Introduction to 644 KSW**

Note: Not checked by KF interpretation by KS of KF Brazil

There were different topics in the first part of today's workshop, which is the Soul teaching part, and some more information was given about how the Soul of the Man (STM) functions, what its processes are, and how we need to understand it in a deeper way. Mr. Keshe repeated several times how fragile the Man is, and how easily he can lose his life on this planet, either through individual accidents or incidents like a tsunami, where hundreds of thousands of individuals can lose their life instantly. This can also happen on the planetary level by getting hit with a meteorite. Perhaps the point he was trying to make is that we should not take for granted the opportunity of a human birth, and that we should seriously try to discover our Soul and reach enlightenment. In the old days when we went to listen to Tibetan Buddhist teachings that was one of the first things they used to teach, how precious is the human birth, because we can do spiritual practice to try to enlighten ourselves. In a way, much of today's teaching is about just that. Mankind has ignored the Energy side of his life which is the Soul, and only takes the physicality (P) as real. We are not talking about this as a religious dogma, rather from the point of view of the true science of life, which is the Knowledge of Creation. The KF has shown us many aspects of the Plasma technology (T) which look like magic to ordinary people, and because they cannot understand it, they may have criticized us as being a fool for trying to enlighten ourselves. In the second half of the teachings for the first time, we are being shown a video of the new KF Space Center in China and just how advanced the KF Plasma T has become.

For security reasons this video only shows a very small part of the work being done with Plasma. It's amazing to see these huge advanced Plasma T laboratories growing and purifying plants back to their original state when they were first created. It brought a lot of emotion to finally see the first parts of what Mr. Keshe calls, 'the Phoenix Rising.' It's especially touching since a couple months ago he showed us how the Americans totally destroyed the first KF laboratory for world peace in Iran. After seeing today's workshop we hope the Soul of Knowledge Seekers (KS) around the world will wake up and join KF to bring the T forward in a rapid way. After all these years of setbacks, Mr. Keshe and the KS have continued their efforts relentlessly and now it is starting to come forward on a commercial scale. This is the time to step forward and increase the momentum.

Back to understanding the processes of the STM. As we know the Soul of Physicality (STP) of the Man feeds the STM through the food we eat, water we drink, air we breath, thoughts we think, and emotions we feel during its time on Earth to mature, and then we take birth as it, as that individual Soul in the Universe (U). During the 9 months in the womb of the Mother the P gets matured. And then we spend our life span, no matter how long or short it is maturing the Soul. Every Soul gets paired with a second plasma we call the STP, but it is not separate on its own. The Souls are interlinked all the way back to the Creator. The STM is paired with the STP of the Man to create the P of the Man. The Soul of the Planet is paired with the STP of the Planet, which in this case is the same as the STM. That would mean our Sun, or the Soul of the Solar System (SS) is a STP of the Galaxy. This goes on to the Galaxy, U, and Unicos, which is the STP of the Creator. They all connect to each other through the Infinity Loop interaction of sharing fields, and all the entities between us and the Creator form a chain of these Infinity Loops that are linked together as one. Sometimes it feels like we are all alone and cutoff from everything, but scientifically we are connected to everything through the Energy, so we can never really be alone. And we are part of all the structures that shape the Soul of the Creator (STC). We are a cell in the womb of the SS, which spreads and creates more cells in the life of the U. When our Soul departs from the P it carries the RNA information of the STM. Remember that the RNA interacts with the local Inertia and fields to create the DNA which is the code for the P. We also carry the RNA of SS, Galaxy, U, and Unicos. So even if we think of ourselves as 'Mr. So and So' with the little titles the Man made up for himself, we actually carry all the codes of the whole Creation in us, as does everybody else. Again, this points out that we are part of the massive structure of Creation.

Those Beings in the U who understand the Knowledge of Creation, when they see a Soul, they can read this information that the Soul is carrying as different RNA's. If we are fortunate to meet one of these Great Beings, they will know that we come from Earth, because just as we read the maps we have made of the stars and galaxies in the physical D, they can read the Energy map of our Soul and its journey. A trick to confirming where the physical body is from is by reading the G field of the Earth, and its Inertia. Because without Inertia there can be no manifestation of the G field of the Earth, without the STP there will be no STM, and without the STM there will be no planet, and the rest of it. Again it shows how everything is connected through the Energy, but the P appears to be separate. In a way, we could say that the positive side of this connection flourishes and expands when we follow the Ethos, and when we don't, the more we appear to be separate and alone in P. Therefore, the Great Beings of the Creation have come to teach us the Ethos of Mitra, which is Think, Speak, and Act Good. This is the very fabric Creation is built out of, so if we don't know that, we have all the troubles Man is having now in his life.

To better understand the next part of Mr. Keshe's teaching we need to understand how the Mind works, and then he said the STM works the same way. The Mind is like a computer, it works according to the operating system that drives it. If we are programmed with Apple we will work that way, and if we are programmed with Linux we'll work that way. Part of the work of Self-realization is to discover which operating system we have

been programmed with as a child. Actually, it is not totally like Apple or Linux, it will be according to how we have been uniquely programmed to understand the world around us. The Indian Masters said, that the Mind is like a white sheet, if you put it in a green dye it will be green, and if in red dye it will be red, and so forth. On Earth we have another problem, those who wanted to rule over humanity found out that if they could get a hold of the religious concepts and rewrite them the way they wanted, they could rule over society, simply by controlling the information that went into programming the computer, or the mind of the people. In general, once people set their belief system's they rarely change them. For example, when the Mongols invaded India they forcefully converted the country to Islam by the sword. It only took a few generations and the Indians who became Moslems totally rejected themselves as Hindus. Of course, there were other issues like the caste system to consider, but in general, we see that once the social concepts get enforced they pass down from parents to children for centuries until they either liberate themselves, or another concept is enforced upon them. The STM follows the same pattern as the Mind. This means that whatever understanding the Soul accepts as true, it follows that until it is elevated to a higher field strength.

America is considered the ruler of the world today and if you look, you will see that their government buildings are Roman style architecture. If you read the history carefully, the first Roman Emperor was Constantine, and he used the symbol of the cross on the shields of his soldiers to defeat his enemies. He never became a Christian in heart, but remained a Pagan who used the Christian symbols to rule. The Roman Catholic Church is doing the same thing today, but it is all done secretly in the background. We talked about this in the past, so we'll just summarize what Mr. Keshe said. The Romans loved the Persians and were envious of their power which came through the Ethos of Mitra and Zoroastrianism. But they were too blood thirsty, violent, and tribal to understand the Reality. Much of the elite class adopted Mithraism. We say they barrowed, but really they copied the writings and symbolism of Zoroastrians, and made it their own and destroyed the older writings and murdered those who would not go along with them. Since they stole the concepts with evil intention they could never understand their true meaning, and all these centuries they continue to teach the wrong doctrines and cannot lead their followers to the true Knowledge of Creation. Throughout history anyone who claimed to have discovered the Truth was crucified and later on burnt as a heretic, and today they are laughed at and called, the Antichrist. This is the way of the physicality and how it understands knowledge. Only the innocent and pure at heart will be able to discriminate between which knowledge is of the Soul, and which is the relative creations of the P. So what do we do, and how do we not fall into the same trap humanity has always fallen into?

This is why Mr. Keshe relentlessly tries to teach us the essence of the Knowledge of Creation, so that we'll understand internally, and not just make a concept of it. He said, this is not a teaching of the Ethos, it's a teaching of how you, yourself are. It's for you to understand about what your physical D is, and what your Energy dimension is. Then you will be able to understand your own creation. I understood that the words, 'this is not the Ethos' to mean, this is not the concept you make in your head about Ethos, rather it is you understanding the essence of the knowledge, then no one can fool you. Then he wanted us to think about, what would happen if they replaced Priest's with AI robots? Because to

teach about the Creator you need to have a Soul. Then we can also think, how many Priests today are actually like robots because they only teach the dogmas of the Church. And when a Priest awakens his Soul a little the people start to be attracted to him, and then he becomes a threat to the hierarchy of the Church. With Plasma Science we don't want to repeat this. It's important that KS develop the Emotion of Knowledge and wake up to the Soul inside themselves. Then we'll be able to distinguish between knowledge that has Soul, and knowledge without Soul, which is just empty information. Now humanity is being taught to accept soulless information through AI, as the only reality. This will make it very difficult to bring the Plasma T into society. Let's hope that the Chinese have kept enough of their Taoist Soul to help humanity make the transition.

There was a very interesting analogy saying that the emotion is just like the Potential Difference, or what they call voltage in Physics. The voltage is measured as the difference between the plate with higher electrical charge and the one with lower charge. Another way to think about it is how electricity is generated when they dam a river. The water drops from the higher position to a lower one and releases energy that is used to turn the turbines to generate electricity. Feeling into the analogy we have the M fields of the STM which are of a higher order, and the fields of the STP, a lower order. That Potential Difference is what generates emotion. When a very strong emotion gets generated between the two, the energy can get released through the hair follicles causing the hair to stand up. We can think of it as a release of energy manifesting in the P. In the same way, emotions can create a solidification in the organs that lead to cancer. It's the same process of how the emotions manifest in the physical D. It feels strange to think of the emotions as such a mechanical process. But then again it is hard to understand what emotions really are. Or is it just the Soul pursuing its desires and it has to follow the laws of plasma and how it interacts to create P? The next time the hair stands up on our arm, we can ask the STM what is it doing with the STP that it has created this emotion and commotion in the body.

There are different ways of accounting for what percentage of the body is made of water, for simplicity we can say it is over 60% and higher in the organs and blood. What is this with the water, and why are we so wet? In Plasma Science we are discovering that H₂O is a very important connection to the Creator and how we are getting fed the Energy of the U, or the Cosmic Rays (CR). The way I understand it is that the O connects and feeds the P, while the H connects to the Creator and feeds the STM. The O is at the bandwidth of the STP and that's how it maintains the body. But it's not clear why we breath out O in the form of CO₂. Maybe it is related to the Inertia and the manifestation of the P from the emotions and interactions of the STM and STP. If we don't get the O through the water and air we will die. And in Space there is no O, but there is H. It's the H that maintains our Soul when we travel in Space as a Soul. The H in the water is also feeding the STM. The Eddy Current means the fields flow in the opposite direction. So instead of going from the O to the H, it goes from the H to the O. Perhaps this is referring to how the Creator feeds the P, which is the O connection, through the H. This is why we need to constantly drink and breath, and why the P of the Man is fragile and can be ended easily when we get cut off from H₂O or O₂. It's not just on Earth, but for life to exist anywhere in the U there has to be that H connection to the Creator. We are back again to, 'I made

Man in the image of Myself.' Because Man is My image and I manifested him through My emotion. I created Man through the love of Mitra, which is the emotion of Creation, and not the physicality, that Man is so attached to. Without H it is impossible to confirm the existence of a plasma in the U. The Energy of the U is the same as the M fields in motion. Those who reach the level of energy become the next cycle of manifestation to confirm the existence of the Creation.

In the future, we'll be able to prove that we are being fed by the Creator by making a Faraday Box for CR. Mr. Keshe said, he was able to make a system in the physical dimension that can block the whole spectrum of CR needed to live, or to block only specific field strengths. We would put a human in a room with everything he needs to survive in the D of P, and then we'll block the fields of the Creator, and the man will die. Those who commit crimes do the same thing, they block the fields of the Creator and slowly bring about their own demise, their conduct makes a kind of Faraday Box around themselves. This is the same as when we isolate ourselves. In fact, the worse punishment in the U is to be cut off from the fields of the H, because then you cannot manifest yourself, and you become non-existent. This is only a test to show that the Reality exists and not something that we would do. In this way, we can have confidence that we are not alone and live by the love of the Creator.

The video of the KF Space Center agricultural development project was shown, where they are purifying seeds to be used in the ONN system to feed humanity. There were two parts to what we saw. First, was a special laboratory where the total environment of where the seeds are grown is controlled. That means we can set the parameters of the gases in the air, water, temperature, and the light to do different experiments. The scientists wear special suits so that no dust particles can come into the lab and alter the fields during the growing process. The plants are grown with the most advanced technology in hydroponics and CR plasma. Then in the second part the seeds are grown in soil, in huge greenhouses that were gifted to KF by the Chinese government. The lettuce, cucumbers, tomatoes, and whatever else is grown here, will be sold to the public as Cosmo products to help fund the research. We could see how vibrant and green the plants were, and there was a subtle sense of joy one could feel just by watching the video. Maybe you are wondering where the Plasma T is being used in the greenhouses. This was not shown because the T being used is confidential and developed by KF, and will not be released to the public. He told us years ago that KF has moved way beyond just using Gans Water, or a few coils around the plants and trees. They are controlling the M fields for the whole environment and it may not be easily seen by those who don't have the knowledge of the plasma. One KS said to Mr. Keshe that he is only using the Cup of Life Gans on his fruit trees, because that is all he knows. If he joins with the KF then he can become a certified grower of KF CR Products and will be licensed to sell under the label of Cosmo.

The Cosmo Products will be totally pure like when God first made them. All the GMO will be reversed and no chemicals like fertilizers and pesticides will be used. KF wants to make it very clear that Cosmo has nothing to do with Bio or Organic Foods, which have over time been altered and have hidden chemicals in them from the use of cow manure,

and whatever else is indirectly being used in the total process of their production, all the way to the shelf in the store. We know that the Organic Community started out in the 1970s with pure intentions of creating clean food. But now they have been taken over by large corporations in the background who are making huge profits on both the use and so-called, nonuse of chemicals. KF is taking a different approach. It follows the Ethos that everyone on the planet should have the right to eat food without poison, and it should be affordable to everyone. We have the knowledge and technology, and today we are seeing how close we are coming to accomplishing it. This goes together with the Keshe Coin (KC), because food is one of the things we can purchase with it. For the KC to grow and be used there has to be things to buy, and food is one of the biggest. There is a new development to the KC, we know that University students tend to be open and willing to try new things, so we are going to give each student 1,000 KC for their lifetime. However, they can only spend 30 KC per year. We are hoping they will help spread the KC across the planet. He discussed more about how that will proceed, which you can read on your own.

There is an extra incentive for the Chinese government and CPC to support the KF Plasma T, and that is to help bring their 30 million farmers out of poverty. Whatever, the government has tried, they have not been able to bring this group out of poverty and they are under pressure because of it. Some years ago he told us that the KF Plasma T was added to the 14th and 15th program of the governments 5 year program policy. Even though the Chinese government is not directly giving KF funding, they are supporting us in other ways. This very well may be the push needed to bring the T out into public. We will have to wait and see how it develops.

The process of educating humanity to the Plasma Science has not yet started on a large scale. The children of the scientists who join the new KF Space City in China will receive free education of the highest quality from grade one all the way near to university level. The important part is that these children will also be taught Plasma within the regular curriculum, that will mark a shift in the way humans educate themselves. Hopefully, from there it will spread out. The Knowledge Seekers who are capable can go to the Space City and teach Plasma. It's a very good development.

There was a question about what depletes the STP. Having good conduct and living the Ethos of Mitra builds up the Souls, then the opposite depletes them. Again it goes back to our intention and emotion. Things like selfishness, arrogance and thinking we are better than others depletes us and brings about our own demise. The problem is, in the modern world this is considered normal behavior, so where would we even get a reflection to show us that we are doing wrong? In higher dimension cultures it is the responsibility of a true friend to correct you, if you start to go wrong and behave badly. Today if you try to correct your friend, the first thing they will say is, 'I thought you were my friend,' which means a friend is only someone who supports my Ego. The discussion then turned towards trying to understand the difference between true love of the Soul, and the false love of the physicality. Please see the Quick Index to read in more detail about what Mr. Keshe calls 'false love,' and how it is just like spitting out toothpaste, which in the long term depletes the body. He made a distinction, that it is not that you deplete the STP,

rather you cut it off from receiving the love, or the fields of the Creator. When we don't receive it has the same appearance as being depleted. But it is us who depletes ourselves and not the Creator punishing us. This is an important distinction, and not just a juggling of the words.

He said, there are some people who know how to create negative energy within another persons Soul. But no details were given other then, 'they know how to give themselves up.' What does that mean? Do they surrender to another power to do this? He witnessed some 'men of the robe' or clergy as having this power, and that it is in their nature to steal from others. And these are the people who will never give when the offer basket is passed to them. They are the type of people who take from your Soul and also your pocket.

We want young people who are open to new ideas to come into KF and spread the T, not those stuck in the past and only think about what Tesla or Einstein said. We should not stick to the words and concepts of what those in the past made as so called, Laws of Physics or this or that. We should be open to experiment and find out through our own experience of things and have that thirst for more knowledge and understanding, and then wanting to share it so that the rest of humanity can benefit.

Thanks for listening.

>>>

Join us this Friday, June 05th, 2026, in the KF Brazil Friday Public Teaching for the whole summary of the 644 KSW.
