

656th Knowledge Seekers Workshop August 20, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

How we are made in Creator's image - depends conditions of environment; He manifests as Himself; Don't know U age; Rays travel U becoming galaxies, stars, etc; Ray through skin becomes lymph, to blood - creates body; Absorb 80% energy from Him; Higher order energy of lymph & neural system - reduces goes into blood; Higher becomes lower of Spirit; Body radiates fields; Same process to make planets, stars, galaxies, etc; First time understand complete process of Creation in P; Understand STM - become free - measured leaving body; As plasma interact with environment - weaker than Space - give to us; Star Formation of STM & Spirit; How receive 80% energy; Food - Black Hole trap; We are conversion process; 20% left behind recycled; Image of Man - mirror of GM fields & Inertia of Earth; Mirror of Inertia of other planets different - filter; Why depends on Place, Position, Possession; All creatures same as us - One; Manifestation is mirror of Creator; Circus - room of mirrors - see yourself as different shapes - Creator in center of mirrors; Knowledge of Creation - stop eating images - lamb, grains; Would you eat your Mother - tap into energy of STM - gaseous part; Universal Community (UC) no language, mouth to eat, hands to kill, nose to breathe - live by interaction fields of U; Soul is reflection of Creator; When kill - destroy yourself; Lying forbidden; Kill to protect lie; Biggest lie - I'm not part of Creator - do what I like; Live Ethos of Mitra; Only create Children of Mitra - understand essence & Knowledge; This knowledge hidden thousands of years; Decide - to be slaves of planet - or images of Creator - detachment; Life is circular - come back to same point; Plasma spiral - leftover rays - G & M - become STM - return back to Creator; Creation is reflection of itself; Most clear description; Mirrors reflect from One Source; Think before doing crime - be perfect like Source; Rectify things you've done wrong - ancestors wrongs; Mature - join UC; Don't carry murders into U; Don't dream about what can't achieve - going wrong way; Why Space appears empty; Man sees what he wants - not reality - ignore own crimes; Aliens no mouth - reflection of Creator; Creator wants Man without mouth; Aliens trained themselves live without consuming; Man isolated till stop killing; All equal - luxuries, crowns no meaning - access everything; This is love; Man's whole life - engage in giving; Mature by own choice; Find solutions through KF plasma T; Soul accepted suffering for misconduct P; STM and reflections of Creator's fields - no difference -; Ignore knowledge own peril, or become true reflectors; One Soul voluntarily accepts to change - rest follow; Ground ready - Keshe Coin (KC) & teachings; Human race - parasite of Creation; First time understood true purpose & meaning teachings; All fields of Creator - end up back with Creator - you decide; Register - part of KF family use Store - buying and selling goods - KC; Governments - trade with KC; Get out from Jewish lobby & Rothschild's; Your image is reflection of Soul; Make things from love - already paid with KC; KC allocation - above most poverty lines; Pay you to serve; Don't need to lie, commit crimes, do wrongs - live comfortable; All needs through plasma - ONN system; Souls come with us fully equipped; Time of barter instead of money; Need to legally be correct; Soul alone & multi-functioning; Quantum - digital world of binary zero's & ones; Plasma - zero & one at same time; Different field strengths at plasma boundary - inside all equal - DC; Interacts - get AC; Inside zero - at edge, one - give & receive; Empty gaps

in M field lines - G; Science wrong - both G & M at same time; Emotion - reflection of Soul; P reflection of Soul with Soul of Planet; Create human cell; Why create cancer; Only human females have permanent breasts; If emotion broken - ionization of Ca; Emotion, injury, or evolution type cancers Ca seed ionized; When Soul has only love - no ionization Ca; Emotion - create or demise; Demise when attached to P; Detachment no cancer; Only joyful Soul can travel U - no needs, fear - a giver; Soul reflects image & emotion - where interacts with STP; Interaction of Soul & Spirit with Earth - upright Man; Other animals different - 3 fields creates dog; Soul - access to all memories of life & U - knowledge gained when asleep; Chose what to remember; U all understand each other - everything free - Man pays on Earth; No knowledge hidden from Soul; History military power created domination & political power - rise and fall last 2,000 years; KC - no military or political connections; Fear in European & American governments regarding KF; White House copied KC - fixed price - governments not accept; This T frees STM - won't need P - biggest fear; Long discussion current world political situation; Advice to China - Iranian military brought America to knees - Trump signed nation to defeat; American government destroyed from inside; Military - have to conduct correctly; Materials production unit; New breakthrough T beyond imagination; Iran emerge superpower in T; Russia trouble from UK & Germany; US no missiles left to defend; Trump's family - 4 trillion; News lies; Ionization by emotion- wrong understanding - nuclear; Holy Books - October 29th - end of cycle - 666 KSW - manifestation of Messiah; Most powerful nation will go down - US; US bombers turned back; Gases are fields for absorption UE; C14, is really N in body; Exhale change C12 to C14 connect UE - transmute - teach later; First Soul change voluntarily - rest follow; About Chinese Qi Meridians - own STP; Blood flow creates own meridians; Organs create own meridians; shift meridian - kill; Nerves have own system; KF history of how patents came into existence - King of Belgium paid - Moses in basket - bring down kingship; Purpose of teachings - peace & understanding into life; Chronic FMS - nothing to do with 80% UE - block ourselves; Energies of Creator - nomads of U; Details about Humanity's future; 3 generations cycles; Future generations decide - or self-destruct; Succeeded on other planets; 666 KSW coincidence; Being tested if Soul wants; 25 years written to DNA; Children of Mitra; Elevating Soul - billions years; Unlearn nonsense; Right education; More billionaires China - hide; Chinese cannot give opinion - China and KC; Become more creative, self-knowledge; We were hours from disaster.

ENGLISH TRANSCRIPTION

(:15)

K- Thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. (:16) As usual, we welcome you back.

I made Man in the image of Myself. If you understood the teaching of last week and the week before, and understanding the process of Creation, you should have realized by now, how you became to be made by Him, and to be image of Him, depending on the condition of the environment, Him manifest Himself. The rays of the Source, going

through the time of the generation of this Universe, some people say, up to recently, when we announced 4 and 1/2 billion, said it's much more, and they made it to 13 and 1/2 billion. And then they measure the width of this Universe to be so many 900 billion years, or 95 billion years, depends where you listen to. So if the life is 19 ?? billion, how could it be 13 and 1/2 billion years of this Universe? So we don't know the time. But when the rays started from the source, traveling the span of the Universe, becoming part of the galaxies, and then part of the star, as rays and fields, then this ray travels through the skin of the Man. It becomes the lymph of the Man, and then it becomes the blood of the Man, and interaction with the fields of the Universe (U) which interacted, creates the body of the Man. And then Man radiates fields, and there on.

So now we know, through the teaching, (:18) that we are made from the Rays of the Creator. We absorb 80% of our life from it. We use what we can at a higher order in the form of the lymph and the neural system. And then when the order of the strength changes, reduces, we go into the pipeline blood of physicality. And we become the source of the lower, with the higher field of strength, become the Spirit of the Man. And then we radiate, as we say, fields of the heart can be measured three meters away from the body. And then we have ?? measured the rest of it. We will come back to fields of the lower strength for the next cycle of life. It's below the strength of the Man. So now we understand we are part of it. We are actually created by it. The fields of the Universe passing on our skin, becoming part of our bloods. And it's just that how different field strength made the galaxies and made the stars and the planet. We are part of that process.

So for the first time, we understand how we became Him. We became part of Him. We are created by Him. And the process of creation is complete according and to up to the level of the Man's understanding in the condition of physical appearance. But once we understand as a Soul of the Man (STM), we have become free from the physicality (P) imprisonments of this body, we become the Soul, we become that energy source, which our Russian friends have measured it, seen it, departing, and many people have videoed it on your new telephone, mobile units, (:20) and then you understand why you absorb 80%, because once you are a plasma, you interact with the environment, you are a weaker plasma compared to the solar systems and galaxies and to the principle of what we call, trans ??, the higher order feeds the lower order.

So now you understand if you have the Star Formation (SF) of the STM and the Spirit of the Man, as a lower order we receive from the higher order, that's where the 80% comes from. In essence even if you look at the World of the Creation, as we discussed in many teachings before, we eat the harvest of this planet, the sources of the energies of this planet. And we create, we convert it into energy, becomes a lymph. So when we eat that beans, when we eat that grain of rice, we send a tracer. This is what the field is we need for our body, the starch we need for our body, the sugar we need for our body and the Universe sends the other 80% in. So we, our food, in essence, is a Black Hole trap for the higher order fields of the Universe to feed us. Now we understand how the whole process works. In a way, we eat that 20% continuously to absorb the other 80% directly. It's me, here, feed me.

And once we understand this, it comes to one question for mankind to answer. Where is the end? Because the end is not us, as the end was in the Earth, as the end was in the sun, as the end was in the galaxy, and that the end was in the Universe. (:22) What is after the energy, which Man converts it, as part of the rest of his living? You're another conversion process, where part of us become what we call, the Soul, and travel the span of the Universe, absorbing 80% of his energy for a source of survival. Another 20%, which is the body of Man we leave behind, become the source for another cycle of life in the dimension (D) of physicality. Now you understand how the process of life is completed, how the process of existence is complete, how, as humans, for the first time, we understand scientifically why we are made. We are the image of, depending on the field strength ?? ...

<< Mr. Keshe connection is lost.>> (:24)

K- ... We had to change servers, we fell out of one server to another. Advantages of the new technology.

R: As Azar said, she says, "We lost you at depending on the image."

K- Yes, depending on the image we create. The image of Man on Earth is the mirror of the gravitational magnetic (GM) field and the Inertia of this planet. The mirror of the Inertia of the moon. And it's not the same. So it's obvious that the Creator has many images. (:26) I made Man in the image of Myself. Which is, I manifest Myself depending on the filter. Where I am manifested. This is why we always said, the Place, the Possession, the Position. And we now understand, we as a STM, we look different according to the mirror which reflects the image of the Creator. So, in essence, when we see another the creatures of the Creator in the dimension of the Universe is the same as us. Because he was made by energy of Him, by the fields of Him and his manifestation, his presence, what we observe as being is the mirror of His Soul in the dimension of the place and the position of where the mirror was made. The manifestation showed itself, mirrored the Creator.

So in essence all creators are one. It just depends what mirror you use. When you go to a circus you have a concave and half concave and twisted half concave and converge one and all sorts and you see yourself fat, slim and whatever. That's your image. Which depends what the environment of the mirror and the shape of the mirror was made to show you. And this is exactly what mankind and the rest of the creation of the world and the Universe are. It just depends how the fields of the Universe were twisted, (:28) how pressure was put on it, and then how twisted that picture turned up, but on the other hand, is one image. When you go to the circus, and stand in the center of the room, if you have done this, one mirror looks fat in the left, then thin on the right, then the short on the other side, but the image is one Man in the middle. And this is exactly how Man is. It depends which mirror we are looking at. And the mirror of the Creation is the dimension of fields of its environment, how it's been twisted, and how it's been tainted with what it has. But the Man in the center, the Creator in the center, is exactly the same.

And once we understand this, we understand the Knowledge of the Creation. We understand I made Man in the image of Myself, but I manifested according to his position, position, and the environment and energy it possesses. Maybe now us, as a human being, ?? stop eating that image, because what we eat, we eat the manifestation of the Creator. That lamb, that grain, that pig, that pigeon, it's all the same fields. It just depends on what mirror and where their Soul found its reflection. Would you eat your Creator? Would you eat your Mother? Then Man has to find a solution. Man has to find a source to stop this mayhem of killing. (:30)

<< Audio of Mr. Keshe breaks. >> ... that learns how to tap in, ... into the STM, to energy the gaseous part of the Man, which flow freely to ?? his physicality.

Now we understand, now we understand the meaning of the words which put together, doesn't matter what language Man uses, as the Universal Community, most of them have no mouth to talk, no mouth to eat, no hand to kill, no nose to breathe even the air. Man learns to live through the interaction of the fields of the Universe, with a mirror image of his Soul. Now you understand, if the Earth, in its mirror, manifests itself as Earth, So, our Soul, in interaction with the fields of the Creator, manifests itself as Man. Our Soul is a reflection of the essence of the Creator. And once Man understand this, once Man understand the reality about his physicality, which is the mirror image of the Creator, in a time, place and position of itself, then Man realizes, is it worth killing? Is it worth destroying? Whereby it I destroy myself. As I said many times, a fool shoots itself in a foot and joins a marathon to win. And a fool shoots himself in both feet and tries to win the marathon. One in the STM and one in the Spirit of the Man. (:32)

Now, the society of the Man has to understand why lying in the culture of Iran is forbidden. It's the biggest crime. Because when the Man lies to himself, Man kills for it. When Man understand the truth, he does not need to lie to himself. The biggest lie a Man says is to himself, I'm not part of the Creator, I'm not created by Creator for that, I do what I like. Now if we understand this, it brings back Man to one Ethos of Mitra and then we see the Universe and the world of the Man needs to join to become to understand to do nothing. Don't create children unless they are the Children of Mitra. They understand the essence of the Creation. They understand the Knowledge of Creation. They understand the essence of the Creation.

Now you as Knowledge Seekers (KS) are given the Pandora's Box of Creation. Now as Knowledge Seekers you understand the knowledge which has been hidden from humanity for centuries and thousands of years. It's for you to decide how to create the next generation. It's for you to decide how to shape the next generation. It's for you to decide if the next generation will be a slave to this planet and manifest the image of the interaction of the field of the STM and the Soul of this Planet as a human body of the Man or it becomes itself directly the reflection of the images of the Creator, (:34) and it stays in the dimension of itself detached from what we call, the fields effects of this planet, even though it's his home.

Maybe you as Knowledge Seekers and the future generations listen to this teaching of today, join all the dots, and find out, it's a circle and not a straight line. Comes from one

point and it becomes itself, and in twisting to become itself, it becomes a shape of the plasma which we have drawn for decades in this teaching. As it twists back at every point to itself, and Man calls it Gravitational, and the Man calls it Magnetical. Where it comes back to itself, at the rays of the leftover of its interaction with its environment, has become the STM. When you become the Soul, when you become that reflection of the no dimension of physicality, you return back, you return the fields of the Creator back to itself, that its reflection creates another dimension of manifestation. It cannot be put in any easier way, in more clearer way, than for Man to understand why he is the image of his Creator. He is one of those mirrors and the Universe has many mirrors, but one source, one Man in the center. The rest are twisted mirrors in different field strength, dimension and direction. (:36)

Next time when you do a crime, ask yourself one question. Is this how the Creator wants to be shown, to be reflected? Its the energy to be, as his source and his race to be? Or am I to be the source of the perfection? At least I show how He looks, and there is no twist and turns in direction of my life. Once Man understand this, once Man takes steps to ratify (?? rectify) what has been made wrong by his ancestors and the process of the Creation, then Man matures to join the Universal Community, because then he reflects the true image of the Creator. Does not matter which mirror it manifests itself into. Ask yourself, once I leave this physical body, as a STM, and I become another point of reflection of the Rays of the Creator, what image would I create shall manifest itself to be seen by the others. A twisted one, a murderous one, a true reflection of the Creator, or me dreaming for what I cannot achieve as I'd ?? run the wrong way. Now the science has to find the answer to this question. And simple, if I am the image of my Creator, what have I done wrong to taint His image? And then try to ratify (rectify).

Try to change. Try to understand life is beyond a breath of ??. (:38) Life is beyond eating. Life is beyond what we call, physical existence of the Creation. And when you become to the dimension of fields of the Creation, and you travel the fields of the Universe in the strength field of the others, would there be any difference, or is it, that's why there is space is empty to the eye of the Man? One day we will answer this question, and one day, will manifest the truth about how Man sees what he wants to see, but in reality, is not what the Man has made himself to see, because this way he can ignore his own crime.

Next time, when the Man meets the Man of Space, ask them, what nowadays when you want to join on your mobile phone, into any bank, they say, look into the mirror, Look into the camera, open your mouth, close your mouth, look left, look right. You ask an alien, open your mouth. The camera, the reflection of Creator, wants to take a picture of you. It has no mouth to commit the eating of another. It has no nose to even take the life of another while he breathe. He has trained himself, he has developed itself, he has brought the condition to himself that I do not need to consume. I create the strength of what I need within my Soul, that I absorb what I need from the free fields of the Universe without committing the crime of the Universe. (:40)

Now you understand why Man is alone, and he has to be uprooted from the condition of killing in the other dimension of the Creation. When you have no mouth, you don't kill for it. When you receive what you need from the dimension of Universe, there is no greed. When you understand you are equal to the others to take what you need, the luxuries, the crowns and the palaces of this what we call, miserable planet has no meaning as you can access everything you need in the dimension of Universe which is love, which means giving. And the whole thing, Man will be engaged in the coming time once he understands this, is how much what can give from me to make the Universe a better place where all others can enjoy my existence as I don't take anything but I become the source to give everything.

One day, one day humanity will reach that point. One day, once we bring the dimension of what we call, new knowledge and technology (T), we allow Man to lose his mouth, to lose his nose and to become part of relying on the sources of his Soul in dimension with the access to dimension of his Spirit that uses the Spirit of the Man to lower the fields of the Universe for its manifestation in the dimension of existence. In a way, as I said before, you need rivers and you need dimension of flow from higher to lower, where the dimension of water falls need water, (:42) the blood needs the circulation of the pump. The Man will learn to use the fields of the Universe and not the physical rivers of life. Flowing be it to drink the water of it or the river runs of the blood of it. One day mankind will mature that by choice he will close his mouth and by choice in teaching himself will close his nose and join the Universal Community as I don't have nothing to take in, no holes in it, I don't commit the crimes of the killing of it.

And soon Man will find solutions in the plasma technology which we have taught, and we strengthen it to add to it, to become part of the cycle of life of the Man. Then one day Man might see himself, his Soul, as the mirror that in reflection of the fields of the Creator leads to the manifestation of the physicality of the Man. I hope you Knowledge Seekers have been enlightened to know why and how you look when you stand in front of the mirror next time. That's the image of Soul of you in reflection of the Soul and the fields of the Creator. Do you like the image, what you see? And is it satisfying to you, or you use that mirror to understand the burden of life your Soul has accepted, in the suffering accepted for the misconduct of the Man, which has got his hand to the hilt with blood of the other living things in the Universe, other Souls which they reflected themselves from the Rays of the Creator. (:44) There is no difference between the STM and the reflection of the fields of the Creator, which gives the image of the Man and the Soul of that grain which is a protein in it, which manifests itself as a grain of rice. Both reflects according to their own environment, the field of the Universe.

Now, mankind has a huge dilemma. Ignore it, and you ignore it to ?? your peril, and understand it, and you become the true reflector of the light of the Creator through the STM, and when you stand in front of that mirror, you'll shine like it as what we call, a sun, and not as a physicality of the Man. One day mankind will decide and will make that difference and once one man makes that change the rest will follow. But the ground for it has to be made. The dimension of the peaceful of the Man has to be made. A Man has to be made to understand he has no need but he has a lot to give.

And this is a part of the work of the Keshe Foundation. Starting from the Keshe Coin (KC) to the dimension of teaching of the plasma technology. Step by step we'll walk Man out of this need, hunger, desire of what has brought such a shame to such a beautiful Soul of this Planet and the reflection of the fields of the Creator, the parasites of the Creation, what we call, the human race. Enjoy your time, but understand the knowledge, change this parasite to a beautiful butterfly, which becomes the envy of the Creation. (:46)

We go for a break, I hope for the first time you understood the purpose of the teachings in true meaning of after 14 years, 13 years of teaching. We're all getting home, but depends which road we decide. As they say all roads end up in Rome, and all fields of the Creator, in the essence of the STM and the rest of the Creation, will end up with the Creator. Which path you take, it's your decision. Rick, take us for a break, and we come back. (47:33)

>> **BREAK** >> 656 KSW August 20th ... (:51).

R: Okay, we're back again at the 656 Knowledge Seekers Workshop here. And, as noted, because it's the second part, there will be an opportunity to ask questions. (:52) But first, of course, Mr. Keshe will have a few things to say. And so please, go ahead Mr. Keshe.

<< Mr. Keshe connection is lost>>

K- ... As I said, we have opened the doors <<Audio of Mr. Keshe breaks.>>... Can you hear me now?

R: I hear you now, yes. There's a lag there, but it's okay.

K- As I said, they don't like to hear what's... because possibly they know what's going on. Possibly they know us to join the Keshe Foundation, what we call, our work and register in different structures of the Game and associations. And to become, to be able to use the Keshe Coins facilities as it's getting released. (:54) <<Audio of Mr. Keshe breaks.>> Next week you in the Store of the ?? <<Audio of Mr. Keshe breaks.>> ?? supports your life. Once we approve you to be inside of the structure of the family of the Keshe Foundation, you can use the Store. We have put no limits. You can be a plumber, sell your services, and you can be a merchant, it can be anything you like, you can start buying and selling your goods, through the Keshe Store. This on the verge of being completed in the Stores, hopefully by next week, even though it could be ready today,

that we allow the circulation of the Keshe Coin, to become part of the structure. We have many retailers, we have many Knowledge Seekers, who make goods and up to now they haven't had a chance to be able to market it in international platform or world ?? platform. You make MaGravs, you make whatever, you're a farmer, you sell chewing gum, you make a bike, you can use the Keshe Coin, as long as you register in the structure of the Keshe Foundation operation.

In a few weeks time we open the door into the world of the government. We open the door for governments to be able to accept Keshe Coin in exchange for trading. We are negotiating and once this is done between two or three countries, (:56) especially African nations will change a lot of things for them, and we start the process of what we call, unification. The limitation I would like to see it gradually, to change but our team are faster than what we can plan, what we do and hopefully within the next few weeks we'll register the first one or to governments, into the structure of the Keshe Foundation Coin, if all negotiations goes well.

As I was explaining to one of the Knowledge Seekers before the teaching starts, I have hardly seen bed, as bed, in past few weeks. It needs to be done and hopefully with the team we have working relentlessly to make sure everything is correct once it goes into open then the whole World of Creation will change. No one needs to borrow to be in the hand of the Jewish lobby that drained the blood of the humanity. And no one needs to be in the hand of the Rothschild's to create war for them to become richer even they all die with all diseases. As a friend of mine said once, "Rothschild's family has the most strangest diseases on the ?? they die in the worse way human race can die." And I said to him, "Bill, it's the crimes they've done, they pay for it."

Now, as of next week, bring the fruit of your work. Register with our structure and become part of it, and start earning a living out of it. (:58) Then you decide how to sell, how to change, how to convert it to your local currencies by buying stock, when buying your goods, or your services in the Keshe Coin, and convert it locally to your currency, that you can benefit by it to survive, as your Soul reflects the image of your existence. Will be interesting to see how this takes shapes in the coming months and years, where you don't need to pay anything to get it, you get it, and through it you live to enjoy it, that exists, and how you as Knowledge Seekers will become part of the structure, that you make things knowing you have already been paid just to be busy, you are doing. This is the purpose of why we allocated ?? 10 Keshe Coins. It's nearly, if you look at it, two and a half Euro Coins a month, two and a half thousand Euro a month valuation, in terms of value of what we do, when you become part of us, you do.

Considering engineer with a BSC in Iran earns \$500, a worker in China working 26 days a month earns around \$800 if he's lucky. An African is happy with \$100 and has to work day and night for it. Now you all get about \$3,000, roughly, if you calculate it, a month without doing anything. (1:00) We pay you to serve humanity. We pay you to change humanity. And let's see how many of you reject having the funds to live, and how Rothschild's try to find to grab this money out of you. Because the interesting thing is, the more they grab, the more you have. And it'll be interesting to see what governments will

bring out, as they see the taxes are paid by a Coin that never had no say in it, and nobody bought it, and everybody start dealing in it. It'll be interesting for you to know you have food on the table. You are not worried about what I'm busy to serve humanity at the first of the month ?? and that two and a half Coins is in my pocket in my account in Keshe Coin and I can use it to live. I don't need to lie. I don't need to commit crime and I don't need to do anything wrong as I'm comfortable, and the only thing left for me is to serve humanity, because I get bored sleeping and lying down. I find the knowledge to serve. And the beauty of it is that for the first time, if you understand what we've done to you, it will be amazing.

As I said many times before, (1:02) we pay the sweeper and the cleaner and the gatekeeper of our company is the same, and (gave) more bonuses than the bosses, and they always complain that we are the boss and we have to be paid more. And I told them many times, if he doesn't clean here, there is no boss. Because you have no place to sit except in your own excrements, and in your own mess. And we have created values for studying. And we put us 120,000. I need 200,000 to show I am better. Now you're all worth the same. A doctor, ambassador, prince, a doorkeeper, a paralyzed man, invalid, you all get equal recognition. And with it, you can live a perfect life. Knowing that very soon, even many of you, as the Swiss did very recently, refuse to accept money per month from the government, because they said we don't need a handout. What we call, national social security because it stays as a national asset.

The way the technology has developed, none of you need to pay for oil as you travel free through the knowledge. None of you need to pay as such for an apple and food as you receive the energy through your mobile phone and the new ONN's, and none of you needs to pay extortionate prices to travel the span of this planet and the Space as you all can do it through an App and transportation through magnetic (M) fields. We're talking about a few months, a few years, depending which side of the Coin things turn up. (1:04) So if you pay for one apple, let's say, one cent of one Euro you can eat a lot of apples, a ?? hundred thousand apples a month. Then you understand many of you will not even a fraction of it and that's why we put
<<Audio of Mr. Keshe breaks.>> ...

As I said, we thank the creator of the Game, and the thoughts which has gone into it, and the effort which has gone to it, and the way it's been set up. As I said, when we come, we come with the Souls fully equipped to do what we want to do. And, as we've seen many times, the Game is the way to bring Man to use the technology, and the Coin to bring all to be equal. The beauty of it is, the King of England, still receives his two and a half Coin a month, as much as the butler, and as much as the Man who streets cleaned by him outside the palace, the same as the Man in the jungles of Africa. (1:06) And I wonder, which one will refuse to cash it in? Or which one will save as much as possible, not to use it, to give his Coin to the others, to... for them, as they don't need it, to help, to build, to change the Humanity?

The implication of what is about to come out and has come out is huge. The ONN's systems are out, more is released, will be released this week and next week. And at the

same time, as we expand on this, we understand more is needed to be done by us, and more is needed to be done by you. Use the Coin. Open your shops. If you are a mother at home and you bake a cake, put it, "I'm in this street and this corner house. If you want, I have a cake I baked today. You can take one Coin, one part of one Coin, and give me a strawberry, a jam jar." And then we both are paid by the Coin. We don't need to go and rob each other and we all have what we need. In a way if you think of it, Keshe Coin takes us back to the barter world of the humanity, which we've done for centuries and decades. Man carried Coins in his pocket, now Man carries the same Coin as a Keshe Coin, to trade with the rest of the world. And once you pass this Universe of Man, beyond the few hundred meters from surface of this planet, I wonder how much Keshe Coin you can give to the Aliens. (1:08) It'll be a good joke, because they give you everything free. Man hopefully by then has learned.

Join the shop, join the Store, put your products, your little handmade toys, little paintings, the products of your shop, link it to your currency, and link it to your currency of love and start using the Coin as exchange rate and tell others, "Have you got a Keshe Coin?" We have a friend in Keshe Foundation, everybody talks to, says, you want to speak to me go to Telegram. That's the only place I talk. And you say you want to pay me, pay me with a Coin. That's the only Coin I know. And gradually we'll see the change as it comes ?? to the systems. You register yourself, now register your shops, your businesses and the shop is there for the ?? few, it does not matter what you make, and ship it across the sea.

Any questions?

Q: ... Thank you Mr. Keshe, we see here, well we have a question from Ike about the, this Keshe Coin set up says for the merchant that would sell under the Foundation utilizing the Keshe Coin as payment methods, will their products be certified by the Foundation and or the specific industry certification agencies before they're authorized to sell their product under the Foundation?

K- You have to have everything you have to have everything legally covered. If you sell goods in Europe, your goods have to have a CE certificate. If you sell your goods in US, you have to have a US certificate. (1:10) And if you're selling your vegetable, I've never seen a certification for vegetables, I presume yes. You have to cover the laws of your land. We are not here to break law.

Q: ... Good morning Mr. Keshe. In the 654th Knowledge Seekers Workshop, you mentioned that if the STM did not have the Earth to interact with, our Soul would remain alone, without any connections or interactions with the planet. And elsewhere you said that Magnetic fields function without the interaction of the fields. I'm trying to understand this, because when it comes to physical emotions, I think we interact all the time. If you could elaborate, elaborate a bit more on this non-interaction of the Soul, I'd appreciate it.

K- We are multi-functioning as a Soul. It's not, as they say, we call it, the Quantum, Plasma. They use the word of Quantum that means in the digital world, in the binary

world, you are a zero or one. In the dimension of plasma, you are one and zero at the same time. You are not connected to none, but you're connected to everything. You stand alone as a Soul, but at the same time your Soul is connected to everything else. You have to understand what the teaching at which part connects to what, and in respect to what. (1:12) In the world of binary you have zero and one. In the plasma, in a plasma like Earth, you have north pole and the south pole. But what they haven't taught you is for certain field strength the field enters from the north and exits from the south. At what balances, is static. This is why the fields are at the boundary of the plasma and not inside the plasma, because once you enter the inner zone field strength of the plasma there is no difference it's all equal.

If you go back to one of the teachings, God knows how long ago, we explained we have a system we have measured it we know exactly we use it in our lab. In a plasma everything is DC. Where it interacts with the other fields which is not of the strength of itself, we see interaction, we see AC. Difference between the plasma field and its environment. So in a way inside you are zero. On the edge you are one, you exist. On one end you receive and from the same end you ?? give. If you go back to the teachings of the past I've mentioned this many times. When you get a magnet and you put dust on it you see lines. But there's an image of understanding. You just look at the lines of the iron dust which you put on the paper with the magnet underneath. (1:14) But there are fields which create that separation which is no iron. That's another field which is going in, you saw the going out.

So our teaching of science about magnets has been put on the wrong basis. And so, in the plasma condition, you are a zero, nothing in the middle, there is no potential difference, but at the edge you are one, and you are both at the same time. You are gravitational as much as you are magnetical. Then you understand why sometimes you are you as you as a Soul, no connection, but at the same time is you in connection with the Soul of the Earth. Your emotion is a reflection of your Soul. Your physicality is the reflection of your Soul in interaction with the Soul of the planet. This is why the emotion is connected to the STM in the dimension of non-tangibility.

One day, I will explain very soon, why you even have create cancer. How you create a human cell of the Man. How your image is created by the interaction of the field of yourself. As, let me give you an example, you understand very clearly, very, very rapidly. As we all know, human race is the only race on its female side, which has permanent breast. (1:16) No other mammal has this. We are born as girls, we have the same condition as the boys, and when we pass certain hormonal condition, we manifest breasts. And this breasts in the brain of the Man stays in the condition for rest of our life. Because we do not know when next time we'll be pregnant and so it become part of our system. If you can look at chimpanzees, if you look at the monkeys, if you look at any mammal, breast appears or a function of the breast appears when there is a child and there is need for a feed, and then disappears. Not in human race.

The emotion that I'm ready at any time to create life, to give life, to love, doesn't exist with no other creatures on this planet except human race. This comes out of emotion of existence. But if that emotion is broken, the same breast which gives life, by the

interaction of the ionization of that calcium in the breast of the woman gives cancer to one to destroy life that does not create more life to create suffering. It's the emotion, the power of that emotion which creates that cancer. The only calcium we see which stays, doesn't matter where, in your lung, in your breast, in your whatever, to cancer, is that if that single seed of calcium is ionized, which can only be ionized by emotion, or by accident (injury), or by set up condition through what we call, evolution. (1:18) Once the world of science understand this, once they purely understand this, then we find when the Soul has nothing but emotion of the love, there cannot be any cancer because it does not produce that specific energy to ionize that seed of calcium, that become the seed of destruction of the Man.

Our emotion is the seed of our creation and the seed of our demise and only comes because we are attached to the dimension of physicality of life on this planet. And once we are detached from it, even in the body of the Man in the depth of the space, we'll have no cancer, we have nothing to kill us, because we are nothing but joyful Soul, that travels the span of the Universe, has no need, and has nothing to be afraid to lose, as it's a giver itself.

So, if you understand this, you understand how come you're sometimes zero, at the same time as you are one. And how come you're a Soul on your own. And sometimes, you're a manifestation of Soul, in the reflection of the Soul of the planet. Is the fields of the environment, and the reflection, interaction of the STM with that environment. When you're a Soul traveling the span of the Universe, the only reflection is the fields of the Creator. (1:20) When you are on Earth, you have to double mirror it, which is ?? one you ?? <<Audio of Mr. Keshe breaks.>> ... Sorry about this. We are in a very dodgy area at the moment, this week. Can you hear me?

R: Yes, we hear you now.

K- ... Then we understand why we are in the condition of the creation and reflection of our environment, as much as manifestation of the STM. Our Soul reflects the image, emotion of the Man, where the Creator and its Creator interact with the Soul of the Physicality (STP), which we call, the Spirit of the Man, And the interaction of the two, with the Earth, creates the upright Man, the way we are. And on the other hand, we have the same position, as I said, our reproduction area, if you look at the dog, the Soul is one end, the heart is in the middle, and reproduction is on the other end. (1:22) And then the interaction of the three fields, gives you a dog. You turn Man upright, the Spirit of the Man, the center of the what we call, sits below the brain of the Man, and you get a tall Man, because it's reproduction. Third one is straight down the same line. We are reflectors of the Universal fields. And how we bend the mirror is how we manifest it. (1:22:35) <<Audio of Mr. Keshe breaks.>> ... Just bear with me, we just... We just going to change our servers, see if we can still sit with this server. Just one second, I have to change. (1:24) Oh, we never... Hello, can you hear me now?

R: Yes, we hear you clearly.

K- Okay, that's good. << Italian translator interrupt. >> I don't know why this always happens to the Italians and only to her. that's a mystery ..

K- ... Any other question? Sorry about the system today. We are in off and everything is upside down. That was a very strange answer by ?? Mike Anderson.

Q: ... After physical death, does the Soul have access to all the memories and experiences from the physical life it lived? Would the Soul be able to...

K- Yes.

Q: Would the Soul be able to access memories that the person could no longer consciously remember, while alive? For example, forgotten childhood memories, experiences that have been completely forgotten, or even every dream the person had ever experienced. And is it possible to remove, alter, suppress, or transform memories within the Soul? (1:26) Or are all memories and experiences of the physical life permanently preserved within the Soul?

K- I have a very bad news for you. Man suffers two kinds of Alzheimer's. One is a physical Alzheimer and one is the Alzheimer of the Soul for the physical body. In a way, in our physical world we remember everything from our childhood blah, blah, blah, blah, but we forget we have a Soul which is working in another dimension and remembers everything about the Universe. So when we die, or when we finish with the physical world, that knowledge which Man gained in the process of physical life adds to that knowledge which the Soul was gathering during the time when you thought you were asleep when you're dreaming and the rest of it. So, in reality, we have access only to part of that memory. We chose that. We never tap, hardly tap, in the memory of the Soul. We tap in the dimension of physicality, which we call, the memory of the Man. But, at all time, once that condition has created, is created, doesn't matter you blow a candle on your birthday, the fifth birthday and you remember your mom kissed you, you remember that kiss, that stays in that memory till the day your Soul is alive across the Universe, it's part of its fields. (1:28) And whatever your Soul did while you were sleeping, it still stays in the memory of the Soul even though you don't remember in the dimension of physicality.

Man has the knowledge of physicality, the Soul has the knowledge of the Universe. And once Man learns how to cross the two, Man will have every knowledge of the Creation. As the knowledge of physicality is available to Man, the knowledge of Universe is available to the STM. No one in the Universe has an English language, translation systems and everything else, because they all speak through the dimension of the fields of the Universe and they all understand each other. Knowledge is free, energy is free, everything else free through the dimension of the Universe and everything is payable to the dimension of physicality of the Man.

And once you understand this, you will see there is no Alzheimer's even in the dimension of the physicality of the Man, if you go to the STM. It'll tell you how the first milk you suckled from the breast of your mother tasted, because he created an emotion in you,

even though you were not aware of it at that time. We are schizophrenic creatures, which only remember who is present and speaking today, and we ignore the other one within us. But that one sees everything, has access to everything, and no knowledge is hidden from it. If Mankind could understand the beauty of the Creation and the Creator, (1:30) Man will never do what he is doing on this planet.

Any other question?

R: ... Paulo has a couple of questions here. Let's see. He said, previous questions in the last couple of workshops.

Q: ... Perhaps I did not express my previous question clearly. I was not simply comparing the military power of Iran, the USA and Israel. I was asking how military power becomes political power, and why superior military power does not necessarily produce a political victory. You have also spoken about brainwashing and limitations imposed on human research and understanding. So I wonder, when a population changes its political perception after a conflict, how can we distinguish a genuinely organic change in collective consciousness from one produced by propaganda or psychological manipulation? If the regional balance of power is now changing, could this create a new political alignment based on sovereignty rather than dependence on external military protection? And if so, could the Keshe Foundation World Peace Treaty help prevent the change of homogeneity from simply becoming another form of homogeneity? I would be very interested in understanding the mechanism connecting military power, political power, collective consciousness and peace. (1:32) Thank you professor.

R: Do you need me to repeat that?

K- I understand the gist of it. I understand what he's trying to tell us. I think I answered you last week but you didn't understand it. You understood different part of it, ?? of what you wanted to listen. Military power in the history of the Man has created domination that the political power goes with it. When we've seen how it has shifted. If you look at the 1940s, 1930s and just prior to that, the England was the mighty power, everything was in Pound (British money). When the Americans came to help the British with the First World, Second World, so their money had to be used, Dollar became more dominant. Now we see emergence of the Yuan, the Chinese money. Because politically, economically, they can enforce their dimension into it. And we've seen the fall and rise of these kind of things over and over again, over the recent history of Man in the past 2000 years.

When we'll introduce a Coin like Keshe Coin, we have no military connection, we have no political connection, and we gain a lot of respect and work through the individuals. You'll be amazed what we hear, what is going through the corridors of European governments regarding Keshe Foundation. We have created a massive fear. We have created fear amongst and within the American administration. I'll explain to you how. (1:34) They see a parallel, but nationalistic side of it has created a problem for them. We put a fixed Coin currency and we see the White House has copied it. Other governments

cannot accept it, because then if you go for a fixed currency, the 36, 38, 39 trillion debt stays 39 trillion. You have to use a fluctuation currency or Coin, that with playing with this fluctuation you write your debts off.

Americans copied the Keshe Foundation, it's become a Presidential decree, but they will not be able to deliver it because they have a political agenda. We deliver it because we have no political agenda. We have a peace agenda. And it will be carried by the people, and not by politics. We carry no Arms, but we have the most advanced military capabilities in the arsenal of the Man. You can kill a man, you can dominate the man, imprison it. This technology frees the STM, doesn't need no physicality. This is one of the biggest fear of the government regarding the Keshe Foundation. This is where the peace work will work. This is where you don't need to rely on military power or political power.

And going back to what I said last week, and I'll try to explain a little bit more, look at how one of the most mightiest power of today, leaving China aside, which is trying to match. It should ?? not have done that, China should have stayed neutral and spent more money on the research, development, and other technologies, than trying to match the Americans. (1:36) The Iranian military has brought the most powerful nation on its knees. Literally, what called himself the superior power, soldiers are killing themselves, jumping off the ship. Mutinies on the board of the most powerful aircraft carriers, because they can't feed them. An army marches on his stomach. But they have nothing to defend itself. What we call, 'fur coats and no knickers' (all show and no substance). This is a well-known saying in English. I wear a fur coat even with all the infestation and fleas in it because once upon a time I could afford it. But today, I can't even afford to even wear a knickers (underwear). So I carry that fur coat (to appear) as though I'm rich. But in fact, there is nothing in it.

Political power, military power of one of the most powerful nations in the world has come to an end. And it came to a prompt end. And they walked themselves into it to do it. Very soon, I'll give you example of how, without you Americans knowing, your President has signed a defeat in the war. Even though they try to say they're victorious. By obligation, by position I have, and the knowledge in our hand and ?? our advisors, we... (1:38) One day I explained to you how suddenly, promptly, American war stopped against Iran. And in that stopping it, the whole structure inside the American government is destroyed. As I said, as you all know, when the president of the most powerful nation on this planet has to escape in the what we call, food basket with the meats and the rubbish from an aircraft, to hide, to fly, when he was in Istanbul, and he leaves his crew, and he leaves his Cabinet behind, that if it's hit they die, it shows there is no leadership.

We all know what I'm talking about. American president in attending NATO entered Air Force One from the front and he was taken through the back through a rubbish container carrying literally the use, if you know how they bring the what we call, toilet rolls in and out, and the rubbish out of the aircraft when they feed you. He was carried in a rubbish bin box into another aircraft that he might not be killed, they had a fear that the Air Force One will be attacked. And he allowed all his Cabinet to go on and get the slaughter if it

happens. He had no respect for his ... That's why his spokesman resigned, and other people resigned around him. The most powerful president in the world, military, had to escape in a rubbish bin to survive. (1:40) You remember the story of Trojan horse? Now they call it, the 'rubbish president.' He had to be taken out with the rubbish of the Air Force One. And then you understand how military force has no power force, unless you conduct everything the correct way. We see the same problems rising very rapidly within the Chinese and their work, and their interaction with the rest of the world, but in a deeper way. In a more ?? prominent way in certain ways, but this can be corrected. The Chinese haven't gone that far yet.

But we see a lot of things that in conjunction bringing Keshe Coin in operation, all these military forces and the what we call, political powers become meaningless because everybody has, nobody can do. The introduction of production of the materials systems which you will see like a microwave in very near future. You have the 3D printers, you have the same kind of machines that you produces you, if you want to make a screw in the house to do a job, you have no metal, the material ?? this system produces ?? will give you the metals for you, give you the screw, the combination you like.

We have had a major, major, major development in research of the Keshe Foundation in the past 48 hours. That will change a lot of things for the Keshe Foundation and for you lot. In creation of materials, in creation of power and energy, our research has turned up one of the secrets of the Universe. We knew it. It was just confirming it. It took 20 years to confirm this. (1:42) And as I said, what we developed in that Coca-Cola bottle, now has become a technology beyond imagination. And very soon we will show this technology. Hold on to your Gans's and through it you'll find energy same as the energy you get from the Sun. From it, if you know how to use it, you'll get everything you need to live in the dimension of the STM.

It's a major breakthrough, a massive major breakthrough. Quantum physics is through the window. Nuclear physics is ended. There is no need for fusion, there is no need for transportation. We have accessed the energy, conversion of the energy of the magnetic fields in motion. And it's a massive major breakthrough in past 48 hours from one of the research centers of the Keshe Foundation. This shortcuts a lot of our work even by years and as I said to my team, I'm back in the lab very soon because this technology we discovered, not discovered we understood, changes everything the Keshe Foundation and even in past two years, let alone past 20 years. We've been searching for this to understand it, and now we understood and it goes back to the essence of the Creation. Depends how you turn that mirror. Now we understand ?? this subject. And then when you have access to such technology, no military and political power has any meaning. (1:44) There is no politics. Peace does not bring with itself politics.

Any other questions?

Q: ... Is Iran going to be an early supporter of the new Keshe structure?

R: ... You are breaking up there.

K- I said, 'silence.'

R: Oh, that's why we didn't hear.

K- You've got to understand, we are committed to peace and we work with any nation. And we have learned over the past 20 years how to deal with nations. And something very interesting has happened in past year and once this completes itself, Iran will emerge as one of the three superpowers in the position of the technology, not military. We got to understand the Russia is on the verge of, if the British push a little bit harder in Ukraine, we will see the end of Kremlin. (1:46) It's disastrous what's happening. The only option left for Kremlin is nuclear warhead. Literally, especially in past three, two months since the British have walked away from the Americans, and only British ammunition is used with the help of Germans in Ukraine. Disasters are heavy.

We've seen the annihilation of the power of America. They don't even have... If North Korea decides to attack America, they have nothing to defend themselves with. Literally nothing. Everything was used in Iran with the false promises of Netanyahu. And crushing defeat on America in past three weeks, which you Americans are not supposed to know, has brought Mr. Trump to sign whatever Iran wants. It's for the Iranian leadership to say how literally, they pinned this guy down. He is even scared of his own shadow to travel in his own country as a president of the most powerful nation on Earth.

And, you know, we all know what the Versailles Treaty was, what the Ghent Treaty was in the 18th, in the 19th century. The new peace treaty is the total defeat for the American government and the end of the superpower. One day I explained how it was done. Israel was pinpointed to the wall, knowing one more bomb, would ?? do with them. While they were pinned to the wall, the American Administration was pinned to the ground. There is no, there is no option but to agree, complete, and what we call, the peace treaty, fully on the terms of Iran. (1:48)

If you are victorious, you don't sign on somebody else's term. Victorious team, or what you call, nation, always has dictated the terms. And what we see coming out of United States, every demand of Iran will be met. There is no choice. And what's come out of the new negotiation, all the Iranian assets will be, what we call, released. All the, everything else will be done and it'll be the end of what we call, United States as a superpower. And we'll see a lot of things, a lot of changes. This treaty, as... in the communication I was talking to a politician, is worse than the surrender of Germany in the Second World War, the way America has surrendered. And with it, Israel has finished.

There's two options. Russia using nuclear weapon on Ukraine, or America using nuclear weapon on Iran. And, both of them are out of question at this point of time, but anything can happen, when the cat is cornered, depends what it does, but American President has been cornered to accept defeat on the terms of Iran. And with that will go a lot of things, and automatically China becomes the only superpower in the world. We'll see. And how it will take shape. But as far as we know, America has accepted total defeat in this war,

which they created. And the only winner has been Trump's family signing 4 or 5 trillion contracts with everybody around. (1:50) If they can complete the contracts, it's a different matter. You'll soon understand. Don't look at the American, European news. Look at what they don't tell you in that news.

Any other question?

Q: ... My question today is, you talk about ionization by emotion. So lower strain ?? emotion create a certain type of ionization in a certain part of the body. So from what I understood, my question is this ionization made by lower strain ?? emotion is kind of create a Sun, a kind of Sun inside in the body, kind of Black Hole?

K- No, you understood it totally wrong. There's no such thing. You go back to understanding thermo, what we call, nuclear physics, then you understand what talking (about). The, the, what we call, biologists understand what I'm talking about. (1:52) But we'll see. No, no, it's not that term you have to understand the term of the nuclear, by nuclear then you understand how it works.

Q: Because as I thought is a kind of interaction more close to the Inertia, maybe.

K- No, no, no, no.

Something very interesting according to the Holy Books again we go back to the Holy Books. Sometimes around last week of October this year, and again next year is the beginning end of the what we call, a cycle of human race and this is what is in the Holy Books and everything else. And this last week of what we call, date is on 28, 27, 28, 29th of October of this year. And as the Jews were waiting for the Saturday to start the beginning of the end, that Saturday, which was the promised Saturday, became the end of Israel. I'll explain this, what happens.

One day I'll explain. At this moment of time, we've been asked to keep quiet about it. How the promised day that'll be the end of the state of Iran and the Jews were supposed to finish. That day they lost the biggest war. Exactly on that Saturday. (1:54) And it's in the, what we call, Holy Books, that the most powerful nation in the world will go down because of it. And we've seen the Americans gone. The second part of this prophecy was to complete that by 28, 29th of... or 27, 28, 29th of the October of this year, there'll be manifestation of the Messiah. This is what it was all for. We've seen the end of the, what we call, state of Israel, as was supposed to be. And you understand what happened at the end of the American superpower behind it. And strange enough, if you look at your screens, today is a Thursday, the, what we call, 20th of August. And the 29th of October falls on 666th teaching of the Keshe Foundation. A strange coincidence. Today on your fist 656, and 10 weeks from now, falling on the 28th, 29th, becomes 666, the 3 6's. Very coincidental.

R: That's about 1 in 10 trillion billion for that to manifest on that date, I would say.

K- Now you understand more. (1:56) Now we have to see what happens.

R: Are you sure you didn't plan all this 15 years ago Mr. Keshe? 12 years ago when you started these workshops. I have to start it today because it's going to be, you know. No, I don't think so. We never plan that far ahead.

K- We never even plan the teachings. Sometimes we've been for 12, 13 years now. I always say, I don't know what's going to do. Many of you have been in teachings with me, in sessions, while it's been the teaching time. We don't carry no pen and no paper. But look at the coincidences of the three sixes and the date given by our, what you call, the holy structures. On the day when Israel was planned everything to go to the world that night, on Saturday, a few weeks ago, with our work, whatever, aircrafts, many aircrafts, flown halfway from America in direction of Iran, turned around and went back. Because they realized the gravity of what is about to happen. A week later, we stopped the same process, because they were like wounded dogs. And, since then, they are pinned to the wall with it. But the most strangest thing is, what's going to happen on the 666th teaching, on the day of the manifestation of the Messiah. This is in the Holy Book of Jewish books. Let's see if it comes through.

Any other question? (1:58)

Q: ... Thank you very much for your presence among us. If I understood correctly, the breathing exercises you taught us are intended to allow us to harness the energy of CO₂ and Nitrogen from the air and thus nourish the Soul. My question is, would it be possible to enhance the effects of these exercises by using dynamic reactors containing CO₂ Gans, Nitrogen Gans or others.

K- The gases are not there for your joy. These fields are there for absorption of the Universal fields. In the body of the Man, it's very hard to create Carbon 14 to connect Man to the world of Universe, to Creation. And one of the nearest isotopes to it, in the construction of the plasma is Carbon 14 or what we call, Nitrogen. When you change the composition of the Carbon 12 in the process of exhale which comes from the lung of the Man, you create Carbon 14. You connect to the Universal energy (UE). (2:00) And that's the work. Nothing else. Where you have Carbon 12 connected to the dimension of physicality of the Man, to the amino acid (AA) of the Man, with a common denominator as the same protons, but the different combination of the fields. And Nitrogen is Carbon 14, connects you to the Universal Energy. Then when you have that connection, the energy balance is between the strongest and the weakest. You have Oxygen and the Hydrogen one. That's where the game is played. That's where you absorb energies of the Universe according to what body of the Man needs. 4 times 16 is 56, connects you to the Soul of the, field strength of the planet. The 16th, and it's combination of the work, is connection of the STM to it's, to the, the planet Earth, which gives the manifestation of the physicality of the Man. The Hydrogen is the field of the Creator. You communicate on AM in the body of the Man, Carbon 12, and then you work with FM in connection with the Universe, with Carbon 14, you call it, Nitrogen. And if you understand how to convert it, then this is how the system works. You understood the key. (2:02)

But there's a way if you play the right way, you can eliminate the Carbon 12, that the body of the Man works in the dimension of Carbon 14 or the Nitrogen, which allows the STM to transmute. But this is maybe next two or three years we teach you how. The Carbon 12 is which is keeping you to this planet. Nitrogen is the game of the Universe. This is why 65% of the air you breathe is Nitrogen. It's your connection to the Universe. But you like it to call it, Nitrogen, so let it be.

Any other question?

<< Knowledge Seeker have a problem with her microphone. >>

K- ... There's a problem with the communication with Iran. (2:04) She's in Tehran.

Q: ... When the human race evolves and manages to feed only with Cosmic Rays, will animals also no longer kill for food? Can you explain how this will happen?

K- We're all connected in the field. When they say the Man and the lion and the lamb will sleep in the same den, it's when we'll feed the STM. Once we'll, once learns in the direct process and give it freely, the rest will pick up with it. Because all will tune to it, we all have one connection. The key has been to create that balance. And temporarily the key sits in how we change the fields on the surface of this planet. Just enough for a few meters where the human race lives. Then the rest will follow. When you turn one magnet all the other magnets change. That's the key. When the first Soul voluntarily changes, the whole creation of created Souls on this planet will change. (2:06)

Any other questions?

Q: ... Today we know of four energy conduction systems in the human body. The number one, the blood circulation system, which is visible. Number two, the lymphatic system, which is visible. Number 3, the Melanin, Myelin and Nerve Brain System, which is visible. And number 4, the Meridian System, Energy Conduction, according to the concept of traditional Eastern medicine, known in China, Japan, Vietnam, etc. This system is invisible. Mr. Keshe, what do you say about the Meridian System, and how does it differ from energy conduction systems number 2 and 3 above?

K- Can you repeat that?

Q: Number 1 was the blood circulation system, number 2 was the lymphatic system, and number 3 the melanin-myelin nerve brain system, which he says are all visible. Number 4 is the meridian system, which is known in Eastern medicine, which is invisible. So, what do you say about the meridian system? How is it different from the lymphatic and melanin, myelin system?

K- The interaction of them in the shape and form, it creates a point ?? of reference for the energy in that position. <<Audio of Mr. Keshe breaks.>> (2:08) Meridians are created

that way. Because of the flow of the blood and its position, has... it creates its own meridian. But when you look at the cavity of the hip, because of the fields in that area, they create their own center. When you call it, meridian, if you understand what it means, what you talk about, is a mini-Soul for that area, central control as energy without the matter. That's all it is. Just put a name on it, make it complicated, then you made yourself your own religion. But that's all it is.

You have the hip, the lowest one, they create your sexual organs, have a special powerful ?? or characteristics and when they are, the energy fields, they create their own meridian. Then you have the organs, the fields of them, not their physicality of them, needs a central point that they all work with. This is why if you hit, if you shoot directly, it's proven scientifically, if you can change a meridian you can kill. Your whole system collapses. And all our meridians are not exactly the same, depends on your shape, your meridian moves according how fat you get, how thin you get, how your body moves, because the mass moves and the amount of magnetic field changes.

When you get one meridian, slightly, micro, millimeter moving because of your obesity, your blood pressure, whatever, you put the other ones in danger. They have to adjust. So when they tell you meridian, it's the central energy of all the physical, it's in a way the Spirit of your stomach, (2:10) let's say, it's the Spirit of your hip or your sexual organ. The one meridian number this and that. Change the meridian to a Spirit, if you understand, we call, this heart the Spirit. That's all it is. It's non-physical central energy fields where they interact and through it they find their position.

So, I think you can answer the rest of it yourself. Make it complicated, it makes it look very clever. Make it simple, we all understand then nobody is cleverer than the others. Just we have to understand the principle and that's all it is. Meridian is the central energy of the organs of that part. Then what's all these things, and then you'll be ?? in the Chinese and the rest. Nerves have their own system for the energy transfer. They are connected to other nerves branches of arm or leg or stomach. When it comes to the total energy fields of all the blood vessels, tissues, neural system of the stomach, there is one point which becomes central control in a way everybody shares we have, we like to have it there, then we know where we are and how it moves, if one moves that one has to move the other one. So change the medium to your Spirit of the stomach, or the Spirit of your Soul, central energy of the physical components, then that's all it is.

As Mr. ?? Wim De Grava, the bastard son of the King of Belgium said to me at the table, "Mr. Keshe, you write things so simple, make it complicated that people don't understand, then we can make money out of it." (2:12) I said, Wim, I write in the language that the Man in the back villages of Africa cannot be abused by a white Man like you. Because we all understand the truth, we understand the language. He is the image of his father, ?? Wim De Grava, one of the directors of the ?? of the organization of the Belgian monarchy, in stealing from their own nation... Any other question.

Let me explain. The great-grandfather of ?? Wim De Grava, or the King of Belgium is the one who paid every day thousands of Africans in Congo to be cut from their arms and

their legs and everything else, if they didn't achieve what he wanted. These people are ruthless and it's in their blood. And then when he collected the money he sold the part he divided to his own nation. (2:14) Then ask yourself a question, which king sells his... the land of a nation to a nation to get money for it? But you have to thank him. He paid for the patents that you lot have the knowledge and the patent of the Keshe Foundation. The, what you call, the poison pen, the money paid by the Belgian monarchy for the patent of the Keshe Foundation to be registered. Very strange, iconic and ironic. He paid the ?? Wim De Grava, or the Grava family of the Belgium, paid 'Red Circle' for writing the patent, and they paid for the European patent because they wanted it to be done, so that they could steal it. Because he brought Dyrk Lauryenssen to write the patent.

Any other question?

Now you know a little bit about the history of the Keshe Foundation. When you hold the patent of the Keshe Foundation, that you lot and the future generation, as a reference point for knowledge, thank the Royal Family of Belgium for paying it, and finding somebody who would write the knowledge. Is that basket with the baby in it, which they all feared, and then at the end became the Moses, which sank the whole kingship. Very interesting. Now we got to wait when this knowledge will sink the monarchies, as they paid for it to become. (2:16) We searched all the patent offices in Europe, somebody to write a patent about the Keshe Foundation, the knowledge. We paid, I think, three and a half thousand Euro, twenty years ago, to one of the biggest patent offices in Europe, in Brussels. They spent three months, four months, whatever they did, and they came back and said, "We cannot do this, and nobody can buy the patent for this technology." "We have no way." Says, "Give our money back." "Sorry, we did our work, but we couldn't find anybody." "So, if you do your work, you'll get paid."

And, one of the founders of the Keshe Foundation, his name is on the document somewhere, he said, ?? there's a company called ?? we went to see ?? IMAC in their offices, I think it's in ?? Maryland if I remember correctly. And we entered a room, I think it must have been about 10 meter long, maybe 20 meter long, I don't know, it was very long, I've never seen a room so long, what about 2-3 meter wide? It was a very strange room, with a table in the middle of it. I walked in with the notary of the Keshe Foundation, one of the most trusted men in Keshe Foundation. And by the way, if I die, he's the only one who carries my will and my testament what to be done. We sat with him and one of the first supporters of the Keshe Foundation, Knowledge Seekers, and there were three people, four people sitting across the table. (2:18) And they asked me, can you explain the technology, I explained. This fat guy got up and he started pacing this 10 meter up and down. He got me, not nervous, but I didn't like his behavior, I said, can you sit down. He said, we've been saying, I've been talking recently, whatever, that somebody soon will discover how to create gravity, and there'll be the end of the knowledge. And you walk in and you're done. What do you want? I explained to him, we paid this, we can't write a patent. He said, I know someone. He can write a patent. I said, we paid this company they control 80-85% of the patent offices in Europe. He said, no, no, no, no, there's one guy who can write it.

We arranged a time. They came to our house. In Belgium, tables, big tables, piled up a meter, some places, we couldn't keep it on the table, we had to put the document references on the floor, because we brought this. Everything which was said was referenced scientifically from other scientific papers to back that we are correct. And this guy walked around the table, he went through the pages, he saw all the research papers, and listened to explanations, he says, "I can write a patent." His name was Dyrk Lauryenssen. And ?? Wim De Grava said to him, "You write the patent, I pay for your time, and we pay for the patent." We said, "We are not short of paying." He says, "No, no, no. We want to pay for the patent, because this patent has to be written." And this is how the first patent was written.

And when we submitted the first patent, a few weeks later, (2:20) I went to the Belgian patent office to submit the second patent, was a medical, not the energy, miniature energy system. It was very much medical. When I came out of the patent office, it was a corner pile of papers. And I saw my original patent on top of it. And I said, "What is this doing here?" "Oh, it's waiting to go to the patent office. Our scientists have been reading it to assess if we can go for patent registration, that what we learn from it." So the Belgians had a good go at it. And then we, the patent was paid for, first for the Belgium and then the European. And we went to Dan Hagen with Dyrk Lauryenssen. I said I have to go to Dan Hagen because the board of the European patent office has asked us to go. He says, "I'm coming, I'm coming, I'm a patent writer." I said, "Okay, I don't know how long we go." We went to Dan Hagen two, three times by the request of the European Patent Office.

And in the first meeting with the European Patent Office, there were one British nuclear physicist, two Italian nuclear physicists. One of the Italian nuclear physicists was heading the meeting. It was his job to see this patent through. I spent quite some time explaining the science behind the technology, the patent. That time, patent had I think about ten, very few, less than a few tens of claims. (2:20) The British nuclear physicist, Mr. Keshe, you are a British trained nuclear physicist, I've been asked by the British government to be present for this, because this pattern is very revolutionary. The Italian Patent Offices, I've been appointed by the Italian government nuclear to look into this and I heard this because this is a big change. He said your pattern is written the wrong way. I said, what do you mean? He says this you have discovered gravity. You have discovered the whole evolution in the science we've been looking for. But it's written the wrong way. You cannot claim a natural phenomena the way you written your patent. I said, I'm the scientist I know the knowledge, he's a patent writer you have to tell him how you want to be done. And they spent quite some time we went for the second time to Dan Hagen with him and they explained how this patent has to be written that it has a value of money.

And then it was approved for the Belgian patent. And then they told us how to, they trained Dyrk Lauryenssen, so ?? they explained to him how he has to write a patent. And this patent through the claim of European patent, it became 340 claims, one of the biggest in Europe. No patent has been submitted up to that time. For this much because there were so many claims on it. But now it was 300 claims on the same patent. Then they changed the policy. Now in European patent charges are done by the claims, by the

claims you have. Because of this patent. And this patent was written and it was accepted. Going through the process of acceptance we opened the patent to world population free. (2:24) By giving it to the government. And this is how the patent was written. And it's the history of it. I've said that many time. This knowledge, this patent, is that Moses in the basket. That child in that basket brought the king down and his nightmare by slaughtering all the (scientists) male creatures that nobody will be there that he loses his kingdom. This technology is paid by a king. And it's that Moses basket, which bring the kingdom of Man down.

And funny enough, when the patent was submitted, this is why the King of Belgium came to that little remote in the mountain, exactly how what ?? I am going to do. Going to the mountain to bring the tablet, the King came to see the Messenger. And you've seen the photos of it. And he still lost.

About this time, not much far, on a Sunday afternoon, I was explained this before, for those of you who are new Knowledge Seekers, I was sitting in a cafe, everybody in that area in mountains of East of Belgium knew who I am, and I'm writing the Fourth Book, you was like people, everybody knew, in a little cafe. I saw a dog, a small dog next to me on the floor. I said, "Oh, you're a nice dog." I saw a woman next to me standing, a very dignified woman, and she said, hello Mr. Keshe, I said, yes, hello. (2:26) She says, I'm the Queen of Belgium. I said, Your Majesty, she didn't let me stand up, sit down, we have to sit with you. You don't need to stand up. (She) said, "The King wants to speak to you." He sat down, we had a tea and a coffee, or whatever was there, help of tea, and he made his threat. And I said to him, "Your Majesty, please wait a minute, I'll come back." That time, the three books, book 1, 2 and 3 of the Keshe Foundation were written, and they were in the back of my car, always had a few copies, because we had Knowledge Seekers everywhere asking, whatever. I went to the car, I brought the three books, I said, the kingship, your majesty. The only thing I can give is not my knowledge, but I can give you my books. I signed the three books to the King of Belgium, and I gave him the three books. He gave it to his bodyguard. That was that day.

I came back the following day to carry on writing my book. A lady who I used to see frequently coming shopping bread or getting herbal medicine whatever from the shop. She said, "Mr. Keshe?" I said, "Yes." She said, "When the king came to see you, me and my friend were sitting and we heard all the threats. And we decided we have taken pictures of him sitting with you. And I put it on this little chip. This is yours." And this is where we have the copies. We give, we released the pictures of the King of Belgium and Queen of Belgium. (2:28) The King came to ask for his Kingdom not to go down. I told him, "I go, you go King." He said, "I'm the King of Belgium." The February of that next year, I escaped on the 13th of February to Italy to save my life, not knowing that my wife betrayed me. And I said to him, "When I go, you go." And he abdicated the same year, a few months later. I went and he left. He's not a king. And, amazing enough, where we escaped to, in part of Italy, is the home land of the queen of Belgium. We didn't know why she was Italian from that point. And then again, assassination, poisoning and the rest of it, between Belgium and the Belgians. The history of the Keshe Foundation. The king

tried to stop that child to be born. And that child in the basket became his demise. Same with this religion, but this time it's the demise of the kingship on this planet.

Any other question?

Q: ... Does recognizing that we are made in the image of the Creator mean renouncing the self that seeks supreme truth? Is union the liberation from the fear of rejection? Does accepting everything, accepting the other, mark the end of our beliefs about the world? (2:30) Could discovering that everything is a secret Joker linked to the immense magical beauty of love experienced within, be the moment of instant enlightenment and transmutation, is this true peace?

K- You call it, you call it, whatever you like. If it brings you peace, if it brings you understanding of your life, that's all that counts. The wisdom of life is the purpose of the teachings and nothing else, and it has to be done by (the) person itself (themselves), not by anybody else.

Any other question? Or shall we call it a day?

Q: ... A question about chronic fatigue. Can it be related to a deficiency in the 80% of the energy we receive from the Universe. How can we repair the root through which we receive this energy?

K- Chronic MS, FMS, or whatever you call it, is the physical side of the energy, not to do with the what we receive. What we receive is always the same, nothing changes. The gift, the beauty, the bounty from the Creator is equal to all. It's us who puts up that barrier, what we don't want to receive. (2:32) So, it is nothing to do with the 80%, it's what we refuse to receive from that 80% that brings us to that point. And it's all connected to the emotion. So we refuse the love, and not the love is given. Have you ever tried to kiss your child and it says, "I don't want to kiss"? You kiss today, you kiss tomorrow, you kiss next year, and when the child is 18 and 20, it's still the same kiss, it's the love of the father. It's the child who refuses it, according to his wish, and how clever he thinks it is. And it's the same with the Creator. You create your own cancer, the 80% doesn't stop coming. You play with the 20%. That's why chemicals and food additives and these things create cancer. You play with the 20% but the 80% has never stopped, never changed. Shall we call it a day.

R: Thank you Mr. Keshe.

K- Thank you very much. Please start registering your businesses, your shops, or your cakes in the house, or your brooms you make, or your painting, and sell it in Keshe Coin and see how much. Don't be too greedy because these people have only two and a half thousand a month to spend. Look after yourself and see you next week. (2:34)

R: I see Dean has raised his hand. Would you take a question?

K- Oh, he's still alive. Good. Hi Dean.

Q: ... Mr. Keshe, you've brought up so many incredible topics again today. You reach back into the knowledge of the Foundation. You've taken us to the pinnacle of Creation. What more is there? One thing I would say, one thing...

K- We haven't even started yet.

Q: I know. I've interacted with you guys and the Foundation and the Souls, all these beautiful Souls, and one thing I've come to realize, you do see the future. You know what's going to happen before it happens. And I've witnessed this and been part of this for quite some time now, and I know it's so. So what's going to happen to the position on this planet if the governments, if the world leaders, if the people, if the Souls do not interact in the correct manner, what is the destiny of humanity and all the creatures that are present here? We know that eventually that we're going to go into the Sun and that the matter state changes, but what about the condition before that, you know, the generational conditions that are going to create wealth within and beauty for humanity and all the creatures. Where's that going to be Mr. Keshe? ...

K- Energies of the Creator are nomads of the Universe So, you don't live on Earth, the energy is created somewhere else. (2:36) And the future of humanity sits with how the humanity understands the cycle of Creation, and how moves before it's moved. And at the end of it, we all become energy, is what we call, the Soul. But do we get evicted by force, or we travel by will? That's the total differences. Not only us but our future generation. What comes as part of us?

Q: What should it be Mr. Keshe? Really? What is the definition of it?

K- Short term Man will go through a cycle of peace. Man will come to the point of maturity to accept peace. Long term, those who leave this planet will find peace in the Universe. Those who stay, decide to stay here, they last a few thousand years and they go back again to the ground. The inventions of the Man today will be scars on the space of this planet. Be it the refineries, be it the ships, be it the gun, the schools and everything else we created. And future generations and thousands of years again, they'll find these and say, "Oh, there was a civilization." (2:38) We are a family of people, what I call, the three generation. The father makes, the child tries to hold on to, and the grandchild destroys everything the two made and hold on to.

We are going through that cycle of making, rich in knowledge. And then, many of us will leave this planet. Many of us. Those few who are left behind, will go through the cycle of destroying themselves, because they cannot reach, they cannot understand how to survive. And then we go back to the no Man land. And then becomes a story of pyramids. Somebody else finds what we built, what is left, and then say, "Oh Man, had a knowledge." What did they do? They were the Aliens. We become Aliens of our own great, great, great children because they go through the third cycle. And this is not the first time it has happened on this planet. That won't be the last time. And the whole

structure is to next cycle, even in thousands of years from now, or when the Man leaves this planet stops that self-destruction of the other. If our generations in a thousand years to come will not kill and understand how to live all together the way it's supposed to be, then we find a land of honey and milk. (2:40) Otherwise they go through the same cycle.

Chinese I think is have found steel pipes deep in the grounds from 11,000 years ago. So Man had the knowledge to make pipes, Man had knowledge to make machinery much better than today's these quantum systems, we have them even in different shape or forms, we have discovered them. But it's a cycle. We are now reaching that father who works hard and become rich, waiting for our children and grandchildren in thousands of years to destroy everything and start again. But this time we're trying to ingrain it in the STM that the killing part doesn't come, doesn't matter where Man resides.

Q: Mr. Keshe, the killing part, so that's the bit where I think humanity, so they understand not to use weapons to kill and things, but when it comes to consuming, eating, humanity, this learning curve is steep for humanity, and find this a difficult one to understand?

K- It's not, it's just that we've got a habit to put something in their mouth, if you shut that hole, a lot of it will change.

Q: Yeah, but many people find that a very difficult, I personally find that a very difficult thing to overcome.

K- It is not difficult. It is not difficult. It's just getting used to it. You offer, it's very strange. You offer an Italian girl from north of Italy a drop of water between breakfast and lunch. It's like you're giving them a knife to kill them. Because they lose the shape, and then they want to eat something. (2:42) You offer them food from lunchtime to 6 o'clock in the afternoon. It's just to give them a poison. They want to keep the shape, you know, that Italian body. And they go through the torture of it. And they got used to it. Even though when you look at their faces, it's all tortured face. We, you lived in Italy, you know. I lived there six years. I've analyzed their faces, how they do. You go to South Italy, they're all fat and happy, because all the food comes from the South, all fresh. The human to, in a way, you call it, fasting or to eat much, reduce eating, it's normal. At the beginning it's very difficult, but once you get used to it, it's as normal as ABC. I used to eat breakfast and lunch and dinner and all made up to be you have to have three courses. Nowadays, one course sometimes goes over 30 hours. Don't feel it. Unless I get a headache, I do. And I never thought you can do this. I'm sure if we train, we can extend. Once a week, then once a month, because then we rely on the energy from outside. The only good thing it had for me, I had to, what you call it, lose a lot of weight. But it gets to the point that you can't lose anymore, that's the minimum you stick to. But you can, you can. I've done this for nearly 2 years now, a year and a half now, 2 years. You can do it. (2:44)

Q: I've done it Mr. Keshe, I know what you speak about, because I've gone through those... One moment I... the emotions overtake and you eat different things and consume it, and it's the emotion. As soon as you balance that out, then you're starting to receive the

other energies from the foundation, from the other Souls that are present, from the technology. I know it works, I've felt it many times both ways, and it is linked 100% to the emotion, that...

K- Yeah, but you have to control, you have to control that emotion.

Q: Yeah, this is the difficult thing.

K- Yeah, yeah, yeah. You have to control. Not to control, you have to understand. Once you understand something, you don't need to work for it. This is the hardest part. I always say to my children, if you understand, you don't need to remember.

Q: Do you understand yet Mr. Keshe?

K- A lot of us do.

Q: Sometimes I understand it and I really understand it. Then another time it's sort of, I don't know, you get this, the STP.

K- Can I tell you what's wrong with you?

Q: Oh please, let the world know, please.

K- You're a human. You're a human. This is all, all it goes back to, you're a human. There is not much you can do.

Q: That's why I have this, that's why it's difficult to let go Mr. Keshe because I know the Soul, when the Soul was present, I had this amazing experiences, it was quite unbelievable and it still is, I still get them, but I know the Soul has moved to another position and the STP is very rooted. How do you get through this with humanity because it's such a big learning curve that you're trying to bring forward, it's so huge. (2:46)

K- It's huge for you but it's actually, you know when you have the class of 100 it's very easy to handle the 10. Earth is one of the smallest planets in the Universe which carries life.

Q: Yeah that's what we forget, that that's the part that we forget.

K- And the other part is, the part is, I've been the teacher of the 100 class. So this is not much difficult, just these this lot is a little bit disobedient, that's all. I know we'll get to it, we understand how. Slowly, slowly. I hope everything's okay with you, have you sorted out your problems?

Q: Yes, it's ongoing.

K- You are a human, put it that way.

Q: I'm a human, I have to go through, you know, I really don't, you know, yeah, absolutely. But the dates Mr. Keshe, that you mentioned that 666 and everything. ..

K- I haven't mentioned anything. I have not mentioned anything. It's just there, it's in the Holy Books and I said coincidence 666. In the Holy Books 666 it's mentioned, connected in some Holy Books to that date.

Q: Yeah, but the connection is that you mean you said about my name and the religion and stuff and I never knew about any of this. Where do I come into this position, you know? I didn't ask for this in physicality, but my Soul has brought me into this. Before I was with the Foundation I'm very normal life I suppose, not so normal, but normal and certain interactions. Now it's very complicated, sometimes very difficult, and very, very...

K- You know why? Because you're tested between the two worlds. That is a part. That is the part. And if it stays with you 25 years and you have a child, it becomes ingrained in the next generation. (2:48) And we'll see the Children of Mitra in 20 years. Once Man learns how to create.

Q: That's the next thing Mr. Keshe. So that goes back into theology and the human body, and all the desires that the humans have, and all these things that link us and ground us, it's a very difficult. Unless you touch the Soul and the Soul comes back and really elevates you. It's such a an area of, space gap of quantum jumping leaping to a position that yeah. It's going to be a long drawn-out process or in an instant if...

K- It's been going on for billions of years, don't get excited on the few years is nothing. Somebody put a black screen Rick, everything has disappeared. ... Yeah, you see, it's the cycle of life. We have accepted a lot of nonsense and a half of the problem is to cleaning up the nonsense, that's half of the problem. And the other half is accepting the totality and not just a nonsense you thought. Once the humans start accepting both side of the dimension of the Creation, Energy and matter state, then 90% of the problems are solved.

Q: How so Mr. Keshe?

K- It is. Education. (2:50) There is a pattern in the cycle of life of the Man. And let me explain in a different way. We know every single billionaire in America, or most of the very rich ones. America has 1,000 billionaires or some 1,000 and a few. And a lot of them they're there. China have 1,120 I think today or something in that region. China has more billionaires than America. We hardly know any of them. And those who became very famous because of their wealth have disappeared. In America you're still to become rich to be famous. In China when you become rich you hide.

Q: Why so Mr. Keshe? Why do they hide?

K- They don't hide because I live my wealth, but I don't need to show it to no one. I don't. Because most of these billionaires, you see, their parents were villagers in the villages of east or north of China. They came from nothing. And that attitude in life brings them that way. And this is why Chinese don't know how to handle wealth. You cannot find Chinese. The way we handle wealth in Europe is unheard with the Chinese. (2:52) And they are trying to bring them to Americanize them, but it doesn't work, it's not in their nature.

I have a very bad habit, which I put things on the table, because to me if you, if there is something wrong. If you are stupid, you are stupid, so I tell you, you behave you stupid. If you steal, I tell you, you are stolen. Why? In Chinese culture, you can't do that. You cannot humiliate no one, because they consider themselves so humble, that you don't need to destroy. You understand? And in the West, we don't have this mentality, and it's very hard. I was one of the meetings with our staff of the Keshe Foundation. I told them, "You don't understand our work. Just resign, walk out." And to them it's a shock. Nobody has told them this. They don't understand, literally don't understand, the culture which we have in the West, openness, we can talk. Here is always fear. In China, it's always fear of doing something wrong that you get punished for it. Because they've all been punished by the emperors, they've been punished by the ruling party, they've been punished. So, in Europe, in America, we do things and if it goes wrong, we go bankrupt. We ?? start another company. Here, are afraid even of the mistakes the other they made, that they might be connected to them. The fear in this, in Chinese nation is so deep, so deep it's unbelievable.

Q: That's not a good thing though Mr. Keshe, a fear of that, that creates the wrong fields surely.

K- They can't live without it, they've been ingrained into it. (2:54) They cannot do, it's, you cannot take this out of the blood of Chinese, impossibility. And straight forwardness, the way we talk in the West, oh, ho, ho, ho, oh, ho, ho. I create enemies more than I make friends usually in China. Because of the way we speak. No fear. We understand in what we say we stand for. The Chinese don't. You sit with me in some of the meetings of the Keshe Foundation with the Chinese, especially those who just joined us in different parts. I see them, I see the fear in their eyes when I speak to them, which is stupid. They shake, they don't know how to handle the openness, the straightforwardness. You sit in the Board, I've sat in many Board meetings, in many meetings with Europeans and Americans and the rest over years. Everybody has an opinion, they have an opinion they speak. In China, only the top guy speaks, the others don't. Very, very seldom he gets subordinates to put questions across. Because if he bothers the boss, he shows that little bit of ?? cleverer than the boss, then it has consequences. Speaking openly in China has a punishment, in, at any level. Boardroom, factory floor, and I'm trying to change this thing. They try, they put their foot in, but they don't put their foot out. It's the way we were born. So, it's very easy to understand human culture, and how we came, how we've been brought up. (2:56)

Q: Mr. Keshe, so what you're explaining there, so we have the West and we have all these things and the wars and all that have happened and all the infrastructure that's been built around creating mayhem for control systems, but then we're getting this new condition being built where you have these big countries that are now establishing a new wealth connection and they're building massive systems and becoming very powerful again. And then you mention what you've just mentioned. It's the same thing again. So it always leads back to the same position of, you know, the totality of how you can actually establish a peaceful connection that's not in fear, that's not in a divisional position. It always leads back to the Soul and the creation point of the Ethos of the foundation. And it just goes round and round in circles. It seems.

K- Let's see if we can change it. The thing is when you, .. when you need to watch what you say, what you do, because effects what you get, how your life will be, it is different than I have enough to live, nobody can touch me, and I do what pleases me to please others. And this is going to be the future of humanity. I put this one to our lawyers very recently. As we have a dilemma. Our dilemma is in Keshe Foundation, Chinese operation, wages are more or less in a district controlled, (2:58) in a way, hidden or more straightforward or whatever, according to which city you live and how much is the expense of that city and a lot of other things. So, let's say a thousand Euro is average, for a man, and that's a very good wage in part of China. Don't forget the poverty line sits around about two and a half, what do you call it, about 40, 50 dollars. Something in that region. No, it's 15,000, it's about 200 Euros, something like that.

Now in Keshe Foundation, we have put to our lawyers, international lawyers, we want to give 2.5 Coins a month, two and a half thousand Euro per month, those who work for us in the Keshe Foundation, as part of the structure, like everybody else does. The question is, who will turn off our work when they can ?? cash the two and a half, or anybody will run our operation? They get four times more from us, not to work than to work. I'm sorry, two and a half times. Then it comes to the governments. Governments make money out of what you do, you put your labor in, you make money, you pay part of it to the government, government spends to produce it, the roads, the schools and the rest of it.

So we say, okay, in the life of a Man in China, he earns 12,000 a year. He works from 20 to 60, 40 years. (3:00) So the return of a Man's life, is \$400, \$400 what you call it, \$12,000 by \$40, \$480,000 in his life. Half a million is a worth Man gets capital produced. Now we are giving the government, let's say, taxes on this guy on 10% or 15% of what he earns. So the government gets 48,000 on the life of a Man at a thousand. Something in that region. Now we are paying a hundred thousand to the government for the same life in ten years and waiting forty years. That's what the government gets. Now the question is, will the man will turn up for a work? Now that he can get two and a half times more than what he would have done work, he has to work 7 days a week, 8 days a week, I call it. And a government that gets money without actually anyone working, because you breath, they get the money already. Then it comes to the point that both human race move from what we call, slavery of money to live, to the luxury of living because I don't need...

Would we see the mayhem of people on the street shopping with their 2,500 Coins or 2,500 RMB or Euro per month, which is about 20,000 RMB, or would we see people, "I work anyway, doesn't matter, because I have that money, if the company pays me or not." Then working for the company becomes irrelevant. Because One Nation policy pays for you to live. (3:02) It's no good pushing the price of the potatoes and the tomatoes very high, because everybody has a higher earning, because now we transfer energy down the telephone lines, you get it for one cent. Does it take the incentive out of the Man to expand in knowledge, Or being free, Man becomes more creative, understand more about himself, and becomes free. Second option is more possible.

Q: Mr. Keshe, I... Sorry to stop you. I just realized that... that your... as I said before, your chess game, your knowledge is so incredible, that you're moving ahead. And so when one only takes one of each plumber, whatever you, electrician, whatever you want to say, a bank or whatever, it takes one to commit their Soul to do this, then it opens up to all. So to make these this, this economy, this new ONN Units and you know, the Keshe Coin and all function, it just takes one from each to then to come forward. And then it's, then it, as I said, it's opened up. And that sort of realization makes me realize how this will operate and function and really will create this new dimension of wealth within for the whole of humanity and all the creatures. I'm starting... it takes a little while to understand.

K- I just lost you when you said, it takes one.

Q: So when it takes one. ... One plumber, one banker, one electrician, one tailor, whatever it is. That one creates for the whole of humanity by committing their Soul by committing their essence, (3:04) the plasma opens up, and that creation point from the Creator, you know the position that you come to the planet to help. You can then open this up and I now understand how this formation of the One Planet, One Nation, One Race will work I always, we always thought how you're going to put it all together, but you are such a master chess player and repositioned everything. I'm starting to see the connecting the dots the picture and how it can actually manifest and how it can bypass all the current systems, and I can now see why the government's and all the others are very worried, because they can see they know these things that you've created, and it is, it's a master plan it's. It takes a while for it to sink in, for it to actually, for the realization of what you've done. Thank you. Really, thank you.

K- You're welcome. We played this chess game many times. Put it that way. The more you play, the better you get...

Thank you for today. We call it, a day. We've been here long enough. See you next time. And look at that number of 666, see if it happens that way. Because the other date we changed. We were hours from disaster, a few weeks ago, and it was diverted. And some of the world leaders were witness to it. And hopefully next time we'll see what happened with the 666. But I'll play this game for a time being. Thank you very much for today and see you next week. I hope with less interruptions. (3:06)

R: Very good, thank you. So we have a 10 workshop countdown from now. All right, great.

K- It's not ours, it's theirs. They like 666. We will carry on for years to come.

R: I am sure we'll pass through unscathed.

... << Message from Universal Council:>> ... (3:08) “We the Universal Council, invite the Keshe and Universal Family present on the earth in unifying at the Soul level, every time every day at 9pm Central European Time. We the Universal Council give from our Souls and invite all of humanity to elevate the Soul of every leader in every nation to work as one Soul in one direction to achieve peace as One Planet, One Nation, One Race.”

656 KSW – August 20th, 2026
