

660th Knowledge Seekers Workshop September 17, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Absorb Universal Energies (UE) - give energies back - Beings made from our leftover fields; Every creature's body is like galaxy; No two cells exactly alike; Understand Man's physiology - Compare Macro to Micro; Body like U - interaction of M fields; Absorb 80% energy from U - trap more energy - create Black Hole - conditions of new star; Single polarity objects - only give or take - enigma; Body - single polarity entity - G field - STM is M field - feed each other - how heartbeat created; Advanced Plasma and CR T - create a heartbeat; How heart & every cell creates its energy; Bipolar system - P & STM - each single polarities - one takes & other gives; Every cell has same system - different strengths; STM and P releases energy, creates current - is M fields motion & physical life; Fundamental plasma physics - convert M fields as current/energy - creates motion - how U & stars move; Not in Newton's Law; When convert & interact M fields with current - get motion, expansion of U - expansion of cells - motion of blood within blood; Motion of fields of U; U M fields work same way in body; Matter state of U - CR & M field interactions; Current & M field create life; More field interactions, more life; Each one has own beat & M fields - creation of cells - heart, brain, blood, & every motion of P; Interact M fields of U with M fields of Soul - creates current with M fields of Spirit (STP) - match & interact them - transmute STM; How dream - M fields interact with current of heartbeat; How heart creates pulse through CR fields within 'sun' of heart; How STM creates energy for body & motion; Mono-pole M fields - Soul expands over entity; Spirit compensates from lymph; STM creates star; Generosity of STC; Transmute - bipolar condition - P or STM; How UFO works; About separating P from Inertia planet, etc; Man's leftover energy - create other lives - one life within another; Field of STM interacts with current of heart - transmute, etc; Reason for heart attack, brain hemorrhage - energy of heartbeat change too rapidly - disturbs STM - paralysis, speech loss, etc; Control breathing & heartbeat, change M fields & current; Fields interact STM create emotions - travel; Fields suddenly hit density of brain, paralysis; Stroke by heartbeat of Spirit, not brain; Heart & STM create motion - but if push STM out of center - death - otherwise stroke; Control heartbeat & rate of flow with STM - motion & emotion; Know where you want to be - aware of time of propulsion, etc; Man control freak; Control time of death - gravity & M fields of Soul, current of Spirit/heart; Transmute by will; Live Ethos of Mitra; Old age heartbeat slows down during sleep - die in sleep; Don't need massive energy - Life travels at lowest fields; Secret of Creation - make current weaker, pulse weaker on same current - expands Soul, travel; Transmutation - not separation STM from P - control by electromagnetism and current - fundamental theory thermodynamics of plasma; Lower heart a little - makes dreams; Aging - STM travels faster from weaker current - don't dream anymore; Secret of Creation - how U expands; Understand & be detached from planet - transmute; If don't learn - Soul forces transmutation to next destination; Re-register for KF Store - upgraded - credit cards; Open own store in Enlightenment Game website; Cash Coin (CC) in Game - later convert to KC; KC - social currency; Teaching on ionization - matter state condition - not exist in Creation; Atomic structure creates ions - part of creation & control of Inertia; Convert energies of U, interact with Earth - matter state; Instead use plasma; Ionization - Nano structure

electron - Inertia of planet; Ionization - Gans state electron in energy matter, controller of Inertia; Advanced physics; Transfer energy through matter; How heartbeat works; Cells & Soul not take energy, instead create heartbeat, rapid fluctuation, harmonics of plasma of electron - UFO - repulsion and flash; Creates radiation; Plasma fields do not have radiation - comes from friction with lower states; How produce X-rays; Easier way, use plasma; How radiation created, Gamma Rays, etc; Why heartbeat has rhythm; Body has CR, plasma, ions; Huge radiation from motion of heart - Gamma; How blood energized, not O₂; Plasma & plasma of ion, or electrons interlocked, creates body Inertia, holds elements together, Inertia; Soul committed to other Beings - not usually reincarnate back to Earth; Resurrection is transmutation - secret of Creation; Reincarnate as human - very difficult; Church made up religious terminology of resurrection - for fools; Purpose of physical life, create Soul, enlighten; Man has resurrected - lower order, attachment; Higher attachment-Soul of Creator; Transfer body; Plasma cars; Starlink satellites military; Register annually, waiting, Austrians accept KC; KC test phase - Resolve legal matters; China wounded - betrayed by India, expected BRICS currency - sold 60 billion American notes - convert to gold - crash currency; Reverse Rothschild's plan; Currency vacuum - KC not promote war; Need government support; Questions about Enlightenment Game answered by Eckmar; Transition period 5 years, convert to currency, Revolut; Plasma fields when playing Game; Breathing exercises; Vietnamese players & ambassador cheated; Thousands of KC not needed - Apps supply food, etc few cents; AI computers obsolete; Will not create two-tier society - they robbed other 90%; KS become part of research team in Space Center - make a living - market own goods; About changes; Make gold at home; Use of T, same as accepting; KS saved 200 Iranian parliament members with Gans - take over plasma; KS who betrayed KF; We are here to serve; This time T take 5 years; Americans failed with Cryptocurrency - Trump made money; If governments don't play - we'll release it; Don't need acceptance - work accomplishes itself; Use of Nano T of KF, etc; Test humanity with greed for knowledge; Mercury poisoning in Canada - dental fillings.

ENGLISH TRANSCRIPTION

(:15)

K- Thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute, what I call, the Institute of Universe, where the knowledge comes from and ends up, if one knows how to handle it.

In the past two weeks, as we say, we are targeting what we call, dimension (D) of the fields of the Universe (U). How we interact with it, how we are made up, and how things are made of us. We looked at that we absorb the energies of the Universe, and in turn, we give energies back. There are processes in the body of the Man, which is like every other system. As I said, we have lost the sight of the reality of the life of the Man on Earth.

(:16) We look into the galaxies, we look into the Universe, and we come up with numbers of billions and billions and billions. And we try to see to get one of them. But every human body is one galaxy. Every body of every living thing on this planet is one galaxy,

and none of the two cells in the body of the Man or any creatures are the same. So we are looking in a Macro comparison to Micro, and then in every direction try to understand the physiology of the Man. When we look deep inside the structure of the body of the Man, we find out, like the rest of the Universe, is nothing but the interaction of magnetic (M) fields. When you absorb rays of the Universe as 80% of the supply, you actually set a trap for it. That's all you do. Trap after trap. Try to extract more. Try to create by extracting enough energy that in that process, you can create what we call, a Black Hole (BH), a new star condition.

In the world of the physics, we have something what we call, single polarity items. It's all giving or taking. And in the world of physics of today has become an enigma, and there are a lot of research on it. But when you look at the body of the Man, you are that single polarity entity. In a way, the body of the Man is that gravitational (G) field source, and the Soul of the Man (STM) is that magnetical field source. (:18) Single polarity, and we live with it, and one feeds the other. And if we understand this, we understand even how the heartbeat of the Man is created. In the advanced, what we call, Cosmic Ray (CR) technology, in advanced cosmic plasma technology (T), when you bring a condition, when you can control through an external source with an internal what we call, capability to release power, you create a heartbeat. The heart of us, every cell of us, creates its energy that way. And then, we understand that we live a bipolar system. We call it, the physical life and the STM. And at the same time, we live what we call, single polarity. One takes and one gives. And when you add the radioactive material in a given way with a pulse which releases itself, you create the heartbeat. You create the speed of the STM, and the interaction between the two brings manifestation of the life, the physical life.

One day I'll go in depth of Creation that you all understand everything you see as every cell of the body of yours has the same system, follows the same characteristics but in different dimensions and in different strength. (:20) So when it comes to the STM, when it comes to physicality (P) of the Man, we have within us, we have within a structure of the two, we force conditions which creates condition of release of energy, creates current, And in that process of the creation of the current and the magnetic field creates the motion, the physical life of the Man. This is how the fundamental plasma physics works. We don't have an engine. We don't have a matter state movement. But when we convert or when we interact with a magnetic field as what we call, as a current, as an energy, this itself creates motion. This is how all the stars move. This is how the Universe moves. This is how the very first fields of the Universe came to move.

There is no terminology of the Law of Newton forces. It's a conversion. And when you convert and interact magnetic fields with what we call, the current, the energy, then you get motion. And then you get the expansion of the Universe. You get the expansion of the cell of the body of the Man. You get the motion of the blood within the blood of the Man. You get the motion of the fields of the Universe within the structure of the Cosmic Rays. There is no difference in how energies, fields, magnetic fields work in the Universe and work within the body of the Man. There is no difference. But once our scientists understand this, that in the matter state of the Universe, which is nothing but Cosmic Rays ... but magnetic field interactions, there are no life if we do not have a current and

if we do not have a magnetic field. (:22) And one in convergence to the other creates a motion of life, the whole motion of the Universe. Then we come to understand the more you 'jam-pack' these closer to each other, the more results comes into creation of what we call, the life of the Man. Each one has its own beat, each one has its own magnetic field, and each one allows certain energies to filter. That leads to creation of the cell of body of the Man, be it the heart, the brain, the blood, every motion of the physicality of the Man.

We come back to this point, and I had to raise this now, because in a short while, then you understand how, as Knowledge Seekers you transmute. You need to create the condition of the magnetic field of the Universe with your Soul, and a creation of the, what we call, current, of the, what we call, magnetic fields, with your Spirit (STP). And when these two come to match, if you know how to match it, then it becomes the transmutation of the STM. Nothing else and nothing more. In a way, you have to control one, or you have to understand how to interact the two together that leads to the transmutation of the Man. You travel the span of the Universe in seconds. This is how you dream. This is how when you fall asleep, the field strength of the physicality of the blood of the Man, (:24) creating the magnetic field which allows the interaction of the plasma in a way magnetic field, with the heartbeat current of the Man, for Man to travel the span of the Universe in microseconds. And when somebody shouts at you, when you wake up, when the physical condition says, I've done my repair, all you do, you change the current flow from this, what we call, the Spirit of the Man. And then the fields change, the dimension change, and matter state motion takes place.

Once the world of science understands this phenomenon, that how the heart of the Man creates that pulse through what we call, Cosmic Ray fields within the structure of the 'sun' of the heart of the Man, and how this field creates the current in going up, interacting with the STM, creates the energy of the Man. brings the motion of the Soul. And if it is strong enough, what we call, ?? mono-pole system of magnetic fields, as we imagine, comes into operation, which means the Soul expands, takes over, and that's the time when and if the Spirit of the Man cannot compensate from the fields of what we call, the lymph's of the Man, Man takes the path of death. When the Soul separates, and with it takes the energy of the Spirit of the Man. (:26)

One day, somewhere in the depth of the Universe, it might come into balance, and that balance might lead to creation of a star. Depends in what environment you have tuned the field strength to what we call, generosity of the Soul of the Creator (STC) within the structure of the energy of the physicality of the Spirit of the Man. Next time you try to transmute, try to understand which bipolar condition you accept. More attachment, more dimension of the attachment to the physicality of this planet, or more strength to the field dimension of the magnetic plasma of the STM.

In one of the most advanced technologies, as you see to you is baffling, in the world of the, what you call, UFOs, Space technology, this is how movement, creation of the motion is created. The separation of the physicality of the Man from the, what we call, Inertia fields, then the motion, the protection, and at the same time, soft landing. How do I position my Soul within the space of the Universe that allows me to manifest myself as

a part of, or the seed of, the next generation of life. While I'm still receiving, and while I'm giving for other lives to be in position of their existence, in control of their existence. I'm just the supplier, and by the law of the Creation, I cannot stop. (:28) I cannot stop or change the dimension of magnetic field as I'm responsible through the field of my own creation, for the creation of the others, the life of the others, existence of the one within the another.

Next time you want to, in a way, concentrate on transmutation, next time you decide to see if you can let the body go, and where would it be? Where is my home? Then try to control what we call, the field strength of the plasma of the STM, which is a magnetic field without any dimension, in interaction with current flow of the fields, which continuously the heart of the Man creates. Then maybe you understand Why you have a heart attack or you have a brain hemorrhage, it comes from the energy field of the heart of the Man. The energy release, what we call, the beat of the heart changes in such a rapid way that disturbs the flow of the fields, magnetic fields within the STM. Then you get damages as the fields try to find a pattern of the flow, paralysis, the lost of word, cannot speak. It all goes to what and what strength was the creator of the change within the Soul, the structure of the Spirit of the Man.

If you understood and if you understand this process, then transmutation for you will become a child's play. (:30) This is why we control the breathing to be able to control the heartbeat, to be able to change the dimension of the fields or the current of the fields, that when it interacts with the magnetic field of the plasma of the STM, creates the emotion of the Soul. Does not need no propulsion, does not need no engine, does not need nothing. It's a natural phenomena. It works the way it does. And when it suddenly hits, the density of the brain of the Man creates a mayhem. And you see the paralysis of what we call, the heart attack and the brain hemorrhage.

When you have stroke, it's the heart of the Man. the heartbeat of the Spirit of the Man which has created it and not the brain. The energy release within the dimension of the current flow of the fields which continuously generated by the heart, in interacting with the dimension of magnetic field of the STM which is a dynamic entity itself, creates dimension of motion. And if that motion is strong, will push the STM out of his position within the central brain of the Man and creates death, because now it's been propelled out of the position within the structure of the brain of the Man. And if the energy is not big enough, but sufficient enough to hit as a current within the structure of what we call, the STM, in the repose of what we call, confirmation of the fields, interaction with us what we call, the layers of the brain of the Man you'll see the destruction and you see what we call, (:32) the stroke with all what it is in the dimension of flow of the heart to the Soul, ?? which then indicates the paralysis of the face, the hand, the arms and the rest of it.

As Knowledge Seekers (KS) you have to learn how to control the heartbeat. And with it, the rate of the flow that creates an interaction with what we call, the plasma field of the STM, the dimension of the motion and creation of the emotion of the body of the Man. You don't need anything. You do not need no system, if you understand the process of work, to transmute, to be aware of, and to learn exactly where you want, anywhere in the

Universe. The time of the propulsion and the rest, long gone. But Man is not ready to understand the development which he understands fully the work of, but he cannot see it working because he cannot understand how to control it. Human race is a control freak until he cannot control, he does not give in.

If one understand this process, if one understands the gravity of the interaction of the fields, magnetic fields of the Soul. And with the current flow of the energy from the Spirit of the Man, which comes from what we call, the heart of the Man, Man can control at any time the demise of himself in the dimension of leaving the body of the Man behind and taking the 'flight of fancy' to join the realm of the Creation. (:34) Man has not understood the secret. And once Man understands the secret, Man will be able to understand to create the dimension of transmutation by the will of seconds, within seconds.

Understand the process. Replicate the process. and become 'Passengers of the Universe,' live by the Ethos of Mitra, and travel the spans of the Creation. When your heartbeat slows down, you call it, a dream. When the current flow is sufficient enough to interact with the STM, you cannot jerk it off to go on, but it travels and comes back. In the old age, in the dimension of the life of the Man, the way your heartbeat is slowed down during the sleep, and then you travel through the dimension of the Spirit of the Man, through the STM, and both remember their parts, you travel the span of the Universe. At the point of death, at the point of old age, if you look, why do you die in sleep? Just think one second. Not only the heart has to slow down, sending lower energy fields to interact with the STM. Now all the cells of the body of the Man work lower, even in the sleep time. So it does not need a Man's imagination of massive energy. (:36) Life travels at the lowest fields. Your Soul leaves the body of the Man when what we call, the current slows down and interaction with the magnetic field of the STM, allows the Soul to depart. This is the secret of Creation, and Man has not understood. You've seen how you dream with lower blood circulation creation of the lower magnetic fields as a current with the STM and you call it, a dream. And even when you make it lower and in combination with the lower energy fields, you create the separation. You create a massive surge of fields that at the lower order of the magnitude creates such a rush in motion of the fields of the STM, which creates the motion like the rest of the created things in the Universe.

The secret is to make it weaker in current. The secret is to make it more weaker pulse on the same current. That the interaction with the STM allows the Soul to expand and create the motion of the travel, separation of the STM from the dimension of physicality at the point of what you call, transmutation does not need to create that. But if one learns how to control, can lead to travel through the science of the electromagnetism and the current flow of the same thing. (:38) This is the fundamental theory of thermodynamics of the plasma, of what we call, fields of the Universe, and Man hasn't even understood. If you bring your heart a bit lower, it creates a lower field in interaction with your Soul, creates your dreams, you travel, but you're still connected through the Spirit of the Man, to the dimension of your physicality. And when I shout at you, you wake up. I was dreaming. I was traveling in the lower field. Now, when you weakened by age, even that field has become lower, and it becomes the time that the speed of the travel of the STM, due to the

weaker dimension of the current, creates a faster speed of the motion. And it can dislocate the dimension of the plasma of the Soul, and its direction of motion to what we call, trajectory of its field, where it's to be, where it's going to land.

Then you understand why you weaken at the old age, and in that process you don't dream anymore, but you create the separation of the Soul as you create a lower field current, that in that process gives push to the higher order plasmatic dimensional motion. This is the secret of Creation. And this is how the Universe expands in billions of kilometers every second. This is the secret of transmutation. And needs a Man to understand and be detached from the life on this planet, that he can take the path of what we call, transmutation of Time, Place, Space, Position, and Possession. (:40) I hope you understood the secret. And if you have not, stay around, one day you might learn. And stay around that your Soul will deliver what you do not want to learn, for you to become the Passenger of the Universe, not at will, but by process of the elimination and reduction and old age. We go for a break and we come back. And I hope you Knowledge Seekers has understood the terms of your travel, and the terms of your, what we call, transmutation of your Soul. I gave you a big secret, and I hope you understand. Rick, take us for a break and we'll come back. (:41)

>> **BREAK** >> 660 KSW September 17th ... (:51).

K- ... Yes, hello. Sorry about that. We try by next two or three days to bring the Store of the Keshe Foundation back to operation. You have to re-register again, because everything is upgraded, changed. And with it, we've been trying to do this for nearly 10 years. If there are any hiccups, if there are any things you cannot sort out, get in touch with us. (:52) Well, no system ever is perfect. But we're hoping that it'll come operational today, but within the next day or two. Hopefully, the Store of the Keshe Foundation reopens in a much better way with use of credit cards and everything else. It gives a facility to be able to join in with what is about to come, with the expansion of the Keshe Foundation through China and other operations we have. I hope you enjoy it and I hope we've managed finally after some years to bring this, what we call, problematic situation of the Keshe Foundation Store to a closure.

At the same time, many of you and some of you have started opening the stores in the Game section of the, what we call, in the system which we have set up, the Enlightenment Game. Try to be more precise. At the moment, you can only deal through your Coins, which you gain in the what we call, the Keshe Coins (KC) of the section and in the coming weeks we will open the Keshe Coins and hopefully the Coin will be used

one of the leading nations of the world as a step one of the currency to become part of the work of the International operation. We're hoping with the next few months to see the first step on the International use of the Coin as we try to bring this work to an end and make the Keshe Coin as one of the, what we call, social currencies and not the national currencies. (:54) And with it we bring a lot of Ethos and a lot of work. If there are any questions, we'll try to answer and try to learn from each other some more.

Q: ... My today's question is about ionization or scintillation and I would like to understand a little bit better if there is any difference between both and how...

K- Can you repeat? Can you repeat?

Q: My question is, ionization and scintillation.

K- What?

Q: Scintillation. Maybe I'm not pronouncing it in the correct way. But anyway, I would like to have a little bit more information about ionization in the plasma process. if you can expand a little bit more.

K- Ionization is a matter state condition, (:56) and in a way it does not exist in the World of Creation, unless you're in the matter state. Creation of ions, in the condition of the atomic structure is part of the creation and control of what we call, Inertia. And to interact, to be able to convert the energies of the Universe, which interact with the magnetic field of the Earth into matter state, you have to have a matching system, which is the combination of the field of the ions of that element, which allows what we call, Inertia. If you understand this process, you do not need to create ions. You work through the fields of the plasma and energy, which is much more, much more effective than ionization.

In a way, when you create ionization, you create what we call, Nano structure of the electron. And if you understand this, you'll work with what we call, the structure of the Inertia of the planet. The way we take the matter, we convert it into Nano structure and then we change it into a plasma, what we call, the Gans. Ionization is what we call, the Gans state of the electron in energy matter, which actually is the controller of the Inertia. We have the Inertia of the planet and we have Inertia of the matter state, which is in dimension of the Gans state of the electron. (:58) This is a very advanced physics, and not understood by the world of physics today. One day they will understand and then it will change a lot of things in construction of the matter state and transfer of energy through matter.

This is the way your heartbeat works. This is the way the cells of the body of the Man and what we call, the Soul level do not take any energy, but create the heartbeat or what we call, the fluctuation in the fields of the plasma, that it changes the what we call, the rapid fluctuation in the balance fields, the harmonic of the plasma of the electron. When you look at UFOs, where you see a rapid expansion and change, this is how it's done.

Ionization of the plasma, in the Inertia level, which creates a repulsion and always creates a flash. This is part of the Space technology, what we call, 'lift and motion.' But it needs a lot of understanding to be able to achieve it.

Q: But Mr. Keshe, there is radiation involved in this process, kind of...

K- It creates radiation, depends what you call radiation. Plasmatic fields do not have radiation. Interaction of plasmatic field with the lower field matter state creates what we call, friction, and then from it radiation. The way you produce X-ray. You release a high current, and a high voltage creation with very low current targeting the surface. (1:00) And you create a release of motion, or what we call, dislocation of the electron, which creates the creation of the X-ray.

There is much, much easier ways to create X-rays. There is no, in the Universe, huge ?? KV systems to create X-ray, but X-ray is created through the interaction of the fields of the plasma, in interaction with what we call, the lower state matter energy. That's how radiation is created in the Universe. Cosmic radiation comes through this process. There's no huge X-ray machine and Gamma Ray machines and the rest of it. It comes from the dimension of the plasma itself in interaction with the lower field in the dimension of motion, which leads to creation of the radiation, gamma ray, Cosmic Rays and the rest of it. And if you manage to understand it, and create a counterpart to it, will create what we call, Infinite Loop of the creation and energy and process.

This is one of the reasons, your heartbeat is, has got a rhythm and it's continuous, and has what we call, muscle energy field strength through the plasma of the Inertia of its own blood. And what we call, the plasma of the, the ions or energies of this, what we call, Cosmic Ray within the structure of the body of the Man. (1:02) If you watch, if you observe the motion of the heart of the Man, you'll watch, you'll observe huge amount of radiation continuously released by his motion. Because the plasma in interaction with this location, because the heart is always physically moving, with the plasma of the ions of the atomic structure, which builds it, releases a very low field energy X-ray, Gamma ray, and the rest. Which that allows the ?? energization of the blood. That's where your blood energy comes out, not through the Oxygen in the way we've been led to believe. But this is the way you increase the plasma. You increase the plasma energy.

It's a very interlocked system of work between the plasma and what we call, plasma of the ?? ion, or what we call, electron, which creates the Inertia of the body, and it holds to all the elements of the body of the Man through its own plasmatic Inertia, not the matter state Inertia. As I said, it's a very, very advanced, what we call, thermodynamics of the, what we call, magnetic fields, which the knowledge is unknown to Man. And when you see a UFO, when you see Man changing his position and emotion, it's all backwards how they do it. It's understanding this process.

Any other questions?

Q: ... (1:04) I have the following question. If the Soul has access to the knowledge of the Universe, does it also have the knowledge of resurrection, including how to create a new physical body? Or does such knowledge not exist? And if it does exist, why don't we see resurrection taking place here on Earth? Thank you for your time.

K- Repeat yourself, I think you answered yourself. Repeat your question, I think you have answered yourself.

Q: The question is, if the Soul has access to the knowledge of the Universe, does it also have knowledge of resurrection, including how to create a new physical body, or does such knowledge not exist? And if it does exist, why don't we see resurrection taking place here on Earth?

K- The knowledge of manifestation, or what we call, transmutation, it's the knowledge of emotion of the Soul. And it's his decision what to do. But don't forget, over the time of the life of the Soul on this planet, the Soul has connected itself to other dimensions, which (it) is committed to. Unless it's the love of the living which brings you back into manifestation of what we call, the emotion of existence. Then, yes, you will see yourself in a physical dimension anywhere in the Universe. You resurrect, there is no doubt in the dimension of Resurrection, (1:06) but it just depends keeping the time, the place, and the field strength, what we call, Possession and Position, and then you manifest yourself. Resurrection is the secret of the Creation.

But if you want to resurrect in the body of the Man back on this planet, that's a lot of doing. Very few can manage it, because you have to understand how attached you are to the fields of this planet that allows you to recreate. The ?? world of resurrection, we clearly explain it, is what we call, transmutation, scientific ?? world of it. You transmute, you don't transmute for the rest of your time, the whole of the Universe. You transmute from A to B, to manifest yourself at B. Now we understand the science, we call it, transmutation. Resurrection is for the fools, who have been managed well to be fooled by those who call, them the Church and the rest of it. The whole purpose of life is the creation of the Soul, to manifest itself as another dimension of creation in the Universe. That's the resurrection, that's what we call, transmutation. There is no purpose in living, in life, if the STM does not found itself.

As I said many times, the minute you leave this planet of body of the Man, your Star is creating another dimension in the Universe. So, I said you answered yourself, but you don't, you didn't understand your question in the essence of the World of Creation. (1:08) You call it, resurrection, we call it, transmutation. You don't go forever. You have to manifest somewhere yourself. What's the purpose of transmutation? Scientifically we understand how to do it. You want to be fooled by the church, call it, resurrection. And resurrection, in the dimension of physicality of Man on Earth, has been done. It's something, but it is a lower order attachment to dimension of the Earth, than attachment to the Soul of the Creator. So you call it, resurrection. Scientifically, it is transmutation. And if you are physical, you do the transfer. If you understood, the knowledge. Soul is aware of it, because that's why it transmutes. That's why it travels the span of the

Universe, to manifest itself as another seed of a star. That is resurrection, it resurrects itself in dimension of their field. You look at the resurrection in dimension of physicality, it has the knowledge of both.

Any other question?

Q: ... Mr. Keshe, I need a new car. Will there be a functional Keshe Foundation plasma vehicle available for purchase or use in the foreseeable future? (1:10) If so, within what time frame?

K- Watch the Store. very soon, extremely soon. We won't sell you a car. We sell you a box with bits in it. You attach it to your car. It becomes your car. Attach it to your Persian carpet, it becomes a flying carpet. Attach it to a cardboard box. You ?? cut place with it. It becomes a flying car ?? ?? . Technology has leaped, a huge, and one of our researchers in the Space Center is a completion of this.

R: You know that Elon Musk is coming up with the flying car to be unveiled in October 1st, I think. His latest incarnation of the sports car, which he came out with nine years ago, or whatever. as some kind of...

K- But it still uses...

R: It's rocket technology. It's rocket science.

K- ... Has he become the Minister of War?

R: No, I don't think so. I don't think so, but I have heard that the Starlink satellites are dual purpose. They're split between military use and civilian use. And all we hear about is the civilian side of it, but each satellite has a split in it. Part of it is super secret and high security and whatnot, and the other is what the consumers get. (1:12) I didn't know that before. ...

K- Keep very quiet about it.

R: Yes, I guess so.

K- He got that contract and he got, he became member of the 'Black Eye Club.' (The Elites in this club included Popes and Billionaires, etc.) Let's see what happens.

Next, any other question?

Q: ... Thank you for everything you donate to us from your Soul. Does each person have to register annually with the Association in Austria? And in the country where they pay taxes?

K- At the moment, it looks like it. We're still waiting for the Austrian authorities, after months of when you voted to bring Keshe Coin to accept the Coin. We hopefully hear something in the next few weeks. Then, yes. ...

There's a lot of work going on with the Keshe Coin. We are interacting with number of governments. We've been accepted by one government to become, going through the first test phase. Hopefully they'll put the thing together. We have the second one has agreed to do. The whole 'ball will roll' when the first, what we call, Coins are released. If you noticed we are ?? sitting on the Coins on the legal matter side that once it's resolved, we will bring changes. And meanwhile, we are negotiating, getting collaboration, organization with different structures of the governments around the world to bring it in. We just need to hit with one nation, and the rest will run. (1:14)

Any other question?

R: Do you think there'll be a rush for global peace coming up? Perhaps a network of countries that will agree to peace instead of this rush for war, which seems to be prevalent right now? Surely there'll be a counter answer to this...

K- At the moment, we have a 'wounded' China. And the wounded China has to find an answer in the past few days. And this can be leading to a huge, what we call, economical crash, which with it not having. America as a superpower anymore, will create a vacuum that it pushes us toward peace.

As we know, most of you know what happened this week. The dream of President Xi was crushed by the Indians. And so China has diverted, selling massive amount of American notes to crush the ?? currency. And that can bring a lot of what we call, problems which leads (leaves) no leading nation to lead, and we are pushed towards peace. But at the same time there's a vacuum in that position and the vacuum is there is a need for international currency that no nation controls. (1:16) Now especially what happened with China and India in BRICS in the past few days. And as they say, the Prime Minister of India was given a huge bribe, nobody knows what it is. One day it will come out. And that brought a huge problem for President Xi, which was hoping this week to switch over the Yuan, and BRICS currency to become what we call, the leading currency in the world. And with the Prime Minister of India taking the side step to do so, stabbing China in the back. China sold 60 billion notes of American government and they sell more, converting it into gold. And this is, if you go deeper in gold, you have less funds for other things, because you're increasing your national reserve.

And major governments are moving gold out of their trustee into their own trust, into their own central banks, which is the reverse of what we saw Rothschild's trying to do for nearly, before First World War. It's the first time we see the reversal of the national, ?? sovereign assets of gold returning back to nations. Where if you looked at World War I and the Second World War, Hitler took all the gold and took them to one position. And now all the gold are going back to the nations, which this can create a huge problem in the coming time. It creates a vacuum for currency, which belongs to none, but operates

amongst all. And Keshe Coin is one of the leading contenders. (1:18) According to a national report by the financial authorities of a nation, we stand 100% chance to become the first international currency through analysis of the government. Two governments in the past few weeks have recognized Keshe Coin to be, has the capability to become the sole International currency, and we are working on it. As it belongs to no nation. And it is acceptable by all, and especially with the videos we put out, how are we going to do it.

There is a gap. There is a window for a short time, maybe two years. And if we see another move with wounded China, as I call it, in the past seven days, that Keshe Coin has the opportunity to push itself into a what we call, 'no nation' belonging to no one, that doesn't bring ?? superiority to Americans, or the Chinese, or the Indians, and it gets accepted. And we have received a favorite, very favorite movement by nations in bringing in. The biggest fear governments have if we become their national currency. This is the biggest thing that's stopping the governments to give the green light. Then they lose control. We have to watch and see.

It's a very, very close chance. And when you create a currency which does not allow a promotion of war, opposite to Rothschild structure, when you promote a currency that is based on peace, then we'll see the result. We stand a very good chance, if things turn up. (1:20) That a currency like Keshe currency, stable, non-governmental, belonging to no one but the humanity, to take over. In a way, evolution and revolution by people against what we call, nationalism, or what we call, making a single economical nation, that they control. This is the biggest problem we have, especially in the Western Europe, that if Keshe Coin gets its final approval in the coming weeks, it will be the end of the Rothschild's. It will be totally the end of Rothschild's family, their assets. And as one of the European leaders has said very recently, Keshe has delivered the biggest blow. Nobody has seen it coming. It's a very, very big job. And the cornerstone of it is peace.

And Americans are in a ?? dandling position. China has a wounded situation in the past seven, eight days, with the Indian prime minister, with the support of the British. They pulled a leg off the table, and the table has pushed. And there is a gap. Bitcoin cannot cover it because it has, it's for the rich people. Keshe Coin has, but we need a huge support from government. This is one of the key points, to supply us with their ?? servers. And with their support, that we can release 90, 100 billion Coins simultaneously worldwide, with no hacking. We use governmental systems as backup to ONN's. (1:22) So a lot can happen, but we are on the sideline. We are waiting for a couple of governments to make the first move, even though we received the green light. Then a Peace Coin is on its ?? path. But it takes time.

Any other questions?

Q: ... Is there a place where the Keshe Coin videos are listed as a playlist?

R: I'll put that link into our chats. It's the Keshe Coin Youtube playlist link. And you'll find some of the older Keshe Coin videos there as well. But there's the six more recent ones that are all available.

Q: ... I have a quick question regarding the Game. So, I've noticed that when we play the Game that, if you if you do the breathing techniques and you start tapping into, like the transmutation part of it. That when I've done this a few times that I've started, I don't know, it seems like my sleep patterns have gone completely haywire and I'm oversleeping by large amounts of time, even though I don't really need to. And it seems to have changed a lot of parameters in the time scale of things. As the Game progresses, what can we expect to start to happen as Knowledge Seekers?

K- Where's the Man which is guilty of this job (Eckmar)? Is he around? (1:24) Do you see him on the panel?

R: Yes, he's hiding in plain sight. He was, and he just disappeared. Wait a minute. We could have answered you. Oh, he's got his hand up. That's one spot to another here.

Eckmar: Hi, Mr. Keshe. Hi, Rick. Hi, Dean. Well, the problem is, no, the challenge is that there is a lot to come. It's... What I should reveal right now is not ready for a public teaching like this. I want to talk about first this Mr. Keshe in private, and then we make a schedule how we release what, because we all understand that this Game is perfect to create our own ecosystem and we can pay with Keshe Coin and build up our own bubble. Perfect, fine. But for the transition period, we need to have the possibility also to sell against fiat currency like Euro or US Dollar. And officially, we are right now not able to do that because we are missing this bank license, thing, but I found a way that every individual from us can do it, in a way. (1:26)

So the shops will maybe starting next week offering the possibility not only to sell against the Keshe Coin, you as a shop owner can sell your services or your goods also for Euros or US dollar. If you have a ?? Revolut bank account, this is for free online bank account, which is for private persons free of charge. Right now I'm building an interface that you can use fiat currencies for your sale, for the... How do you say that, transition period. Because when we have achieved our goal, that we have a million of shops selling billions of goods, all payable in Keshe Coin, then we don't need that anymore. But for say the next few years, two, three, four, five years, I think we still need the possibility to offer you as a shop owner to make your personal decisions for which currency you would like to sell your services, your products.

So if this is the case on the better server is already running, we can also integrate this ?? Ethereum or Bitcoin or other Cryptocurrencies. Everything is possible. The bottom line, the lawyer needs to say, okay, this way is okay and this way we should try to prevent. (1:28) Again, we will announce it officially when Mr. Keshe is ready for it and say now is the time. But it is prepared and we can do it within days. So there is a lot of things which will happen within the next, till the end of the month. It depends on how fast the Austrian government will respond when we can officially use the Keshe Coin, the KC, within our structure, because right now it's more or less on hold. So we are only talking about the CC, the Game Coin, because there we do not need any bank license or whatsoever because it's a pure gaming Coin. It's nothing backed up like the Keshe Coin.

It's back up with gold, and market shares, or stock shares or whatever. This Game Coin is just built back up by trust, by us all together. But there is no exchange available. You cannot exchange the CC against Euro or any other fiat currency, because that will immediately bring us to the point where we need to have a bank license. And then we are in all this reporting and in the old structure, which we will try to replace with our new ecosystem.

So therefore, no, I think this is the wrong way to go. We keep it as an internal currency for the Game. (1:30) But every shop owner can decide, he can opt in for the option to sell his goods, not only for CC's, also for Euros or any other fiat currency. And it's all done automatically by the system. So there is no human intervention needed. So it does not change a thing if you sell it for CC's or for Euros. It's the same automatic structure. Everything done by the system. The only system, the difference is we will not be offering escrow service for fiat currencies because that will implement again this legal issue with the bank license.

So, if you pay with a CC the seller does not receive directly the amount, so the buyer is sending the money to the host, to our service. And only when the buyer is receiving the goods, then the escrow is released to the shop owner, to the seller. 98%, 2% is hold back to recharge for the server account where all the treasure chests you opened during when you play the Game, you are finding some CC is there, all this is coming from this server account. So we need to have this feedback loop that it will be not drained over time. So it must be a self-containing system. I explained that I think yesterday in your group, Rick, right? (1:32) So bottom line, yes, you can look forward for a lot of changes within days or weeks, There's a lot to come, and it's already running on the ?? beta server. It's not something we need to develop this year.

K- You haven't answered Dean yet.

Q: So, Eckmar, my question, thank you for the explanation of the Game. the structure that's taking place. My question to Mr. Keshe, and ultimately he passed it on to yourself, was about losing some time by playing the Game when you go into the breathing techniques of the transmutation and physically starting to interact with the Game. It seems to be creating fields of all sorts of things with the physical structure of the body of the Man. So are you aware of this? Do you know what's going on?

Eckmar: Well, the whole concept of the Game is blowing down. It's not the Wild West Game. I shoot first, you are dead, and I win. This Game is about learning, about collaboration instead of competition. So you have to wait until the... Timer is counting down to zero. Here you have to wait a minute. There you have to wait 120 seconds, two minutes. So learn patience. Learn to become calm. Because this is the state which you need to achieve for this enlightenment, for transmutation, for so many other things. (1:34) It's not a rush. You should play this Game for the next decade. You should make a living out of it. Just sit peaceful at home and playing a Game instead of going to war. It's a fantastic alternative, right? Swinging in your hammock, your laptop on your belly and

playing the Peace Game and making money with it and making friends, right? We have introduced so many different programs like the school program, right?

The teacher which joins with more than 10 students. Yeah, they can get a certain amount of Keshe Coins for free sponsorship for schools. You have now these sponsorships in the partner card. There's a new tab. where you can decide to sponsor three other players, maybe new player, which they have just started the Game. They do not, you know, there's only dust in level one, what you can gain or what you find. So more advanced player or player which is playing the Game for longer time and has more Coins he can sponsor up to two, three other persons. That means every income you achieve, you give 1% to each of the three. So you keep only 97% for yourself and give 1% to each of the other sponsors. So you have to learn sharing, giving. It's not a one-way street, everything for me, right? Oh, I want to be again rich, yeah. (1:36) No, giving back. You have to learn that concept. And slowing down. It's not a rush. You don't need to rush. Learning. Read the short form from Wikipedia about the different countries. Learn about who has the most forest, which country has the most forest, where. What is the capital city of Portugal and so on. You learn by playing. This is education. That takes time. It should not be a race. A race is against time. This is the wrong concept. Just relax, calm down, make the breathing exercises like you mentioned while you are waiting the two minutes until they come. But you have to do that often, not only once or twice, do it 10 times, 20 times.

So it's up to you how you use the tools which are built in the Game. And there are a lot of, new tools which will come the next three months. Till the end of the year, you will not even recognize anymore the Game. So this will make a huge transformation in itself. And I hope that Klaus will be very soon ready for the tests in KF audio rooms where we can transfer these plasma fields because this will be all with the one to one session. No coughing or falling a book, whatever will not disturb the next one. (1:38) There's only the field and you in one session. But we can offer multiple sessions at the same time, different locations. So again, a lot will come.

K- Can I ask you a question. Can you address this situation with the Vietnamese, they think the money has been stolen from them, they're Coin or whatever. Because it's become a, it become a, what you call it, a sore wound for them.

Eckmar: Okay. We had a group of 11 or 12, not sure if it were 12 or 11, 11 Vietnamese players, which the ambassador is this. What we are doing right now is we are building up a network of trust and the ambassador has the function to build up this trust between the players because each player we don't know, there are foreigners, strangers. So, but the ambassador should verify that the player has entered the correct data and he needs to verify it in a live ?? session that the content of any official document, like a passport or national ID card or driving license, whatever, is the same like the user has entered when he has registered his account. (1:40) And these Vietnamese people have not done this job. They entered the ?? ITC room, but they did not show anything. There was only one person in the ITC room, not even the second one. They were just present. And after six minutes after the time was over, they just registered or verified the person so that it can reach the next level and earn more money. And also the ambassador who was doing that

job, earns about five Euro ?? or Keshe Coin ?? in worth about five Euro. So what they did is they verified passports which have in the second name something like LTD, like limited. There is no passport in the world with a second name like LTD. So there are proofs that they did not verify the data accurate, which is the job of an ambassador. They need to verify that the player is really the guy who is saying, yes, I am this guy. No, it must be a different guy. In addition to that, three of them had the same IP address. Ok, it could be a family with three members. It's not 100% proof, but it's just an indicator ...

K- Why did they lose their Coins? How did the Coin was reduced or whatever, if I understand correctly?

Eckmar: No, no, they did not lose their Coins. It's impossible to take the Coins back because the Coins are on the blockchain and they have the private key. If they have gathered with ?? back using some Coins, that's what it is. (1:42) They have the Coins now. I cannot take it back. What I did is because they leveled themselves each other up from level two to level three, some already leveled up to level four, which was a bug in the software because normally an ambassador can verify only players on its own level, or level below. And none of the Vietnamese players had more than level two. So how they could reach level three, and especially a few of them level four, it's impossibility. This should not happen this way. But I understand now how it happened, because they overloaded the system in a way because they verified themselves within seconds. Within two hours, they leveled up from level one to level four. This is every level up brings them about five euro. So within the two and a half hours, they made about 180 euros by faking verifications. It was not a real verification against the passport. So what they lost is their level. Say I put them all back on level two because it's not fair, then the cheaters will gain 1,000 times more than a regular player. So they are all back on level two. And that was, of course, very disappointing for them to level down. And they wrote this letter to you. But the data is available. We can show them this. What they did. (1:44)

K- I understand. No, it's just that we all understand that the program needs monitored by the people themselves. This shows there is a sign of greed around and others pay for it, because of the other people's greed. Thank you very much, Eckmar. Thank you indeed.

Any other questions?

Q: ... Mr. Keshe, can I go on from what Eckmar was just saying there? Are you aware of some of the stages like I'm fairly sure that if we go through this transition period with the Game and still having to use the fiat currency and things, that there will be certain legislations that are written to, I've seen some recently, to make it so that if you're a shop owner, that if you have to send physical products somewhere, they're trying to do it so that you have to do it in a very specific way that makes it almost impossible for a small shop owner to be able to exist. So all these things are, you know, all these games are being played. I'm sure you're aware of it, but it's a question of how will we overcome this so that it actually functions in the correct way?

K- At the moment, I'm going to tell you something which I've said before. And that is, I'm trying to put it in a most accurate way. (1:46) Some people tell me that you're giving, through the Keshe Foundation, 10 Coins to the youngsters and to the newborn. And that's 10,000 in some Western world. That's nothing. The child to live, you know, some families get around about, I don't know, 2,000 or 3,000 already from their government. So 99 and 95% of the world population doesn't get this. So, on the other hand, as Eckmar said, the way the technology development is going, should we reduce one Coin per person per year, instead of 10 Coins? Understanding that all the technological development, your medicine, your food, source of energy, would be bought with one cent. In a way, if you eat 10 meals a day, with the fruits and everything else, it only costs you 10 cents. And If you take that by 365 days a year, you only need 35, 40 Euro. Why do we give you 1,000 Coin and 10,000 Coin? It will be in the hand of the future heads of the Keshe Foundation when I'm gone, to adjust this. (1:48)

We are looking at bringing peace, bringing what we call, a fair level play for everyone. And when the Apps come on your system, when you connect to the games, especially the system share, coming up and getting tested, you feed yourself free in a way. Why are we even giving 10 Coins, which is about 10,000 Euros? Wouldn't it be better for us to distribute very, very cheap, down the line, one-way traffic, mobile phones to every person who joins us, that through it they can receive their food, their medicine, and in one way or another, confirmation of the energy, for nothing. This is not a fairy tale. The system is already on the trial.

When you don't need to pay hundreds of thousands for traveling from A to B, and you can do it with a few cents, or hardly even one cent, is there a point to be? What is the \$10,000 for? And these are not things very far. The Space City research in space has already started. The first scientists have taken their place. And in the next few weeks and months, we will see a huge amount of development in energy space technology, which makes a lot of things obsolete. (1:50) When you can find a transport system for less than \$100, doesn't matter what color and paint you put on it, When you go to an App and download an apple and a spaghetti Bolognese for less than one cent just to connect to, you'll change. Do we need all these positions? Do we need the Americans to kill each other on board of their aircraft carriers for hunger when we can connect them in line and feed them? As long as they put their arms down and go back home. These are the evolution in science. Even what you see, all this AI and this kind of computer and that kind of computer is obsolete with what is just to come.

Q: Mr. Keshe, won't it create like a two-tier society, though, where you have... ???

K- No, this is the first time we want it. No. The thing is, the two-tier is a tier for those who lose all the privileges they had by robbing. 90% of the world population will live a peaceful life. Tier as a cry of them, yes. Because they lose their control. But they tried to bring the hierarchy, the separation of Man, for somebody to be important. It all goes. That's their tier. But it won't be a two-tier society, no. They try to hang on. They try to do things. And it's the society which dictates. (1:52)

As I said to... once before, they left me too far, too late to control. And the whole expansion is mind boggling, what is and what is developing, what is to come. We even see how Knowledge Seekers have changed while they're sitting with us in board of directors. How people, our advisors have changed. They see the change, and they're moving so fast just to be with it, just to catch up, that everything goes forward the same way.

There's a discussion very soon, hopefully in the next few weeks, with the help of our IT team. This morning has come up, and it's taking shape, that you all can become member of the research of the Space Center. On your own. You can be physically, what do you call it, virtually present. And I start doing the research you're doing and you get paid for it. And you literally become a researcher in the Space technology by the way you play the Game today now. It becomes what we call, you play the Enlightenment Games. It becomes the educational Game. It's like a university. It's a research center. You come in. You can do your research. If it takes shape the way it's set to be, then every one of you from your homes can participate in the real research. And you pay for it. And we charge you for it. Your payment is through your Keshe Coins and you make a living out of it. (1:54) And it's the next step if the program takes shape then you have two games, or not two games, you have a game which you play enlightenment, and you have another program which you all, even the ladies in the kitchen table can become researcher. And the way they cook their, God knows, food or whatever, and do research on it, and bring it out and goes back into the system.

It's part of the KFSSI. Now it becomes virtual. Millions of people can be joining the research. We pay you to pay us back to do research and we pay you back to what you call it, to market your own goods. Every time I sit with anyone who comes with something which is valuable to us, or positive to us in Space Center, I tell them, this percentage is yours. And you work for yourself. And when it comes, it helps us to help others. It's not that they come and then they say, oh, I'm going to find somewhere. ?? We are tell you from day one, this is on the table across us, your financed, get it done. Different way of research. The researcher knows he is a benefit of his own work and not hiding.

Q: So, for many... they're still going to be... and I'm just trying to, you know, play both sides again. So there's still going to be many that are going to be a very matter state. But what would mean physical?

K- Let them be. Let them be. Let them be. (1:56)

I went to the Central Bank of Austria and I said, we produce gold. How do we negotiate? How do we handle it? They said, there is a section which is responsible for the gold reserve. Go to speak to them. I went to see them. He said, where does the gold comes from? I said, the system. This cannot be correct. This cannot be true. You do what you like. We cannot accept, more or less. They can't accept change in technology. It takes 20, 30 years. These people are sticking to their job. How can you have...

It's very much like... When I used to be a diamond dealer in Antwerp Borsch, we carried millions of dollars of diamonds with us. And, you know, it had a lot of value. A piece of glass, I used to buy it for \$10, \$20 in Africa. Cut it, lucky, came out, it became \$6,000, \$10,000 on the streets of London. Nobody had, it because I controlled. The same as what we do in Keshe Foundation. From the mine, to the ring on the finger of the person, I controlled everything. It's the way I always worked. I knew a stone cost me \$10, \$20. I used to ship it legally across. I used to sit with the Congo ambassador in Brussels, that everything is correctly shipped through the shipping companies. And the stone of \$10, by the time we used to cut it in Antwerp, diamond Borsch words, goes on the street, 6,000, 8,000, 10,000, and there was nobody to control it. (1:58) Now you can't do that. The Chinese and the, God knows, the rest make diamond like, God knows, nothing. It doesn't even cost a dollar to make any more diamonds the way they are going.

The same thing will happen to gold. In next two or three months, we show how. Very soon, you can, by the way, you buy microwave machines, or you buy these 3D printers. Keshe Foundation will market microwave size, which produces gold and silver at your home. So who's backing America, and who's how much gold is in the reserve? And we are not going to make it, we just give license to companies which are in this to make it, for us to set a company and do it, to ship a Toyota Mitsubishi ?? guy of China. We all give them license, give them the blueprint, make. It's not very far, it's just that, we have given value to something which does not know value. And this way we take the value away from it, then it's not a ground for war.

Q: Well, that affects everything, though, Mr. Kessler. If you take away that structure by, you know...

K- We are not taking structure, it is development of technology. It's a knowledge. It's a knowledge. (2:00)

Q: They need to accept the knowledge though, Mr. Keshe. They need to ...

K- When people use it, it's not acceptance. When people use it, it's not acceptance. It's already accepted when you use it. I sat during the Corona. with the head of security of the Tehran parliament. The guy was dying. He had a few hours, if that. One of the Knowledge Seekers was informed by the Central Security Committee of the Iran Parliament that, can you get to him before he dies. The Knowledge Seeker, he knew the risk. He went into isolation unit. with the Gans's, sat with the guy, and he caught Corona from him, and the guy survived. First thing he did, he went to the parliament, tried to ban Keshe Foundation, because he wasn't getting money out of it. The Gans's saved his life, the head of the security of Iranian parliament, present parliament. First thing he did, he went to ban, because he wanted this to be given to him, that he can make money out of it. We got caught in the syndicate of what we call, mafias of the medicine in Iran. This is how they are. Save them from death, then they want it because they know what it can do to them, or what it can make out of.

The Iranian Knowledge Seekers during the Corona time saved 200 members of Iranian Parliament from death. (2:02) Knowledge Seekers. Just with Gans's. And then they found out what it is. They want all of it and to be in their control and everything else. It happens with the Knowledge Seekers. The Keshe Foundation Knowledge Seekers worked with top people in Iran. And the guy said, you get 1%, you're happy, 99% is ours. He's saying this, how many times Knowledge Seekers around the world stole knowledge and they tried to, how did they end up? One of them is on a bed with more drugs in him than ?? in the fields in South America. One is in a bed with another kind of cancer. Whoever tried to ?? (?? cheat) Keshe Foundation, because it's the trust ?? of you lot, go and see what happened to them. We don't care about this and we're here to serve and our job is to spread and bring it out. And when they're all done, the ?? classes, those who abuse don't like to let go.

Q: I think it's a slow process, Mr. Keshe, and I think it's going to...

K- No, no, no, no. This time is going to be very fast in a matter of a handful of years. A handful of years. Americans are moving away from gold into Cryptocurrency because they want to increase the Cryptocurrency that they can pay with their debt with the increase. It didn't work, did it? (2:04) It has not worked. That was the biggest plan by 2025, 2026, that the Americans will take all the Crypto currencies and then push the prices up, and with that, they paid their national debt. The national debt is skyrocketing, because it didn't work the way they wanted it. Bitcoin dropped, and their shares dropped. Only man who made money was Trump. ?? Read ?? you can't stop. You just change independently the ground game level and that's it. And when you look at the six videos of the Keshe Foundation, we wait a little bit. If the governments don't play the game, we release it and then let them handle people because it's on the Internet. It's in the hand of people exchanging Coin and playing with the Coins and keeping its value. It's not in the hand of no one.

Q: It's understanding the technology, Mr. Keshe. It's that what you've created was where the plasma is actually of a higher order and then it's filtrating down through all these manifestations into this physical world. But Man doesn't seem to accept this.

K- He doesn't. We never stood for people accepting. We carry on with our work. It does it by its own. You become ingrained in the work of the system. You don't need acceptance. I already do it. You look at how many new inventions in the past 15, 20 years, (2:06) line it down all the way back, ends up with the release of the Nano technology of the Keshe Foundation. Just one side. Forget about the others. The Black Hole paper, as I said, go and see how that paper, by Stephen Hawking stealing it, trying to say he changed his mind, opened the door to many other things. It does its work. We're not here to make money. We're here to change fundamentally the basis of the knowledge. With it comes a lot of other things. We, as I always said, you test fire with gold. And we test humanity nowadays with the greed of the knowledge.

Shall we call it a day?

Q: Thank you, Mr. Keshe.

K- Thank you very much. I have to tell you something that just came to my mind. Do you know what your name means in Farsi? It means religion.

Q: You told me this.

K- You are a very religious man. No problem. Thank you very much. Is there anything else, Rick?

Q: ... Understanding the disclaimer and that we are responsible for ourselves in plasma science, how can we support a community that has had mercury poisoning for decades? Can it be done by placing many MaGravs for...

K- No, no, no, no, no, no, no, no, mercury, mercury. (2:08) Where it is, how it's done... Then we can analyze it. Mercury poisoning, especially, we see mercury poisoning very heavily in some dentists, due to previous fillings. A lot of Alzheimer's and all sorts of things in what we call, past as dentists. Where is it from? Is it coming from an industry? You have to know a lot of it before you enter it. It can be done, possible to be done.

By the way, something I have to tell you, we were planning to, or plan was done, to have a conference in Switzerland on 23rd, 24th, or 24th, 25th of October. This will be delayed to November due to developments in all data development. and system development, which is going through at the moment. We'll delay it by four weeks due to what we call, advancement in technology. The data we gathered from the waters of the Lake ?? of Zouk opened a new dimension. And so we had to change the system to be able to, in a way, to be more efficient and to cover more spectrum of the problems. And we saw a breakthrough for us, and it's better to go in with a very major scientific change than what we had.

And so those of you, I know two or three of you might have a problem with this, but we changed the presentation to November, then October, (2:10) then our systems already are what we call, the visa of our offices to travel to certain areas. sorted, that will be a very nice presentation in November. Sorry about this, but as you know, with Keshe Foundation, technology comes first. We're not in no hurry to go and show something when the development has changed. Systems are getting built, and that allows us to show a beautiful system. Much more compact, much, much, much, much, much, much more effective.

R: Will that be associated with contamination of water in other ways? And would mercury be included in that?

K- No.

R: Like, for example, Ascension was just mentioned that it's 11,000 tons of mercury from a paper mill in Ontario, Canada, apparently, that they're speaking of. And the local people there have been poisoned for many decades with this.

K- What does that mean?

R: Well, they've been affected by the tons of mercury that from the paper mill over a period.

K- It's in the water?

R: Yes. And the air. ??

K- That can be sorted. There is a solution for that. We have the technology for it to do it even. Yeah, it can be done.

R: I was wondering if that would be part of what you're going to be demonstrating.

K- No, no, no, no, no. It's a different technology. Mercury poisoning is a different, different technology. (2:12) Mercury, we have to see in what state it is in the water. Has it become part of the sediments? Is it partially floating in the water still? Are they still adding to it, or has it stopped? Yeah, it's a very, very, it is possible, can be done.

R: It'd be difficult to treat if they're constantly exposed to it. You have to stop the exposure before you can really...

K- Are they still adding to it? Are the industries still adding more mercury or have they stopped?

R: As far as I know, that's still part of the paper mill process, but it does stay for decades in the water and can transform to even more poisonous forms of mercury in the environment as well.

K- Let us finish with, I'm sure I cannot come to Canada, I'll be put back in prison again.

R: Don't do that. But it is a common problem. It's a common problem with Aboriginal groups actually around the world with being basically the colonialists or whatever you'd like to call it, have dumped the poisonous substances onto the reserves onto the native reserves (Reservations), and caused a lot of pollution, which has caused mental and emotional problems, that they're trying to recover from. And it's prevalent around the world, but especially...

K- They already have done it to themselves, even the nations have done it to themselves. (2:14) Thank you very much for today. Wish you all the best and hopefully we meet number 661. Thank you very much and goodbye.

R: ... << Message from Universal Council >> “We, the Universal Council, invite the Keshe and Universal Family present on the Earth in unifying at the Soul level, every time, every day, at 9pm CET or CEST. And there's a wish, and this wish is, we, the Universal Council, give from our Souls and invite all of humanity to elevate the Soul of every leader in every nation to work as one Soul in one direction to achieve peace as One Nation, One Planet, One Race. And we are present with this wish.”

660 KSW – September 17th, 2026

End
