

659th Knowledge Seekers Workshop September 10, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Universal process of life - give & receive energy - 2-way system - give what don't need; 80% from U & 20% Earth; Lower & higher energy; Body - nuclear system - absorbs radiation; Gets rid of waste or leftover energy; Conception everything planned - Mother links you up to U get rid of waste - use her energy connections; Aura - energy boundary - changes when eat; Emotion part of U energy in Soul; Our waste feeds other lives in U - matter state; Complex composition of taking & giving energy from U; Detect M fields - see where energy goes in U; Harvest physical life of Earth - harvest energies of STM - feed other creatures; Convert higher order energies into lower - to feed; Flip one atom - others flip - doesn't matter where; Trillions of cells - feed others; Kidney cells - coded to feed other lives; Not only take - giver too; Responsible for actions - through emotion - body converts energy and feeds other creatures; Without knowing - father of 100 beings; Old man takes energy from grandchild; Take what want from me - I tap into Creation; STM never stops growing; Give through touch & emotion - transfer information of fields you need; Father gives himself cancer - stops giving - punish himself by not receiving - energy backs up; Be a giver - forgive - live by Ethos of Mitra - become part of U; Understand ourselves, behavior, emotion - combination of physical energies & UE; Match emotion of STM with emotion P - transmute; Transmutation - ask for fields - go to Moon; Creatures of U don't eat food - mastered knowledge of UE - giving; Heartbeat, breathing, emotion: Missing piece; Taking pain from others - right attitude - gratitude; Give with purity of heart - unconditional love - be free and detached - Soul is home; Souls same - dog or prince; Diet - reduce 80% to 60% - what happens to those you feed; King can become dog; Absorbing UE brings enlightenment; -273 C matter stops - STM free; Can't freeze M fields; Man made huge assumptions and lies to himself - dismisses what cannot understand - distanced himself from Creation; Feeding from P will end when Soul matures & detaches; Still connected to Mother - feeding others; Be generous as Creator - givers; Not understand unconditional love; Start spontaneously transmuting from own knowledge; Here to upgrade Man understand Creation; Next 25 ONN Units getting completed; Negotiating 3 governments Keshe Coin (KC); Not replace national currency or lose control; KF not take over governments - make life easier; Not Cryptocurrency - can't speculate; Governments want make money; KC bring stability; Cryptocurrency - gambling system; Poor live through KC; Stay with us for we have arrived home; G & M fields not matter state physics - about M field strength & interacting with other fields; Friction zones of fields in opposite direction - how fields created - visual manifestation; Fields interacting with itself - appear as other fields - confirms manifestation; One field forward - one backward; Dust - confirms wind on sand - M fields same; M moves away & G towards; Dust of C; C hard to create - from Deuterium; Deuterium exists everywhere in body - balanced state - stored energy reserve neutron inside; H - unbalanced - only proton & electron - why take sugar; Tritium - 2 neutrons - both plasma & matter state same time - releases radiation, radioactive; Deuterium's together become C; Written in patents; Poles of Saturn, Jupiter, every planet, hexagonal shape of fields - like stable Deuterium - double state - plasma & matter; 6 Deuterium's - confirm a C - by-product; Hexagonal fields Soul - halo on head; More

shapes & sides elements in U; Determine how planet moving; Implication for Medicine; Walking barefoot - receive from Earth - balance your fields; Fire Walkers - float over - ash creates separation between Earth's fields; Different entity above; Zoroastrian Temple Sacred Fire burning - Fire Keepers breathe ash - purest trees - get separation from Earth - like Black Soil, S America; Understand knowledge - not copy; Update China agriculture - first year still contaminated; Weeds take poisons; Pure conditions by 2028; All elements in body Gans state - outside atmosphere matter - Inertia of Earth, blood, Ca- bones - type of matter; CR Balls, feedback - use different ways, not get wet - diagonally across body; Enter Medicine in China; KF Chinese medicine - hands spread fields, don't wash; Use CR for changing Soul - peace - not have to clean - dynamic; Biochar; Tests on seeds; Guided meditations, Enlightenment Game; Long & complicated questions not answered; No junk DNA - scientists ignorant; 20 years after paper on Black Hole; Use common sense - look from Energy side - learn, do independent investigation; When people transmute - life continues; Man wiser but more narrow-minded; China now in control; Fall of old empire; Human travel outside planet - Mars; Or use T to live on Mars; Death not final position; Memories - facing death - not afraid; Assassins in Belgium, Canada, Hillary Clinton; Death threats constantly - not panic; Reason for everything, solution; Live without fear, stability in higher purpose; Detach, stay correct in life; Countries reaction to KC & ONN; Same as God's love; Continually tested - how handle emotion; Ask why Soul is testing; Lot of different answers to same question; Negative people create negative life for us - get us to believe it; Change environment; Body & Soul same - channeling different energy, depends; Emotions - M fields in motion; Understand own circumstances; Problem - stick to belief's even when wrong; Learn to live in Soul; No forces against KF - target not to destroy; See everything positive - negative blocks; Change from victim attitude - learn lessons, manage; Success from within ourselves - outer circumstances don't matter; Two different worlds, use Soul to support P; Not like situation - work out through Souls - bad things are good; Find own strength; Work at night Soul D; Depends what you expect to get - or outcome they set; From Antwerp understood how to deal with governments; Why bother about matter state; This time change totality of Soul of Planet; Chinese assassination attempt; Belgians root of all humanity's problems - hold people by weaknesses; When no weaknesses - they fear you; Memories give strength in what you do; Not looking for anybody's approval.

ENGLISH TRANSCRIPTION

(:16)

K- Thank you very much. Good morning, good day to you as usual wherever and whenever you listen to this series of Knowledge Seekers programs from Keshe Foundation Spaceship Institute. We welcome you back and hopefully we can do more and learn more from each other than before.

In the process of teaching of the past few weeks we're trying to understand more about energies which we use, we have, we receive, and we give, and we do not, we could not, or we have not understood the process. We talked about the energies we receive from

Cosmos that is feed us. But you have to understand that if you keep on filling a balloon with air it will expand and expand and one day or another, one point or another that balloon explodes because it cannot take more. So if we are taking so much energy, 80% of what we do daily from the environment and the space, we have to give something back. (:18) To keep that figure of 54 kilogram, or that bodybuilders of 120 kilogram. It's not a one-way traffic, it's not that we take 80%, but we take 80% of the order we need and sometimes we give higher order (?? back) because our body is a nuclear system, absorbs radiation, and sometimes lower energy bodies. So our 80% of the intake is not a one-way traffic, there has to be 80% of waste which goes out too. But how this waste connects? Where does it know to go?

We are a factory, we produce a thing, we have a customer for it, otherwise we don't produce. From the minute we are born, we are so well ?? (rehearsed) that we know by 6 months you have to be that weight, by 12 months you're going to be that weight, by two years you're going to be that weight, that height, that we use to look at the intake of the physical matter and what we give out as a physical matter. And then somewhere in between they have convinced us chemistry works, and then some things gives and something takes, and energy goes in the cell, the water goes another position and then it becomes you walk and you breath and that's it. But this process has an outlet, it has to, because simply we cannot keep on taking 80 percent from the Earth. (:20) We take from the Space, we take 20 percent from Earth and we see how much waste we produce every day. What about the 80 percent we take from the Space and we don't consider it because through the process of the birth, through process of the first initial contact of egg of the sperm, the waste disposal system is already set up?

(The) Mother just doesn't take your waste in her womb while you're in there. She already links you up with the rest of the energies of the Universe (U) that she has a connection with. She has established a long-term connection over her. Okay, I go to the school, you go to the same school too. I go to this restaurant, you go to this restaurant. I tap into the restaurant of the Universe, but at the same time I know where to give back what I don't want. or when I finish with what I eat in the what we call, 'table of the Creation,' from the energy point of view. We as human being in the technological boundaries of our lives have reached to what we call, the Aura. Scientifically we can see it. We see it changes. We never understand the changes because we always see in what we eat with changes. The emotion is part of the energy of the Universe which we have in our Soul.

How do we get rid of or how do we connect to other part? We become a supplier for the time we live on this planet to another life. We are the gatekeeper. We are the gardener. We give life to others in the balance of the way we do in the World of the Creation of matter state. How do we connect to these entities in the Universe that they take what we don't need from the second, (:22) from the instant that the Soul of the Mother and the father in a connection to each other lead to the creation of the new Soul? Who connects us to? Where is the waste disposal? Why don't we see any what I call, restrooms as they call it, politely in the West? Where do we dump the energies which we use taking a higher or lower order, we release higher order or lower order back into the system? Why our body uses radioactive materials? What's the purpose of this what we call, complex

composition of taking energy from the Universe and giving nothing back? If that's the case does it come to the point that when your Soul reaches the maturity that is taken enough and hasn't given anything back and jump back to call yourself the point of death? I've stolen everything and I've given nothing I'm matured and now it's time to go.

But the world of science tells us there is a field what we call, active around our body it changes dynamically and we call it, the heat we call it, the Aura, we have systems which can detect it. But once the Man develops the system that detects it there what we call, magnetic field, then we see a different thing than just what we see as Aura. We see how our life energy balance after what we take from the Universe goes to. (:24) We in the process of the Creation we are not just creator of children, we are not just creating a job to survive, from the second we were seeded in the womb of the Mother we already being given all the connections where the waste disposal system is.

In a way we can see in the what we call, agricultural level what we grow, what we harvest from our physical work. What do we grow? What do we harvest from the energies of the Soul of the Man (STM) while he's alive and he's taking so much from the Universe? And where does the waste energy, energy which are not at the level that the body can't deal with anymore, goes to? Are we feeding other creatures? Are we just a processing system? Are we what we call, a conversion system because of the Man in taking higher order and giving lower order, gives order to those below who need more energies to live? Then we see we are not just consumers, and the life of the physical life of this planet, from the second we were conceived, we became the feeders of those who need the energies we release. It's very simple. As it has been said, when you turn one atom, the other atom turns to doesn't matter where it is. So it has a place to feed it to, to be connected to. (:26)

So, you have trillions of cells in your body, they receive vast amount of energy from the Universe, who they convert it to? What does trillion cells of the body of the Man feeds a trillion cells others in the Universe, and our kidney cell is not just taking whatever from the blood. It is coated, it is sat there, it is a structured to feed such an, animal such a life in another point in the Universe, because it's connected to it at the field strength. 'I'll support you to live I have somebody who gives a what you call, the conversion, the shop is open.' Now you understand, we always look we've been brought up to look at what we take, what's to our benefit. Now we look, we looked at the benefit in the matter state who are we nourishing in the fields of the Universe.

Now you understand you are responsible for your action because your emotion in what your body converts feeds something down the line, creates a life, you are the supplier. Without your knowing you are a father of 100 you're the feeder of 1 trillion creatures in the Universe. This is not the theory, we can prove it, we can show, it can be done. Take an old man and you put and give him a grandchild. Watch him before seeing a grandchild, (:28) and watch him after meeting and hugging, and cuddling the grandchild. Why do the grandparents love their grandchildren? They are a source of energy, some of which is still connected to us by what we gave to the parents. We are takers. Why do we

feel good when somebody is tired ?? you say, come on, I'll give you a cuddle. You don't feed it, you connect through the dimension of the fields of the emotion.

So, I always said, take as much as you like, I have enough. There is no shortage, there is no lack of, you can tap into me, and I can tap into the World of the Creation to, for you to change the fields of your emotion that I cannot feed you in the dimension (D) of physicality (P), because I work, I convert some of these vast amount of fields I take from the Universe into emotion of love, giving and by cuddling you, by kissing you, I transfer that to you that you feel better. How many times your children when you say, come on I'll give you a cuddle, says, daddy that was so good, I feel good now. Because it's the essence of the evolution of the maturity. Puberty of the Man happens in the age of 10, 11, 12, but the puberty of the STM never stops, it just keeps on growing, it needs more. Every age, every stage has its own field strength. I'm short, I can work and give you food on the table. (:30) But I give you the touch, I give you the emotion, I tell you, I love you, which transfers that information of the fields you need to you.

The point comes when a father cuts his love to his children because it doesn't suit him. Is it that he receives so much energy over years to create this child, now he has nowhere to go, now he has to dump it because he has no customer, the customer was the son and the love I gave, now I have to absorb it I create my own cancer. So Man has not even understood the connection with the dimension of the interaction of the fields of the 'food of the Man' on the table of the humanity, on the 'food of the Man' on the table of the Creator. When you take too much, because He gave you so much to love this child so much, and you change it to hate, I don't give. The minute you don't give is when you punish yourself by not receiving. But you receive you can't stop, it piles up, it's a dam which is going to crack, but it doesn't crack, it solidifies, it becomes that cancer to you, in the body of you.

Now we understand why Man has to be a giver and forgiver, and live by Ethos of Mitra. When Man understands that Ethos of Mitra work both for the physical dimension, and the dimension of the Universal Energy (UE), then Man if he can bring the two together, succeeds to become the 'Passenger of the Universe,' as now you become part of. And if you understand this is more important to them than to us, it's more important to understanding them than us. (:32) Then we understand ourselves, then we have to understand our own behavior, that our emotion is the product of not the physical dimension of the energies, but it's a combination of the Universal Energies which we receive.

Go back to all the teachings of past few months and years I keep on talking about the emotion of the STM and the emotion of physicality of the Man. And if you can match those two, understand what you receive and understand what you have to give, and you don't become that 'Scrooge' to sit on everything, then you understand the whole concepts of the transmutation, because then you ask for the fields which takes you to the field of the Moon and you are on the Moon directly instantaneously to the dimension of the emotion of the Soul. And then is it good to bring the physicality, then I think about it.

Then it comes to the process of understanding the process of Creation. Then you understand why other creatures of the Universe don't carry cattle farms, don't carry fish farms, don't carry orchards of the animals of their world when we see them. So many of people over decades, centuries, thousands of years speak about Aliens, how many herds of animals we have seen they brought to us? How many of them we've seen with a plate in their hand eating? They have mastered the understanding of the knowledge of the Universal Energy, (:34) and in that process what I give, brings me back.

We have understood the process, but we have not grasped the idea of the Creation that it works on two levels, matter state physicality of the Man and the dimension of the fields of the Universe, which feeds them. Now a lot of you are in this what we call, entanglement of the heartbeat and breathing, and emotion, and the rest of it in past few weeks, how much do I breathe, how much do I give. All that touches your physicality, because you're controlling your physical condition. There is a piece of puzzle which has been missing in that structure. And it's not, it's not missing for us, it's missing for you, because you never understood.

The process of the breathing and process of holding and whatever else, is to connect you with the dimension of the fields of the Universe, which connects you to the Soul of the Physicality (STP) of the Man we call it, the Spirit of the Man. How many times you have taken a pain from somebody for even one second? Because it was genuine. What you have received back for it, we are not so, you are not so thankful and grateful for it, that you lose more, and what did you say to them? Didn't I help you? (:36) Didn't I do this for you? What you did was to the emotion of the Man. And if you understand that process, if you understand the stages of the life that when you give with the purity of heart, when you give what we call, unconditional love, then you understand what it means to be free, to be detached. Where I lay my head is my home, because my home is the Soul of me which is free anywhere in the Universe. I have to lay this body somewhere that I can go to my home which is the Universe I travel ?? with it.

I had a very interesting experience very recently in past few days. It's a hot summer time, workers are tired and they literally sleep on the pavements, some literally no t-shirt, very little clothing on them and they fall asleep. I look at them and I think where is the Soul, they have nothing to do with physicality, and it's not one of them, it is tens of them they were all sleeping everywhere on the pavements on the benches in the big cities. If Man can be so detached that he can leave his physicality on the middle of the road what you call, on the pavement, why are we fighting for? (:38) Because he knows I capture him back when I come back and I move on. If a dog can be born in a nest in the ??, and a Man can be born as a prince in a palace, is there any difference between the Soul of the two, in the eye of the Universal Community, in the eye of the Creator?

Now you understand,, always you looked at what you eat I hate 200 calorie I reduce it to 150, I lose some weight and the rest of it. What do you do your diet with the Universal fields that you take? Have you ever done a Universal diet? I'm not going to take anything 80 percent let's reduce it to 60. Game of losing weight dimension of physicality is the characteristic of the Man. Have you ever seen a dog to diet? I go to the gym, but his Soul

and the Soul of the King are exactly in the same dimension, it's just how they interacted with the fields of the planet has given them different manifestation of the ?? fear, presentation of manifestation of being there. (:40) If a King can manage to produce the same fields he'll look like a dog too, as most of them are anyway. Because they have only one thing in mind, they do not understand the process of absorbing energy from the Universe. It brings you enlightenment, it brings you what we call, dimension of understanding more.

Next time you sit on the table of the fields of the Universe try to go on absorbing a little less from the Universal Energy, and see what happened to those who you committed yourselves energy to, to feed. It will not be ?? done, because you take only what you can and what you need, and you are responsible for those that you feed. It's not a mechanical work, it's a dimension of we establish you, you gave your life to support other lives. As we said, you are connected by the magnetic fields, not by matter state. According to the law of physics and what we understand and minus 273 ?? Celsius there is no movement of the body of the Man, but the STM is free, travels the span of the Universe. Because no one up to this moment has managed to freeze magnetic fields, not even to the Knowledge of the Creator. And God was better than Beckham, (:42) He could bend it whenever He wanted because He knew how, and He never got a World Cup for it.

Man has created himself a lot of massive amount of assumptions lying to itself, and dismissing because he cannot understand, and in that process Man has distanced himself from understanding the process of the Creation in the dimension of the fields of the Creation, and not in the dimension of the matter state of I eat, I feast, and then God knows what I have to give back. But there is no famine, and there is no feast in the dimension of the fields of the Universe in what we receive and what we give.

Next time you contemplate on eating, as I said last time, arrange the fourth dining, except if you're British you do the fifth one, tea and the supper. Then see now you understood more, would it make a difference if you understand how to transfer the fields of the Universe to those who rely on you feeding them without you knowing? I made Man in the image of Myself, I feed unconditionally, so does the STM. It is the Man who's trapped in the dimension of his physicality what I call, all well which comes to an end as the Soul has confirmed is what we call, maturity of detachment. (:44)

Maybe you understood a little bit more today that you're not just the takers, but you're just the processing gland for the other lives that depend on you, that your Mother fed and now you'll feed in conjunction with the Mother, because Mother is not there physically anymore, but as you are connected to, you're the next feeding station. I made Man that they create children that they may love Me, which means to be as generous as Me, and givers and not takers. Man has still not understood and still looks at the love as, 'the guy needs something.' Try to understand the process because we are bringing a very close to the point that some of you will flip into the dimension of transmutation by your own knowledge, by understanding the process. And that's what I said from the beginning, we are not here to uproot the Man, we are here to upgrade the Man for him to be able to understand the process of the Creation in dimension of ?? original, the actual way, then

the Man has done with him eating, killing, and doing whatever he likes in the dimension of physicality. We go for a break and we come back, and hopefully we learned a little bit more. (:46)

>> **BREAK** >> 659 KSW September 10th ... (:56).

K- Thank you very much for your time. As usual we always move on to the next step of development and growth of the technology (T). Finally this week hopefully by next week the first 25 what we call, (One Nation Network) ONN's will be out and completed, it's just waiting for actually the plugs, out of nowhere, from our experience in the past 12 months apart since the last ONN's will be easy to those people who've been ?? chosen ?? to receive. So we come to ?? reach the next step.

In respect to work of the Keshe Coin (KC), you got to understand that governments who are negotiating with us, we're talking with the few of them at the moment, the biggest fear is that we have heard from three governments in the past few days the same story, that would this replace our national currency, and can never do. Last night in another meeting we heard the same thing. I thought, why are all the governments think about that national currency? (:58) Losing control. Our message to the governments is very simple. We are not here to take over your governments. We are here to make the life simpler that your nationals respect you for what you have given them to be free.

In that process, we are in a way, in a message which is going to the governments, we are not in the speculation. We are not the Cryptocurrency, we are the Coin, just for those who need to become, not needy. We are not here, the Keshe Coin has a big problem, and we see more and more, especially in past 20 days, different negotiations, the government says, "What's in it for us?" There is no room to speculate, to make money with it. I said, "No, but it makes your nation, your government solid, because they rely on what is done, is safe, is controlled, and is in the hand of the people, for the people." Bitcoin and other Cryptocurrency's, which they work, is just made to get money as much as you can, from the hand of those who have a little. By greed of them, they can make more, and they drop it, and make money out of it, and then put it back to the next generation, who have built some, and you drain it.

If you look, the players of the Cryptocurrency's, that's all the game they do. The rich hold on to. They take it to a point, they drop it, that those who were not supposed to be in, it's become a milking machine of making those who made the little, and they trusted, they

take the Coin, they drop it, and they lose everything. How many tens of thousands, millions of people have lost money with Cryptocurrency's? (1:00) A stable currency like Keshe Coin is a backbone of humanity. And as I said to a politician very recently, does God rain different on you than the Muslim and the Jewish guy? And it's the same. Does love of God is different for different people, unless they brainwash you to it? No, and it's the same with the Keshe Coin. Keshe Coin is a structure for humanity to live at peace with itself and with society. It is not there to create what we call, 'commotion of life.' The rich play with the fake coins, the poor lives through Keshe Coin. They know they're solid, they know they receive, they don't need to worry about when the next one comes, the next one arrives, and they have 30 years to train themselves. Knowing is there, they cannot speculate, they cannot steal. And this is what bothers many, many governments. We live by the law of and by the law of Creation, not by the law and the laws of the land, which Man robs from one who disgraces a color today, and praises it, because he can rob it.

Next time when you will see the release of the Keshe Coin amongst you, it's the time the agreements with the governments are completed and on a run. Just wait a few days. (1:02) We release the Coin, once the first agreements, once the first decisions are made, and from then on, it's the game, money for the poor. In a way, the poor will live in the 'land of milk and honey,' where up to now, it looked to be in the hand of the other. 'Milk and honey,' not the financing, not as something that can have, as a peace of mind, the stability of the emotion, that I don't die because I don't have.

In the next few days you will see a lot of things moving around the Keshe Foundation in a very drastic way and we would like you to be part of it. As we announce, and we see gradually we are ready to embrace what we call, the release of Keshe Coin. The first phase, through governments, cooperation of the governments and with the people, that brought their work together. And we'll see the next steps, how the whole thing will take shape, and how the sparks will start from where it was not supposed to start. Stay with us, we have arrived home. It's just dusting the jackets from this long journey of human life to get to here. If there are any questions?

(1:04) << There is a problem with the microphone of the Knowledge Seeker (KS). >>

Q: Can you hear me Rick ... your conversation .. my line is all over the place .. I hear the name ... ???

K- I've got a bad line, I can't hear you clearly

R: It's breaking up you're going to have to get clear or to a better position.

K; ... Today is very good to be in the behind the ?? bars, so communication is very comfortable today.

(breaking up ...)

Q: ... My question today is, could you expand a little bit on the Gravitational (G) side of the Magnetical (M) and the Magnetical side of the Gravitational? And expand a little bit on this kind of physics.

K- It's not physics, when you are in motion, you create what we call in the World of Physics, Eddy Current (backward flowing electricity). (1:06) It's the same in the World of the Magnetic fields. And in that process, as you have lost the strength to even, what we call, level, and you have interacted with others, you get pulled the opposite way, or you are left behind. And when you do a lot of this, in one direction, you create the friction zone of the fields, which move opposite to you. This is how most of the fields of Creation are created. This is why we see visibility, confirmation of existence. Because actually itself, by itself interacting with other fields, confirms the manifestation. And every time it does, in essence, to move forward, what is moved into has to move backwards, or we call it, it passes by.

The only manifestation of the wind on the sand, is the dust which (it) creates. And it's the same in magnetic fields. And dust, some of it goes backwards, it doesn't go direction of the flow of the wind. And so, in every direction, doesn't matter if it's coming to you, or it's going away from you, in coming it's creating a dust which left behind, and going forward leaves a sound and dust which comes back to you. You call it, it was magnetic, or it's going away, but why the dust comes back to me? This is the law of physics, it's the way interaction of the fields are. And in world of the, what we call, Plasma, it's a natural process, (1:08) not a different, very straightforward process.

Q: Is it the dust, the Carbon (C)?

K- Repeat again?

Q: Is it the dust the Carbon, the Carbon field, is the equivalent of the Carbon field that you...

K- Not necessarily, not necessarily, not necessarily. For Carbon to be created in the world of plasma, is one of the hardest thing, but by create, the condition created, it has, there is no choice but that to start with, but in its fundamental point what we call, Deuterium and then it builds up it's a complete cell.

Q: It's basically what was happening in the lymph, we get that kind of condition.

K- Pardon?

Q: I'm just connecting the dots, sorry Mr. Keshe, I'm just thinking about the lymph and what's happening in the lymph is... I remember you talk about what's in the lymph is a Deuterium level, if I remember correct.

K- Deuterium exists everywhere in the body of the Man. It's a balanced state till somebody needs it and when the unbalances becomes the Hydrogen (H). The structure of

Deuterium is what we call, reserve position. (1:10) Most of the cells of the body, once the scientists understand it, will look into it, they see energy fields of Deuterium everywhere. It's the reserve which doesn't interact with anything. stable condition, supported by this neutron inside it. It's a complete structure. So it can hold. Because of that structure, it can hold. Deuterium brings stability, reserve.

Hydrogen brings chaos and energy. That's why you take sugar, you create the rest. Then, when you go to Tritium, is the motion changes to combination of the Plasma and matter state. If you look at the Deuterium in a true way, it releases radiation, yes. Because in a way, it's in both dimensions. It's in dimension of the matter state, and it feeds, or works in dimension of energy, .. we call it radioactive. It's a part of the process, it has both characteristics, as a plasma and as a matter state.

So, if you look at it and put a combination of Deuterium's together, till it becomes unstable, you reach Carbon, there is no other choice. Because in the energy field, it's part of the, it's in the patents, energy field, go back and read it. (1:12) We see this in the poles of the Saturn. We see it in the poles of Jupiter. We see it in every pole. We see a hexagonal shape of fields, but no matter. Even if they ?? bring with themselves ?? clouds, because each one is one Deuterium complete. They just share in balance. When you share your balance, it closes the circuit. And this is what the fields of the matter state conversion does.

This is the reason you see the hexagonal, what we call, shapes on the northern poles of the most of the, or the exit part of the stronger fields of a planet. It's the characteristic of a double state plasma and matter state, what we call, confirmation of existence. You have six Deuterium, in a way, confirms what? A Carbon. It's the stability of the structure, and it comes as a by-product, never work to create it. Once, I discussed this at home some time ago, about the hexagonal shapes in the poles of the planet, even Earth has it. .. This is where the fields gather together. But actually if one day mankind makes a picture of his Soul, you see the same thing. It actually exists over our head. It depends on the field strength of our Soul. You know when they make this crown (halo) over people's head, where do you think it comes from? (1:14)

Q: ?? I always thought about it. But Mr. Keshe, the shape that we have at the end of this hexagonal conversion of fields is always a ?? dome shape. It looks like more than a donut, it looks like more...

K- You see, it tries to convert itself to 12. And it goes through a step ?? by ?? step, but it cannot hold on to. Because the energy balance, it's hard to sustain, but when Man goes deeper will find different shapes, or more sides to, and then by the shape of, rotation of, confirmation of, size of, this hexagonal shape usually on the exit ?? pole, it is how we know if a planet is moving upside down, or sideways we look at the hexagonal shape where does it come out. We know that's his pole. And scientists ?? who learn a lot. And in the world of medicine, that's a huge, huge implication.

Any other question.

Q: ... (1:16) Last workshop Mr. Keshe talked about using ash to create that separation from the field of the Earth to create that Black Hole in the ground, in order to feed the Man with Cosmic Ray (CR). In another lecture, Mr. Keshe talked about the importance of being with no shoes, and standing on the ground. So, what is the purpose of the two, and can you explain the difference between the two? (and it goes on to say) When is it best to separate ourselves from the ground, and when is it good to connect ourselves with the ground?

K- It's totally by your taste. What do you feel? I had this discussion maybe couple of hours ago. I just took, I was walking barefoot, everywhere. And a person says to me, "Why do you do this?" I say, "Because I, I lack energy." "I need some balancing, and I can't balance it on the concrete." "I have to walk on the earth, to balance what it is." A few days ago, I was absolutely in a point of exhaustion. I could not get anything done, because I was busy with so many things. And I just took my shoes off and I walked on the grass, on the sand, on the soil, everywhere, but the Manmade material. And then you find your balance. People who walk on the ashes, we've seen people walk on the, what we call, on the fire, don't feel anything and sometimes they say they float over it. (1:18) If you know how to handle it, you should be able to float over it. Because that ash is a separation of fields from you, the Earth's magnetic fields, you are a different entity above it. And you receive different fields, you live in a different environment.

When I was in Iran, something puzzled me, very first time I went to the temple. The Man who is in charge of the fire, they are usually very serene. It took me years to understand the psychology behind it. And years ago when I looked at it, it was obvious. These people breathe, live through ashes of the most purest trees which people bring in temples. They don't burn normal wood. They burn some of the most rarest things. Pure. And of course, they receive energy, they get separation. They go to bed with it. And so many times I wish if I could be the fire keeper, I knew I don't have to do much. (1:20) Because I understood the science behind it, not just the words about it. When you meet with the head of the, what we call, temple, it's a different business. It's something you have to come here to take from us. When you speak to the Man who's after fire, you literally see... I met 2 or 3 of them. All have the same character. And they say, "It's a privilege for us to be here." But they don't understand what that does to them. They live with ashes. Most pure ashes in the world. And it's the same as I've said in, in world of the agriculture in South America. You have to understand this, it's not just to copy. It has to grow on you, it's not something that can stick on you.

Any other question?

Q: ... Good morning Mr. Keshe.

K- Good morning. Is the harvest time finished for you?

Q: No, no, no. I'll start November. Yeah. The broad beans are not, not, I don't know what's happened there but the flowers didn't set. We had a lot of rain, so maybe too much

nitrogen. (1:22) That was one of my questions I wrote down is has there been any update on the agricultural side of things the Cosmic Ray in China, or they're still in the process of, you said maybe when I last spoke three months ago that...

K- They... they harvested, they cleaned up, I watched something new because it's a culture, they have their own culture of growing things. I think the ?? what you call it, the seeding starts in the whole of China around about 15th, 16th of September I think, and we go through a second process. As I said to our team, the first year doesn't count. Even though we observe, we watch what we do, the way we do, we did. Is we took over the greenhouses and lands. And the first year we are still contaminated. We have to go through a process.

And, as you understand, we are harvesting weed at the moment, as far as I know. Very interesting, because, what you call, we have a huge land, what you call, agriculture. Actually, I'm trying to get you a page for you to see. We have to drain the system of the, what we call, the poisons of the past, and at the same time create a new condition for a new one. (1:24) While we are harvesting from one greenhouse, we are sitting in another. It's very interesting and what I said to our team is, let the weeds grow because weeds will take a lot of the poison of the land off the land. And we mixed it with the Gans's, now we put ashes back into the ground from weeds we took out and watch what it does the next harvest. We'll see the actual results of the agriculture by 2027-28, where we reach the pure seeds, pure conditions, and understanding the totality of the work, and how things take shape. But we are sitting in one greenhouse and 10 meters away we are harvesting in the other.

Q: There was another question Mr. Keshe if you so kind. You know you spoke about Iron in the body cannot be detected until it's outside the body because it's in a plasmatic form. Does that apply to all elements within the body?

K- We can see the energy converted, more or less, yes. Our blood is not red the way as you know we see it red. That's what the ?? composition comes to with atmospheric condition. But the elements inside the body of the Man are literally in a plasma state, not in the matter state. (1:26) The only thing which ends up itself with the matter state is a Calcium which creates the bone of the Man. Even those bones are different at the time of life, then the time of death, or separation. The minute the pressure changes, it's like the wall in the heart. The second you take the first breath, that wall closes. And the second day, ?? the ?? is exposed. We see it as a bone, we touch it as a bone, but it's in a plasma state it changes into matter state because of the Inertia. So yes you have different things but the minute it comes ?? under the magnetic field Inertia of the Earth, yes it comes the matter state of the Earth.

Q: And just quickly with the Cosmic Ray Balls, have you had any feedback on people's response to having them and how they feel on that?

K- Yeah. People do all sorts of things with it. They go to bed with it, they put it on their pillow, the grandchildren are sick, they put it in their pillow and say, "Oh, in the morning

there was no nothing, it was ?? through." They put it in the drinking water, all sorts. And yes, we see it and we hear, continuously hear from people because, I think the last batches left the Keshe Foundation, we have no more. This last week, whatever it was. As I know, we are not producing anymore. And in a way we give you a connection to the Universe. (1:28) How you use it, it depends how you manipulate it.

I have kept. The very first original is in my possession. I have it. Because ?? I was playing with it is very recent. It's changed color to yellow. The, you know, the Ball itself is yellowish color. I think we're holding in the 10, 12. These are of the original ones, but we're not producing anymore. But the fields of all of you who have Cosmic Ray, you're all connected to each other. It's amazing, but you're all are connected to each other. And we chose, I chose deliberately some of the Knowledge Seekers who have the Cosmic Ball and they received the ONN's. Deliberately. That we see the pattern of the ?? change. Pardon?

Q: There's a connection between the ONN and the Cosmic Ray Balls. Of course.

K- You as users are of course, but once you receive the Cosmic Ray antennas, then the game starts, truly starts. Truly, truly starts.

Q: Just having a difficult time at the moment, maybe it's a health issue, but I'm not sure what's going on. I think my, I think I'm, geez, you know, it's, I'm the same age as you, maybe it's just a, you know, midlife crisis. So I don't know, you know, I'm thinking, you know, should I be holding on to these Cosmic Ray Balls and having them in my pocket all day? (1:30)

K- Oh, try to put it across the body. If you're holding it in the right hand, put it somewhere in the left foot, creates a circulation. Very soon, in next few months, Keshe Foundation will enter the world of medicine in China. And these kind of things will, what you call, will affect, especially if you have like Cosmic Balls, many Chinese have, the effect of is different because it absorbs the fields which are connected to you. Would we ever produce them again? I don't know. But if you use them, use them diagonally, do not lock them to be together in one dimension. When you use like the what we call, Chinese medicine provided by Keshe Foundation, always never wash your hands. Never. To keep, if you rub your knee, actually the hand you used don't wash, creates a circulation in the body and the whole energy flows. You feel the difference in the whole body because now you are a transporter of fields and you keep on shaking your hand, raising your hand, moving or whatever. But the knee or the leg is that steady. Even if you are in bed, the leg you put a Gans material on it, and you rub it with your hand, but the hand keeps on moving. You can imagine how much energy transfer goes from the knee through just the handshake, the vibration. Use, use the Cosmic Rays for change of Soul. (1:32) And through the Soul you'll find the peace of mind.

Q: When you clean up the water, it's polluted. So, what's the best way?

K- No other way, you just use it as it is. We advise you not to wet them. It's very, what you call it, should not be done with, many Knowledge Seekers use it as a sugar in the pot, they have one or two in the cup and just a drink from it and all sorts of things. But ?? as I always say, it ?? depends on what you feel.

Q: The Plasma water, I could use the Plasma water that I have the Plasma jar and use that water to clean it, it would be best.

K- You can never clean it, it's a dynamic, it's, I mean, have you looked at it? It's dust which just keeps on rotating. It doesn't have, you can't, you can't, if you, if you get a Cosmic Ball, and leave it somewhere very, very steady, and try to stay and move close, back and forth with your head, and see what emotions you go through, then you know its power.

Q: ... Thank you very much.

K- Thank you

Q: ... Hello Mr. Keshe, from one Knowledge Seeker to another, (1:34) surrounded by frogs tonight, but yeah I had listened to recently the classic Keshe statement of, God now I can't even say the statement, but of Man imitating the Creator and I think I finally got it. It's probably really silly but the toroidal fields out of the brain mimic the magnetic gravitational fields out of the south pole into the north pole. And yeah, thank you for that one. So simple, but that's what you mean, yeah?

K- If you understand it that way.

Q: Okay, on to our next topic, biochar. Interesting you're talking about wood ash. And yeah, wood ash doesn't have much Carbon in it, and it's pretty much a temporary byproduct of the burn, whereas biochar stores the Carbon. Would that mean that my biochar-based garden beds are going to have a deeper Black Hole, a more powerful MaGrav effect?

K- Depends what you and how you use it, or mix it. We are testing something very interesting, and maybe in a few months time we'll have, and we'll know the data. How we can manipulate the seeds through Gans technology, (1:36) using Nano structures. And it's very interesting what the outcome of the data will be.

Q: Yeah, it's beautiful how light the soil is then how much water it does hold with the biochar. Yeah, my only problem is that it tracks the gum tree roots too much into the garden beds. So, yeah, I don't really like to think about it but farmers clear felling a ?? paddock and growing their crops without trees anywhere nearby seems like there's some wisdom behind that. Yeah, so, very good. Well, yeah, also the heart teaching was a big one, and the breathing. I wish every night I go to sleep to my meditation, trying to connect in with the Soul. But is it far away until you produce a meditative breathing 10-

minute piece, Ed and the team in the AI production line? I'd love to have a little Keshe inspired breathing video or mp3 that we could put on at night time.

R: It's even better than that actually. You can go into the Keshe game, the Peace and Enlightenment Game and select different breath patterns and have the AI guide you through a guided breath experience. And we tried that as a group in the Plasma Reactor Group and that was interesting, (1:38) and I could see how it actually could be useful for people to try different breath patterns and whatnot.

Q: Yeah I don't really play many video games, but, uh, is it essentially a website you can enter and...

R: Well this is a different sort of game where there's many things attached to it, many different aspects of the Keshe Foundation and of the Store and other interactions with others, and so on. It is all built into the Game and you can access those access points basically through the Game and it's quite varied and complex and never-ending it seems in terms of the potentials and implementations that are going on.

Q: You don't need a PlayStation though.

R: You just need a computer that can access a browser basically. But you do have to sign up and get involved and start actually playing to accumulate points and so on. But there's many things you can do without even... without even playing as far as that goes as soon as you sign up. Anyway, Mr. Keshe you might have something else you wanted to say there. I didn't mean to.

K- No, no. What's the next question?

R: ... Well, we had a question from Boz Michael, (1:40) and it's regarding Iranian missiles and whatnot and I don't know if you want to get involved in that kind of...

K- No we'll stay out of that one.

R: Okay, yep. All right, I thought you might want to pass on that. It's a bit of a hot potato right now you could say. What about, pardon me?

K- I said, can we have the other question?

Q: ... Good morning Mr. Keshe. How can I now understand what scientists say about "junk DNA" and the two strands, in light of the knowledge regarding Plasma that you have explained?

K- Oh let them live their junky life, you don't need to worry about it. That's all you can do. Nothing is junk, the body doesn't produce any waste, it has a reason, and it works the way it does. Somebody comes up with these things and everybody picks up because it's catchy and whatever, but it doesn't, it's just... I was listening to a video recently and they

were explaining the Black Hole in such detail, how fields ?? work. And I think I says what happened 20 odd years ago when I released the paper about the creation of Black Hole? And was nothing, it was nothing. Now it's become, they just make something and we saw how Stephen Hawkins played with it. For 30 years he was a master of lies and then he became master of cheat. (1:42) So when you hear things like this, use your own common sense and look at it from the energy side. If it makes sense from the energy side, then you can accept it. If it doesn't make sense, see what you learn. Maybe the question, maybe the subject, maybe the topic comes across for you to gradually learn to do your own independent investigation, to enlighten yourself. And you gather what you think from the knowledge. But what did it bring you? Why did that question come across you that time? For a reason. What can I learn from it? And then you find out nothing is junk. People who talk about in the human body junks and half of the brain is not used, it means they live a junky life. And they don't use their brain so it's easy to convince the others.

Any other question.

R: Okay, thank you. A question from Paulo, regarding... let me see here, it's a bit involved, but can the Time, Place, Position, Possession of the 588th Knowledge Seekers Workshop, and the question of identity I raise here, be juxtaposed with the physical concept of quantum state and lifetime? Do they complement each other or are they contradictory in some respect? Does every manifestation involve a fundamental mass, whether transitional or dark? If so, then emotion, intuition and/or thought would have this mass at their origin, sustaining them, correct? (1:44) In this case, emotions, intuitions and thoughts, although not normally treated by physics as material objects, could have an origin sustained by some form of mass or field that we do not yet know how to measure. If so, what is the physical carrier of that mass, what is the physical substrate. If every manifestation has a physical origin. Does every manifestation need at some fundamental level, a substrate that possesses mass and therefore, Inertia. Are you still there, still with us Mr. Keshe?

K- Yeah, just I don't know how to answer this, because I can't remember what's on 588.

R: Yeah, that's about the Time, Place, Position and Possession teaching, I guess. I'm not sure how that gets juxtaposed with the physical concept of quantum state and lifetime. That's... I don't quite understand that question. Well, I'm not sure what to really say. Is there a physical origin to manifestations? Does every manifestation need a physical substrate that has mass and therefore Inertia? I think that's what he's getting to, but it's... I think, Paulo, you need to make your questions like one sentence, and try to be succinct, and... (1:46) I think that will provoke a better answer from Mr. Keshe.

K- No, just pass on it, because it's too complicated.

R: Yes, I mean it's too convoluted.

Q: ... Thank you, Rick. Good morning, Mr. Keshe.

K- How are you?

Q: Yeah, fine. Thank you, Mr. Keshe. So, Mr. Keshe, what you've been speaking about today. Can we delve into a little bit more with these new Units and all being placed and the position of the population around the planet. How is this going to operate between positions where you have governmental control and you have free plasma being able to transmute and feed and everything else. I mean, I know you've spoken about this before, but do you think that people will, or entities, Souls will stay in position or move freely around the planet? How do you think that's going to integrate with everything that's going on over a period of, I don't know, the next few years?

K- What do you mean?

Q: Yeah, so once it starts happening, how are the governments going to be able to handle, you know, the ability of an entity to travel at will and position themselves anywhere? How will that integrate with today's society, you know, what's going on, on the planet right now?

K- Exactly what went thousand years ago, or a million years ago. (1:48) Bunch of people moving, bunch of people eating, a bunch of people doing other things. And the same with the animals. Fundamentally, Man is becoming wise to understand more, but Man's becoming more narrow-minded because he thinks he understood everything. And it comes with the arrogance. But in general if you look at it is exactly almost 500 years ago, a thousand ago, some more, some countries are developed. We get some people who become what we call, operating their own way, and there's not much. Politically we just look at what is to us.

I watched the revolution in Iran. What they say people changed, people went backwards, whatever. And I have been fortunate to watch another revolution, but totally in different direction, of the Chinese. If you're not here, you don't see. Chinese always looked at the others, and in past two years, three years, now there are people who look at us, we are now in control. And we decide, because we know better, because we got here. And it's the beginning of fall of an empire. And this had to happen. That people now for years trying to be, being dominated by different countries and everything else. Now it's our turn. (1:50) But in a different way, arrogance in the religion, arrogance in God. And it's another cycle we have to watch. You're British, you colonize half of the world, you colonize half of God knows wherever it was, and took a lot of things and doing things not the right way, but the Chinese now doing it in just to be the push of a button. But the end result is the same. 500 years, 400 years difference. It's repetition, depends where you are, which cycle of the repetition you are in.

Q: So where does that leave us Mr. Keshe. So...

K- There is one thing for sure, one thing for sure. In the near future for human race, we'll get a foot into outside this planet. They're facing, we are heading that way. Not with the Keshe Foundation only, but with what we call, matter state technology. But what are we going to do with it? There is, they've chosen the first person, it's a woman, who's going to

Mars, knowing she can never come back. We don't have the facilities to bring her back. But what I said to the NASA boys, do you have a facility actually to get her there, keep her alive. And the way they are looking at it that we managed to get food to the, what you call, the lab, station lab. (1:52) We find a way managed to get the food to her. That's the only concern. And she's accepted her income, probably outcome of her life, that if he goes there she's the only one, she never see and think she won't come back. It is a solitary death sentence. And is that what we are going for? Or is this the beginning of a new step out? Unless we can come up with a different dimension of technology. That we can live on Mars the same as we do in the campfire somewhere down the road, or in Africa. Knowledge is going forward, but would this knowledge be here and then we don't destroy ourselves, or we get educated so good, somebody comes to this planet and says, "Oh, this planet is empty, let's use it."

Q: Mr. Keshe, with the teachings that you've taught for many years, the Knowledge Seekers have started to understand that death is not the final position. So if this astronaut or whatever they call them now is, has been listening to the teachings, perhaps they've lost that fear of death. And that has a big significance to how you operate and how you function, and how you understand, you know, Creation, I suppose. ..

K- You just, with one word, you just brought a rush of memories. Amazing. You just touch something which ?? now sits in the back. Knowing you die, you know you're going to die. When you're faced with it, you become expert in it. (1:54) That there's nothing above what they scare you of. They kill you so what?

It was about summertime. I was driving from Kortrijk to Antwerp. I did about life next to and I noticed, I knew there was a plan to kill me, and being trained by the Russian Secret Service in all sorts of things as friends they taught me a lot how to protect myself during the Keshe Foundation, before the Keshe Foundation. I... what they were behind to push you to roll you over, and then shoot you in the head, which is we found that it's the way these people work with the Belgians. I managed to get myself behind, thanks to the Russians, they showed me a technique. Amazing what it can do. And knowing now they're behind and if they break, they go into the wall first, they took a turning off into Antwerp city centre by the Holiday Inn, those of you who know Antwerp, going up the ramp. I know that area like the back of my hand. He came to a traffic light, but he was in the light. Before he goes up the ramp, I saw him throwing a gun out. It was obvious it was a gun they threw out. The plan was to shoot, they didn't get arrested with a gun. I drove and parked the car 90 degrees at the light. I knew what to do with it. And I came out of the car, I said, (1:56) "You're going to shoot, shoot. You're going to kill, kill. What's the purpose? Why do you try to damage the child?" And there was no fear of dying. I saw the gun being thrown as they came off the ramp. And... This was something touches you.

The next time the Canadians got me in the airport, and this guy kept on saying to me, "We're going to kill you." They told, they called my sister in and said, "If anybody finds out we got him here, we're going to shoot him in the head." And my sisters were crying, my two sisters, they're crying their eyes out, "Don't kill him, just don't kill him." Says,

"So you don't report to no one." And that fear of death wasn't there, because you already had a shotgun. And there's no fear when you're not afraid of dying, is there's nothing to be afraid of. And it's the process of life. You... I have no fear. Time comes, time comes it's a human body life. But when you don't have a fear of end, you have a lot of future ahead of you.

Q: That seems so Mr. Keshe. What you said there, that resonates with me that as soon as you place that fear thought or you connect to it, you attract it's that magnetical gravitational, you know, gravitational interaction. (1:58) So if you keep it at a distance or don't bring the thought forward, you don't create the link. So when you are listening to all this warmongering and medias that constantly navigate this atrocious conditions of how they try to control, it's trying to put that dome around yourself where you don't interact with this structure, you're outside of it, it's like a bubble.

K- You've got to become what I call, a passive life, they come, they go, they hit you. You receive threats on a regular basis, all sorts of threats. But the assessment is, what would it do to me? You used to panic, the threats I receive nowadays, you know, you, if I was 20, 30 years old, I would have had a heart attack, but now I know I'm just going to sit it out because one thing to another, there is a reason for it, there is a solution for it. Threat to us, as human being, is there even we are asleep. The mosquitoes, they can give you malaria, kill you. Snake can bite you and all sorts of things. You have the house, you have the earthquake. There is no fear of and is embracing the future which ?? counts.

Q: And that's why Mr. Keshe when these Units go out and you get these children that are interacting emotionally and living and becoming part of a civilization where they don't carry that field strength of recognizing that threat, (2:00) then they start to operate and have a completely different structure that resonates and has a field strength that is joy and happiness, and it doesn't create this war. It doesn't create this momentum of the insistence of control to dominate. It's a strange thing...

K- It's a fear, it's a fear of allowing other people. Well, don't start the chat because I can go down the line very, very harsh with this. In the biggest fear of Man is losing, doesn't matter what. And if you have no fear that doesn't matter what I lose, I stay correct, then you can't have a fear, because whatever is the reason happened, is for the change. And it's always for a reason for the better. But you see you... You get people tested by it. You see the people around you, they test you. As I said very recently, you don't want to be sitting where I sit. We have established the structure that the governments are literally in their feet of fear. And they ?? have two choices. We lose control or we have to negotiate. We lose control or we have to negotiate. And I see this now with four or five, a couple of major countries in the world have got to that point with the Keshe Foundation. (2:02) One is with the ONN and second is with the Coin. Trying to get advantage points, where there is no advantage. You are a president of the most powerful nations, you still get 2.5 Coins, and you are a peasant in the back of the stones of Africa, you still get 2.5 Coins. And the love of Keshe Foundation is the same as the love of God, where he's equal ?? love to all. So, how can you fight that?

Q: They have a fear of loss Mr. Keshe, it seems that...

K- Control, fear of losing control.

Q: Property and financial, everything that, you know, a human desires. And, they can't get past that, it seems that way, and we're all like it, you know, humans are like this, this thing we have. So the knowledge needs to, you know, to touch them in a way that they really understand the beauty of creation. And that is a difficult one to get to for many. They can't get past the fear of loss of something, one way or the other.

K- Yeah, it seems like it. It seems like it. It seems like it.

Q: And it's from Macro to Micro, Mr. Keshe. So it goes from, you know, from the individual like myself to right up to, you know, it's the same procedure right from the atom to the Universe, as you teach. So the process must be known, it must be, you know, (2:04) you understand it and you know how to function and how to position and how to accommodate this, you know, enhance it. And I know you're doing that on the planet now, you've been doing it for a long time. And yeah, it's just that we get a little bit frustrated with, you know, the others that won't or don't, you know, don't want to cooperate and understand it. Because it's just going to be a better, wonderful creation for all. And I still never understand why people would be opposed to this. Other than the fact they have to create force to dominate. Which is a strange thing. A very strange thing. ... Are you still there Mr. Keshe?

K- Yes, I'm listening to you because I tried to understand the emotion than the words. We are tested on a continuous basis for everything. And how we handle that emotion counts. I sometimes say the Soul creates the emotion to see how the physicality reacts. And then you will sit and watch. Why did my Soul test me? Then, I don't know, there's a lot of answers to the same question, but it depends how you put the question. (2:06)

Q: What do you make Mr. Keshe?

K- We have always come to be around people who are negative. They create a negative life for you. And you believe in it and you live with it because the emotion is negative. You live amongst the people who bring you knowledge. Knowledge you bring your happiness or whatever, and you find out just going from one person to another your life changes and your knowledge, or what we call, the outlook, changes. The body is the same the Soul is the same it's just where do you channel the energy, and what is done with that energy, which is again magnetic. Emotions are magnetic field in motion. But, human life is very, very fragile because of his own understanding of his own, what you call, circumstances. And we find every excuse to stick to what we believe in, even though we believe in the wrong thing to be. And the others who take advantage of us, they enforce that thought to us, if I drum it enough in, it'll go in and it'll be done. And this is part of the society we have to learn to live with the energy of the Soul than energy of the Man. And then we see the difference, how it changes. How things changes. (2:08) It's very, very interesting. You brought a lot of, what you call it, rush of memories back.

Q: Sorry Mr. Keshe. I didn't ...

K- All good ones, not the bad ones. Very good ones. Very, very good ones.

Q: Good. It needs to be. We all need this. We need at the moment the way things are stacking up and the way that the field strength seems to be. We have, you know, everything that you're trying to do and there's many wonderful people all across the planet and Souls are present trying to elevate and trying to create beauty and then we have this other you know systems that are opposed to it and we need that, you know, we need the Foundation, we need you as you've been doing for so long to create this beauty, but, you know, the forces against are, you know.

K- There is no forces against. You see, there is there is no forces against. It's just that if we carry on with what we are doing because the target is not to destroy, is not to rob, it's just bring a change that the others will have a comfort of beautiful Soul. Let them do what they like. I learned that. I learned that very, very, very, very, very clearly. If something happens to you wrong and you think it's done wrong. Don't look to see what is wrong. Look at why I have come to this point and what I'm going to learn from it. And what can I do with it? (2:10) If you change the victim to the reason to be progressive or to learn something to succeed, therefore it doesn't matter what they do.

Q: It's two different worlds Mr. Keshe. You're talking about the Soul, and you're talking about physicality , as usual.

K- Yeah, but you can use your Soul to support the physicality, it doesn't mean you don't need to feed it. Many, many times I find myself in a position which I don't like where I am, but I turn internally through the strength of what I carry, what I call, a Soul, I carry forward and things change better than I thought, because I don't do the physical negotiation, I leave it to the Souls to do it. And I've learned that and it works, it works so good if you learn, if you rely on the emotion, on the energy of your Soul. Even though it looks that everything is falling apart and falling on top of you, you'll find that you walk out and say, "Oh my God, how did that happen?" "And what a good thing happened to me." This drives a lot of people around me crazy, when something goes wrong. I said, "That was the reason, it was a very good thing." So, you keep on saying the same thing Mr. Keshe, "Bad things are a good thing." I said, "Two things, they first test us, secondly they teach us." And with that we find our own strength and we learn from it, nobody else. (2:12)

Nobody can understand things and benefit by things except the person who has happened to it. And what do we learn from it? And I get that challenge every day of the 365 days plus, the other side of it, night time. It never stops, never stops. There is not a now, there is not a day, something doesn't fall off the world, I call the skies, on top of the Keshe Foundation. And I used to run around trying to do things. I try to don't look at the life the negative way, always say, always look at everything there is a positive to it, and you can move on. Negative holds you back, positive pushes you forward. As long as you're a

helper, you're there when somebody needs you, you're there to be correct to be what you do. Doesn't matter what goes wrong.

Q: And then many people, Mr. Keshe, would find that difficult to accept, given their own circumstances, you know, where they exist in. It's only if they understand the meaning behind what you say and understand the Soul aspect that many people can get through this. And that's a belief system and that's all that goes with that. (2:14) So, and that's what you're gradually teaching. It depends on the, you know, the STP or the STM. Which position are you viewing from and what do you, what do you wish it to be? It seems.

K- It depends what you expect out of it. And what outcome they set. I learned, what I just told you about what happened to me in Antwerp, it became cornerstone of understanding what I'm dealing with. And that incident became a cornerstone of our move out of Belgium. Because the continuation of me getting out of the car, this car managed to go around on the grass and whatever, and escape towards the center of Antwerp. And while my ex-wife was on the phone with the police, they said, we have you on the radar, we know. Security forces are on the move, just stay on track, keep away. And we were talking about this, they came through the ring, on the side, they go through... If you know Antwerp, there is a road which comes off the ring, into the center, towards the Diamond Bourse. And this suddenly out of narrow it becomes a very wide road, and I was sitting behind this car, beeping, beeping, it was a red light, And then suddenly it went green, as it went green, out of nowhere, the whole traffic light, was police officers. These guys literally walked into the police car. They pulled them out of the car. They took us in, the officer who came, says, "Mr. Keshe, we know who you are, please, we take you to a secure room with your wife and child." (2:16) They kept us there for a while, and they said, they did a wrong report, and everything else. And I said, "These are assassins, and they are sent by the police, by the people from the government." And the officer looked at me, because they could understand English, as I was talking to my ex-wife. Strange enough, with such an incident, nothing happened. And then I found out, through other channels, that they were paid to kill. And they were supposedly released from the prison, to kill, and their sentences will be reduced if they carry out the assassination. And there was no file ever was made, nothing was done, and totally (let go), because it was organized by those who run the nation. And then I found out that's how they do, when they do high class assassination, they give a pardon, or they get promised these criminals reducing sentences and if they do it and somehow they get out. And the guy who sat in front of me, some 3-4 years ago, later in Desenzano, who poisoned me, he told me this is how we kill. And interesting enough, I said to my ex-wife, "I don't accept Belgium." She says, "No, you have to." I didn't know they were working together. Only reason, when I had a battle, I went ?? next to Belgian just escape, why I should ?? accept the Belgian. And then later on we found out they're all of the same structure. But I learned from it a lot. But it doesn't change things. (2:18)

Q: Mr. Keshe with your knowledge you know how to protect yourself in those situations on many levels. So we've spoken about this before I'm sure we have many times. So what significance does that really have if it's just the matter state condition but the other side of it is it's an impossibility to touch.

K- We carry on, we got a job to do. We got a job to do. There is... you carry on. These are just little obstructions by things which you overcome and you carry on. The whole thing is, it's not just the Keshe Foundation, the whole thing is the future of humanity to change. And this time change is not for one tribe and one race, it's for all of the Soul of the Planet. And it'll be done by the people, we are just organizers. And this is the beauty of it. It's absolute beauty of it.

Q: We witness it unfolding Mr. Keshe. I sense it and I see it and I know many that's why it seems that many are in the background but constantly viewing and watching and they're very aware of the situation that is for sure. And it's trickling down not just to from high-powered positions, but to the humble positions that are understanding this technology.

K- You see it gets to the point that you give up, or they give up, or they sit and see what happens. When nearly 10 years ago plus, we came to China, (2:20) very first few days me arriving in southern China, I was invited by the central government to come to Beijing. And I was with Knowledge Seekers they were, a couple of Knowledge Seekers were with me. I was kept in a safe house, because of the reasons. It was a very dark heavy night rain, and there was a knock on my apartment which I was kept in a beautiful villa. Two Knowledge Seekers were outside the door and they said there's been an attempt at assassination to kill you, and two young officers 21 and 24 have been killed outside. We are here because there are armed officers all surrounding the house. It was raining very heavy. Very tall guy was responsible for my security. Very lovely guy. And The Knowledge Seekers literally laid outside the door. They wouldn't move. They said, if they come they shoot. They're going to have to go us through us. They know who they are. They're listening. I met this officer, protection officer in another meeting not long after that day. They moved me into a military hotel for protection. And he said, "Two people lost their lives protecting you on that night." He said, "I stood myself on the rain and thunder with all the officers that they cannot cross us." (2:22) He said, "I don't know what you do, but anybody else would have been done (killed)." I said, "I'm not afraid of it." He said, "It's just amazing how they did not get to you." When you go through these things you just become numb to the human thoughts. And again it was organized by the Belgians. Two young boys, one with a child. And then you learn. It's life worth.

Q: May I ask a problem, a problem, may I ask a question? So, you've mentioned the Belgians very many times, and I know, I know you can't speak about it in certain ways, but is this the root of all humanity's problems, is it really that deep?

K- When you keep people, when you keep people to ransom, by their weakness, yes. When you have no weakness, that's the time when they fear. This is where, where you find out, is it worth it? (2:24) And the memories you carry with you, it gives you strength in what you do, what you are.

When I was kept by the Canadians, they kept me up every night till 1 o'clock, 2 o'clock, Toronto airport, interrogation. And then there was a security officer, so whatever they

had, they had to take him back to prison, or what you call it, a holding station, they call it. They put me in a very long room, maybe 15-20 meters long, with six beds in it, or something. I was the only person in that room, and all the people who are kept they couldn't come in, whatever. But the difference was that whole night there was a guy walking on the steps in front of the room, the step wasn't quiet, it was deliberate (loud) to keep you on the edge, And it stayed with me. And the next morning, again 7 o'clock, 6 o'clock, they come and say, "Hello, it's breakfast time." They put you back in the back of the, what you call, the police car. They take you back to the airport, repeating 10 days, this every day. And then you sit in front of the guy who reads a screen, and I told him, "What's this?" He says, "The questions comes from the Prime Minister and others, and now the room is like a full of men. Since all these questions are just doing whatever they are doing. And there's a question from Hillary Clinton, and blah, blah, blah." (2:26) And I said to them, "You're afraid of me, I'm not afraid of you." And after 10 days they sent me back to Belgium again. "Anyway, if you get somebody, why do you let him go?" But, a few months ago, I woke up jumped. Because somebody walked with the same sound of shoes outside the door, outside the room. And when I opened, they said, "What's the problem?" I said, "You just brought a very bad memory back." Same noise, the same thing. I said, what are you doing outside my room? "I'm just going to the balcony." It's what gives you strength, what you understand. And it was a strange thing, as I said many times, they had a fight how to handcuff me, to be seen or not to be seen, Take me from Toronto airport and into the ?? South, over the holding station. But if the world leaders have a fear of you, you know you're right.

Q: We look forward to the day that they celebrate you Mr. Keshe, and really understand.

K- We don't mean that. We've done our job, it is in the hand of you. Even today I receive threats from even Knowledge Seekers. I've got used to it. Shall we call it a day?

Q: Yeah, thank you very much.

K- Thank you very much. Wish you all the best. Thank you Rick.

R: Okay, thank you Mr. Keshe.

K- Thank you very much, bye. (2:28)
