663rd Knowledge Seekers Workshop October 8, 2026

(Transcription, Editing and Proofing done by KF Brazil)
(Auto transcription by Elias)

Continue with language of U, how to understand Others; Show Aliens with human features - create fallacy; Very few creatures look like humans; Matter physic measure noise & light by frequency - penetration; Language of U is STM - no frequency - works through plasma fields; Universal Community (UC) talk through Energy; STM uses pulses - interacts with fields, not frequency; Understand by compression of fields of emotions; Feel how you push with emotion; Push at one strength means joy; Pressure and field strength at certain point has certain meaning; Learn to create field plasma of emotion & impression to communicate; Celestial objects like Earth & Sun, communicate through field interactions; How fields bend has meaning; Feel pressure on Soul, understand; Same field strength at all times; Analyze by light from a star - strength, composition of energies - tells emotion of planet; Creatures carry impression of planet - specific field strength; U identifies us by field strength - everywhere same; Soul converts meaning of energy to P - like when meet Soul of dead Mother, knowledge transferred as emotion; Teach languages through Peace Game; Convert voice into emotion of language, energy level; Know Chinese through emotion, like dream; Transfer knowledge & emotion from matter state into Energy; Already have this T - language of emotion of matter state - emotion and language of Energy; Way we photograph Aura - color of Aura of STM; Communicate with each other through Souls - not Esperanto, etc; T - see emotion in matter field strength, through plasma fields; Speak to any human, animal, every Being; Field strengths universally have meaning; Planets & Universal structures speak to us; KF system - energy into matter & matter into energy - language of Soul of Humanity - every Soul lay down weapons; Deliver before end of month, Promised time; Reach every 'seed' of creation - talk to Soul, cell, DNA, every creature in U - by totality of energy transfer; Soul teaching - how to use system - meaning of field energy; Key through Game; Touch one rest of Soul reached; My command - I wish peace; Travel world using Soul language; T available for Mobile phones, Game; Completion world peace requires world language; U is silent, except; Fire to melt, H converts, edge of SS; Create fire of love within STM; Bring into motion of fields - transmute; No fear how to survive at destination; All together as one system; Fulfilling promise; Always live peaceful life; Understand language of the planets, etc; One language for Unicos - Creator is founder, deliverer of totality; Book 3 - transfer this energy back to P; Wonderful times ahead; Everyone cannot travel U - commitment to Creator start new life; Access to Shopify, KF Store; Monthly Flight sessions - through Game; Learn different emotions & how to transfer; Stay to complete last phase; Universal & Earth Council, Satellite Souls work as one; Satellite Souls come into operation; Establish Earth Council & Universal Council as two separate companies - manage KF - not own; All Souls same throughout U - different manifestation; No difference between electrons - reason cannot predict; Electron has Soul; Explains past lives - information of RNA - energy and emotion; DNA physical features of ancestors; Memories of Space - grandfather's Soul; Silver nitrate - use fields; Decide if working with energy or matter; Play with different field strengths - learn by experience - create conditions; How to help addicts - not kick on street; About narcotics, adding alcohol & tobacco - create new characters, new Souls; Addicts don't change; New

exotic drugs, chemicals, not knowing how affects brain structure & mind - understand background; Roller coaster ride - brain damage; Don't see in villages of Africa; Addicts have multiple characters inside them - change over time; Tobacco adds frequency - creates new Souls; Western diseases - freedom culture; Alcohol and tobacco keep it going; At moment no solution; Problems with drug treatment programs; Always handle through Soul, confirm multiple Souls - like how planets created; Parents with addicted children; Each cigarette brand different fields; New Energy drinks - Carbon coloring - like narcotics; Children becoming hyperactive, autistic - from coloring not sugar; Detach yourself - don't need to kick people out - handle your emotion; Work through Soul, create solution both side satisfied; Create structure to make it happen; Don't abandon people in need and walk away; Process of loving someone and caring; No obstacles to connect to Creator - make up - not aware of Soul; Research about how DNA changes with different emotional experiences - means Soul connected to Soul of Creator; Famous beggar with millions - rich inside, but outside choose poverty; Have T - machine to enlighten; No religions - knowledge within us; Ready for T & knowledge transfer; Not building churches, temples - knowledge in heart & STM; Only person loves you is your self; Supported in every way to achieve World Peace & create balance for Humanity; Conquering Space; Hair dyes, make-up, skin creams, can interfere with Souls communications - minimal - unless create a rotation, etc; Perfumes - affect emotion and Soul; To give speech at UN - depends who's behind & benefits; Mother Teresa - surprised by what's in background; UN divides world for those who rule; Best "UN" - when Universal Council comes into operation; UN creates more division, war, etc; Rothschild's, British Royal Family, others control UN; British controls Americans from inside; UN involved in child trafficking - protects traffickers; UN food policies setup to control - destroys nations own agriculture; Only way out of mess - Keshe Coin (KC), RKC, and URKC; UN is worst thing happened to humanity; KC temporary problem of becoming lazy - not work; KC to be payable according to efforts and work; Open Space to Man; Rothschild's in background - become biggest enemy of KF; They offered us our own bank; All banking systems now working against KF; Our team has to complete system; Mobile phone App will make it available to everyone.

ENGLISH TRANSCRIPTION

(:16)

K- Thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers, from Keshe Foundation Spaceship Institute.

As usual, we are in the territories of the work of the language of Universe (U), and how we understand others. Why do we think that the other creatures of the Universe have arm, legs and eyes and nose like us, and all the Aliens we have shown, or we try to show, always have one of these features? In fact, having arms and legs is a very rare things, and very few creatures in the Universe carry such a system. In a way, how come we pretend and prepare ourselves to accept such a structure? There are Beings, they travel the span of

the Universe, but not necessarily human like two arms, two legs. This is a fallacy and fantasy which Man has made to confirm there are others like us.

In fact, as we spoke before about the condition of the understanding of the language of the Universe, in the World of the Physics, we speak, we make noise, we see lights, we identify it as an image, and we make noises as we talk and everything else in that level, and we always measure it in frequency. But the world of the Soul of the Man (STM), the world of the language of the Universe, has no frequency. It works through the dimension of the fields of a plasma. So, in a way, when we become part of the work of the Universe, we join, we go to the city of the galaxies and what we call, Universal Community, (:18) hearing noises is very rare. Because noise belongs to the dimension (D) of the matter state because it needs to penetrate, it has to weave its way like a worm to get through and we call it the frequency.

In the dimension of the STM, we're talking about pulses, where in fact there is no frequency, it's an interaction of the fields. Would the interaction of the fields create noise, but it's not what we depend on, because creatures of the Universe don't have an ear. They can't hear. They understand the compression on the fields of the, what we call, emotion. They feel how you push with the emotion. This push, at this strength, means joy. This strength, at this point, means demanding. This point, at this pressure that field strength has a meaning. This is the emotion of good, this is the emotion of wanting, this is the emotion of creating. But what it comes to is how far we can understand this process. As there are no frequencies and is magnetic (M) field strength, then it comes to the point where we come to interact. We can come and stand in front of something, an entity. We can wave and shout and do everything. Has no ears, has no eyes and nothing. But I can stand there and create the field plasma of the emotion of, can I help you? Would you like anything? Can I give you something? (:20) And learning the language of the emotion and the impression, then we can communicate.

It's very interesting, we have turned everything the way we want to confirm that, yes, Aliens do what we do, because that's our image, we are '4-Wheelers,' and this is how everything manages us. But if you look at the work of the celestial objects, Earth and Sun, they don't talk to each other, they interact in the field dimension. And when it's very heavy, what do you get? You get the daylight, you get in a way plasma field strength, that this plasma field strength in my skin means daylight, means something is going on, it's a different thing. If the Sun gets angry and throws spatters of the, what we call, creation of Black Holes on it, because he didn't have a nice day the two, three days before, and we see the black spots, then what does this mean? What's the emotion of the Sun? We need and we see that when the fields hit the Earth, or the magnetic field of the Earth, they create mayhem.

We need to understand the impression of the fields on each other, not the frequency of things on each other. And once we understand this, and once our Knowledge Seekers (KS), the Knowledge Seekers of the Universe and Earth, come to understand that the way you measure frequency, you measure the pressure on the magnetic fields, that how the fields can bend and in that bending what it means, then we can understand the

impression, (:22) the emotion of the person standing in front of me, because now I feel the pressure, this pressure on my Soul means he needs something from me, he needs energy from me. Which part of energy I have in my reserve that I don't need, freely make it available. Sorry there is no central bank, I give you the energy, give me something instead. Because the minute I release energy, what it needs, I have a gap in my system, which means I need to be fulfilled by the others, by other fields in the Universe, that are available, but they are not mine, but for me to use, for me to have access to.

Now we understand the, what I call, a complete image of frequencies, and what I call, everything the Man has made from it belongs to the matter state. In the world of the plasma, we look at the pressure, field strength, and commonly these field strength has the same strength at all times. When we see the light from, they say a star 13.5 billion years ago, if we have the tools to see it now that we find that we can measure different things, it's exactly the same strength at the source as is at the point we see. So what do we see? We just considered the light, we've seen the light, this is a composition. What about the emotion of that planet? What is it trying to tell us? And how can we interact with the creatures which carry that impression? There is a specific, specific field strength, in a specific combination, which is the pattern of those Souls which are created on this planet. (:24) So, the minute I come across a knowledgeable creature of the Universe, field strength, he knows by what we call, GPS, in the language of today, in the matter state, by plasma state field, where you are from, what is your identity, what you carry. They don't have laboratories and the big telescopes, Hubble, to say these are the gases and constitution of your body. They understand the field strength of the Universe and what that field strength is the same at all points.

So if you understand this, it becomes much easier for us to understand we are 'schizophrenic,' we have a two dimension of the Soul and the physicality (P), but we are language is schizophrenic too, because our Soul understands that, and it converts it at the moment to the physical dimension that we understand it. When your Soul meets the Soul of your mom there is no discussion of, mom can I make you breakfast and would you like this flower? You transfer that knowledge as an emotion. And as the mother has no tongue, has no face, but is just a collection of the fields which identifies you as a son or a daughter, then your brain uses a translator of the emotion of the physicality to translate it in a way that you understand in the language of the matter state. Now we have to learn how to translate the language of the matter state to the field transfer of the Soul that it transfers that to the person, to the entity in front of us. (:26) And this is going to be a big dilemma for Man till Man learns.

In the upcoming teachings and the upcoming program, especially through the Peace Game, we start teaching this language. When you join a game, you understand you don't live in Portugal, but you speak Portuguese, as fluent you understand as you speak your own mother language. This we program in the coming time, that Man learns in a way by language, but by language in two different ways, one in the energy level and one in the matter state. How we convert our voice into the emotion of the language that the other understands. This is part of the structure which we promised a long time ago. That when you go to China, you don't need to know Chinese but through the emotion,

understanding, the field of what we call, the Soul of the Chinese, you speak the language, you trans... It's like the way you dram with your mother, or you are in another country, in another place and everybody speaks your language.

Now you learn how to transfer knowledge, how to transfer emotion from the matter state into the what we call, energy state. We nowadays have created this Macro life and trying to talk about everything else Quantum, but in fact there is no 'Quantumatic' about it is the reality that now we have to understand the language of the energy, not the language of the frequency and vibration. If in the coming time we develop a technology (T), (:28) where we see two things, it's like when you sit in front of the oscilloscope and you have two parameters. One is the language of the matter state, emotion of the matter state, and one is emotion and language of the energy state. What does this mean? Then, for example, if we develop a technology where now the Russians are good at it, they've developed it to a very high extent that you see different colors of the Aura of the physicality of the Man, then with another behind it, we see the color of the Aura of the STM. And what is common, ?? the ?? indentation is exactly the same, so we understand this emotion fits that.

In the coming time, this will be the way that the language between the living things on this planet will be, because now we all speak our local language and then international language, you might speak French, German, or whatever, that you can, some sort of, communicate with other nations. Now, we speak English and German, to what we are in German, but we go to China, we connect to the energy of the Soul, of the nation, of the language, and its beauty. And then, our own Soul, in a communication, the way it translates the emotion of the mother to you, to remember a word, would you like something to eat? Now we understand the Chinese guy tells us that, would you like something to eat? You can do this, we can do that.

We are at the verge of releasing this technology. We have developed a system for it. And in the upcoming time, we will show this technology. It's not something we're going to develop. It's getting fine-tuned. (:30) And then when you stand in front of someone, you can see the emotion they create in the field strength of matter state through the field plasma. We are very advanced with this development. Then we understand three languages. You might be born in France, you speak a fluent English, now you can understand the language of the Soul. So, in a way you don't need to learn English, because when you understand the language of the Soul, you can speak to, as you speak to the rest of the Universe, you can speak to any human, to the dog, to the cat, because in a way when you stand in front of it, you understand the emotion of the fields, the field strength, which that field strength universally means this.

And if we develop this, if we understand this fully, then we understand why planets behave like this. Why Universal structures behave like this. What they are trying to tell us. It's not just that everything rotating, galaxies are moving, and the stars are in it, and then the planetary and their moons. These are impression of the emotion of the celestial life, that we never understood now we have to understand, because now we understand the field strength of the what we call, plasma state, the dimension of the Creation. We are

not anymore in the village of Earth, we speak our own dialect in the kitchen with mom and dad and nobody else understand. Now we are in the kitchen of the Universe, we have to understand what goes on, what's cooking.

This needs a system which mankind can adjust energy into matter state and matter state into energy. (:32) This system is more or less complete and is the hand of the Keshe Foundation. We wait until what we call, the Enlightenment Game, its process of completion, be accessible by every Knowledge Seeker. Hopefully before the end of this month if the team works out you should be able to reach the game on your mobile phone on App, and once you do that we can load up the backstage into it that you understand the language of the Soul of the humanity. Our team are developing but they don't understand what it sits behind it. In a way we 'sing the song of the peace' and every Soul, every Man on this planet will understand what it means. Lay down arms. Then every Man will do. This is not a dream. The technology is complete.

In the past 24 hours I have laid down the final stages of the development of this technology. We try to deliver before end of this month, the 'Promised' time. All depends on how our Knowledge Seekers advance in completion of the system. Which means we can reach every 'seed' of the creation. And in that, you can understand the language. We talk to the Soul, we talk to the cell, we talk to the DNA, we talk to every creature in the Universe, (:34) in understanding the totality of the transfer of the energy and not the frequency of the life in a matter state. If Knowledge Seekers understand this, and if you could go deeper. Some of you who bought those Units which you sit in front of and you can communicate through the energy of the Soul, you already have part of this technology with you, but it's not completed, it was in infancy two or three years ago when you bought the unit. ?? We've done something, which we just 'pulled out of the hat,' it's the completion of the systems you did with us, where you came through the sessions.

In the next couple of weeks we'll introduce cycles of the teaching of the Soul, which means how to use the system to be able to communicate, how to be able to understand the meaning of the field energy, than the frequency of the matter state. The key for all of you to lock in, step by step, shall be what we call, the Game. Because as it sets (?? it says), it's enlightenment which brings peace. In so many ways, if we touch one's Soul through the dimension of the Amino Acid (AA) of the life, the rest of the Soul shall be touched. 'My wish is my command.' I wish peace and I've made systems that will deliver that peace where mankind does not need to be a kind of a Man, which by kindness will achieve, but he'll understand the kind of Soul he needs to have. (:36)

You travel to the other part of the world you understand the emotion of the Soul, you understand the language of the Soul, the way the emotion of the mother who died 20 years ago comes to your dream and translates to what she's telling you, it's the same process. Now we understand the process, we developed the technologies, which does that, translating the energy into the matter state understanding of the Soul of the Physicality (STP) of the Man. It's not something is going to be developed, it is something which is developed already. A number of units has been made, and those who made it, the scientists of the Keshe Foundation, they don't even themselves know what they have

developed, because it's been put step by step, and it's reached a point of maturity. But it needs to be not with those of you who have computers, and can access by computers as is now the Enlightenment Game.

In the next couple of weeks, hopefully, the team of Keshe Foundation will produce systems that every mobile phone on this planet can access, and with it, will deliver the 'Promise.' We deliver that you understand gradually the language of the Soul, that you don't need to learn so many languages. You understand how to travel the span of the Universe as the systems are set to do so. Completion of world peace needs world language, one language, is not English. It is not what we call, the Universal language that everybody will follow, it's not Esperanto or anything else. The 'promised' language is the language of the Soul, being able to translate the energy of the plasma into the language of the understanding of the physicality of the Man, (:38) and once you learn that language, you speak the language of the Universe. This is the condition for Man to enter Universal Community, to be able to understand the meaning of the energies, not the sound of the energies. You listen to the Universe, it's 'quiet as a mouse.' There is some ?? bizarre noises which comes from the interaction, and rubbing of the fields of the Universe against each other.

Learn one thing. Man burns wood and sees fire, and that fire melts, whatever he likes to do. We see fire in the depth of the ocean, where there is no oxygen, and at the same time the pressure is so high that nothing can burn, but the energy of the hydrogen converts into and creates the melting fire. We see the same thing on the edge of the solar system (SS), on the outer boundary, the interaction of the fields of the solar system, we see another wall of fire, which is from the interaction of the fields of the plasma of the Sun with its environment. So now if you understand this we can create the fire of love within the STM, which he falls in love with Universe and not the individuality of a person, or a nation, or whatever he has chosen in the dimension of physicality.

In the next few weeks we bring the change and the change is that you all know need, you, there is no school for it, there is no patent for it, we haven't opened the language, the school language of the Soul. If you are German you learn that, if you are French you learn that. We all be able to understand the language of the Soul. The way we speak to our mother in our dream, she died 20 years ago. (:40)

Now, if you understand that, then you understand how to bring that into motion of the field, then you understand in that process you can transmute and the fear of the transmutation of the Man is would he come back, and would he be able to survive and speak the language of his landing place. Now you understand all is one process, all is one system, all is all together, one. We fulfill our promise, and what you said there'll be one Universal language is not one Universal language of Esperanto or English, but it's the Universal language of the Soul. There's a language of the fields of the plasma which can be understood by every created things in the Universe, because when you create a plasmatic field pressure, I have the same plasma as your Soul, as everybody else's Soul operation, and it feels the same. You do not need to see the light to feel the pressure of the emotion. Plasmatic field, magnetic field strength. And is it with me or is it against

me? If it's against the dimension of my fields, I have to move to accommodate to be on the same side, not for them to change to me. In this way, I always live a peaceful life and I always interact with the fields that are within the structure of my life. I understand the language of the planets, I understand the language of the solar system, I understand the impression of the galaxies and the universes.

There is one language, does not matter which Universe of the Unicos we go to, because that is the way Universe communicates with its Creator. (:42) The Creator, the founder, the what we call, deliverer of the totality. Maybe, if you understand, you understand we are getting to the chapter, the last chapter of the Book 3. And now it's time to see how we transfer this energy back to the dimension of physicality. Where do I want to manifest myself? At the Position, Place, Time and Possession. Do I want to be a Martian, which has 20 arms and no eyes? Or I want to be from planet Zeus, which is nothing but a field of love and generosity? I made Man in the image of Myself, as My image is the image of energy, and not physicality, state of the matter of Man.

Wonderful times are to come. A system, sorry, to be made available to every citizen of this planet, is becoming available. I hope, don't forget, you cannot all become Passengers of the Universe, as your Soul has made commitment to its Creator, where it shall be available, in which position it'll take in the Universe, that it can start a new cycle of life, to show the beauty of the Creator. That's why you cannot commit suicide, because the Soul is not matured to understand the language of the Creation.

We go for a break, and I hope I opened your eyes, into a new dimension of life, where we have no churches, no mosques, no languages schools, no United Nations to cheat each other, and no state to kill, for the sake of being the promised one, as the only promise is the Creator. (:44) And we shall see what will come up. Rick take us for a break, and we come back.

>> BREAK >> 663 KSW October 8th … (:50).

K- Thank you very much. There's not much to tell you today, this week, except that we are going ahead with what we planned and what is now becoming very close to being executed and we can deliver, in so many ways our promises. We were hoping that we would give you access to Shopify, the Store on the website. There's a couple of hinges in

the process and hopefully should be ready in completing this part. Then we go back into our process as before

We are planning to set up a series of what we call, sessions for testing our systems in transfer of the energy and in a way how to communicate, how you feel. And as we will be using our system through the Enlightenment Game, those of you who participated, you're waiting for the last session, will be given priority to join to be part of that you individually stay online and there is no mayhem of people. It takes two, three weeks to complete this and we'll set up a session, a series of sessions of how individually, one by one, you learn different kind of emotions that it transfers to the emotion of the Soul and at the same time we can fine-tune our systems to complete the process. Please stay with us and support us that we can complete this last phase, that we can go ahead with the rest of the what we call, we set here to do and complete the process. If there are any questions we try to answer.

Q: … (:52) Good morning Mr. Keshe, what does it mean to reach the unified pattern?

K- Explain to me what is a unified pattern?

R: Well anonymous attendee will have to put up their virtual hand I think. I wonder if that might be Filippo because he comes through as anonymous in the Q&A for some reason.

Q: … Good morning Mr. Keshe. Recently you talk about this state of reaching this unifying pattern, talking about Universal Council, Satellite (Souls), and Universal Council support. And talking about this, you mentioned at certain point, reaching this unifying pattern, but I don't understood exactly what you mean, and so this is my question. Maybe I not understood clearly, but...

K- We always said that when the whole system falls in place, (:54) everything works as one. The Universal Council, the Earth Council, and those who are Satellites (Souls). We don't have any other structure in working for what we call, the humanity. The Universal Council is in go between, and the Earth Council is the physical dimension. And in a way, Universal Council is work of the STM, in communication with the Universal Community, which is, as we heard today, works in the dimension of the energy. And the Earth Council is like the STP of the Man. And in between, you have to understand the needs. There is a need for interaction, communication between the STP, the STM, which is the Universal Council, and the Humanity, which the Satellites come into operation. that it's all one unified system. We're just about to get there. And you will see very soon the return of the Earth Council operation, and Universal Council operation in a very big way. What we had, we will be left. It'll go back into what it is and it'll become a full-time job for the members, especially the Earth Council.

And gradually we are, we are reaching there. We established a lot of things, but then we walked back around to solidify, consolidate, and go to why we set them up at the beginning. It's like when we set the Keshe Coin (KC) ten years ago, it was just a Coin,

but now it has give us the foundation to be able to complete it. It is the same now. (:56) We will put a very big push through for the establishment of the Earth Council and the Universal Council as two companies, then they'll be managing, not owning, the Keshe Foundation worldwide and all the association. And in that process, we'll do the whole humanity with the next step. We let everything take over till everything is ready for it, but they've had a pre-run, and now we're coming to full run gradually in the next few months. And this is what is called unified, this all works together. And in a way, you have administrative, you have legislative, and you have a... people who are between the two and the Humanity, what we call, the Satellites.

And we're just about to get there, we need still to refine few bits here and there, and we'll go back to the Humanity once, especially the, what we call, Enlightenment Game is set up. We go back to asking for those who want to be the member of Universal Council. In a worldwide, with all those you get to be played, to understand the Totality and it's just ?? Knowledge Seekers. Those who want to serve through the Soul. And those who are there to see the equality in the physical dimension. And then we'll go to the next level. We're waiting for couple of things to complete. Which one of them is the end of the, what we call, superiority of one nation, one race on the other. And we're just about to see that very soon. The biggest part is setting up of the Universal Council and the Earth Council, as companies, as entities. And with it, transferring the rights of the Keshe Foundation, management to this, to... as the true ?? prelude of the work. (:58) And then, more or less 80% of our job is done. And that's why it becomes all one, as one unit, and unified.

Q: Wonderful Mr. Keshe. Wonderful.

K- Thank you very much.

Any other question?

Q: … Thank you Mr. Keshe for the beautiful teaching of today. My question is, although we are different in physicality, as a Soul, are all Souls similar throughout the Universe, only different in a matter state?

K- Yeah, 100%. We don't see differences between electrons, do we? It's just where they're positioned, but in essence they're all the same.

R: Even an electron has a Soul?

K- Of course. If you have a fields, and you behave, and react, and interact, you have to have something to be inside you that controls you. This is why you cannot predict the position of an electron, because at every point different manifests. It's just what we see they teach us in physics. One thing, rotating is just for simplicity. Electron's position can never, they said, now we can calculate with AI the next position of the, what you call it, an electron. (1:00) Electron has no position to be. It's in circle reaction, not only to its center, because the center is dynamic, to its environment, which is working, so life is the same. We are, we have a Soul and we interact accordingly.

Q: … Thank you for all the work and love you give to us. Some people have said that under hypnotic trance they have gone to past lives that they describe exactly. In the science of Creation how can this be explained about past lives? Thanks.

K- The past lives, I explained this many times before. When we say, "Oh, this has the eye of his grandfather or he has the behavior of his grandmother." The eyes are physical, the behavior is emotional. So the way we carry the DNA of physicality, we carry the DNA of energy and emotion. And it's how that Soul has seen. The way your gene carries 500 generations back and more, (1:02) your knowledge, information, emotion, goes back the same from the beginning. Whatever your DNA remembers, your RNA, or what we call, the Soul energy field remembers. And if you, your great-great-great-great-great-great-great-great-great-great-grandfather was a soldier who knew, let's say, how to pack a gun, the way he passed on the color of his eyes to you, is passed on the information to you the same. So we live through the past life, but in the past life it's part of our own DNA, what we call, energy side, which is there. It's not just you carry the color of the eye of the grandfather because it was your grandfather, because it comes through your DNA, you find inherited diseases which comes again DNA, you carry the emotion too.

So when we speak about these things you have to understand you only Man looks at the physical side. The emotion, the energy, what we call, the RNA records are sitting next to it, as part of it. So you go to past life, yes you go to past life, but what your generation has seen your past generation has seen. And even you go back to the Space and then you say you remember something somewhere, you go into, oh, I went to somewhere it was a galaxy or whatever I went in the water. Where has your grandfathers of your Soul have been that they brought that knowledge to you. You married in the physical life. (1:04) You're still married in the dimension of the Soul, interaction with the field of the others. You're created from their energy, too. So it's not just somehow DNA. And we look like grandpa. We carry the Soul of the grandpa memory bank with us, as well. It's just a microchip. It just gets loaded more and more. But at the same time, grandpa not only had the eye to see, and the emotion of physicality, he had a Soul too. So your Soul, when it comes to create it from the attraction of the physicality of sperm and egg of your parents, the Soul dimension has transferred too. Even the electron has a Soul. When you understand the structure, then there is no question, because you can see the whole reality.

Any other question?

K- … No more question, that's quick, it's the quickest time we have in the...

<< Knowledge Seeker has problem with her microphone.>>

K- … We hear through her Soul. …

Q: … I would like to know what is kindness on the matter level? (1:06) Um, particularly how to be kind to a person and still be assertive and set limits and basically kick

somebody in the street, when I have a place for him to live, just because he can't pay them. And I have let him stay there for a year rent-free.

<< Knowledge Seeker have problem with her audio. >>

Q: … Well, there is a scarcity of question. I have plenty. Mr. Keshe, I would like to go back to donkey time in the technology. I remember you talk about silver nitrate in a plasma state, obviously, to rely to bacteria in certain condition. And I would like to know a little bit, a little bit more, how to handle these things. (1:08)

K- What do you mean? What do you mean to handle?

Q: Well, talking about infection, for example, where you have bacteria in some place, and you talk about bacteria is amino acid base, and it's not a virus, and so if you want to tackle them, one of the possibility is use that kind of plasma.

K- Yes, but you have to understand when you deal with a plasma, you deal with a source. So, if you can take that one step, you, you understand you don't need the silver in the matter state. But you can create the condition of the fields of that interacts both in the energy level and the matter state level. And you have to understand how to bring it together, how to interact it together. You got to understand the energy and the matter interaction, or conversion, or how to bring it in. And you don't need to have the silver, because if you get the infection in the Space, there is no silver, what are you going to do? This is what I always say. If you understand, you don't need to remember and then, then you don't forget what is behind everything else. And you have to decide you're playing with the energy or the matter. And 99% of the Knowledge Seekers have still not managed to, what you call, fit into this. (1:10) To be able to use it and to understand it.

Q: We have to use, you mean play with the field of that, of that kind of strength. I mentioned...

K- Why does it do? You have to understand what you're dealing and what you want to do it. And we learn with it. It's just a process. I do the same like everything else. You have to understand and do you want to do something with it or about it or... You want to just do something for the sake of, "I can do." You don't need silver, you don't need gold, you don't need nothing, if you understand how to play with the energies, which are the creator of these conditions, diseases and the solution for it. (I think Imgard is back).

Q: … Yeah, I feel like I am, most of the time, kind to everyone in my environment. (1:12) And I don't know how to, what to do. I feel like if I kick this person who has a psychiatric condition out into the street, I feel like I am being unkind. I'm not feeling congruent about that. I'm going by the feelings, because that's what I've always gone by, is my feeling, at least recently, that I have the space and this person is struggling.

K- You see, Imgard, there's a problem, is that, there's an old English say, says, "You can take the horse to the water, but you cannot make it drink." You understand?

Q: Yeah, but like I have given him work to do and like painting.

K- They can't.

Q: They can't paint a straight line, you know?

K- Yeah, because they don't want to because with it I get something else. Do you understand? And secondly with the present conditions, depends what has affected the structure of the brain, the mind. And you cannot change that. You cannot solve that. Anything to do, especially when it comes with these things, you have to understand, narcotics, alcohol, and these new chemicals, (1:14) are like what they call, 'coaster ride.' When you go on a coaster ride in the fairground, you go in for a pleasure, but you don't know how you come out. The biggest roller coaster in America is closed now. Millions of people have been on it, but hundreds of people have had brain damage, and they had to close it. You go in, it's put people in coma, it's brought a brain hemorrhage, it's killed many people. It's in Los Angeles area. You know it better than I do.

You have control over certain things, and environment creates certain condition. And then the brain of the Man has its own dimension of interacting. And when you talk about people like this, doesn't matter what you do, but the biggest problem, the biggest problem of today's society is narcotics. And when the narcotic mixes with alcohol, these people you don't know anymore. Because to the spectrum of the energy created in the brain, it creates as many, many energy levels that each one tries to satisfy one or the other. This is not something. We don't see these things in Africa. We don't see these things in villages. These kind of what you say, you try, because you still work on the human level, what is norm. (1:16) But these people have interacted with a condition that is dynamic and creates its own energies. They have different character.

Q: Yes. And what do we do with those people? How do we love those people?

K- At the moment we... you deal with ten different people. The person you're talking about has got two or three different characters. The one you knew, even if you picked him over the street, is not the same person because they still use. You see the problem is, we know from research, very simply, if you are touched by narcotics, any level, in conjunction with alcohol, because you have to look at the structure of the narcotics in carbon and nitrogen and oxygen level and when you add alcohol to it, and then you put the frequency of the use of tobacco, this is the tobacco is like a cycle which creates new, what I call, let's say, Souls, regenerate. Depending because you look at what tobacco gives you. So there's a lot of research going on, it's not only our research, but we don't see these things in the villages, we don't see it in the third world nations where there is no narcotic, there is no alcohol. Diseases we see in a pure Islamic nations which they don't touch alcohol is very different than what we see in the West.

The diseases which are Western diseases. (1:18) These are diseases which come with this 'rock and roll' and the freedom we don't have. And I've done a lot of work on this. I

tried in a very deep way, I got involved with it, with two or three cases, and it's very, very... I have a diagram which now, I believe, from energy point of view, what we call, creation of the Soul, is very clear. It's not as innocent as five years ago or two years ago. If you have alcohol, if you have touched whatever narcotics, soft, hard narcotics, whatever. And... you... continue the consumption of the alcohol and the cigarette, even you don't touch narcotics anymore, That leads to creation of new energies, new cycles, we call it, like a Soul, like a schizophrenic. The nice people. You create babies of, and depends on the strength of. But, one side still tries to please.

I, I believe from the research we have on our hands, if you stop these people from alcohol and, tobacco, which is the main opening door to these things, you can control it to a limit. But if you let it run, plus the condition of the expectation which creates a different emotion, you create many characters. And you, with you, you still know the character which you picked up the street two years ago and gave everything. Today, knowingly or unknowingly, (1:20) the alcohol and the innocent cigarette is the feeder of it. You're still watering the plant, which, to you, was something else, now is something else. It used to be a rose, now it's another plant, another plant, another plant, a different version of the roses.

Q: Then what do we do with people like that?

K- At the moment we have no solution.

Q: I mean do we kick them out in the street? We have lots of them out in the street.

K- We have lots of them and we see this is the creation of the freedom of the West.

Q: Yeah, I understand that, it's just what do we do with them?

K- At the moment we try, we see, we physically see the energies, that's for sure. There is, exists within the structure, different energy packs. We can handle one, but there's another one behind it, which is, we cannot handle, our system is not set to characterize multiple energies, as you call it, at this moment of time. Because we don't know where is that next multiple energy.

Q: Yeah, but my question is, now that it is, what it is?

K- You have to draw a line. Because you're dealing with the memory, but the reality is totally different, because first thing is, you have to stop this, what do you call it, tobacco. It's a composition of it, to our research. Then you have to stop the alcohol, because that CH bond connects a lot of things. Carbon, Carbon 14, Hydrogen, Hydrogen is what we call, the single plasma, is the essence of the source of the Soul. (1:22)

Q: Yeah, see when I go to court and have him evicted, then I feel like I'm throwing him away. He goes in the garbage bin. I don't feel like doing that with a human being.

R: One thing to consider is that for homeless people there are programs. So if he becomes homeless then there might actually be help available.

Q: There's a big gap between services. If you are hospitalized here for withdrawal and you want to go into a treatment facility, there's a minimum of a two-week wait. And what happens during those two weeks?

K- Yeah, but the thing is, they go in as kindergarteners, and they come back, as ?? professors in these places, are going to prison. The guy goes for a pick pocketing, he comes back, graduates how to break safes and how to break whatever. These places are not clean, that we think they go in there and come out correct. This is the biggest problem.

Q: He's been home now for a month and I don't believe he has had any alcohol and he hasn't had any cigarettes. But he's still not healed because his brain doesn't work.

K- No, because the process is there, you have double energies and triple energies.

Q: But what do I do with a person like that?

K- I don't know. I'm the wrong person to ask. Because we tried, I'm fully aware and this is not something new. I have been through this for decades, trying to understand. (1:24) But now in the past couple of years, you stop the process, but you see a chain of events started, you cannot do because it's not physical, it's on the energy level. But at the same time, these people, doesn't matter what they say, they keep that habit, they create that habit energy of the cigarette or alcohol. And then that creates a second cycle, next cycle. I am deeply involved, it got so involved with this, especially in past two years, with couple of cases that emotionally and psychologically affected me regarding these cases. Because I handled these cases for 40 years, I know exactly where things are, but now it's a very clear process. Once the process starts, you cannot stop. And, narcotics, new designer, what you call, narcotics, cocaine and heroin, was good. We could control it. These, what they call, exotic drugs, which are coming into the market, they are creating conditions that we have no awareness of. We don't know what they are made of.

Q: Right, I understand that. I understand that, but if there is a person we cannot help on that level, how are we kind to them?

K- We don't, we always handle this through the Soul, but now we have confirmation of multiple Souls, we can see it on our system. Clearly can see it on our system, we're not dealing with one. And then, it's like a party inside, you don't know what's, who's dealing, who's who. And this, in this party, you know, you go and see someone, they have a child, this process happens, they create new dimensions, new energy fields, (2:26) and the interaction of it is just like, one start creating another planets, and planets, and planets.

Q: Yeah, I understand that.

K- I understand it, but there's no solution at the moment for it.

R: What about for Irmgard, in terms of detachment, and emotional connection to this person, and so on?

K- That is, that is the hardest thing to do, because you invested the energy.

R: Well that's the thing, yes, it's...

K- You invested … We have it with the parents, we have it with the, with the family members. Because, this is what I invested in a lifetime and now it's here, because we understand it. I could battle it, we could see this, this new... You know, it's very simple. You change the brand of the cigarette. You change that process. You add another dimension. All the tobacco leaves are not the same. All tobaccos are not produced the same way. Are not produced in the same way. So they introduce the new energies through that channel of the Carbon and Hydrogen. It's not as simple as we used to think before.

Q: Well, yeah, that is, I understand that.

K- You know, one of the biggest problem, let me explain to you something else. One of the biggest problems which we are looking into. Originally appeared about 15-16 years ago, maybe more. But now it's becoming very, very, very clear. You don't need narcotics. Energy drinks, colored drinks have the same effect, especially in the United States. (1:28) You have no restrictions on what goes in these colored drinks you give to your children. You have no control ... Does he drink fuzzy drinks? Does he drink...

Q: Only he drink is water.

K- Cola? No, I'm not talking about your person. I'm talking about the others. You understand? These, because again, all these new colors, which in these drinks, are Carbon produced from the coal. And they create that energy line. Affecting children. Immensely. Now you put narcotic into it, you put sugar into it, you put, it's a cocktail that nobody knows. And it's getting worse. We see now, there's a very well known sweet in the market, internationally, you see them in every airport, you see them in all the supermarkets, from China to Africa, everywhere. European brand. And this brand now, is getting connected more and more, not because of the sugar, because of the color they use in the children hyperactivity, in children, what you call, autism. And as parents, we buy these as a treat, it's a brand we trust. That's the biggest, one of the biggest, biggest problems. And people who have these mental conditions, which is created through narcotic, because they need energy, they take a lot of sweets. So, now what you get as sweets, is actually feeding the condition of the energies. (1:30) It's getting too complicated to be handled in one way or another.

Q: Yes, I understand that Mr. Keshe. I want to know what I can do in a situation...

K- Detach yourself from it.

Q: Detach? That means kick them out?

K- No. You don't need to kick people out, but you don't get involved in it the way you are. You never kick people out, because then we are plants and trees. But try to understand how to handle the emotion.

Q: Well, we're about a couple weeks away from a court date. You know, and if I go through with that, then he will be in the street. And he has no resources, even though it's his own fault. And not all his own fault, the fault of the system of providing all this crap. So how do you deal with a damaged person in a kind way? That's really my question.

K- You ?? work through the Soul and allocate a certain part that he... you can look after him, but not in a way that... it can, what you call, interact with your business. So, you don't need to give him a home, but you can facilitate him to have a home, to set him up in a different way, but then you satisfy both.

Q: That's what I'm trying to find out, to satisfy both.

K- Yeah, it's just that how you structure it, how you structure it. (1:32) It's not being detached, I mean, it happens to parents, but it's a structure that, you feel what I do is correct, you feel what I've done is correct. I don't, I don't abandon, I don't walk away, but understand how I can live with what I do, and at the same time, I look after.

Q: I have not found that yet, that path.

K- We'll talk very soon. I'll call you and I'll explain to you what to do. My ideas. Then you, you, you have to decide what to do.

Q: Okay. Thank you very much. This has been on my heart here for a long time.

K- I know, I've been with you, I know, every step you've gone through this, but... this is a part of, what I call, feature of loving something, or caring.

Q: Yeah. Thank you.

K- Thank you very much.

Any other question?

Q: … What obstacle must we remove to connect directly with the Creator?

K- There is no obstacle. It's just understanding the way.

Q: The second part of the question, why does the Soul lack the filter that would allow it to express itself directly to the Creator and achieve instant enlightenment? (1:34)

K- You're not aware of the position of your Soul. I was explaining very recently to one of our Knowledge Seekers. Scientists in one of the universities have done a test with DNA and this is a very recent report, research. And they have taken the DNA, I mean protein, amino acid, whatever, and they have shown a scene of a murder to the person. They have seen the DNA structure shrinks. They have shown a very nice video of another home, creating another environment of happiness, whatever. They have seen that the DNA, instantaneously expands. Then they've taken the DNA to another part of the world. They've flown this right across the world, that is not near. And they've shown the same thing again. And instantaneously, DNA has shown the same result. So, your Soul is connected to the Soul of the Creator (STC) and reflects it. Does not matter where your physicality is. You're not aware of it. You chose to call it, a dream. If you understood, then you understand.

Just because you live a horrible life in the physical dimension, as I mentioned, doesn't mean your Soul has ?? done ?? the status. (1:36) You filter it, because it suits you. It's... A few years ago, there was a very famous beggar on the streets of Brussels, and in Antwerp. Very famous. Everybody knew this beggar. And he died. He lived in a hotel. They went to the hotel, to get his whatever, they found millions. In every nook and cranny of the hotel room he lived for years. As he was a famous beggar, he collected a lot. But physically, he was a beggar on the street. And this is the story of life of the Man. You are rich inside, but outside you choose to live that way in the dimension of physicality.

Any other question?

Q: The third part of the question. Never in human history has a machine or a game enlightened a human being, so how is this possible now? Thanks.

K- Technology.

R: Or as the Italians say, "Technologica."

K- Technologica. This is, this is possible. You see, the enlightenment has come to tribes, (1:38) has come to people who made the ?? mess of it, call it, the best business in the world, the most profitable business in the world, called religion. But now there is no religion. It's understanding and the facility is there, that we don't need to get people on the back of the horse and conquer and kill to take. We use the technological dimensions to transfer that knowledge and now it's possible to do. We build no churches, we build no temples, we build no structure, but we build the knowledge in the heart and STM and you cannot be better than that. You don't need no churches and no priests to rob you. The only person who loves you is yourself. And now technically, scientifically it's possible to reach the whole of humanity.

We have a country called China which produces millions and millions, tens of billions of these mobile phones, which allows that connection to dimension of physicality, which we can get to the Soul. Now, through the enlightenment, and once you understand how it's connected, the knowledge, the understanding, reaches through the dimension of physicality. STM, this is what was missing, that's why Man carried on killing. Now it changes, because we found what was short by the planet, to be given by a system. Then it finds a balance. But you have to create a condition, that the need of the Man is met, which is his survival. (1:40) And this is why we created the Keshe Coin. Once the App, up and running fully, because up to now, those of you who had computers or whatever, and some of you, could use your mobile phone if you could.

Now it becomes reachable by everyone, then we can go. We don't need the sword, we need the knowledge. The knowledge is there, the people who are devoted to see this happening. And we are moving very, very fast. We are supported, in every way, to achieve the World Peace and creation of the what we call, balance for Humanity. And it's not that hard. Because the harshest part, the hardest part has been set, done. And amazingly, everything has come together. The support in structuring it, the support in there. By the end, once you feed people, you can't say, "Be on the street, I'll sit there, I have a mobile phone, I get fed by street, I do anything." The hardest step is now getting, once we provide this, getting Humanity to move to the goal, give a Man a goal to conquer the Space, to go outside, to be part of.

And then we have another problem, do we have enough Humans to support, the life support from this, we don't deplete the nation, we become like in China. Everybody has moved from the West to the East, where the, all the jobs are and the, the villages are getting empty and cities are built, but nobody there to live. It's a very delicate and we are structuring everything at the same time. It's not that easy, but every facility for it is getting set up. (1:42) There's no time zone, there is no, what you call, restriction. It's just what we put on ourselves. I was talking to someone today. I was working till 4 o'clock. 3 hours later I'm back on and carry on. It's a big task, it's a big undertaking and we've been trained for it to do.

Any other question?

<< Knowledge Seeker have problem with his microphone. >>

Q: … (1:44) Can hair dyes, make-up, skin creams and other products, also interfere with the Souls communications?

R: Not hearing you now Mr. Keshe, I'm not sure what's going on.

K- No, I'm just thinking how to answer this guy.

R: Sorry, I thought my system had died.

K- Can you repeat the question?

Q: … Can hair dyes, makeup, skin creams and other products also interfere with the Souls communications?

K- Possibly yes. But the interference is so minimal which will not be considered. I don't think your grandma will say, "Oh, you changed your hairstyle." We see the change in the skin, we see the change in the color, but it's the strength of the level that it actually does interfere. If we create the fields which creates, interacts with the fields of the Soul. If it creates a rotation, high blood flow, yes. Encaging certain fields, maybe.

R: What about perfumes or other such things like that, that create a gaseous environment around the person? (1:46)

K- Perfume is a, is a very delicate matter. Perfumes and odors are environmental conditions. And yes, they affect the emotion ?? and through the emotion is affected the Soul, yes. There's a lot of research done in effects of the, what you call, perfumes. And a chemical combination of it in emotion. And yes, you interfere with or you interact with dimension of the Soul.

Q: … Mr. Keshe, thank you for the teaching today. I'm just wondering, I heard this lady, beautiful Soul called Mia Amore Motley of Barbados and she's had a speech of the UN and I thought such a powerful speech. Has the Keshe Foundation had any interactions with this lady?

K- Never heard of her.

Q: Okay. Just...

K- I have not heard of her.

Q: Mia Omar.

K- Sorry, but I'm not ??.

Q: Yeah, yeah. That's alright. No, I just thought that...

K- Depends who's behind her. Which country is behind her. (1:48) If you can give a speech at the United Nation, there is something in it for someone.

Q: Well, it's… she's there for her people.

K- Yeah, but who's benefit? Yeah, yeah, but it depends. But it depends what it serves in what path. A lot of these people who get to this position, especially talking in the United Nations, there's a lot of things underneath of it, especially like Mother Teresa. If you see what was behind it, it's amazing. I haven't become aware of, aware of these people. I've become aware of the intention behind it. What is… because what we see, what we see,

what it is, is different than what actually goes with these people. Everybody thinks, Mother Teresa, but if you actually be with the people who've been served with Mother Teresa, they talk a different structure.

Q: But there are many good people in the world.

K- Oh, there are plenty. We are all good people. It just depends to whom we want to be good to. It's just, first of all, I don't believe in the United Nations anywhere. It's nothing about uniting, it's all dividing. And in whose benefit are you dividing? The United Nations is actually... pardon?

Q: The problem with the United Nations is the Security Council. It's... they should be disbanded and then it would be much more united. (1:50)

K- I think the most united nation you'll find will come when the Universal Council comes into operation.

Q: Yeah, well that represents every country. It's Universal.

K- Yeah, it's... Very recently, when you look at the history of the United Nation, is actually everything was united. Creates more division, creates more war, than more war plan in United Nation for those who want to create and wealth which has no meaning. And we see the structure is very simple, you have… The people who control the finances, which is Rothschild, which is the ?? of the British Royal Family. And they control the American from inside. Out of all the back presidents of the United States, only one or two, which actually got terminated very quickly, are not connected to British Royal Family. So it's their servants, in a different name, bigger structure. They just changed the, what you call, ?? Commonwealth. (1:52) And there is no United, isn't it? It's just there to create more division, to create more problem, to create... It's actually opposite to what it says, it's not United, it's divided Nation. To whose benefit.

Q: But like I said, the only problem is the Security Council, which vetoes everything that tries to be done, so nothing happens. You know?

K- Oh, it's more happening in the United Nations, outside the Security Council. Much more. Much, much, much more happens, which is not fair to no one. United Nation resolutions are a game, but United Nation behind, on the banner of United Nation, does a lot of harm. A lot of harm. I worked with United Nation in number of occasions. And, it only carries the policies of certain nations for them. It's become a arm of two, three nations to do what they like. I worked with the child trafficking, I worked with the refugee structures, I worked with United Nation, AIDS, it's all, when you look at it, it is all one nation, two nations, they try to put their policies through for their own selves, not for helping any other nation. When you see United Nations food policy, (1:54) you know, that's the end of the nation which they are giving food to, to destroy their agriculture. When you see, United Nation goes in through any shape or form. You look at all the child trafficking in Africa, which ends up in Middle East. All the top people in

United Nation know about it, and they have something to do with it, because it makes a lot of money.

I met... the whole Africa has one... like EU has a representative in United Nation, Africa has one representative in United Nation. Forget about that, all have their own representative. I met this gentleman a few times. When they are released his pictures, we have a lot of pictures with him. And then I realized how they work. When they cannot reach a nation, they work through these guys who they put as a representative of the continent Africa, the United Nations. They cover every post how to slave the others. The only, the only reason, the only way out of it is the Keshe Coin. You will see when everybody has, nobody needs. Especially with the Reserve and the Universal Coins which come into operation, we serve the nations and the people by themselves. They don't need to. But my biggest fear is, people will go through the phase of, "I have what I need to do." And then, watching the next step of it. Everything moves and how everything has to be controlled. (1:56) The worst thing happened to humanity was the United Nations.

Q: I just thought maybe that was the last hope.

K- No it's not. They structured it. Maybe there was a good will at the beginning of it. Setting up of it. But not now. Now, now, now the way they have structured it, the way they're using it. The use has brought abuse. I used to work with the United Nation child trafficking from Africa to Middle East. People, a lot of people know it. Then we looked at the child trafficking from India into Middle East. And it's one of the most lucrative businesses which United Nations officers can ever get into or people who get into with them. Being young girls being from the children. Pardon?

Q: I didn't think that was happening. But, it's very sad if that's what you're saying is true.

K- It's not saying, because I used to be, I got involved and I walked away. My moment was to support and serve. And, you see… When you reach a level of success in business, (1:58) wantingly or unwantingly you get or you make an opinion and you get involved in certain works, especially people like us in those days. We are a multinational structure, cover two or three continents. And then you operate through governments. You don't operate through… when you look at the Musk and these people, are not themselves. They are working for someone. Somebody has set them up to be there. So, they owe their structure to somewhere. When you're an independent businessman, and you don't owe anything, and... you try to be clean, and you get involved in these things, you walk away from it. And I saw how narcotic is trafficked from South America into Africa, and then in exchange, children are sent back to Africa for abuse, from Africa to South America, and then those Arabs and the Europeans, who get these narcotics, how they traffic children with it. Children are part of the prostitution, children trafficking and narcotics, the three go together. And I saw it in Africa. You hold the child, you walk into the area of 1,500 children, you hold a child of 2 years, 3 years, 5 years, 10 years, they don't know which village they come from, they have no ID. They've been walking for weeks and months,

till they find a buyer. And then what you did with them? Abuse them physically, sexually, whatever, enslave them, and then with it, how they get paid. (2:00)

And it's there, and United Nations fully aware of it. There's a budget in United Nations to buy children back. You release them 20 kilometers further up, the same guy's taking it because child has nowhere to go. We don't have enough orphanages in Africa to put them and they put them in orphanages, they take them from orphanages and they go. A child starting from Central Africa to get in the bed with a guy in Saudi Arabia takes a year. Child, if alive, survives, and this child has been released by United Nations most probably 10 times. Slavery hasn't finished, you people dream, I've been there, I've seen it. It is part, the same happens with one of the biggest lies you, we got Indian Knowledge Seekers, they know what I'm talking about, go to Kashmir, go further up. They just go to villages and people sell their children for a dollar, two dollar, five dollar. They're going to become waiters, they're going to become doctors, we take it straight down the line, slavery till they get to Saudi Arabia and die in bed with a fifty, sixty year old man, somewhere in Saudi Arabia.

It happens with... now they're trying... you go to Dubai, you go to... there is a village in Dubai, you can go and women and men, more than 90%, women sitting there, waiting to be bought. You pay, you get their passports, and now officially they work for you two years, three years, but you give them a room the size of a bed, and every night gets abused by the, by the owner. (2:02) We call, I call them the slaves room, two beds on top of each other. You only, we, in, in Europe, if you keep your top, it's against the law, they take you to prison. I've seen all of it. I put... I was involved with the United Nations with refugees for a long time, and I saw exactly how it works. And then, on the other side, and then the financial affairs of the United Nations. I haven't heard, I've been in it and I've seen. And I walked away from it, because the minute you object to whatever, they find you something to dump you or to drown you.

Q: Mr. Keshe, with the Keshe Coin and the Enlightenment Game and what you're doing, it will bring this abuse to an end eventually, won't it?

K- When we give people they don't need to go. We see we... You were all with us when we went to Ghana. We paid to… a graduate from Ghana Atomic University gets paid 100, 150 dollar. If that, 60 dollar topside. My idea, my principle is, they have to be paid equal to the West, that they don't leave, they, to them to come to Europe and earn 20,000 is a lot of money, but they don't know what time their ?? mortgage, they prefer to be in Africa. So I set up the structure, we paid the master degrees from the nuclear university across the… Actually, European wages, a thousand. What happened? What did happen with the Minister of Science and Technology? He called us to his office, says, "They're earning three times more than me as a minister. You're a criminal. This cannot be done." I said, "You want to lose your educated on this high seas and be killed on the way?" This way they say, (2:04) "No, no, no, no, you have to give me the money." And they started all the problems.

When we release the Keshe Coin, there's another dimension of problems will come up. I can see it. But at the same time we're trying to, to stop it, to overcome it. People won't go to work, because I earn so much. But then we have to structure a Keshe Coin that is payable according to effort. According to, you are deported to your job, you are not working, this is there to make your life more comfortable. I am sure we are going to hit these things very soon, once we start doing it. We give life, we give support to children to be equal to whatever, but the abuse of the nation and the nature of the Man is there. We are not short of the Coins to give, it's what would the people do? Will they turn up at work. I have money from, you know, from Coin. I don't need to work. You're not my boss. I had this in Britain. In Britain in 1980s, they brought this social security payment for youngsters. And what happened? We used to interview God knows how many to find one and most of the ones which never got ??. I've been sent here to sit for an interview. If you pay me double what I get from the government, I might turn up. Then they adapted themselves to live with that little money government was paying them. (2:06)

We're going to have a problem with Keshe Coins once you start releasing it, but that's a short term, maybe next five or ten years, till it's adjusted. We've seen from governments very enthusiastic to, and then when they realize they lose control, no, no, no, no, we don't want to know. Because the people who are there, who... what's going to happen? Would you buy any Crypto currencies when you have 30,000? You don't need to do anything. We have the structure. It's the same as what I see is happening in the Game. You have to follow the Game. You have to input something that we can, output something that humanity doesn't go that way, or the other option is open the Space. That the Man has time to endeavor to, what do you call it, to open up another dimension, busy, like the rest of the citizens of the Universe. We don't have factories on the planets. We've never seen all these huge telescopes. Nobody has seen factories. Nobody's seen the animal farms, because life is a different dimension there in those cycles. Don't see armies, we don't see killings, anywhere we... how many planets we have searched.

It's not going to be all... milk and honey. The Rothschild's we see in the background has become one of the biggest enemies of the Keshe Foundation. Don't forget we've been in touch with them, we've been interfacing with them for decades now. (2:08) They offered us our own bank, they offered us our own system and it doesn't work. Now we try to close everything around it. They don't know once we release a Coin, people say this is a Coin for people, not for rich people, and they want to stop it. All the banking system now works against Keshe Foundation. We don't talk because we keep ourselves very quiet. Rothschild's have become aware of what is about to happen to them. They won't be worth nothing. The palaces will be... even the dogs won't live in it in the very near future. The banking system doesn't need it. What the structure to create separation between Man by level of money you have, by taxation is gone. You're born, we give you equivalent to 10,000. In Africa, you live like a king. Electrical engineer with a master degree in Iran earns 400, if they're lucky dollars a month, that's 4,000. The guy gets 30,000 Coins from Iran from the Keshe Foundation. What do you think, who rules, us or the government?

Q: I think the government only divides us.

K- We just need our team to complete. We don't, at the moment, we become exclusive to those who have a computer. We have to become system of people. And this, the App and the diversity to Mobile phone which now we are maturing to everything else is getting done, is the more or less another step for us to finalize. A Man in Africa can have App and get the Coin and shop a Coin. (2:10) Not a Man, Bitcoin, who created the Bitcoin, 50, 60,000, 130,000. Rothschild's in past 3 months has realized Keshe Foundation has hit them very hard. And the same with governments. They realize they lose control of what they wanted to call control. They created 2 trillion assets as the richest family. We covered them a hundred times more.

Any other question? Shall we call it a day?

R: Yes, I think you've answered most of the questions. Anything left over can be brought over to next week.

K- Thank you very much. We try, hopefully, as we said a couple of weeks ago, but now we see most of the things as a result, with the Shopify that it allows you to join us in another way. And hopefully, the team of the Keshe Foundation, in the background on the Internet, will complete this App, which allows us to reach everyone and become exclusive in the next two weeks, three weeks. And somewhere everything will come together, the time to change and the technology for it to be there as well. Thank you very much and see you next week.

R: … (2:12) … (2:14) <<Message from Universal Council>> "And invite the, all the time, give freely your Soul, to elevate, to illuminate the all Souls in existence. Especially, our wish is you unify, with Universal Council, give from our Souls. And invite all of Humanity to elevate the Soul of the every leader, in every nation, in every community, to work as one Soul, in one direction to achieve peace, as One Nation, One Planet, One Race. And all the time remember it. Please all the communities, you all Souls, as you Souls, is it time for the service? In the Universal Council, service for the community? Say yes, please. You write the info@keshefoundation.org. And you say, I like go to be part of the Universal Council. (2:16) We happy for you be part with the Universal Council. Please need all participation, all support for the all communities, and all Universal Council members for all communities. Thank you so much. We have the Soul of Peace. Thank you, thank you. Thank you again for the opportunity, Rick."
