

Summary of Pattern of Creation - The Mirror of Creation - Rectify Mistakes - Ca Ionization Cancer - America Destroyed Itself - Gases - Meridians - Future Humanity Introduction to 656 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

Today's workshop is the first time Mr. Keshe has, after around 14 years of teaching been able to summarize scientifically what the saying, "I made Man in the image of Myself" means. We made most of this summary in last weeks workshop but we'll go over it again briefly. There are different names for things that are the same in essence, but might have another function. We might say that the love emanated from the Creator are the Cosmic Rays (CR), or we could say the Universal Energies (UE). The CR would cover the whole Unicos, while the UE would be called that, when the CR enters our Universe (U). We could even say that they are the same as the Hydrogen (H) Plasma fields, which are the building blocks of Creation. All of these are really the same thing with different names. But matter state scientists don't know about the CR, and they made up something they call, neutrino's and try to find them in water buckets they put deep down inside the Earth. It's strange because what they are looking for, has actually become them. Just by knowing this, the Knowledge Seekers (KS) have become more advanced than those with the PhD's. This is the beauty of the Plasma Science as taught by KF, it makes everyone equal.

Last time we discussed how the lymph gets energized from the food we eat and the air we breath. And we eat to get the 20% of the energy by creating Gans seeds to attract the 80% from the UE. We could not survive just on what we eat, but we didn't have that knowledge before. The UE are absorbed through the melanin in the skin and converted to useable energy and passed to the myelin and into the lymph. The lymph physically connects to the blood system through 2 small vessels above the lungs. The lower number of the diastolic blood pressure tells at what pressure the lymph goes into the blood. The lymph enters the blood and mixes with it, and then feeds the cells through the capillaries and part of it re-enters the veins to be taken back to the heart and lungs for being energized. And part of it eventually makes its way around the lymph network and goes back up the body to enter the blood vessels between the shoulders. It's like the cells are saturated in lymph, which carries the energy to create, maintain, and replace them. The scientists only focus on the blood and what they call oxygenation. In Plasma we look at how the lymph changes field strength as it delivers its energy to the cells. Most likely this is why the blood changes from darker red to bright red when it leaves the lungs after being energized. We know this from our Gans's when we see them change color and wonder why. Years after having the CuO Gans in my room it has become darker, because I have received the energy from it. The fields transfer just by near them.

The lymph is the source of the energy and the body has set up the 3 systems for creating and maintaining cells. The lymph passes between the neural and blood system and the cells are created, just like in our Gans Boxes. The Soul of the Man (STM) and the Soul of Physicality (STP) interact to create the emotion of life and they interact with the different Inertias and MG fields. And this is all taking place according to the Time, Place, Position, and Possession, in what we know as the dimension (D) of Earth. But this same process of life takes place anywhere in the U where the correct conditions come together. It's the same pattern and process of how the Creator was created. All of Creation follows the same pattern. Therefore, I made Man in the image of Myself. It is very simple, and yet there are a lot of different pieces that we have been learning over the years and we have to put them together in our Minds so that we can understand them. Today is that day for harvesting the fruit of our work. This completes our knowledge of understanding of how our physical bodies are created, and are being created each moment. But this is only from the physical side of our life according to how we appear and what we can comprehend at this time. The Energy side continues to dance and find new ways to interact with each other.

When we stand in front of a mirror it reflects our image back to us. That's how we know what we look like, otherwise we wouldn't know. We need something other than ourselves to make a reflection. Today, Mr. Keshe used the symbol of the mirror to help us understand how Creation is a reflection of the Rays of the Creator. Before he taught us that a single Ray creates the U. The single becomes multiple by interacting and reflecting off of itself with itself, and then forgetting. The image of the Man on Earth is the reflection of the Fields of the Creator on the mirror of the GM fields and the Inertia of Earth. It's good to get an object and put it in front of a mirror while contemplating what an image is, and go deeper into this teaching. The image produced by the mirror of the Inertia of Earth will be different than the Moon, or any other planet in the U. This is why he always says, it depends on the Time, Place, Position, and Possession when talking about created things. Every single thing in Creation is a reflection of the Creator. This is how the One becomes many. But why is there so much variety? To understand this, the next time you go to a Circus or a Fair go and stand in the center of the 'Room of Mirrors' and look at your countless reflections in all the different shaped mirrors. There are so many twisted and what looks like deformed images of yourself. But they are not really deformities, they are different manifestations through the interaction of your fields. Then if we put the Creator in the center, we get all of Creation. In essence, this is the Knowledge of Creation, which is the interaction of the fields.

This reminded me of the school of Tibetan Buddhism called Dzogchen. A person who practices Dzogchen is called, a Dzogchenpa and they usually carry a mirror on their chest. I received a lot of knowledge from Namkhai Norbu Rimpoche who wrote a book called, 'Crystal and the Way of Light.' In Buddhism they don't like to say, the Creator, instead they call it the Void, or your Buddha Nature, or the Presence. It's just terminology, the essence of the experience is the same. It's one of those mirrors reflecting the Truth. Norbu Rimpoche, in very simple language taught a lot about the Mirror and looking for the Source of the image. He never answered that question, because, by trying to find the Source, we become the Source, and we'll feel the Presence.

In the Universal Community (UC) they understand that all Beings are images of the Creator. Therefore, they don't eat other images of the Creator like the lamb, grains of rice, or any other created thing. In fact, they became so wise they decided to close their mouth and nose. This is why when we hear true accounts of people meeting Aliens, if they have a mouth, they say, it is just a line that doesn't open. The same with the nose. They don't speak because they know their Soul and communicate their emotion through the fields. They understood that all Beings are the image of the Creator, and they would not even think of eating their own Creator. That would be like us eating our own Mother. But humans as a race do not yet have this knowledge. It is being brought by the KF and through it we will stop killing and learn how to open up to receive the Universal Energies. We will learn that when we kill, eat, or commit the crimes of the U, we are actually destroying ourselves. The balancing of the fields happens in a subtle way that we don't recognize, and that's why we think we can get away with our wrong behavior. In ancient Persia when the people followed the teachings of Zoroaster, which actually came from Mitra, lying was considered the worst crime a person could commit. The root of the problem is that the Man tells himself the biggest lie, that he has not been created by the Creator, therefore, he can do what he likes. And when Man starts to lie, then he kills to protect that lie. Once society falls from the path of living the Truth of Creation it continues to snowball and slowly worsen until it destroys itself. The society of Man has again reached this point. If and when we come through the transformation, then we should only create the 'Children of Mitra,' then society will become perfect and remain perfect because everyone will understand and live in the Knowledge of Creation. This knowledge has been hidden from Man for thousands of years and when we again know it, we will be able to decide whether we want to be a slave of the P created from the interaction of the STM with the Soul of the Planet, or to become a direct reflection of the Creator and live detached from P on this planet, as it is our home.

So, the next time we want to do a crime, first we should think about what the results will be and whether it will become a true reflection of the Creator's fields. Is our reflection going to be from a perfect mirror or one full of the twists and turns that got deviated from the wrong path taken by our ancestors? We should try to rectify the mistakes of the past by maturing ourselves to understand the truth. Then we'll make a True reflection of the Creator and be able to join the UC. The way I understood the following teaching is that, when we get enlightened to our Soul we'll travel the Space at the same strength field as the others and then Space won't appear empty to us anymore. Our scientists say there is nobody else out there, it's just empty space. Is it because they are hiding from us, and don't want to get polluted by the 'naughty kids'? Or have we cloaked ourselves in a lower field strength, and that's why we can't see anybody else? Rather than trying to expand ourselves to understand, we say nothing else exists, then we can ignore our own crimes, and create our own fake happiness in our minds. We should know that our Soul has accepted to take on the suffering caused by the misconduct of the Man in P, as he has got his hands covered in the blood of other living things in the U. All of these Souls are themselves reflections of the Creator according to the field interactions of their own environments. The human race is known as the parasites of Creation. Slowly we are changing Man through the work of the KF with the Plasma teachings all the way up to

the ONN Units and the KC. And now for the first time in well over a decade of teaching we can summarize the process of how our life is created by the Fields, and how we are made in the image of the Creator. The parasite will be transformed into a beautiful butterfly and become a true reflection of the Creator, and the envy of Creation. As all roads lead to Rome, so too, all fields of the Creator end up back where they started from, in the heart of the Creator.

The Keshe Coin (KC) is continuing to move ahead with a huge amount of work going on in the background. We thank all the KS and Mr. Keshe who are giving their whole being to see this through. When the KC starts spreading across the planet we won't have to borrow money from the Jewish Lobby who are draining the blood of humanity, nor the Rothschild's who create wars to become richer. Because they control the ideas the Man is allowed access to, everyone believes they are getting away with it and nobody can stop them. This ignorance, and the fear people have of them is what keeps them in power. But Mr. Keshe is letting us know that the Elites wonder why the Rothschild's die of the most painful and horrendous diseases that have to be kept secret. The 'Books of the Deeds of Our Life' gets balanced regardless of the made up wealth, position, and fake titles of the Man. Now, how will the Rothschild's try to grab the KC out of the hands of humanity, but the more they take, the more humanity will receive. He also said, the KC has a Soul and is conscious, and those who try to cheat will pay a heavy price.

An unexpected development happened with the KC. It is now being made open for everyone to use the KC even with their non-plasma businesses. This means the plumber, the farmer, a man down the street who makes a bicycles for sale, the psychologist, and everyone else can use the KC to run their business. He encouraged the housewives to bake a cake and trade it for KC with the neighbor who sells strawberry jam. But everyone has to become a member of the KF to use the Coins. This is an evolutionary change that is by the People, for the People, and through the People. This was the intent of those Quakers who wrote the American Constitution, which has now become totally corrupted, and actually become the enslaver of humanity, instead of the beacon of freedom it was meant to be. Negotiations are now under way for some governments to start trading in KC.

There was a question about the Soul remaining alone without interaction, and without connection or interaction with the planet. I understood this to be about existence itself, and confirmation of existence. He explained many times that the Soul exists on its own, is self-contained, and doesn't need to manifest P, and at the same time always remains connected to the Source. But to confirm we exist we need interaction, this is where the STM interacts with the Soul of the Planet and creates the P. And we got stuck only believing in the P as real. The Western philosophers say, 'I think, therefore I am,' this is only the P part of the equation and does not include the Energy. Mr. Keshe answered, the Soul is multi-functioning. Therefore, it exists in different dimensions at the same time. This is not the case in Western mentality, in the recent past our internal program got switched to the digital binary system of zero's and one's. In the past decades they came up with the word, 'Quantum' which really just means the smallest quantity of matter or energy. My understanding is that they have changed their definitions since Mr. Keshe has

been teaching for the past 20 years or so. In the past they said, in quantum computers they can only be a zero or one. Now they added the term called, Qubits, which can be both a zero or a one, or both a zero and a one at the same time. This is nothing other than the Plasma as defined by Mr. Keshe. But they are not allowed to mention the KF, instead they just start use the terms as if they are theirs. Then they can continue to make money ignoring the truth. This is the ethics of Western science.

He explained this before, that inside a plasma it is only DC. This means it is singularity, without the duality of Yin and Yang, or M and G. It is only at the boundary of the plasma where it interacts with its environment that M and G interact and create AC, or the matter state. Science has never understood this part about magnets and magnetism, so the whole understanding is built on a faulty foundation, and that's why they always have to change their theories. In plasma the theories don't change, but the manifestation of matter state changes according to how the fields interact. It's a huge difference.

How the emotions create cancer was told with more details. The 3 types of cancer are those caused by emotions or psychosomatic, injury to the cells, or evolutionary causes. I understood that for the cancer to occur a Ca seed needs to be ionized and that starts the whole process going. That ionization can occur through injury or trauma to the cells and evolution. And the emotions can cause ionization. The emotional part is what the scientists cannot understand. They see the relationships but they can't put it together because of lack of knowledge. When the Soul lives only by love, then the ionization of the Ca cannot occur. The body won't produce that specific energy to ionize the Ca. The emotions lead to our creation, but also our demise. In Space the Soul will only be joyful, because all the needs will be fulfilled through the UE, there will be no fear of losing anything, and Man will only be a giver, therefore, there will be no cause for cancer to arise.

In the history of humanity Military power has always been linked to Political power, but with the KC, we don't have Military or Political connections. Instead we are working through the power of the individuals, and this is what has created a massive fear in the European and American governments. They pretend to be for individuals, especially the Americans, but now we are producing something that truly is for the individuals and makes each person free. Why is it such a threat? Because the Technology frees the STM so that it doesn't need the P. While their power depends on controlling the physicality of the Man. Then Mr. Keshe went on to summarize the current situation with America and their attack on Iran. He will explain later, but due to recent events regarding the Jewish prophecies on specific dates this has lead to the self-destruction of America as a superpower. On Saturday August 8 according to the Jewish 'Holy Books' they were supposed to destroy Iran. The planes were loaded and on their way to Iran, when the Methi told them certain things that would happen to them, and the President called them back. This backward movement has resulted in the defeat of America as a superpower. The prophecy actually stated, that the most powerful nation in the world will go down because of it. And now we've seen that the Americans have gone down. The second part of the prophecy is to be fulfilled on October 28th or 29th with the manifestation of the Messiah. And it is just by coincidence that the 666th KSW falls on October 29th. The 666

is from the Book of Revelations in the Bible and is called, the 'sign of the Beast,' or some say the 'Anti-Christ,' etc. But nobody really knows, these are all made up ideas by powers that want to rule humanity. In this case they are using 'reverse' psychology, and they want to scare the ignorant masses from freeing themselves. We have to see how it will turn out. Mr. Keshe said, that the Jews will have Trump declare his son-in-law as the Messiah. Regardless of what they try to do, the teachings will go on, and the STM will continue to be elevated.

Not only are we absorbing UE through the melanin and myelin system in the skin to feed the lymph, etc., but also through the gases we breath in the air. The air is composed of 78% N, 21% O, and other trace elements including CO₂. It's very hard to create C14 that connects Man to the Creation and UE, but the field strength of an isotope of N is very close to it. It's interesting that the composition of air is 78% N. When C12 is exhaled it becomes C14. C12 is also connected to the Amino Acid, it has a common denominator through the protons. That's a deeper level connection through I think the plasma, that we have not been taught yet. The C14 and N energies allow the STM to transmute.

There was an interesting explanation about the Qi Meridians of the Chinese and Asian Medicines. He said, that the organs and certain areas of the body create their own Energy centers or Souls. He didn't clearly explain how for example, the liver has its own channel traveling along the leg and why certain points on that channel have particular functions. But we can understand that the STP of the Liver can create its own channel, as well as all the other organs. This then would also apply to the Chakra system. He said, the hip area creates its own Energy Center or Soul, like for example the sexual organs and what power it has. And perhaps it has an energy channel. Or does it get mixed in with the other channels? The blood and neural system have their own meridian, but we don't hear about them. By slightly shifting the meridians you can kill a person because it collapses the whole system. This has been confirmed scientifically and we have heard about Masters of Qi that can do this. When our body weight changes it can change the meridians, because they are M fields that get changed as the body mass gets moved around.

A KS said that he has witnessed that Mr. Keshe knows things and what is going to happen, and he asked him to tell us what is going to happen to humanity, will we make the change? Please read the Quick Index for more complete information. What I understood is that soon humanity will mature to create peace on the planet, but it is not guaranteed to last forever. That all depends on whether the 'third generation' will accept the deeper changes. In humanity historically it has been that the father makes the changes, the son tries to hold onto them, and the grandson destroys what they created. This is a symbolic pattern of the human who believes himself only to be the P. Regardless of what happens the goal is to get the Man to stop killing and ingrain that in the STM so that wherever he goes he will not spread this disease of killing around the U. The bottom line is being able to control our emotions. Mr. Keshe has done this on plenty of other planets and he will eventually succeed here too. The important thing will be for Man to start creating Children of Mitra, and then in the future accepting that as the only way to create children, then we will see eternal peace.

Thanks for listening.
