally opposite you don't see a single wire hanging around and

they are so clean, and everything is immaculately arranged. In a few months time, KF will collaborate with the Chinese Space Agency and we'll see them walking normally in their Space Lab and not floating. The contracts are already signed, and everything is set to go into the next phase)).

(When you don't have a Soul, then you float in Space. You have to be connected with the system. When you understand how to connect your Soul to the Soul of the system, then you are at 1G anywhere. (The 1G is not a measurement, it's the balance of survival, and that you live normally in the conditions you are in. You can go on Moon and still have 1G, compared to the Gravitational field force of the Moon. ?? This only happens when you can tune into the Soul. Matter state material don't have that possibility)).

(All we need to do is to introduce one of our systems inside the Chinese Space Lab and they'll walk like on Earth. It's a joy to work with the Chinese scientists. We don't have this in the West. ?? You work with the 'G' of the Soul which is a CR. We are going to change this schizophrenic life we are living now).

(Can you imagine traveling millions of kilometers per second, but your Soul is still in the D of P? Your Soul will encapsulate your P ?? that it is inside itself. These ?? systems are already part of the evolution of the T and they are getting built).

(Our brain creates 1G inside, ?? in respect to itself, not in respect to the outside 1G. The interface is the skin of the Man. Because the skin is part of the brain, it collaborates with the Soul, ?? and both agree. ?? You float in the D of the Fields of the U. ?? When you travel in your dreams you never float, do you? Now you understand the difference, and how misguided the knowledge of Man is. When you dream of your mother, do you float in front of her, or does she float? No, you meet at each other's Space, Cosmic Ray, Gravity, M field).

(You don't need to hop like a rabbit on the Moon, you can walk on the Moon like everybody else. You shut your mouth and connect through your eyes to the Universal Cosmic energies. You feed yourself through your eyes, and whatever energy you need. This is the secret of living on the Moon. There is a lot for Man to learn, when he stops killing).

Q: The iris is of a different color, but the pupil is black for everyone. Is it a black hole? It's magnetic mirror, that absorbs the fluids in magnetic field lines of the Universe? And what does it bring to internal vision?

K- (No, it is the balance of the fields. I call it the Soul of the eye. (?? The color of the eye is the filter for what fields can go through that hole. This is why we have different behaviors with different eye colors. There is much deeper knowledge to learn, but this is not the time or place to talk about it now. ?? Maybe we can teach or refer to it in the future)).

(The specific eye color creates a specific skin touch. The skin is connected ?? to the STM through the brain. Black skin is amazingly soft. The skin has different textures and softness specifically ?? tied to different combinations of the color of the eye. For example, a blue eyed Russian has a different skin softness. ?? The texture of the skin comes ?? from the energy absorbed through the eyes. This shows the importance of the eyes in absorbing CR and ?? how it interacts with the brain. The brain, lungs, and skin are of the same tissue when you're conceived in the womb of the mother. (In the embryonic stage of life). A specific eye color creates specific types of skin, and specific behavior).

(The touch of Russian white skin is emotionally unbelievable, because it is something we are not used to. Their eyes absorb a kind of light which feeds the skin and decides the emotion and skin texture. This is how much Universal energies affect us. The energy we absorb through our eyes decides our skin tone and behavior. One day I'll teach you and then you'll see why we behave the way we do, and how some people dominate and control when they enter a meeting. It's done by what they release from their skin. It creates a certain behavior. He tells his experience with different skin textures from different eye colors. It works through the Soul. Our body is a compromise, or we could say an interaction of the fields of the U. (Could not understand ?? when they match the Soul is not there).

(He has traveled in more than 80 nations across the world and he always observes peoples behavior, and then looks at the color tones, and the way they are. Our eyes dictate the texture of our skin, because it's the only direct interaction with the Soul. Your Soul works and absorbs through your eyes. The eye sockets have a combination of cartilage, muscles around the eye, the collocation of the retina, and everything else that is there. Your eyes are the gatekeeper of the fields of the U which directly feeds your Soul).

(Calcium (Ca) interacts with the motion, or restriction of the work of the Cosmic Rays. One day I'll explain the reason and why every cell has a Ca seed in it, otherwise it doesn't work. It's been planned that way, because that's the only way you can survive, and the only way you can convert CR into the level that your Soul can survive within the structure of your P. Look at your skull, and then at the other bones. How come the skull is only part where the organ sits inside, and the rest of the bones have muscles hanging on them or is encaged inside? The skull is the only place that there is no muscle tissue and it doesn't need to hang onto something. ?? The muscle content is your brain ?? mass. And the eye is the only right of passage into the Universe. There is a lot to learn).

(He talks more about the Swiss Presentation coming up and water decontamination, and something about nuclear contamination. The Iranian Ambassador to Switzerland will be one of our guests. It is part of the joint China Iran collaboration of the technology. Buy the Beads, it's your obligation and then let us know how beautifully your Soul gets elevated. Then there was some clarification about registering for the Swiss presentation as a government, corporation, or an individual. The governments and corporations involved may receive sensitive information which cannot be told to the public and that's why they are separated. We can give them confidential research and data. We are not there to create a panic, we are there to show a solution. There are some new products in

the KF Store. The new Monthly Flight Sessions will be limited to 30 people. We'll actually feed you and we need you to give us immediate feedback about what you experience when we send you fields of say, Golden Delicious apple. Your feedback will be immediately put into the system and tested again. We have to get the field strengths right for when we release to the public on our ONN system. There will be 3 to 5 sessions for this that will be very extensive and interactive. It won't be like we did before. We want KS who actually give us feedback to participate. These sessions will be extremely valuable to us for the development of the ONN transmissions and Energy transfers). Thank you very much and see you next week.

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:17)

K- Thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers Workshop from Keshe Foundation Spaceship Institute. As usual, we are back here, and we try to understand more the real ?? work of the Creation beyond this planet, and how we are, what we call, umbilical corded to the Universe (U) with our senses, with our physicality (P), but we think the physicality is the controller and ruler.

In the past few weeks we dug in more deeper into understanding the Cosmic Rays (CR) and their work and the way we receive energies from the Universe. Today I take you to a new dimension (D). (:18) This is something most of you never think about and as far as you're concerned you only get involved in it when you get a little bit older and you cannot see, and you go to the shop, can I have the first glass which I need to wear to be able to see. And then it becomes part of your life not to forget it not to leave it on the shelf and then it comes worse and worse and what we call, the sight of the Man.

The eye is not just for seeing. The eye is one of the most important connections of Man direct passage through the Universe, receiving Cosmic Rays information. Many, many creatures in the Universe have eyes, have a process of vision, and many have created dimension of Cosmic Rays that they don't need the eye, but they can feel the dimensions, millions of kilometers. But it's proven that the vision has certain advantages. And the human race body has fallen into the trap of what we call, eye to see but not eye to actually absorb, feed, control. It's one of the senses we talk about a lot. We open our eyes if we don't see the day doesn't start and if you are blind we rely on those who see to tell us what it is.

But in a Universe and Man traveling the space of Universe has to learn how to use the Cosmic colors, Cosmic Rays. What do they mean? The way you understand on this planet. We made red danger, green to be green and grass and every other color. (:20) We have to understand, basically, how the color of our eyes has come to be what we are. Why we have blue eyes? Why we have hazel eyes? Why we green eyes? Why do we have a brown eyes? What's the black color comes from? And then, if we understand this revolution, we can then understand the next step, how this is connected to the absorption of the Universal Energies, and how it's connected, our eye socket is not just for our eye. Why do you see dreams? Why do you have dreams that is photographic? Why your dream is not just sound? Why your dream is not just taste? Why your dream is not just touch? Why do we remember pictures? So, we understand our ?? eyes of it, is a hole, it's the only common ground, the only common path, where are, what we call dimension of physicality and the dimension of connection to the Universe, used as one.

This is why we remember the dreams, because the Soul sends its information through that part, which is, hasn't got the Calcium (Ca), which is the skull of the Man. But we have to understand how the evolution of the color of the eye has brought maturity to the Man. What does allow the body to absorb from Universal energies, that matches to the color of the eye? (:22) For this you have to understand first, what is our eye color? Why we brown? Why are we blue? Why do we have a green eyes? And how this allows maturity of certain way absorptions from Universal Cosmic Energies that affects our emotion, affects our way of thinking. Originally, the eye of the Man was black, from the impregnation of what we call the eye. When the Man moved, you have to understand the black eye, black color eye center, is connected to two things. And then we never considered the emotion which is the third thing to connect to it which that emotion controls to the Soul of the Man (STM).

Black eye needs started where there is a green there is a lush green high temperature and the surrounding that could allow the seed of the Man to grow in. That environment has the impregnation that can see the environment that is in monotonous, deep, high trees, high, what we call temperatures of what we call, mono temperature more or less, on the Central East Africa plains, in South America, plains in Australia, where there was not much traveling. You stayed in the environment you are, mono-coloring. When the human race crossed the Strait of Hormuz into the central part, southern Iran, where we crossed for the first time out of Africa, and then the other tribe, which came down every 200, 300 years, (:24) down the river from central Africa into what we call the Egypt of today, two ways were invaded out of Africa, human race coming out. This is this cycle of generation of the Man.

In the other cycles of generation of the life, which is goes back maybe half a million years before, it was opposite. Life was based in Northern Hemisphere. In the rotation of the Earth, conversion, gradually everything is... That's why we see sometimes places, they say, it's been hundreds of meters below the sea level, millions of years ago. When it was below surface, the life was different. Different creatures were brought up, born. Life of the Man, the way we look, brings us to that point. When the Man crossed, for the first time, Africa, into the Asian continent, through the Straits of Hormuz. This is why Straits

of Hormuz is so beautifully connected to the life of Man, and we see what they're making of it today. Man came to the different savannah, came to a different condition. Green lushes of the South of Iran, with the desert land. This process started when they crossed, the Man crossed from Africa, into the southern Saudi, what we call, land. But they stuck to the sea, they were there all the time, nothing changed.

Once they came into Iranian Sahara, and into the Iranian forest section in the south of Iran, then became a problem seen during the day and night. This became a problem to adjust to the desert and the green. (:26) So, to do that, the eye ?? color, changed into brown, that we can see more. And this was the biggest change in the evolution of the Man, in the development of the STM, to absorb energy it likes. It had diversity, it's like if you look at the animals, the dog, the cat, the snake, they don't move that much up and down. Man goes from flat, horizontal, to vertical. And this change of 90 degrees back and forth, brings different fields, that body creates, absorbs from the Inertia and the field of the Earth, and the Universal Energies, and this brought the maturity of life, maturity of intelligence.

Then, you understand, when we crossed into the Iranian part, what we call the Old Persia, millions of years ago, hundreds of thousands of years ago, the evolution started. Then, few thousand years ago, when we actually start living, due to change between this combination of the light, Man changed to brown. Then, when as human race expanded into the left, which is the forest, what we call the green continent, the Europe, things changed. Man did not need it to cover the heat, which was created by the material of the eye. He needed to see a combination of the different green on the savannah of the Europe. Accidentally, nobody knows up to now, one person changed the color of eye to blue, (:28) that it brought for it to be able to live in a constant green area, but not in the forest. They moved between the forest and the green, what... because at that time, Man became cultured in agriculture. They brought the trees down, they could cultivate. So, they were not living in bushes all the time.

So, at a moment, at this moment, one person changed blue. And all those human race, which have a blue eyes, come from that one single person. It gave visibility of being able to live in two dimensions of the forest, and what we call the agricultural open land. At the same time, the group of the men which use like into what we call the black forest in Germany, highly dense area and they never actually saw the open lands, but they were living in the shades of the sun and dark, sun and dark, when the light came through the trees, they developed to be able to see more clearly the green eye. We know this historically, scientifically. Then, this group absorb different energy, we see them with different mentality, we see them with different absorption of Universal Cosmic Rays absorption, because it's interfered with partially by the trees. They do not get the pure, what we call, rays. All the rays, in majority of cases, have element of interaction with the Inertia and the field of the trees. (:30) The Vertical People had a direct effect on their color change to green.

We saw Northern Europeans moving further up Denmark and that side of the Norway. And we start seeing these people, didn't see the forest, they saw the sea, the oceans,

mainly grey, darker, with the clouds and the sea. They ?? always looked outside, they were what we could see, and this created the grey colored eyes. Grey colored eyes, which is about 2% of the world population, which is very near to blue, came because of the environment. Then we see the hazel eyes. The hazel eyes were the ones which start moving between the desert dry lands and green lands. We see this hazel eye a lot in the background of the some of the people who moved as what we call travelers, changed in past thousand 1,500 years ago into going from, let's say Palestine to northern China, this started creating a hazel eye because we have a combination of blue and yellow, and this allows us to work both in the deep green and allows us work in the deep dry. When we go in the desert we need different eyes which we even today, we buy double glasses. And we see how they changed eye (color). Then we have a golden eye people which is very honey. These are ?? moral energetic system. A percentage of the world population is. These are who stayed stable in their condition in Savannah with nothing. But what we see each color change brings different emotions, different behaviors. (:32) You see the placid Norwegians, Denmark. We see the aggression and what we call killing in Middle East, which is part of the nature it has brought in. Continuously fighting to survive the desert, fighting to be alive. Then we see the behavior of the Europeans and we see the behavior of the Chinese.

So the color of our eye which we ?? view was just the color, is the creator of our emotion, is creator of our behavior, is creator of how we react, is the behavior of what we absorb from the Universe. And the skin of the eye is protection of the Man's side from the physical dimension of the Earth. It does not stop the absorption of the Rays of the Universe. So next time when you dream understand that you have gone through the skin of the body of the Man, through into dimension of Universe. Your dreams are the extension of your Soul. Your vision side is the extension of your physicality. When you close the eyelashes, when you close your eyes as you call it, you detach yourself from the what we call, the physical body of the interaction of the Man with his surrounding. But the dream doesn't stop. This is why we remember it. The information goes, is the limitation of the eyelashes and eye, what we call, skin of the cover, does not stop the waves, the plasma technology (T) of the Universe, (:34) the Cosmic Rays to be blocked. The only thing which changes it is the what we call, the skin, which we created on the outer layer of our eye, which dictates the color of our eye, dictates in what bandwidth of the energy we absorb, which we feed our Soul with. Your eye is the feeder of your Soul without interference directly to the Creator.

The problem for humanity starts that we are used to the colors of what we call our planet, our physical dimension. Now that we are becoming the passengers of the Universe, the colors of the Universe are slightly different and sometimes colors we've never seen. But we just take a spectrum of it which makes to the color that we see. You have, as Knowledge Seekers (KS), brought up to see colors which they don't exist. But to you has become normal. When you show this color for the first time to color specialists, some of it don't exist. I've taken some of the Gans's to some of the people they can give me a color, and (they) say this color we cannot produce doesn't exist. These are mixtures of the universal colors and what we call in the spectrum of the observation of the Man. Go to Book 3 where I show a tube of different Gans's and I say, (:36) these are the Gans's and

you see different colors separated but these colors we are not used to. As Knowledge Seekers you have accepted it. Put CO₂ and Zn next to each other. You see the difference between the color. Zn is pure, it's white, snowish. CO₂ is creamish white.

There used to be a university in London or in England that you could get the degree and a PhD in a thousand colors of white. You could actually have a degree, there are scientists, there are doctors who have degree on a shades of white. You can go to university and get degree for it. But all, even if you take all these thousand shades of white, they are not the colors of the Universe. Man, in a coming time, as we are introducing more and more Gans technology to you, as you're learning more about Cosmic Rays, you start seeing colors that the others don't see, which are not used to the technology. Because in the Universal Community (UC) you don't have the eyes to see, you absorb the way you dream, you see people in front of you through the fields, so nothing to see but your eye, but your Soul says there is an individual here, there is a living thing in front of you. Eyes cannot see, but the STM, he sees the Cosmic Rays it produces. Is it danger? Is it a friend? Is it telling me something? Am I seeing something? Or am I feeling something? I'm going to go through something I don't see, but it's hard rock.

For this reason, in the coming time, we release part of the UBESUS set of the eye, what we call, Headsets, (:38) for Man to start seeing the colors of the Universe. Many of you will lose your lives if you do not understand what color combination of the Universe means colors you've never seen before. On planet Earth you are used to the combination of basic colors and how you, what percentage you mix them. In the Universe you have to learn about the Cosmic Rays mixture, how they interact. The colors are not what a Man is used to. But at the same time, these colors, what you see as energy, affects the field energy of the STM. Then if you learn to tune the sight, the fields of the emotion which comes from the sight with the field which you absorb to feed the physicality, with the STM, you create a new emotion which is unknown to Man at this moment of time.

Go back to the teaching some times ago, I said there are emotions which Man is not aware of. In a way you develop a sight like a blind Man. You have no eyes to see, but you feel the presence of. You know the street is there, there is a car running. This car is a Cosmic Ray, is another body which you. You are blind. You enter the Universal Community blind totally, if you do not see through the eye of the Soul. This comes where the sight of the Man and the STM work together very closely because eye sees the physical, Soul sees the energy packs, dimension of the fields which absorbs. A spectrum which is blind to the physical dimension, and warns through emotion the Man not to move. (:40) There is something in front of you, you don't see with the eyes, I feel it. Trusting each other, collaboration between the two. The races in the Universe who have learned to do this have become unique.

Man with a beauty of the eyesight will learn this. You have no choice. This is part of becoming part of Universal, what we call Community. You have to learn about the rules of Universe. You have to learn about how to judge to understand. Nowadays you say, "I felt something is going to be wrong and it was there, it was wrong." This is your Soul behaving the way it'll behave in Space. I don't feel good, I don't feel to go into this car,

and then the car crashes. I didn't feel to go, I knew that, this is going to happen to you, now you become a passenger of Universe, because the eye has seen it. Through the fields of the Universe, understanding the motion of it. How many times you've seen an animal, for example a dog, poses, what we call, on their back, and something happens in the space they were. The animals rely on that, because their eyesight is not what we see, they see mono-colors, so they work with their Soul. We see with the, what we call, Vertical People, how they arrange this with their physicality and the Soul, that in the harshest storms, they can stick to the ground. Let's move together. (:42) And we say, "Oh, the wind came, and this did, and that." We have to learn and then rely on each other. The blue ?? Alakai sees certain fields that the black one doesn't see in the dimension of the physicality, but at the same time absorb certain fields through that barrier of the skin which is set on the eye, to be able to absorb, that the emotion created by it can help the blue eye.

In the Universe the color of our eye changes in the shape and dimension that sees a full spectrum through the STM, not through the dimension of physicality of the eye of the Man. Next time when you look at your eye in the mirror, say, "What do I absorb from the Universe?" Next time when you get up and you dream, you say, "I had a dream." You understand now is where the Soul sees the dimension of the Universe. It's the only hole in a way, which the body of the Man, the STM, can travel out on its own, without interactions, without any Calcium interactions. Then, next time, when you wake up and you said, "I had a dream", say, "My Soul traveled, and I've seen the Universe."

This is why, as Humans, there is always problem in understanding, that what I call, the schizophrenic life of the Man. (:44) He never sleep. The brain of the Man works 24 hours a day, and our stupid scientists, we only use 5% and an idiot like Einstein has used more than everybody else. Actually, he didn't use any of his brain, because the mouth talks faster than the brain. Then you understand, the other 80% of your brain is not for your work on this planet, or physical dimension, is used for the natural information and energies, that the STM stores, for his operation and connection with the physical dimension. In a way, your brain is used by the STM, as a, what we call, transformer. Stepping down energies, converting it into messages, that your physicality can feel, can understand. When you become Man of Space, there's a need to do that. The brain of the Man become part of the inside of the Man, and then the Soul moves in, and then you understand that you will comprehend different things, because now the pure energy in the dilution of the fields of the Universe interacts with the STM and decisions are made on that way. You feel a new dimensions, you feel that your arm and legs is not what I'm used to. And then you understand what's happening to you, why you would call it in the in a world of humans, my Soul is elevated, I get access to more.

Then you understand how you gone through the evolution of the, shedding the old skin. (:46) And the new skin, like a snake, becomes the dimension of your knowledge. And you have to go through that step, that you gradually understand more and more, and store more energies of ?? life (or light). It's a physical transmutation in elevation of the Soul. It's not something just for somebody. You touch, your fingers are new to you. You touch

this, "I don't know this feeling." And then, because the Soul has elevated, the physicality has to follow and say, "Okay, from now on this is what it is."

I've been through this process physically, two or three times, and elevation of the Soul changes. You wake up, "My hands are not mine, I knew this, I know the feeling." But then you find out, the knowledge, the emotion has changed, detachments become more, because you know, "If I can lose this, so what is worth attaching myself to it?" If any of you, go through this evolution of the Soul, through the dimension of the vision, sight of the Man, that allows you to see the Knowledge of the Universe, you'll feel this. I know this emotion, I've been through it. It takes two or three days to get used to the new skin, but you see the knowledge changes. You see more and more. The third time when it happens, the whole knowledge of the Universe is open to you. Servitude is the salt of the basis of that point to reach to it. Detachment. Because if I cannot be attached to this physicality, what is the worth to be attached to the worth of this, this body? (:48) This is how when it happened to me the first time I could not understand what it is. I was like a crazy Man for days. I know the feeling is there but my eyes were seeing different thing. I have no connection to these hands. I have no connection to these legs. I have no connection to this life I live. When it happened to me at the age of 39, 40, the wealth of the world had no meaning. But it was a tool to be able to teach the others how to become part of the Universal Knowledge, how to structure it that others can understand.

Your sight, your eye, the colors you absorb from the Universe, through Cosmic Rays, is your future. This is when you die, you leave it behind, because you didn't learn how to see through the eye of the Man, through the dimension of the World of Creation. Then you understand how important your eyes (are). It doesn't matter if you're blind, it doesn't matter if you're aged, it doesn't matter if you got cataract. You still dream, you still travel through the barriers which is made by ?? collagens of your body on the front of your what we call, the hole into the Universe. Your eye is not just to see what is around your physical world, your eye is an opening to the dimension of the sight of the Universe. (:50) This is why you dream and you say, "I had a dream." Do you see dream through the back of your head? Do you have eye in the back of your head to see where you are going? No, because the structure is that way to see. And we see this with most of the creatures of the world, Universe, which have that dimension of attachment to physicality. And many, many, many, what we call, tribes and races in the Universe, give their life to have that, what we call, physical vision.

Next time you wake up, as I said before, don't say I had a dream, I traveled. Because what happens to you when you are traveling in the dimension of your fields, energies, connection to the Cosmic Rays of the Universe, and then suddenly somebody wakes you up in the dimension of physicality, you're telling to the others, "I have to go, there's a problem, he's waking up, I have to go and look after him." Babysitting the physicality of the Man. That's what happens on the other side. You've never been present to hear about what your Soul says about your physicality. The guy yesterday went and did this wrong, what shall we do? The Souls decide, "Okay, we set him up to pay back." The Day of Judgment is done by your Soul and not by you.

Now you understand how your vision is your, not only channel to see your physical surrounding, it's the channel which connects you directly without interference with your connection of life in the Universe. (:52) Next time when you dream, it's not a dream, it's me traveling, it's me seeing. And if you see the travels and dimensions of the Universe, it means you become part of Universal Community. If you travel and see the grandma and grandpa and change them, conversation with them, you still have the connection to the, what we call, the planet Earth, because the anchor of physicality is left under the blankets.

There was a mother who used to go to sleep, but she was always afraid of losing her child. She used to tie a rope to her ankle and one to the ankle of the child. And the children stopped around her all tied up with a rope to the mother, that they don't fall off the roof, they don't fall off the bed, they don't go somewhere while she was resting. And this is Man, it's the human race. We keep the physicality with the ankle on the rope, that we can go and play, but we know we are locked into that point to the leg of the mother, which is the Earth. When we grow up and mature, we take that rope off, and that's where our Soul goes.

Now you have to understand, that in part of the teaching, how important your sight is, and how your sight gives you the Knowledge of the Universe, while your physicality is there repairing. You're literally like a Man with a car, going to the garage, leave the car in the garage for repair, (:54) and man goes for a coffee. The car doesn't need to go as it sits in the garage. But you've learned to get this car into the garage every day, and the driver goes for a coffee with all the friends, till the repair is done, to come and take over to drive. Now you understand, physicality of the Man, is not the owner of the Man. Man is just a shell on the back of a snail, protecting it, while the snail does its job.

Your vision, if once you learn to connect it to your breathing, will open a new dimension of life. And what this is, next time when you go through the cycle of the breathing, when you bring your lymph, which is your Soul connections with your physicality, feeding to physicality, what it needs through the Soul, try to connect to your vision and then you see what you see. And then you understand how you feel when you die, when you are detached from this physicality because you'll see with the eye of the Universe and the energy of the Universe. I made Man in the image of Myself, I need no eyes and I no need lungs. But I do for me to enjoy the dimension of physicality and the beauty of Mitra.

We are creatures of the Universe and we got attached ourselves too much to the dimension of physicality. And now you learned how it's your job. Nobody else can do for you. Nobody can pay you to love them and nobody can pay you to trust them, but yourself. And this is what it comes. (:56) Now you understand. And this runs right across to other dimensions of the teaching of the Keshe Foundation as we go closer to the point where the Man meets his Creator, which is within him. But you have to understand Him, that you can connect to Him, that you can understand your own purpose of life. Now you've seen what the air was, now you see what the eye is. There are 100 senses in the Universal Community at least, and you muddled yourself with five of its physicality. Then it comes the emotion, which itself has no limit. And Man will know new

dimensions of emotion, the dimension of the connection with the Cosmic Rays of the Universe. We are not teaching you about Gans making. The Gans was that bite (bait) which we threw in the water to catch the fish, that with that, we don't capture the fish, but we give food to the fish to grow. And most of you have taken that bite. And now you understand how the process started.

The teaching you receive today, and it'll stay for human race for thousands of years to come, it's a separation of the Man, not from this planet, but connecting Man to the Universal Community, that he can enjoy his physical dimension on this planet, and anywhere in the Universe. I hope you enjoyed this teaching, and next time when you stand in front of the mirror, don't look at the face of the Man, don't look at the beauty of the eye of the woman, is it blue? (:58) You say, "What am I losing with this color of blue, or with this color of brown, that I cannot absorb from the Universe, because my skin has decided certain fields needed for me to see the dimension of physicality of my environment?" And then you see what you see.

The most interesting thing is, what happened when one eye is blue and one eye is green? What is open to this? I used to know a charter accountant who had this eye, and many times I put to her. What do you see? Very unstable. She could not decide what she loves and how she wants to live. But she was a chartered accountant. Says, "Figures are the only things I can trust on the paper." Many nights I sat in front of her and I laughed. I said, "Which one are we going to trust the blue or the green?" Now you have to decide which eye you are wearing, and which one is reality, and which one is the dream.

I hope you learned something today that prepares you to become the Man of Universe, in the Universal Community, knowing your engine of physicality is the line of your connection, (1:00) that allows you to dream, to become part of the Universal Community, when you don't kill, when you don't destroy, when you don't eat others. It's just the Emotion of it. And then you ask yourself, "How come I was with mom and I was eating food?" You ate the energies of the dream of that food. Not. You didn't killed for it. And you don't need to kill for it, because it has no dimension of physicality. And this is what we are training, bringing Man, that not even dream in his dreams, killing. physicality we can handle.

Thank you very much for today and I hope now you learned what you have to do to take next steps to understand how you can transmute. You cannot transmute light. Your eyes are your door to the Universe, but you have to know, if you are going to use a night vision, you call it a dream, or day vision, that you call physicality. We go for a break and we come back, and I hope you have seen the new dimension in teaching, and that's the whole purpose of it. And soon we open other doors to you, that it allows you to control through the physicality dimension that you can live at the same time in both dimensions and be controller and with it bring new dimension to humanity. This is the one of the keys for Man entrance to Universal Community. We go for a break and we come back. (1:02:30)

(1:03) << Video of Space City of KF is shown at the break.>>

>> **BREAK** >> 647 KSW June 18th ... (1:06).

R: All right, that was very, very nice. Thank you Mr. Keshe.

K- This is part of the Keshe Foundation operation in China. You saw the greenhouse inside. One of the pictures you see, greenhouse from the top. This greenhouse has no glass room and we use it to see the technology how to spray and we spray our greenhouses with the ventilation of what we call the drones. It has been one of the biggest problems for agriculturists is to use the Keshe Foundation because it's too much laborious to spray every day. Now with this technology we just leave these in the fields and each drone covers tens and tens of thousands of squares. It comes home, it lands, doesn't need anybody, it fills itself up when it's completed the cycle and goes back. In a way the next generation has a preset memory, doesn't need the operator. Lands on the platform, fills up, gets charged and then comes back. This is an evolution in the technology that brings us into heavy agriculture.

And in China this is normal, using drones for agriculture is a normality. This building you see now, go back a picture, the frame you were before, this is the Keshe Foundation Greenhouse for Chinese agriculture. (1:08) It's over 22,000 square meter. We'll show the inside of this very soon. The buildings you see, most of the buildings, the three buildings are Keshe Foundation operation in agriculture and this will increase to 300,000 square meter in next 12 months. This building is specially designed this way, has no roof, so we can spray both from the bottom and from the top. We can change the environment, we can change the ground level. And at the moment it's under ?? poor cultivation and most probably the next program you see, somebody told me, Rick explained to me, is this AI generated banner on the wall? No, this is the Keshe Foundation logo on all our buildings. And all our buildings which we occupy in this Space City we call it, is it carries our logo. It will become a prominent logo across as more and more buildings and sections are added.

Our research center which is getting filled up is not part of this building, it's a totally different building and hopefully by the end of this year an impressive research center specially built for Space technology application will be unveiled, will invite the world leaders in science and technology from universities to come in to understand the new

technology. It'll be based in China and this what you see, this blue building, is one of the most advanced space centers in water agriculture, the one you saw with the spacesuits. It is an amazing place if you understand how it works, and we haven't mastered fully yet for its full operation. We don't need tests, we are not there to make profit, we are there to understand the problems of agriculture and find solutions for it. (1:10) And if we produce products in this section, it's a benefit.

But the other thing is if you go back on that big building which you saw with no roof, especially for that purpose, this building is taken for a specific reason, we are growing Chinese herbs in a specific way, we developed this. This is all has been irrigated it all has everything remote water play. In the center of this building there are two swimming pools run about 180 to 200,000 liters of water. In the next few days, we start growing fish. No food. We want to see how we can change the food of the... we can grow the fish. We feed them through Cosmic Ray technology and what we know. And we have to train our staff that do not interfere with the fish. Chinese, 80% of them don't know what even what to do with the fish. They eat it, but they don't know how to look after it. And we had experiences with Chinese who have no understanding of the fish.

So now training to the Chinese scientists that we don't want to feed, but what they get fed is exactly what we are feeding the plants. There's two reasons we did this and you will see it most probably in the future videos, you will see the pool. We learned from the work with Alekz in Africa, if you remember the swimming pool, and we learned from work we did with the Norwegian salmon industry, we learned from the work we did in fishery in Ghana and in Gambia, that the fish does not need food, but it needs an environment that it can be pleasurable. (1:12) So, we have set this new pool, which you will see very soon, when the fishes live, they live in the environment of the pleasure, not as hunted. We have changed a lot of structure, that it'll become the basis, fundamental basis for the fishery agriculture of tomorrow. We want to show that we can produce fishes with Omega 3, then Omega 6 and poison and cancer in the fish, because of the stress. This pool is nearly ready, it's just we are waiting for the last pieces of the equipment to go in, and then the fish will be fed by Cosmic Rays. It'll be evolution. We see how we succeed, we see how we move forward, and this is part of this.

But the most important thing why we put this fish tank here, is to show that the product, there is no chemicals. What feeds the plants, feeds the fish. Cosmic Ray, we can feed ourselves without killing. Those of you who are addicted to, can live off it, without actually dying. And, shows that the process is natural, and it replaces the present heavily, industrialized, chemical-ized, growing fish. A quarter of the price to feed healthy fish, fish that can be medicine to Man. So we growing the fish and the Chinese herb next to each other, together. And the purpose is that we go for two or three years with this growth, with this way, that we produce herbs. We produce Chinese herbs back to strength they used to be maybe 100 years ago. (1:14) People nowadays don't believe in Chinese herbs because they don't have the strength of it. We speak with the farmers, they say that it doesn't have what they used to. Now we are taking the chemicals and the combinations which is put into it. We're mass producing in tens of thousands of meters the Chinese

herbs with the effect of 100 years ago. No chemicals and at the same time because they energize with the energies of the what we call Cosmic Rays much more powerful.

We do not sell these products into the market to sell. We want to see how people get affected. The root you buy from a shop which it says, oh used to, now it does. But this becomes cleaning and developing vegetables that we make our technology out of, that is pure. We control, no chemicals. When you buy a product, it stands by the Keshe Foundation, it's pure from the seed to the hand of the Man. These materials, as we grow, will be used by our, what we call, Wellness Center, and will be used by our medical application products, which very soon you will see across China. The herb side of the Keshe Foundation products as medicine will be introduced in Chinese market later on this year and beginning of next year in a massive way and covering the whole of the China in one go. This process is setting up and it's getting set and by the time everything is ready, you will see Keshe Foundation Chinese herbal medicine across Chinese hospitals and the processes. All is in process of getting done. And all that will come from these greenhouses. (1:16)

In the near future, we don't rely on no one to supply us to trust the abuse, no chemicals. From the food, to the feed, to the fish, to the product manufacturing and to the end. It takes a long time, another year or so for us to lock everything into each other. But you've seen how we spend Keshe Foundation money. This unit has taken a long time to produce and it just allows us. There's a step further after this which will come in a mass production environmental change. which will be applied next year or so in China. And we export this technology outside. And this is the opportunity to change where the Man does not need to buy, while the farmer eats three times, four times more in the supermarket, because it doesn't cost any more. You don't need to buy chemicals, you just need to change the style of the life.

I hope you enjoyed this video, you will see a lot from this. The picture you see, this land does not belong to us. As part of our agreement with the authorities or the, what we call, the governmental side. We take part of their land, when we produce, we look after. And we compare the changes. This started late, but it took time to set up. The next harvest is what we call corn, which from day one of seeding we are in it. We are part of it and we compare how much we changed. We got involved in this in very late stages, when the fruit was complete, where we started to display, but we have done, we're still monitoring the data, has it made any difference. (1:18)

So, if you are a farmer, Keshe Foundation is there to deliver, technology is remote. And no more going and watering with Gans's. Everything is done automatically. Just put it there. It does it for itself every day. You don't need to be there. Just make sure there is a water, and there is a power to the position, the, what we call, the drone will do its job. The mixture is made in boxes the way it should be for that special plant, that special what we call harvest. And now we seen in the very near future 10-20 of these next to each other for huge land mass which is growing. This is beautiful when you can spray even a greenhouse from the top. We change the environment and this is important for us to understand.

Going to another announcement with the Keshe Foundation. As we are pushing forward with the meeting of 23rd, 24th of August, or sorry, October, in Switzerland. The Keshe Foundation has put out a reservation, you can reserve your seat. We have a limited number of places for people to attend. It's an exhibition, not a conference, but at the same time there will be a lot of presentations and explanations. The 23rd is booked for officials and dignitaries, and the 24th is for Knowledge Seekers. You spend a day, we try to bring the head of the Keshe Foundation, Chinese operations, and the board of directors of the Keshe Foundation China, will be present. The, what we call, Keshe Foundation, heads of the Keshe Foundation, will be present, in the exhibition with the new technologies, is a ground-breaking technology, this work, where it is going on in the background, and it'll be a very limited number of people we can let in. (1:20) And we try to give the integrity of the work of the Keshe Foundation in this meeting.

The other point with this is that we will demonstrate one of the major problems in Europe how it's solved. The process is ongoing and Keshe Foundation initially started working on this in 2017. Opportunity has risen in Switzerland for us to bring the two together and show how the technology can change everyday life for many of you through the, what we call, environmental contamination. We consider Switzerland as a clean everything to be perfect and clean. And it's a good place to show how a clean technology can bring cleanliness actually to the people. And then from here we spread it across Italy, France, Germany and the rest of it.

And I'm proud to say one of the latest fellows, somebody we're working and experts in the environmental work has joined us except the leadership and she'll work between Europe and China in coming weeks to gradually bring scientific work in the background directly with the environmental section of the Keshe Foundation. She's the leading scientist, she's a she understands and has been this work for a long time and she accepted the position and we'll see to the next step. This comes out of you writing to us, and we assess your expertise, your knowledge, and how you can do. And this week, four new positions around the world has been offered to the leading scientists, to head their own divisions, and to bring in a new technology ?? dimension, and what we call Keshe Foundation across the world. Language is not a barrier, nationality is not a barrier, nothing can stop us to serve Humanity. You'll see a lot of women at the head of the Keshe Foundation work. (1:22) As the head of the Keshe Foundation, she's been there for a long time, you have now a number of ladies heading different divisions of the Keshe Foundation. We are not allergic to other races and creeds. We are all one and we work one. And the establishment of the Keshe Foundation is becoming very nice, how women are taking their leading position in such advanced technology.

Write to us, tell us what you know, how you can, what's your expertise, and we look at it, and we are in the recruiting, what we call, cycle. You run your own laboratories, you run your own research, and we give you the facilities, and we bring your own team in, we guide you how to, and you work with the management, Keshe Foundation, then through Markray Corporation, and then through the European Corporation, to bring it across the world, to be spread very rapidly.

On the other hand, some new products has been introduced this week, I've been told, I have to mention, we have brought in a special material. It's expensive, but we want the feedback. If you go to the Store of the Keshe Foundation, you see two different type of 'Beads' has been introduced. Again, the colors are not natural colors, the colors are very different. This is a part of the range of the products of the Keshe Foundation, where you will see the, what we call, the new Beads, that you can purchase. You need two of them. When you buy them, put one on the right, what we call it, hand, and one on the left foot, across your body. (1:24) The both sets are set up exactly the same as we used to do the Pain Pens. And as you go through it, understand how it works and how it's applied.

And then you have other products, couple of new products, fancy products have been released. We want to try something, we call it a Butterfly book holder. If you with a book reading it, doesn't give you any different feeling than when you read a book not in the Cosmic Ray environment. This is a deliberate development and release and it will be interesting to see, does it feel any different if when you put your book you read in your hand, or on the Butterfly which creates a different environment for even for the emotion of the product? Stop there, go back up, go back up, go back up, there on the left hand side, the ONN's.

At the moment there is a number of ONN's working our research centers. The first ?? 4 ONN's has left our research and development and it'll be in hand of Knowledge Seekers. So, the ONN's are on the move, 28 of them by end of or middle of July will be around with you. We don't announce who'll receive it or other, what the reasons we have, but we have started delivering ?? ONN's. Now we are going to, it's already in the left is in the hand of a dispatch and it will be with you very soon. Do not disclose when you receive this to anyone. The first 28 are crucial. (1:26) We run this for about a month to two months to see all the things we need to do. What are the factors? It's a plug and play. On the box you see the Units when you receive it has a number. You don't need to announce it to us, if you announce it to us that you received it it'll be good, but we recognize it directly through our system. It doesn't matter where you plug it in the world.

When you receive, if you are one of the 28 people receiving these, do not announce or do not let my friend know or one of the Knowledge Seekers to know. We want to keep it totally secure. You are the first line of test. In August, September, we'll release 100 Units. Depending on, if we have to do work in the background, we see their weaknesses, we might delay. But it's taken us nearly a year to put this out. At the moment there is another 14, 15 master control units or whatever working in the background. They've been tested, they're on. Now this is going to cross South America, Central Europe, Southern Europe, Asia, everywhere. And this is all for us to see the system. We go to 100 in September, October. We go to 500 by the end of the year. If all the tests come perfect, we don't get interference. We don't need to adjust. And then you start receiving the Universal Antennas to add to it. And then we monitor the first 500, how they operate with the Universal Antennas. And then we release, go into release of tens of thousands in the next 2, 3, 4, 5 years. (1:28)

Step by step, you are part of the support of the Keshe Foundation, you are part of the work of the Keshe Foundation, you supported us, now we are going through the phase of testing. The way we tested in agriculture, now we are testing the system across. Can we transfer? Can we put one of these Units with you and connecting to you, you can change, let's say addiction, you can change your hunger. Three weeks ago, three Fridays ago, we did for the first time single individual tests for addiction because a lot of you didn't write to us and we did a cycle of tests with one alcohol and whatever addict substances we don't know. And the interesting thing is after two weeks, the guy says, "I never had addiction. I have no craving. I wasn't addicted." And he is in the Institute for Addiction and Alcoholism. He says, "I have no craving." So we have seen one session, two hours, has changed life. That he, the person inside himself, he has been taken to a rehabilitation for alcoholism, whatever, and he says, "I have no craving I'm not addicted. Even have erased the memory of addiction. No craving. And we test this again with some individuals we see in next few weeks through these ONN's. That the message received by people who are part of can deliver.

We received a beautiful gift from one of the Knowledge Seekers yesterday, they have created an App for the Keshe Foundation. I thank both of them, these guys have worked so hard and been at it. And it's passed on to the people who are in charge of it. And soon, if the work is completed with the other work of the Keshe Foundation, you'll get your App. (1:30) It's already done by these Knowledge Seekers. The gifts we receive is unbelievable, but in a way, we gave you the gift free in 2016, and it took 10 years for you to gift it back to us, that we can give it to the rest. And this is the process which is going on. And after a year, generally, your ONN's are literally on the way to the first 28 people. Altogether, I think it's about 40, 42 of these in operation, which has been set different part of the world. They're in three, four locations at the moment. Now we go to 28 locations, plus the other 10 or 14 units, which are in the background, running as the controllers, and the testers, and the rest of it. I thank those who are behind it. It's been a lot of hard work, a lot of nerve-wracking time. And once this is done, we complete the first 28. We start sending and seeing how the Keshe Coins will operate, and behave and the control of it.

So, this is part of the bigger structure of testing for us, allocating, delivering Cash Coins and Keshe Coins, they are two different Coins, into the operation, monitoring it, not hacking and the rest of it. So, please, when you receive these Units, we thank you for being with us, we thank you accepting to support us in this, but keep it to yourself. Keep it in a cool place, it creates heat, creates energy, and put it on a stand, and it can air flow, air condition around it. And then when you receive your Universal antenna, there is a plug in the back, we send you a picture where to plug it, just plug and play, you don't need to do anything else. Then we transfer energies and Cosmic Ray energies. (1:32) When we give you this, we have to see how these fields affects the motherboard on these systems. In what you receive, it might not do anything wrong, it might be working, and then when we send the energy of an apple, it might interact with it. This is the test, what is need to be done, and we go through it.

There is a position we are looking for, experience sales team, for the Keshe Foundation, in China and worldwide. Our sales team needs a strengthening and we rely on the

Knowledge Seekers who understand what it does, but they have expertise in same. And this position is open we're trying to cover it with everything else we need a modern advertising systems, we don't rely on televisions, and we don't rely on God knows, telephone calls. We are using we are trying to use the influencers and gradually build up the technology around those who understand the new technology and why they use it. We are looking for doctors who can start testing our material, what we call medical applications, signed with license through the Chinese structure of their licensing, across their patients in China and outside. These are all own controlled by the Keshe Foundation team and run for the Keshe Foundation. We expect to launch about 10 different products across China in next few weeks or the next few months.

And if you are in Chinese herbal medicine or you are in medical applications or what we call as a doctor in China, please get in touch with us, gradually you will understand how to do it and tell us what you see, (1:34) you can advise us, we need your expertise and we put you in touch with the sales team of the, what we call, the medical sales and you can negotiate with them or talk with them, advise them or whatever and in the team which will be set up. This is totally in-house Keshe Foundation Corporation and we will take you into the factories to see and you understand how we do and then we get export license for these across the world. We are going step by step, a lot of this was done in different part of the Keshe Foundation in the past and now all those certifications, all those materials are coming into use for the what we call medicine part of the Keshe Foundation application. Everything is under the regulation of what we call certification of the Chinese authorities and the products will be simultaneously spread across China. Every structure for this has already been set up by Knowledge Seekers and now we are amalgamating everything together. If you have any expertise, if you have developed anything, get in touch with us. We look at it. If it is something feasible and something we can do, we join you. And we ask you to join us to be part of the bigger expansion and development.

Are there any questions?

R: Were there some other images that are of products, that I should be showing here now, Mr Keshe?

K- I don't know if it's loaded, but it should be there. (1:36)

<< Rick try to find the products on the website, but they are not there yet.>>

K- ... It's very interesting. Those of you who take the Bead, we want to know the outcome. One is Sugar Bead and one is a Pain Bead. And we would like to see how you enjoy the product. What you see the Cosmic Balls, we don't produce. I had the request yesterday, can we carry on with it? Because a lot of Knowledge Seekers still are interested to buy these Cosmic Balls. At the moment we don't produce them. And we have I think a very few, a handful of them I think is left. And then, when the next cycle will be, we have no plan for it. But, the Beads and everything else, you watch for it, you'll see it on top of the Keshe Foundation. But book for Swiss, what we call, exhibition in

advance. We won't let nobody, we won't sell ticket at the door. Only those who pre-booked will be allowed in. There is no, "I came all the way from that side, can I come in?" Doesn't exist. You cannot book half an hour before you come in. All the booking has to be completed. We know what we have, who comes, the way they come. And then we organize it accordingly.

Do you have any questions? (1:38)

Q: ... Hello everyone, quick question to Mr. Keshe. Is there a possibility of using Plasma Technology, in cases of retinal detachment or retinal separation. ... ?

K- Eye is something we look very, very closely to, but we... you have to understand, anything connected to the head can affect the Soul. And as our systems are coming into the, what we call, trial test market, which actually you use the unit for controlling everything and feeding yourself to your Soul, we expect to see interaction with the eye. It's inevitable. This is one of the reasons we didn't push much with anything to do with the sight, as we wait for the final developments of the new systems. This is part of the UBESUS Unit which is now become a Head Unit. I believe a lot of things can be done, but we are very careful about this at the moment, very careful. (1:40) This will go to our, what we call, Chinese medicine section and the, what we call, in Chinese application, maybe you have to fly to China to get and come back. A lot of you will introduce new, what we call, materials through Chinese medical application company. It's a... what you call, everything is under license, Chinese license certificate. Be it from cancer, being from everything else, will be sold, handled, certified through the operation we're setting up in China.

We are testing new materials which we have seen amazing feedback in a short time, in a way, following what we teach, now we see it in the application. But, if you need the products, you have to fly, because nobody can stop you, bringing your stuff back out of China. And it's sold in hospitals, it's sold, applied in, most probably, pharmaceutical structures, like chemists, and you get the rest of it, you can go. But at the moment we have no plan to get international license through FDA for our products. We don't see any reason. The world is small and many of you travel. No government can stop what's in your pocket. And this is the way we look at it. And secondly, once we launch these through the ONN's, you go on the App and you choose the material you want. (1:42) You got a headache, you put the headphone on, you connect to the App, the headache is gone. Why do you need to take chemicals? It's not a dream, now it's in our reach. And you have seen we are controlling from seed to the growth to the production.

In a way when we see the... we sow the seed in the land in China, we monitor it growing. That seed or the product of it, the harvest of it, goes directly into our factory. Change into material it can be and then from the factory gets sent to the medical medicine manufacturing part of the Keshe Foundation, from there directly to the sales which we own again into the hand of the people, we become fully, fully vertical. No one... and then we see the change, the effect on people. We have seen the first changes in agriculture. 69 day harvest has changed to 39 and today just before the teaching I received a video. They

don't even know why it was supposed to be 39 days, the harvest is not there, they already cultivated it. We find out next week, have we reduced the time to 25? But what's the difference in the emotion of the people who eat it?

I asked the team to give a more detailed pictures that you become part of us, you supported us to be here. You see the tomatoes, you see the cucumber, you see the onions which are growing. And how it is, I've asked them not to stop harvesting, let it go through the winter. Can we support growth all the way through the winter? Because we're changing everything outside and inside. Every week we change the environment, (1:44) we control the environment of the... again, what you call, the greenhouses. From outside we control, from inside we control. We are creating a Cosmo, what we call, climate. Not Eco. Eco doesn't work. It hasn't worked because we have to use chemical. The Cosmo environment gives us a fantastic opportunity to test. And the whole thing is, everything is done by Keshe Foundation. Everything is done.

In the next maybe year, even the Zinc's, CO₂'s, and all Calcium and everything else, will be produced from Cosmic Rays, that is not, does not have a traces of any what you call contamination directly into our tanks. As we absorb the ZnO from atmosphere, it produces energy package of as what you call it as a Gans. Then we see the real true effect. It's getting set up a beautiful, beautiful factories in the process of completion in the next six weeks or so. We do not show our factories to no one. It's sacrosanct what we do, but it will be one of the most advanced environments where we don't go for buying products. We decide to produce Gans of Copper today. We produce the Copper in the water as energy to Gans. Technology is in our hand, it's just that we have to go to the next level to do it. We don't need to go to a mine, we don't need to go to a Zinc importer or a Copper importer.

We are negotiating rare earth material production with one of the major governments in the world. (1:46) Negotiations are underway where the nation does not need to import a single gram of mine to damage the culture, what we call the landscapes of the world. But we had to plan it, you Knowledge Seekers are with us. Why do you think we are pushing with the Keshe Coin to come in to be in circulation before we introduce the production of materials like in Western Europe or America or China or Japan, that they need to control all the Rare Earth materials because you put it, you produce it outside. We have to support the African nations, the nationals, that they don't lose anything if their money was their gold, because they can, everybody can produce a gold. This is one of the reasons I introduced the Keshe Coin. They're rich, they have money to live, they don't need to sell their lands and they don't need to go poverty because the West has moved on, but they come up with a new solutions, new life.

We support we have to have these ONN's completed that we can supply a thousand Coin value than 1 million euro the minute the child takes his first breath. The mother knows there are no worries. I have a Keshe Coin in my pocket, I can buy the clothes, I don't have to worry that my worry psychologically changes into my milk which I give freely to my child. We are touching much deeper than you think, but has to be done step by step the correct way. Keshe Coins and ONN's you buy is not just having them, this allows us

to distribute what we do freely across and then we have with this to be able to release the Coins that we can provide it to every citizen on this planet. (1:48) Then doesn't matter if Chinese want 50 ton or 100 ton of gold and the Japanese need titanium or whatever else it doesn't touch Africans, because at the moment they are robbing them. Now they stay independent. And this is what we are here for.

Keshe Foundation for the next 20 to 40 year plan is on course, will not change. We don't need no government to support us as you've seen. The Chinese, the people in China are baffled how every day all expenses are getting met. Everything we're growing, solid, no bank borrowing, nothing. The agriculture comes into operation, will pay for itself. The medicine will pay for itself. And allows us as researchers to do their work, independent. No government can decide on what we designed on research and development marketing. And it's done totally by your support over past 20 years. Every item you buy, every sessions you join, every donation you did, all goes in one direction and now you've seen it. You ask any agriculturalist, bring 30,000, 40,000 square meters of latest technology into operation and run. Now you see then the Wellness Centers which is on the plan will come up very soon. You can go to China to Wellness Centers which is operated totally from A to Z by Keshe Foundation technology. (1:50) You don't get it in the West, you don't get it in anywhere else. You fly in to Keshe Foundation Space City, you get in and you walk out. Or you put in your pocket, nobody can tell you what you carry.

Any other question?

Q: ... Hello Mr. Keshe, who is that huge eye of light that appears to the Soul every now and then?" and I see it as a Soul, I have noticed that it appears when I sin, as if I have not yet made the expected change. It has happened to me that I was ashamed and looked away, and I immediately got a blockage at a certain point. The intensity...

K- I don't understand.

R: And so, I don't either. I think they would have to talk personally, and I think I know your answer, which would be, you weren't there and...

K- Oh, it took you 10 years, so 20 years, 15 years to get used to that.

R: So, if they want to personally ask that question, maybe they can clarify, and they can put their hand up.

Q: ... (1:52) When we eat honey and pollen or milk from animals, is it considered theft? As I understand, we are not killing anyone.

R: So I wondered about that too, in terms of, for example, fruits from a tree, say an apple tree when we when an apple falls from the tree and we eat that apple. And is that, well, theft or is it harming another being? Is it actually harming the Soul? Because that maybe the fruits made to be eaten, that's how the seeds get around and might find a fertile

ground somewhere, perhaps a human might even plant the seeds and continue growing the trees. So is that considered okay, or is it still hurting a Soul.

K- It still is part of the structure, if you look at it, that we, if one is not bad so the other one won't be. (1:54) And this is, what you call it, part of what limitation we put to ourselves. Once I start eating, so I eat everything else. And how and what we value. If it's one of the tree, is it mine and can I do it? And then I've done that. And this is what we have to consider. It's just off the tree. You cannot take it because the tree has dropped it. Yes. But then you get the habit of eating it. Next time you go for the tree.

Anything else?

Q: ... (1:56) Can you explain the operation of cat's eyes when they are fighting snakes? I watched my cat kill a cobra snake. The cat seemed to be way faster in his strike as compared to the snake. Thank you. How are the eyes affecting how fast a cat can be?

K- There is a lot of mysticism about cats. According to historical papers, historical, what we call, tablets, found from thousands of years ago. It's been said that the cat is not from this planet, it was brought in to do certain things, and there's a lot of explanation about behavior, because people couldn't understand their behavior, they considered them as to be something brought in. And I've read a lot of these historical papers about a cat, what you call translation, some of it is banned from public, I don't understand why. Some of the tablets from four or five thousand years ago written about a cat is so... God knows translation of it is so deep that it's not open to public. And I thought an animal knowledge is not open to public. And in these papers they talk about how they can concentrate, focus, that as they see through you. It's the only animal which does that. ?? Emotionless. And they somehow analyze everything through one picture where we need hundreds of pictures, it's just like they're focused, they take that picture, they analyze it. (1:58) And they analyze the emotion the feeling of the what you call, the time, the place and whatever they are in. When you have to process, one picture is very fast.

So, one scientifically we understand, if you have a cat, you watch, even in that second you see overcoming a snake or whatever, watch them. It's a part of the phrase, for milliseconds you come, sometime you see it, they are frozen. They analyze that picture and in that picture they assess everything else. They don't need to be running like other animals or humans. You see this behavior with Messi, the football player. It's amazing if you understand his work. Messi when the football starts, the game starts, you see all the football is running everywhere. He watches for about four or five minutes, ten minutes at the beginning of the game, if he gets an opportunity to go, but he behaves exactly like a cat. He one by one scans every opponent footballer. He one by one scans every of his own team and then he starts playing.

I watched the behavior of Messi very much in, what you call, the scientific report. One image gives him what he can do in that game, where he can position himself, what he can rely on in that game. And we've seen his mastership in this game. Sorry about he lost the last game, very bad. But, in the World Cup. (2:00) But he himself is a master, he's like a

cat. Cats do this. And they have that ability of one picture frame analysis, the Soul and the physicality. And they know how it's going to behave. And that's why they're successful in these things. You don't see it in the young kittens, and the mother teaches them. And these animals, we see a slightly this behavior in cheetahs. We don't see it with the lions. We don't see it with other cats. The cat itself has this ability of single image analysis. And then everything else compares to that single image. And that's why they are usually successful. And as humans, we can do. We've seen it. I call Messi the 'cat of footballers,' because he does that. And this is why they're successful. This is why they always land on their feet. They analyze from the first time where they're landing, what they're doing. That one microsecond picture tells them which muscle they need to bring into operation, how they have to land and automatically the body does it, like the Soul sets it for landing. (2:02)

I have studied the behavior of the cats for a long, long time and scientifically we can say how they do it. It's a single image, decision made, and the whole body changes into that. I'm going to win this snake. Analyze it, his weakness, where it is, how it's moving, in that picture I decide. Sit in front of your cat and watch it. It sees through you, say it's, you know, it's asleep, it's, you know, it's frozen. No, it's analyzing your Soul. It's just directly, he sees different images.

In the next few weeks teaching, I teach you about this. What you heard about the vision today, it has other parts to it to come. Your vision without you knowing, assesses the Aura, the fields around you. And that field gives a lot of what we call information how you behave. We see people physically, with the eye, and our Soul sees their fields, what you call, Aura. Even our machines don't make the aura which the Soul sees. And then we assess. And the more we become understanding the work of our Soul we live like a cat too. I said that many times before, if you walk into a meeting people I have no emotional connection it's just a business, within five minutes I make a decision where is going to go, if you're going to do something with this guy, (2:04) what is his behavior, and that decision ends up 95% correct. At least they do something wrong or take a different action in the middle. But the assessment is always because I look at the physical side and at the same time I look at their emotion, their Aura, the way they walk, the way they shake hands, the way they put their foot, the way they sit with you. It's all part of the Soul and the Aura they create and the cats are good at this.

So don't worry about seeing it done, because the geared up frozen picture analyze both what we call the aura, the emotion aura and the physical body, so they are ahead, they see what the snake thinks to do, they're already connected to it, they're aware of the colors of the emotion. It's a very interesting thing too, one day I explain. We wrestle to show who's more powerful we do hand wrist fight to show who has more power. We fight to show who's more powerful. The Souls see each other on the strength field and common ground we all have, and what is my strength in with you. Let's say if you are a 5 Tesla Soul level and I'm 6 Tesla Soul level, I don't insert me I'm more powerful. I don't need to fight with you to win and I'm stronger. (2:06) No, I share, have some of my one extra, we share half and half, we become both 5.5. It's a different world of living and this is some animals

do this, we see it, I observed this in Africa because there is a different way of life then here. Our animals have changed into human matter.

In Africa, when you sit in some places, you see the old way, like the Chinese herbs. They share. I need you to live. Take my Soul, take my physicality, we go together. This is where we look at the end of life, but we look at the other side of sharing life. It's a difference around these different pictures of life when you look at it with a 'night vision' of the Soul. We cannot lie if you learn dimension of the Soul. You feel it because it's there. The betrays, the adultery, the lies, the cheats, the deception, the loves, the care. Some people are scared to show their love because they're scared of what might be. Some people are scared of talking, of what might be, but if you see the level of the Soul, you know how to speak. Some people don't deserve to be loved, because they abuse that. Some people don't deserve to be honest with, because they abuse that. And some people you share everything and they build it with you, because you see the Soul, not the physicality. (2:08) Because behavior comes from emotion. And the emotion dictates the behavior. And then, if you are not there, you go to the Soul, Soul says, he is lying, forget about it. Or is sincere.

Watch your cat next time. Watch and find that one second freeze. And then you know why it wins every time. If you watch, the cat is the only animal, more or less, who makes an arch, when he goes into defense. Then you understand why. It connects the emotion of the physical side, it goes on the back of the spine, in the spinal cord with the brain, all work as one. We have very few animals who behave this way. They complete the circuit, they connect to the Soul, and in a way, the tail end of the spine deceives the animal. The animal doesn't look at the head, looks at the end, and that's how the cat gets in by the neck. It's very interesting, watch that and all. Just video it, and watch the phrases, and then you see it.

Any other question?

<< Knowledge Seeker have problems with his microphone.>> (2:10)

Q: (2:11:30)... I am actually in, now the recent government has actually changed. We had an elections.

K- Where are you from?

Q: I'm from India.

R: So he's a Universal Council member, correct?

Q: Yeah, it's correct. And then I'm after a month I managed to meet the minister. I had a word with him about Keshe Foundation. And then now have a mail to you about it but I didn't get any reply from you. It's info... (2:12)

K- I seen the mail from you but we don't know what you're talking about. Send more specific. I saw your email yesterday or the day before and I asked the team to write back to you to see what which country are we talking about, who we are talking about, which government, in what detail.

Q: It's actually, this is the heading ?? actually which I gave you it's from India ?? government.

K- Yeah, I gathered that I got that from your email, but I need more information and communicate through the email channel. We respond to you as now I know what you're talking about. I try to set up a time that we can speak on Zoom.

Q: For sure, yes. ...

K- And then we can discuss things more in detail. Yeah, send a message to the info, I'll give you a Zoom time we can meet, because it's important what you wrote, but I couldn't connect how, what you're talking about, exactly what it is, and I asked email to be sent to you, to explain in more detail. Send the message that I've asked for a Zoom, they send it to me and I allocated time in the next week or so, that we can talk and do it properly.

Q: Okay Mr. Keshe.

K- Thank you very much.

Q: I sent actually 4-5 mails but it got bounced back, it didn't reach you.

K- Yeah, it has to go, it has to go through. The Universal Council members have a special connection, you go through the Universal Chat, Universal Council Chat, and send a copy from there to the email, and we get it. (2:14) There is no... Universal Council Chat is monitored by us very heavily. Put a message and time for a Zoom, and I ask the team to bring it up and we call you back and we can discuss it. The Universal Council members and the Earth Council members have a direct line to me. You don't need to go to anywhere else, but I don't go to your chats much because you have your own chat chats and I don't get involved in it. I watch it. Then we can talk directly on the line between you and me. You don't need to set up anything else up. Use the Universal Council link and send me a message direct, I'll get it. There is no intermediate, there is no need for email.

Any other question?

Q: ... Is it true that when you Soul travel by dream and you see dead people that you don't know that you will soon join that community?

K- What?

R: I thought you would say, what? I think he's saying that probably with the people of his group in his community, perhaps they're worried about when you Soul travel by dream and you see dead people in your dream, if you don't know them, (2:16) then you will soon join them.

K- What does that mean?

R: I don't know if I... maybe it's a... some sort of a tradition or cultural thing. I don't know if we can answer that.

K- I don't know.

R: Have to talk to the ones that joined that community when they saw their dream and it's too late to talk to them, unfortunately.

K- I don't understand.

Q: ... Can you make the energy of a plant or animal with the Universal Cup? Thank you very much.

K- In a way, yes. But it depends how you do it. But you have to understand the composition. You have to understand the composition of the Soul, how it is. It's very hard to do it in parts. And it's very hard to find the exact location that you can take that part. It needs a special way to do it, special knowledge and I don't think no Knowledge Seeker has reached that level yet. (2:18) There is a way to do it. Part of our agriculture heads do that way.

Any other question?

Q: ... Can we place fans on top of the ONN to draw the heat out?

K- No, it doesn't need it. You just keep it in a normal place. Don't lock it up in a suitcase, don't lock it up in a cupboard. It needs air flow. And it doesn't show up. It's like any other computer.

R: Don't use it for a hat rack.

K- Yeah. Don't use it ... And don't put it in the back of your cycling down the hill. (bump, bump, bump) Treat it as a normal. It's something which will do. In the long run, we would like to see the effect of this worldwide. Because then, the way we look at it, I think I explained this, but I'll go into it with a little bit more detailed. If you go back to the past teaching, I always said that the Earth, due to its composition, has not managed to feed its citizens, cat, dog, whatever, Man. With the Inertia, it has locked into what it does in the center. So we are restricted to what composition is in our body, due to the Inertia of the components of it. You got to understand the center of the Earth is a Plasma, is a hollow, because that's the characteristics of a plasma. The same as in your brain. (2:20)

Then you have a dynamic part we call the magma, which is the one of the reasons the composition of it being mixed, allows different Inertias to be created and moves the Inertia. The magma underneath of our feet, it's exactly the same run as we have in the oceans, in the rivers in the oceans. The oceans are not just static, they all move, waters move, like the warmth of the air from South America warms the West coast of England and makes it habitable, but the warmth comes all the way from South America to the Northern Europe.

The same is with magma. Magma flow inside the Earth has a pattern and this pattern dictates the condition above because these are the creators of the magnetic (M) field. It's the generator of the energy. It's that, you know, you have a magnet, solid coil, and then you have a magnet rotating and you create energy, you create electricity, it's the same process. The magma is that rotating magnet and the shell of the Earth what the crust of it we sit on is that solid state. And the interaction of this magma with a solid state Inertia creates different energies, creates different emotion, creates different condition of thoughts. It's all field. You produce one volt with a rotor, you can produce one megawatt with the same rotor, but if you know how to handle it. (2:22) And this is the part of the structure that we have to understand, to learn, and then we can do travel, be anywhere, because we know when to detach, when to create a negative position of it.

In the Space reactors, which will show very soon, very soon, very, very soon, in 2027, 2028, will show the first UFO, for sure, independent by the Keshe Foundation. And this is the problem a lot of what you call Space agencies have. They still haven't solved this riddle. We're coming tomorrow, in the next two days, to what we call Equinox (Solstice). And Stonehenge. People are puzzled how these huge stones, there are stones, I was talking about with Knowledge Seekers recently, 300 ton, 400 ton stone sit on top of a structure. Today's, all the cranes we have, we cannot move such a thing. How did they get it there? Keshe Foundation has and is developing a technology, which can do. We're not talking, go and read the patent, it's in the patent, now we are delivering. Read the lift system in the patent of the Keshe Foundation. It's not something which is we talk about.

We can move millions of tons, you can literally move a mountain with a spoon. Because this is actually discussed in the Keshe Foundation. It's getting going for development. The spaceships when you land, they don't, you cannot use negative anti-gravity, all that rubbish. (2:24) You have to create the right atmosphere that the Earth's magnetic field with your system magnetic field handshakes. You don't throw with a handshake, you let go loose, but you have to know how to develop that technology of handshake. To create the separation, to create the vibration, to create it. And we have achieved that technology. It's in our hand, it's not something we're going to do. And one of the Knowledge Seekers was affected by it very recently.

You have to understand the process of detachment from the Soul to dimension. If you go in the presentation of last May in Beijing, the motors, he says in one of the interviews, it's obsolete. I think it's Rafael says it is obsolete systems, they are obsolete. The Keshe Foundation technology systems has no motor, no mechanical motor. In the coming time, you will see the flight, you will see new communication systems which has no

electronics, nothing exists in it. The first pieces of it was in my hand in past few days. We are on the verge in the Space Center in China. This will be developed very rapidly because everything is done. It's just literally jigsaws together, just put it together.

Then when you create systems like this, you work on the field of the Soul, strength of the Soul. You can change it. You can change the Soul to production of materials you want at the time you want. (2:26) The World of Science has not understood the difference between the solid, the plant and the human life or animal life. And if you understand this, you can move millions of tons. It doesn't take a fraction of a second. Little, little, little, very little energy. The energy you use to pick up a spoon to feed yourself, is the energy you need to move a hundred ton, million ton. This knowledge was in the hand of the Man. Man abused and it was withdrawn.

When you look at these structures, heavy. No slave was used, no, God knows all the rubbish you see in the history and in the books. Pharaohs used slaves. One spoon, everything is carried, but hidden in different ways. They were scared to share the knowledge. And when they made the pyramids they lost the knowledge. Because they did not share the knowledge. This is all in... we are heading for Equinox next two or three days. And when you look at the Stonehenge, when you look at these constructions in that time, just have a look. You pick up a spoon, you can pick up the other stone. The knowledge has to be taught. And Keshe Foundation research is on this, on it. (2:28) They're building the systems for it. So, aircraft a million thousand centimeter it's irrelevant. You can do the same with your body. You can lift yourself. If you know how to tune. I'll teach you. You will learn. But then you move to physicality. What are you going to do with the Soul?

Any other question?

Q: ... Thank you Mr. Keshe for a bird's eye view of the effects of Man's eye color on his Being. My question is about the 1G in last week's teaching. How does the vacuum in our body affect the 1G?

K- No, it has its own G-parameter. This is where we float in the present Space technology, and where in the Keshe Foundation Space Center, you don't float, you live a normal life. Weightlessness is meaningless, because the system used today does not have a Soul. When we walk on this planet, our Soul, in a hidden way, has already balanced itself with the Soul of the Planet. You talk about the gravity and magnetical field of the planet, you don't talk about gravity and magnetic field of the Soul of the Planet. Our body deals with the physical body, 1G. Our Soul deals with the Soul gravitational magnetical (GM) positioning. (2:30) In Space we learn to use ours in respect to the environment we create. Because the systems are made through what we call Cosmic Ray Technology, in the fields of the Universe. Our system, Space labs, don't have a Soul. So the Man is shaking around and floating around. If you create a Soul within these systems, nobody will float.

Man doesn't understand the science of Creation, so he's busy with his 'monkey business.' It's the same... I was laughing a few days ago. Get yourself a picture of American or world Space Lab and get yourself one from Chinese. The knowledge of the Man is a mayhem with the Americans. It's like a guy who collects rubbish around the world and puts it anywhere. And they are proud of their disorder, they are proud of not ?? knowing, everything else, and it's glorious. Look at the Chinese lab, you don't see a single wire, it's so clean, everything is immaculately arranged. In a few months time, when the Keshe Foundation collaboration with Chinese Space Agency completes, you will see the astronauts in China Space, will walk normal as on Earth. We introduced this as part of our collaboration with the Chinese Space Organization. Contracts already signed, it's not something we're going to do. Everything is set to go into the next phase.

When you don't have a Soul, you float. Connection with the system. When you understand how to connect your Soul with the Soul of the system, you are at 1G anywhere. 1G is not what you measure, (2:32) 1G is the balance of survival, that you are normal in the condition you are in. You can go on Moon and still have 1G, compared to the Gravitational field force of the Moon, then you don't need to. Only can do that when you can tune the Soul. When it's a material, no it doesn't.

In the next few months, in next couple of years, the collaboration between Chinese Keshe Foundation and China Space Organizations and Military Defense, will bring this into operation. You will see, I hate when I see, it's just like an American Space Lab, is a nonsense of a lot of people doing things for the sake of just being there. Wires everywhere, nobody knows what it is. Get a picture of Chinese Space. It's ordinary (it's ordered), it has mannerism, you can work with it, you can create the Soul, that you can operate in it. It's shameful when you see the European and American Space Lab. You just... I mean Chinese don't let anybody in, and you see how disciplined these people are. It's a joy to work with the Chinese scientists. We don't have this in the West. And then you create a Soul, because you see where the problem is. All we need to do is to introduce one of our system inside the Chinese space lab. And they walk like you and me on Earth. ?? weightless becomes .. Because you're dealing with a G of the matter. You don't work with the G of the Soul, which is a Cosmic Ray. This is the schizophrenic life we live, and this is what we changing. (2:34)

Can you imagine, you're traveling millions of kilometers a second, and then your Soul is still in dimension of physicality. Your Soul will encapsulate your physicality, that it moves inside with it. We're not talking about ?? something, these systems ?? they are already, as part of the evolution of technology in progress, they are getting built. This is why you are weightless, this is why you have a problem to understand it.

And our brain creates 1G inside it, for in respect to itself 1G, not in respect to outside 1G, the interface is that skin of the Man. Because the skin is part of the brain, it collaborates and then with the Soul, "This is what I can accept, this is what I can accept." You float in the dimension of the Fields of the Universe, where you go Space traveling in your dreams, and you never float in your dreams, do you? Now you understand the difference, you understand what, how, misguided the knowledge of Man is. When you have a dream

of your mother, do you float in front of her, and she floats? No, you meet at each other's Space, Cosmic Ray, Gravity, Magnetical field. You never could understand this. Now maybe you understand.

Have you ever asked yourself why the astronauts are floating when they go into Space, and I go to Space and I walk away, I want? Because you deal in your Soul field, Cosmic Ray, at a 1G of the space, time and place and position. You are part of it, that's a 1G of the space-time. And when you can do that with your Soul, in the dimension of the Space of physicality, you get the Man walking. If Man can walk and understand this, then he can walk in the space-time. (2:36) You don't need to hop like a rabbit on the Moon, you walk on the Moon like everybody else. You shut your mouth and you connect through your eyes to the Universal Cosmic energies. You don't need a farm to feed because you take what you like through your eyes. Now you understand the secret of ?? living in the Moon. Man needs a lot to learn, when he stops killing.

Any other question? Last question.

Q: ... The iris is of a different colors, but the pupil is black for everyone. Is it a black hole? It's magnetic mirror, that absorbs the fluids in magnetic field lines of the Universe? And what does it bring to internal vision?

K- What?

R: I'm just saying that the iris is... makes up the different colors that we speak of, but the pupil, the center, is black for everyone. Is it a Black Hole?

K- No, that is the balance of the fields. I call it the Soul of the eye. In a way, what your... what the pigmentation decides, will go through that hole, that's your filter. (2:38) That's why we have different behaviors with different color of the eye. If you... you got to go much deeper, I don't think it's the place to talk now, or teach now, but maybe in the future I'll refer to it.

The specific eye colors creates specific skin touch. The skin of the Man is connected through the STM with the brain of the Man. If you touch a black skin is soft, it's amazing soft. You touch a white skin, specifically to different combination of the color of the eye, you get different texture, softness. You touch a blue eyed Russian, the skin touch softness is different. And you say this eye girls or boys or whatever have such a skin because the energy absorbed through the eye, now you understand the importance of the eye absorbing Cosmic Ray, interacts with the brain. Brain, the lung and the skin are of the same tissue when you're conceived in the womb of the mother. So a specific eye colors creates specific skins, creates a specific behavior.

When you touch a white skin Russian, it's emotionally unbelievable, (2:40) because we are not used to. And that kind of light absorbed by the eye which feeds the skin, is dictator of the emotion and the skin texture. This is how much Universal energies affects us. The energy we absorb through our eye decides our skin tone, our behavior. One day

I'll teach you and then you see why we behave and how some people dominate control when they enter a meeting by what they release from their skin. It creates a behavior. I used to have a ?? Siberian friend and always told her it's amazing how you people behave and how people perceive you. I lived in England. I know what that blue eye, white skin texture is not the same as Russian. I lived in Africa, I know what the African texture is. And always, always, always ask myself, two people know that their eyes, the color of their eyes decides their skin and their emotion. Because it works through the Soul. Our body is a compromise, it's a, what we call, not a compromise, but it's an interaction of the fields of the Universe. And this planet, and when they do ?? two match, they create on... because at the end the skin cannot ?? live, the Soul is not there. (2:42)

In traveling across the world, in more than 80 nations, I always looked at the behavior, looked at the... what we call, the color tones, the way they are. And I used to know very closely a Russian doctor, and she used to explain to me in detail exactly how they feel, the touch, and it's totally different than what we feel with touch. And then we see our eyes dictates the texture of our skin, because it's the only direct interaction with the Soul. Your Soul works through your eyes, absorbs through your eyes, and that hole dictates with the combination of cartilages of everything else around your muscle tissue of the eye and the collocation of the retina and everything else is there. Your eyes is a gatekeeper of the fields of the Universe which directly feeds your Soul.

Calcium is one of the things which interacts with the, what we call, ... motion, or restriction of the work of the Cosmic Rays. And one day I explain the reason. And why every cell of the body of the Man has a Calcium as a seed, otherwise it doesn't work. It's planned that way, because that's the only way you can survive, (2:44) that's the only way you can convert Cosmic Rays into the level that your Soul can survive within the structure of your physicality. Look at your body, look at your skull and then look at your bone. How come the skull is only part which the organ is inside, and the rest of the body everything else hangs on or engaged in? Your bones, your skeleton, your legs bone, everything is hanging on it. The only place that there is no muscle tissue and doesn't need to hang on, because it doesn't... the muscle is content in and contained in, is your brain. And the eye is the only right of passage into the Universe. A lot to learn.

Thank you very much for today. We'll meet you in what we call, hopefully, coming time. And we try to explain in more detail how the things are, and how the things are going to be. And for you to gradually learn. Rick, I was just sent a message that if you can check the store, the Swiss Exhibition is already put up. And the other products will be followed today. If you want to check you can bring it up. I haven't seen it, but it's getting worked on in the background. (2:46)

R: Okay, and which category was that again? The new products? I think it must be new products, I think it's updated, let's see.

K- ... Check your link, then you go back to it. It's on your, it's on your chat.

R: Oh, new link, okay. Yeah, that's the one up here, the Switzerland presentation. That's good, because we had a question whether people were to sign up with the Keshe Foundation or with the presenters of the Switzerland presentation.

K- No, no, has to go through Keshe Foundation. Everything has to go through Keshe Foundation. It's been put up. It'll be a showcase of the technology in the West.

R: Quite a beautiful logo actually, very... with water in all different realms. Nice. Okay, and there's the information. Let me put the link in our chat as well, chats.

K- And the other products of the Keshe Foundation will be on links in next few hours. I presume they're working on it. But now this exhibition is... you see the water, there is a reason for this water and when we get closer we explain. This is part of the work which Keshe Foundation has been involved in 2017, (2:48) in conjunction with the Italian Parliament we work with, now we can release the knowledge partially, we work with the Prime Minister of Italy, Berlusconi, to do a research on this subject. It took three years to do the report, fully covered by the Italian Parliament and Italian government expenses. And in the background we did some with Knowledge Seekers and some hidden through Italian Atomic Energy Authorities, because it was a lot of things in the background. A couple of Knowledge Seekers are involved in the front, but the main backbone of this is the nuclear contamination. And now we brought this in Switzerland. It's a beautiful place for it to come out because it involves the Swiss residents or citizens. And it is amazing in what will be unveiled in this presentation. Not only for Europe but for North America, especially United States is extensively involved and damaged in this structure. There are, what you call it, court cases and lawsuits in America. And we show for the first time the solution.

Representative from major independent organizations to confirm will be present. It's all getting set up. That organizations, international independent organizations, even from United Nations will be present to confirm the technology. (2:50) Iranian Ambassador to Switzerland is one of our guests, and it will be as part of development, it's a joint collaboration with Chinese Corporation of the Keshe Foundation, the Iranian Keshe Foundation and others. And for this respect, we have asked the Iranian Ambassadors to Switzerland to attend as part of the joint China Iran collaboration of the technology. It will be very extensive and it's all in plan, it's all going ahead, five months ahead and that's why on Friday is exclusive for dignitaries and the official representatives.

We'll see what it will be, but you will see one of the technologies of the Keshe Foundation. Amazing, it will bring a change and will bring a drastic change to a part of our life, every day we live with it. And in North Europe and America, extensively damaged by this. Now, we have the support of the Italian government support, what you call it, report. Our own report is getting piled up independently, and a solution, and confirmation by independent organizations, international organizations, that they'll be there, live testing and confirming.

Thank you very much for today, and look out for the other the products which will be posted up today, tomorrow by the Keshe Foundation, especially the Beads. If you buy the Beads, you have to write to us. It's your obligation. We have to know how beautifully your Soul gets elevated. And that'll be interesting. Thank you very much for today, and we try to add to the knowledge next week more in detail. (2:52) Thank you very much Rick, and see you next week.

R: ... (2:54) << Message from Universal Council.>> "Please give the energy of your Souls to Columbian citizens, which holds its Presidential election on June 21st, to elevate their Souls, so that they may choose a life of peace, while respecting their vital rights." "We the Universal Council invite the Keshe and Universal Family present on the Earth, in unifying at the Soul level, every time, every day at 9pm Central European Time. (2:56) ... We the Universal Council give from our Souls and invite all of Humanity, to elevate the Soul of every leader in every nation, to work as one Soul, in one direction, to achieve peace as One Nation, One Planet, One Race. Yes Mr. Keshe?

K- Something, sorry I do apologize. In the invitation of the, what you call it, the Swiss presentation, there is divided between corporations, government and individuals. Only corporations and government officials allowed on Friday, and individuals on Saturday only. If you're a company, corporation, and try to be on Saturday, you have to have a reason you're connected to the subject of the technology presented. And if you're a corporation, you cannot attend on Saturday because it's been set up for Knowledge Seekers and, what you call it, different kind of presentation. And so if you look into the fine prints of the booking, you have to look at and state if you are a corporation, government, or individual. And this will, what you call it, this gives you separate invitation and access to the exhibition.

R: So how would they order? There's only one option for the 24th on the options.

K- No, it should be three options. (2:58) You can have governments, officials, and what you call corporations.

R: Okay, they'll have to fix that. So there's several options.

K- We see that, I don't know if you want to refresh your thing, you might get it.

R: Oh yes, there we go.

K- Yeah, so, government officials and dignitaries are invited by the invitation of Keshe Foundation, if you are corporations, and we are very careful about this, because different kind of information given at different times. Because governments and corporations involved in this field receive sensitive information which cannot be in the hand of the public. So that's why it's separated. And what you call, it's clear, we stand clearly on this ground of how we make this presentation and part of the, what you call, confidential research and data will be given to the, what you call, to the officials and dignitaries, because there are decisions to be made by, what you call, by governments and others in

respect to what is shown. We are not there to create a panic, we are there to show a solution and a lot of things cannot be seen by normal people, or by public, till it's sorted in the background.

And I was told that the link for the new products has been linked up as well. If you can go on it, I'll put it on your chat. You can reach that as well, which shows the Beads. (3:00) We're very interested to the, what we call, the evolution of these Beads. How you respond and how it will be. And it's very important to us, you have to mention which Bead you want, you want a combination, you want the Sugar Bead or you want the, what you call, the Pain Beads. This is built into the cycle of what we call energy transfers. And then I think you have another product which is added again for the book. This is part of the same structure where we would like to know if you purchase the Bead with a book, which is a Butterfly, it's a book holder, does it give a different effect? This is for us, the Butterfly and the Bead are connected to each other. And we have a reason for it, it's another part of the development of the technology. Does it give you the same sense do you read the book, or do you get the essence of the book in the dimension of the Soul when you carry the Bead? The Bead connects to the Butterfly, and it's very interesting to see how these things develop. You will see this coming up, it's a new cycle of presentation.

In the next few weeks we announce a new, I think you most probably get a Butterfly later on, (3:02) we announce a new sessions of Monthly (Flight) Sessions of the Keshe Foundation. We are still waiting for our team to finish the last one, but this is a different technological development we are going to announce with a limited number of people, maximum 30 per session, where we take you through the whole dimensions of the new technology, in the dimensions of we want to actually feed you, we want you to eat an apple, we want to tell us what taste apple is, we compare to the apple we have with us which we put in, Is it a Golden Delicious apple? Is it a Red apple? Do you taste a banana? And we need live interaction. Everyone who is on the session has to tell us what they feel. We are not looking, "Oh yes we do." If we don't, we have to adjust to tune that you feel the same, so we keep everybody fed. This is part of the Space Technology development which comes on, And what we learn from this, it adds to our system in ONN's.

It will be a 3 to 5 session, and it's very extensive, interactive. It's not like before, you sat there and get the things done. This we transmit, you tell us, we adjust. The ones who felt it, tasted it before, now they don't taste it, the others ?? do too. It gives us to learn the spectrum of the transmission of the Cosmic Rays for the product. So, we announce this in next few weeks and very, very limited. And we want Knowledge Seekers who actually give us the information and say, "Because, why don't we just come in the session and go away?" Till we don't catch you in the session, we keep on changing in the session, live interaction. And we don't want many people, but at the same time, (3:04) hopefully our system is set up that, you cannot hear each other, that you can influence each other decision, or thoughts. You can say, "Oh, I taste that." "Oh, he tastes that." "Better say, I taste too." This is coming up, those sessions will be extremely valuable to us. Extremely valuable to us for our next session of development of the ONN transmissions and, what

you call, Energy transfers. Thank you very much. And sorry about that jumping in. It's just that we... the background, they received information that our company wants to join and they had to put that up, that they see there is a separation between the two. Thank you very much and see you next week.

647 KSW – June 18th, 2026

End
