

Universal Sound Needed for Life - Creation Through Vibration - Swish in Vessels - Clean Toilets of U - Altitude Determines Behavior - Tongue - Missing Enzymes - Parasites Introduction to 653 KSW

Note: Not checked by KF interpretation by KS of KF Brazil

One of the themes in today's workshop was about the background noise of the Universe (U), or we could say that hissing sound scientists hear when they listen to deep Space. It's the Universal Sound, and without it life cannot exist. Is it the same sound as what the spiritual Masters of India call, "OM"? Mr. Keshe did not give us that answer, instead, he left it for us to ponder about it in a scientific way. What is that hissing sound in the background of the U? Is it the sound of M fields rubbing up against each other that eventually leads to life? Many years ago a video of two fields interacting and becoming a plasma, showed the light, but there was no sound portrayed. Today, the importance of the Universal Sound was stressed so much, that without it, life cannot exist. And then we have the sounds in our body. There is the pulsing of the heartbeat, which matter state scientists say is the most important and that when the heartbeat stops, we are pronounced dead. In the Plasma Science, it's not the heartbeat that is the important one, in fact, we can actually live without the heart. The important one is the swishing sound made by the blood flowing through the vessels when the gates open and close. Those gates are what keeps the blood from pooling in the lower legs and feet of the body of the Man. But again, why is the sound of the blood rubbing up against itself and the walls of the vessels so important? What I remember, is that we were told the emotions are M fields from the interaction of the Soul of the Man (STM) and the Soul of the Physicality (STP), and they are carried in the blood. How is that swishing sound is related to the creation of emotions? In Chinese Medicine they talk about wind in the blood vessels, but that is only in relation to when it is out of balance, and not about creation of the cells. This workshop is in a way, a time for putting together some of the new knowledge we have been given in the past months, and to go deeper into understanding how our body functions in reality, so that we can create the process of transmutation.

If we get cut off from the Universal Sound we'll die instantly. As Man is keen on finding new ways to kill, if he can create a Faraday Box that blocks the Sound of the U then he will have achieved the ultimate. Mr. Keshe said, it is extremely difficult to do and that he only had it put into the KF patents as a "death code," so that Man could understand that it is possible. But it has never been done, nor will it ever be used. As it was said before, killing a Soul in the U is not possible, and we should not worry about it. And remember, that nobody can do anything to our Soul without us letting them do it. Independence of a Soul is sacrosanct.

We put a video in the KF Brazil Playlist about 25 sounds recorded in Space. It's very interesting to listen to them, and even more revealing how they interpret what they are hearing, which is without understanding of the M field interactions of plasma. One thing this points to is that the sound Mr. Keshe is talking about is not these matter state sounds, but the sounds the Souls hear and responds to. As long as the Universal Sound is singing the Soul can create the cells, and the melanin and myelin through the skin can convert the Universal Energy (UE) which feeds the STM and in turn it feeds the physicality (P). When this process gets disrupted then we see different conditions and diseases arise. Salts solidify in the Middle layer of the skin and that leads to other things. As the Micro is in the Macro, the Sounds of the U are also in the body, where we have the pulsing of the heartbeat, but more important is the swishing sound from the gates opening and closing in the blood vessels and the blood flow itself. This is also somehow related to the importance of energy created due to the blood flowing, and not just the blood itself. In matter state we totally ignore the Energy part of the blood. And now we have to put together all these different field interactions that lead to creation.

The lymph gets charged up with energy from the food we eat and from the UE through the MM system. The sound of the heartbeat and the energy from the heart muscles and in the blood delivers the physical energy to the lymph, and that interacts with the UE, which create a vibration, and this is how the matter state of the body is created. The third part to this is the field strength coming up from the planet. When a human being is created on this planet we have to consider all these different interactions like the sound and vibration of the Earth, heart, physical body, and the sound and energy that come from outside the body. All of this dictates the shape, color, and everything else the body manifests. The reason we have a bone structure is part of this, and is because of the sound of the heartbeat of the Earth and its GM fields.

The 3 things of the vibration of the heartbeat, energy from the blood flowing in the vessels, and the UE coming through the MM system, combine in the lymph and they create a given cell in the body. In this process we have the different Inertias, there are the Inertia of the heart, blood vessels, UE, and Earth interacting to determine the physical features, and the fourth element is the Inertia of the Emotions. When these four elements come together and find balance with each other they will create the different cells in the body, determine all the features, decide on the emotions and behavior of the Man. There is a lot here to put together in our heads, but this is how Creation takes place and now it's not a mystery. The Man has not known this before. And then we understand that when we travel to another place the Inertias and fields of the new place will change the features and characteristics of the manifestation according to the destination. I understood, that the emotions created by the STM and STP are in the blood as MG field strength, and the Inertia of the STM keeps that. In other words, what we felt and experienced as a human is recorded and we have access to it even when we change to different manifestations of physicality. Today we are the human body, tomorrow we might become a Planet Zeus body, and so forth. All time our Soul has access to the memories of those existences.

To be able to start transmuting we have to overcome our attachment to the human body, as the manifestation of who we are. For one thing, the bone structure which resulted from

the interaction of the fields on this planet won't be there when we leave Earth. For example, the worm, snake and jellyfish don't have bones, so we shouldn't think that we need to always look like a human body. The example of the Knowledge Seeker (KS) who saw herself as half fish and half human is not the 'Mermaid' syndrome, but attachment to the human body. Even in our dreams when we can't accept the reality that the human body isn't the only way we can live, we see ourselves as half human and whatever. We have to learn that when we transmute we'll become plasma fields and we won't have these human features. We will be dynamic Energy with emotion, and we'll see ourselves as a light. When we see ourselves as light it means we have become detached from P. When people say they saw the light as they came back from being 'dead,' it is because their Soul interacted with the fields of the U in their environment. It's not mystical, it's the interaction of the fields. Where we can travel to in the U is dependent on the strength of the fields of our light, Inertia, and our emotion.

What we do in the physical life on this planet determines how much field strength we can gather and where we can go in the U. It's like those government research buildings where you have to get a security clearance to go to different floors or into different research labs. This is where we have the power to decide what we want to do with our lives and how we want to live. If our parents and society didn't help us to learn the proper understanding of life, and we weren't able to correct ourselves, then we may only be able to clean the toilets of the U when we leave Earth. But if we follow the Ethos of Mitra, help others, and realize our Soul, then more access will be given. It's us, by our behavior and attitude that determines our 'credit limit,' and not some angry 'Old Man' in the sky. It's the Creator who has access to the whole building, and we are striving to reach Him. But even when we become part of the Creator, it still takes a very long time, and we carry our 'dirty' work within us. I understand this to mean that it is not about what they called, Heaven, where you go to a good place. The life of the Soul is spent learning and growing, and even when we reach higher levels of consciousness we still grow. We may wonder why do these 'bad' things happen to us when we are trying to be so good? Well, for one thing we might only be looking at the P part of it, and not understanding the depth of Reality and that there are many different dimensions interacting with each other at the same time. That's why it's a long way, but it is not boring. It's only boring when we get attached and stuck to a narrow view of life.

He said that, these teachings are unknown to the Universal Community (UC) and it's the first time they have released this knowledge. By this we should understand that having UFO and advanced technology is not necessarily a sign that a race is advanced in Consciousness. But according to Mr. Keshe the races of the U are advanced enough to know that eating, killing, and destroying is wrong and that's why they stay away from Man, because they don't want to get dirty from interacting with him. For example, Trump tried to cheat and bribe in every way to get the Nobel Peace prize, and when he couldn't get it he started to kill more, and finally he made up his own prize. These people will end up cleaning the toilets of the U. But even poor and homeless people, when given the chance will start killing. Therefore, the only solution is Man has to elevate to be able to take energy directly from the U, become detached from P, and understand the Knowledge of Creation. This will all come soon through the Plasma Technology. Man has to give up

killing before he can be given the Knowledge. When we say, I made Man in the image of Myself, we shouldn't think that the Creator is jealous of the Man killing. The Creator is not a killer, He has whatever He needs, and He doesn't need to kill to gain something. When Man receives the knowledge he has to become humble and not try to use it to dictate over others. Mr. Keshe is an example of a true Being of the U, at his position the "I" becomes the Creator. This is the same as what the Christ said, 'I and My Father are one.' The religious leaders had him killed for saying it, and later they forbade people from say this. But we should understand that when the Soul says this, it is enlightenment, but when the Ego says it, it leads it into darkness and huge problems. Therefore, we should strive to understand our true selves and have control over our emotions and not let killing, jealousy, and possession rule us.

Through the interaction of the fields we control the emotions, and Inertia of emotions, then we control the Inertia of the Blood through breathing, and with it control what we absorb from the UE and the Inertia of the Universal Fields, then the Inertia of the Planet becomes irrelevant. In other words, we can manifest whatever shape, or race we want on this planet. This is instantaneous and gives us control over the 'control panel' of the Creation, which includes its MG fields, emotions, and Inertia. This is why we have to have our Ethos correct. To be able to change a planet like Earth Mr. Keshe has to be at this level. This is very difficult for human's to understand, because right away we start thinking about the power and what we can do with it. It's more about understanding how Creation works, and then the Soul decides what our role will be. When we understand and master the World of Creation we'll be able to transmute. Our Soul will not do wrong, but it will also not stand for lies, or the wrong being done to others. The example, given here is of how when a person who thinks and does wrong gets with pure Souls, he ends up getting trapped in his own wrong doing. So it doesn't mean you have to physical fight to protect others, you do it through the Soul's intention and the power of balancing the fields.

In the past, warriors were trained to defend the poor and the helpless and they usually had to fight to accomplish it. This is the reason BodhiDharma taught the monks Kung Fu and they became the Shaolin Masters. Now, when we control our emotions we can use our intention through the power of the Soul to stand up to wrong doing. So even the physically weakest person can defend the helpless against the most powerful criminals, or wrongdoers. Of course, there are some that don't want us to know we have this power inside us. When we can manage the emotions of our Soul, we can control the emotions of the Universal Fields, and even the STP. This points to the Universal Power we have inside us, and why Mr. Keshe is trying to get us to access it, rather than becoming dependent on technology for it. Then we will be responsible to change our world, protect it from getting corrupted, and safely carry the generations forward into the future.

What I understood is that, what we cannot control is how the local emotions and Inertia fields of the Time, Place, Position, and Possession will interact. It's not clear what this means because they are the lowest level fields, and we tend to think we would have control over them. What I think he is referring to, is that we don't have control over the angle at which the fields interact with the local conditions and that determines the

manifestation. The example he gave was the tree line on the mountains, above which nothing can grow. That is set by the angle of the Inertia of the Planet, and above that point the Amino Acid of life does not reach, and nothing can grow there. That is separate from the angle of the Inertia of the Planet that caused the mountains to rise up and take their shape. He also said, it has to do with the fields of the Inertia of the emotions of the Planet. But the main point seems to be that the angle of the field interactions have to be considered when understanding the manifestation in P.

This is also the case with humans and it is related to the altitude of where Man lives, the breathing, and the interaction of the emotions. An example for this is that in the high Himalayan mountains a woman can have 5 husbands. This is due to the conditions of the field interactions at that altitude, whereas at the altitude for the Arabs one man can have 40 wives. The emotion of the environment determines this, and that is a foreign idea to us. When we travel the U, its emotion will dictate to us what we will find as an acceptable way to live. And this is the reason certain parts of the U don't have very many elements, because the emotional fields don't match the Inertia of G field of the plasma of the entity that wants to manifest there. He will teach us this by creating Universal Fields and then letting us experience them and how we can manifest ourselves in them. First he will have to teach us how to create the Inertia of Emotion, so that we can learn to negotiate with the U Fields which are a higher order. They have their own sound and heartbeat and when we can synchronize them to resonant with each other and become one, that's when Creation takes place. The four elements we talked about before have to synchronize and then P can be manifested. This is how the different cells in our body are created.

If you have been studying the teachings for years then you understand that their depth is beyond anything humanity has received up to now. But the key to applying them has not yet been given to us. Of course, it lies with our emotion, but we don't really know what that means. And those who have obtained realization gave their whole Being to it, and suffered for years trying to achieve Enlightenment. It seems the answer to this is that, as long as the Man kills he will not be given the "key" to understand it. But at the same time, without the knowledge he cannot understand how to stop killing. What came first the chicken or the egg? Do we physically have to say, okay, I suffered enough, now I am going to stop killing? I do think this is part of it, but it is not the whole story. There are those who work day and night to bring the change, and there are those who don't even know it is about to happen, and yet they will benefit too. There are multi-dimensions at work. And has the Creator already made the decision that Earth is going to change, and we are in that process now? But it is not known how it will turn out. It has also been said, that Man has to decide, but at what level? It's not a simple human level, 'yes or no.' As Mr. Keshe said, it is up to us, we decide for ourselves at what level we want to experience the U by our behavior in P. And he has made it very clear, this has nothing to do with joining a religion, and living a narrow-minded life. Rather it is about taking the internal journey of discovering our own Soul, identifying with it, and letting it guide our life. The Soul is the true Guru and Inner Guide that takes us Home to the Creator. And when we get this right, we'll start understanding the process of the emotions of the four dimensions which lead to the Creation. And this will lead to detachment from P. Then

we'll understand that during all this time, Man has used the wrong mirror to see the image of the Creator, and that's why he is confused and lost in the Illusion. This time the Change is going to come and everybody will understand by their own intelligence. We don't want anybody to translate, not the soulless AI, the hypocritical Priest who are really businessmen in disguise, nor anybody else. We will learn by opening to the Emotion of Knowledge, developing our intelligence, and applying the knowledge and feeling and becoming the result. Even these introductions and summaries are only a 'jumpstart' to get the 'ball rolling,' and then they won't be needed. Because each of us have to bring the knowledge inside ourselves and make it our own. Then nobody can take it from us, because our Soul will know if they are speaking the Truth or not. No one will take the crown of Kingship, because it's too big of a burden on the Soul, to risk falling away from the Path to the Creator. In the end it is us who decides for ourselves whether we will clean the toilets of the U, or have greater access to play throughout the World of Creation.

When asked about breatharians and whether CR technology was an upgrade, he replied, there has never been a totally integrated system for receiving energy given to Mankind to live from. Hopefully, soon we'll teach you how to create a single unified field, that Man will get all he needs to live from, then you don't even need to breathe. In the future, when we close up the mouth and get rid of the stomach, etc., there is one thing we will keep and that is the tongue. But it will most probably become spherical and part of the control system of the body. The tongue sits under the sinuses and puts pressure against the roof of the mouth, this in turn helps with the conversion to NO (Nitric Oxide), which changes the blood flow, pressure and those things. There is a lot about the tongue that will be opened up later. It works with the tonsils, which are frequency makers that converts the emotions of the Soul and decides about the vibration in the body. When they are removed the body has to make up an imaginary replacement to carry out its work. The tongue in a specific position controls the blood flow and brings the emotions to resonate so matter in the body can be converted to energy, and energy back to matter. The reason the breathing exercises are not very successful is because we have to learn how to use our tongue. There is a lot to learn and it is related to feeding the Soul of the Cells. The heart is not that important, it's the glands that will convert the energy for the Soul. In the U entities don't carry a heart, it's only for creatures like Man that haven't developed very far.

About 10,000 years ago Man had 440 enzymes for digesting whatever food he ate. Today, there are only 200 enzymes left in the stomach and the reason for it has not been disclosed. The result is that our bodies are getting overrun with parasites. The body had been trained with those missing enzymes to handle the parasites, and not that is not there. If we keep going the way we are in a thousand years we might be down to only 50 enzymes. The Medicine Men of the past had the wisdom to know how to use the herbs to compensate for the missing enzymes. The two best plants are cloves and black seed (?? Nigella sativa, or black cumin), but you have to know how to use it. Soon KF China will come out with some products to help with this.

Mr. Keshe alleges that the secret policy of the Israelis is to kill Palestinian terrorists and then kill their children and harvest their organ, which they sell to synagogues all over the

world. After searching the Internet I couldn't find anything about it. There was one small line that only says, there are wartime allegations by Palestinians saying they received back the body of their relatives with missing organs. Strangely, they were doing this to their own people, but they said they stopped it in the year 2000. The Israeli Parliament is going to allow the 10,000 Palestinian prisoners to be executed, because Netanyahu has already sold their organs to synagogues around the world. This race has been cursed, and we will see the result of it in the future.

When Man elevates to the point of not having to eat then the organs for processing the energy won't be needed and will cease to function. However, it takes millions of years for evolution to replace for example, the lungs. In the interim period the organ can become infected from not being used and it can lead to death. The solution is to transmute the body with the organs back into energy, and then re-manifest a new body that is able to survive on UE and without the organs.

There are more topics you can read on your own. This workshop opened up a lot of new ideas for us explore. And we have to watch what happens as the ONN Units begin to arrive in their new homes and the change for humanity begins.

Thanks for listening.
