Topic Index

Framework of melanin & myelin (MM) system - new knowledge - need to live in Space; Bones & matter problem in Space; STM separates from P - no bones or muscles; Not keep Earth body; Illiterate scientists forced us to believe wrong things; Body evolved - don't need appendix - in Space don't need bones - or brain - move by emotions; Holy Books - stone has Soul - center of energy - every cell has Soul - our internal energy; Soul of Cells - not fed with matter energy of blood; Things have to fit together; Blood interacts with lymph through pulse - converts to matter frequency - feeds Soul of Cells - but it need more energy to function; MM system - absorbs Cosmic Rays (CR) through melanin in skin - transfers energy through myelin - feeds Cell Souls - needs energy like rest P; P is leech - 2-way communication system - across body - not just STM; Science of Calories not include STM or Soul of Cells - don't know where energy comes from; MM system for feeding Soul Cells; Physical food converted to Gans - not enough - only 20%; In deep Space - gravity different than Earth - bones stretch or shrink - die; Not right to compare gravity on Moon, Mars to Earth; Example - all cells grow evenly - relative to each other - otherwise bones break etc; When transmute bones change according to Time, Place, Position destination; Spacesuit force conditions - not integrate - to physically evolve takes billions years; Soul travel manifest new P; All teachings connected; STM manages feeding Soul Cells - cell by cell; Billions of blood cells carrying energy - only release to specific position that match strength with that specific cell - Soul Cell balance with melanin in Soul of Skin - very specific operation; Why have so many blood cells - blood cell carries Soul of that Cell - not release unless matches; If set for kidney cell - won't release to brain; Number of cells in body - matches to number of cells in blood circulation; Any deviation in number - change emotion - through compression of melanin to myelin - lead to cancer; Any diversion in matter state will lead to cancer - energy higher when emotion added to cell & if no match in blood - won't be fed, interacted with, have waste energy taken away; Why if eat certain food - cure cancer, diabetes, other diseases; Specific foods matches strength missing in blood; Change disease by changing

circulation, speed of lymph - concentration & repetition of an energy in lymph at a given point; For cancer, find out which one & why there - melanin absorption got disturbed by field energy and emotion; Same time - energy that comes through blood circulation doesn't match - can't be fed until get a match - becomes psychosomatic illness; Emotion has changed energy level at specific place - ?? blood doesn't have a match for it - changes cycle, frequency, pulse, becomes more dense until solution found; Blood is missing matching energy; Herbs can boost particular field strength in blood; Buddhists Monks chant - bring emotion change absorption of Universal Energies (UE); For knee pain - bring emotion, attention & contract muscles - follow breathing method; Tell where you want energy to go; This brings together all past teachings; Breathing method plus attention and emotion of Soul - change pain; Changing energy level of blood cells by contracting muscles in that position - brings in lymph; Pain helps concentrate emotion - brings in energy from Soul; This method - substitute for ibuprofen, etc; Changes in environment create pressure on cells - it changes the lymph; Guru feed by breathing; Sports - change energy heavy breathing; Sit calmly exercise without moving muscles - small foundation muscles - only through lymph; Change anything in body by sequence of breathing - movements & position - use emotion - change absorption of energy through skin; Lungs, skin, brain same & biggest tissue in body - interfaces with lungs connected to brain; Skin interfaces with environment - lungs with gases of environment - all connected and interface with STM in brain; Get trapped between 2 stones - knowledge to detach leg & re-grow - ancestors knew - change emotion in brain - transfer through skin - to detach limb; Could do when we were reptiles - lost tail; Did same with kidney, etc; Forgotten how to handle emotion; Scientists measure strength of emotion - loss of tail creates - or when snake sheds skin; Every Soul receives energy from environment; How snake sheds skin - emotion - interaction Soul & STP - energy from CR; How emotion creates psychosomatic conditions through skin - completes circuit through nervous system; Melanin absorbs UE through skin - passes through Space gap - stronger melanin feeds weaker myelin - transfers to nerve system - Soul dictates what wants through emotion - gets from skin - completes circuit; Cells even weaker fields; Energy transfer through neural system - how body heats itself; When feel emotion - skin feels cold; Get excited - touch another skin - interfere with CR energy absorption; Have to match to create life, tangibility, etc; Why matching energies needed to confirm existence - Yin & Yang - Soul-mate - matter & Energy interaction in space between lymph; Identity of matter for lymph - when receives emotion of Soul through skin and nerves; Mayhem when control or change synchronization - emotion comes out of STM - tells skin what to absorb - transferred to myelin, completes cycle; Heart circulates matter state energy - itself has a Soul & is connected to STM - what it feeds, it is also fed by - I am the beginning and end; Control breathing, bring attention to place - change D & transmute; Heal knee pain - contract muscles - attention for lymph to come - breathing, distributes energy - brings in Soul - can fly or transmute - don’t need P; Bring STP & Inside STM; Start at big toe feel - transfer energy - thought, emotion of Soul, breathing - move to ankle - knee, organs- put inside Soul - transmute; Created double M field between emotion & Soul - double reactor with two different energies - find balance in respect to G field of Earth - travel; Do this exercise - observe changes; Encapsulate energy in brain; Control GM fields - direct where Soul goes - transmute; Every cell transmutes energy from melanin to myelin - then to Soul - weaker one receives energy - when it changes

Soul takes over; How death comes; P with circulating Energy create double reactor - Soul travels - like membrane of egg -Soul sits inside; Practice it - do it slowly - move Energy - start at toe to knee - hip to brain; Create, transfer, distribute energy; How you'll transmute - understand structure of P - don't leave body parts behind; Learn boundaries of energy, how to breathe, bring attention to certain point, divert energy of emotion to that point; Put finger on point to feel; Inhale to 4, hold for 4, exhale for 6, hold for 2 - one cycle; Changes rhythm of heart - energy given to lymph; First time given you an exercise; Move energy from toe to brain; Move energy in partner; Relationship - get connected by Soul - set limits; Understand Totality of Creation - not a part - why scientists can't understand - rejected Energy part - never understood lymph, blood circulation, rest; Every cell is 'taxi destination' - means energy can only be delivered to that specific address for that specific cell; Energy absorbed from UE through MM system; Fully understand work, purpose, emotion, energy - bring up to brain - cascade it through Soul - double core plasma reactor - adjust emotions to lift P - transmute - don't need take P with - let it die - or keep it until come back - lifeline - energy left in lungs; given key to transmute;
