664th Knowledge Seekers Workshop October 15, 2026

(Transcription, Editing and Proofing done by KF Brazil)
(Auto transcription by Elias)

Humans stuck on P - worship Sun, trees, what we see; Introduced knowledge of Soul - created religions - control through weakness of ignorance; Discovered most physical knowledge of body; Missing piece, knowledge of Soul, Internal Energy; Parallels, allows Soul to operate within P - emotions, Aura, atmosphere, etc; Aliens understand pressures & vibrations strength of plasma, Soul; P created boundary of skin, Aura, M fields particular smell - feel our emotions in P; Earth, SS, Galaxy do same; Everything has particular smell - body unique odor; What is smell of Soul - how confirms existence in fields; Energy and smells unique; Planets, galaxies, Fire, have own smell; No difference between Micro & Macro; Heat creates smell, body odor; CR interact with Soul of Earth - smell exists in Energy; Know fields of Mother's Soul; 3 scientific papers, change in Science - what is smell of plasma; Soul, Earth, etc. has fingerprint - smell of planet; T - test smell of Soul; Transfer energy over phone - Soul translates to P; App connects to Enlightenment Game - purchase energy of apple, KC; Earth nursery for Souls - depends how elevate Soul, amount energy; Good Souls create stars; Souls of wrong doer become rogue planets - isolated, no light, no smell - biggest punishment, solitary confinement; STP creates expansion for STM to increase strength - becoming smaller, more powerful; Get rid of attachments; Understand how Soul interacts with U fields, smell, emotions; Death - only take Soul, energy level; Elevate Soul - smaller; Man reaches exact D of My image - don't exist, everything exists within; Think about outcome before acting - will it result in star or dark planet - how life works; Each planet unique smell; Man smells of crimes - fingerprint - others shun him - did what Creator forbid; Live peaceful life as STM; All Souls same - differences in field strength - according to servitude; Day of Judgment - STM & STP balanced; Knowledge - access U Energies; Phone App - before end of October, Promised Time; We are Messengers of God - deliver T for change; We provide plasma condition - Soul decides what it will be; Emotion of STM gives taste & energy - same as dreaming; Dream becomes reality; Everyone responsible to understand process of Creation & Energy; Coincidence - Jewish Promised Time falls on next Thursday - deliver T & beginning of 666; Carbon - 666 means completion, new cycle starts - not bad omen - explains - Star Formation (SF) - create fourth reactor - same as cell, CH3, COHN - unbalanced condition creates cell; Fallacies in Physics; Cannot fuse 2 atoms - amalgamate as plasma to bigger plasma; High temperature force a plasma to be created - mistaken for fusion; Chinese captured neutrinos - nearby nuclear reactor; Nuclear Physics fallacy - neutrons physically cross wall of reactor appear in other places - impossible; Neutron into plasma, cross wall in Energy state - re-manifests in other places; Soul does same; Hidden knowledge in structure of 666 - base of SF - creates fourth reactor; Make up fallacies when puts matter into Energy; 666 - time to rejoice - not be afraid; Accept differences in Space cultures; We choose to divide through different languages, races, nationalities; Story, school children - all get along as one - parents teach to be different; Soul - not racist; Planet Zeus allows all races to live on her - manifest according to fields; Story, growing up in Zoroastrians school - leave religions at door, inside all equal; After 50 years message same - Man changes to suit himself; American government said will destroy Iran - because what Persians did 2,500 years ago; Shows

Man not matured; Jews have never matured, remained most illiterate people, kept themselves in dungeons of denial of own existence; Will go back to having nowhere to live; Jews running US - president's son-in-law biggest weapons company, selling for and through Israel; Ashamed to carry blood; Soul, no color, beauty of Creator - live Ethos of Mitra; Don't die, travel U through Soul & Ethos; P can live Ethos; KS changed life; Forest fires burning in Indonesia; Special Plasma T - feed smoke into CO2; Soak curtains in house Gans; KF produce fire extinguishers, not harm humans; Walk into fire - no power to burn; New plasma T above Gans's - field based; CO2 plasma wind - put out fire; After 666 - lots new T come out; Plants take directly from created fields; Indonesia, fires being started; Not interfere with natural fires; Land grabbing for Rare Earth minerals - American government behind; Earth creates hurricanes, washes iron into oceans; Space Center in China; Microwave sized machine - create any material at home; Stop abuse of Africans by Western nations; KC help Africans; KC belongs to the people; Mass release through Game; Decision how to distribute KC from Universal & Earth Council; Connect KF Store into Game; Pre-sell our agricultural products; Phone App gives access to villagers; App testing; Release App & KC October 22nd - beginning of change; Rooms in Game for feeding energy; Play Game become peaceful; Ask military test systems; UBESUS 26; App piggyback on ONN; Apples stay on tree; Receive food as plasma wind; Teaching about function of eyes - equator level - North & South Pole; Eyes plasma; Planets, invisible anti-clockwise rotation of energy; Eyes too close to Soul - invisible field flows; Why dreams feel real; How image made; Convert dream into reality of vision; Images not from brain; Light flash at death - Astronauts; One eye stronger; Use this property in T, cornerstone; Need agreement with governments, UBESUS-26; Soul gets 20%, don't need to eat; Convert plasma matter products back into plasma - no waste; Plasma recycled - dilution- how make Gans; Developed T 2000; 2010 BP oil disaster - changed oil back into energy - incarcerated in Toronto; No more garbage; Areas in Space where energies would absorb us - shielding not work - viruses; Virus, dissolves within you, diluted; Fields of Soul feeds matter & energy from food feeds STM; Tighter means heavier gravity; How STM & P interact - feed each other; Question to you - what is the odor of your Soul.

ENGLISH TRANSCRIPTION

(:16)

K- Thank you very much. Good morning good day to you as usual wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. It's of knowledge of Universe and understanding of totality of the essence of existence.

Up to this generation we have always been tied up with the physicality, we worship suns and everything else, the tree, the stone, the wind and the rest of it. And by introducing the knowledge of the Soul and people who could bring us to understanding that there is more life than the physicality, we created religions and then the views of it by those who understood the weakness of Man in the absence of the presence of understanding the Knowledge of the Creation and the Creator.

In the past few weeks as we're going deeper into understanding of the structure of the, what we call, life of the other part of the life of Man, which is not the physical but the energy side. We have to come to understand there is much more into it and there is a lot more into understanding the essence of the totality. What does this mean is we know as we said we explored every possible things about our physical dimension (D). We know all the diseases it can catch more or less, and more or less we understand how we think every organ works, every piece of our body functions and what will be the outcome of if we do such a thing, what we're going to get, even we have understood the effect of the physical emotion and the rest of it. As we learn to understand the energy side of the body of the Man, there are similarities in a way that's why the Soul can operate within dimension of physicality because he has parallels. (:18) Emotion, essence, Aura, atmosphere, and everything else.

But the interesting thing for a Man to understand as we talk are fellow beings as what we call, members of the Universe (U) don't have the same structure as us. As they don't have nose they cannot smell, as they don't have ears they cannot hear and all goes back to understanding the pressures, vibrations and the strength of the fields of the plasma what we call, the Soul of the Man (STM) or the Central Energy the body of the Man. What has come to us to understand is, in the dimension of the physicality we have a boundary of the skin and then we have the Aura of the body of the Man, and then we have the smell of the body of the Man, and we feel the emotion of the Man in the physical dimension. But in fact, when we look how does Earth creates its magnetic (M) field, what we call, the atmosphere. How does a solar system (SS) create its magnetic field? What we call, the structure of the solar system, the envelope which holds the planetary systems in, how does a galaxy create the environment?

And as we know, in the physical body we have an odor, we smell, this is the smell of the bread, this is the smell of the body of my brother, that's how my Mom smells. But what is the smell of the Soul? How does the STM create his confirmation of existence in the dimension of the fields? (:20) In a way, if we mature to understand, as we call it, the energy of this or energy of that, or the smell of this, or the smell of that. What is, for example, the smell of our Soul? What is the smell of this planet? How does the Milky Way smell? And if you listen to what comes out from the depth of the knowledge of NASA and system we sent out some 50 - 60 years ago, is going through the fire of 90,000 degrees on the edge of the solar system, going into the Galaxy, what that fire smells, how does... when we cook a meat, we smell the kebab from miles away, how does this fire on the surrounding area of the Solar System, which is supposed to be 90,000 (degrees), how does it smell, what odor do we leave behind? What is the odor of our Soul? There's no difference in Micro and Macro. Then it comes to understand the totality of existence. The way the heat of the fire creates a smell, the heat of the summer creates a smell in our body that is our odor. What does the Cosmic Ray (CR) in interaction with the Soul of Earth creates that it leaves a trace of its smell in the dimension of the energy. How does it work? How do we assess? In the physical dimension, this is the smell of the mother. In the dimension of energy, how does the Mother smell? How do we know we are dealing with the fields of the mother's Soul?

In the coming weeks, we'll release a paper, scientifically as I said before, (:22) as powerful as the creation of Black Hole, we changed the whole history of the science since 2004, when we explained how those Black Hole creates, and we saw now it's openly spoken what we set up. Three papers will be released in coming time, very shortly, that will bring as more fundamental changes in the world of science, and one of them is, 'what's the smell of the plasma?' What odor does it leave behind? How do we know this is me when you see me in the dimension of the energy, when I'm not in the dimension of physicality? What is the fingerprint of me, fingerprint on my Soul? And how does Earth creates its fingerprint? What is the smell of this planet? Up to now we never understood. Now we understand. We deliver technologies that you can test literally the smell of your Soul. This is what, how is, this is how literally we are transferring the essence of the apple down the phone to you. Because we take the essence of the interaction of the Cosmic Ray on the structure of the plasma of the apple, not on the dimension of the physicality of the apple. But because your Soul knows it, it translates it to the dimension of physicality, that this is the apple I ate.

In the next 7 days, 14 days, Keshe Foundation will release an App, which connects you to the system of the Game and through that you can connect yourself to purchase your apple, orange and everything else. In that process, when we understand the totality, in that process we understand the energy side of the physicality of the, (:24) what we call, life of the Man in the dimension of the planet Earth, will be very different than what it is in the Universe. Many times we have told you this is the nursery of the Soul, that's where the Souls are created and according to the dimension of what you do, how much you gain, what condition you create for your Soul to elevate, we explain to you how your Soul and where your Soul will be. Not all the Souls will be a star, creating, generating new bodies. A lot of your Souls become what we call, the rogue planet, rogue solar systems and the rest of it. Me as a scientist, as a nuclear physicist, as what we call, cosmologist, we understood a long time ago, it's not what is seen in the dimension of what they have told us. We consider that when you have a solar system, you have a planetary system, whether possibly depending on the pressure of the environment. These are the Souls which have served in the dimension of life. These are the Souls which are the beginning of the establishment of creating another generation of life. What happened to the Soul of wrong doers? What happened to the Souls who committed murders and the rest of it, or those who committed suicide?

Planetary system is not exclusivity of a solar system. In the dimension between and amongst what we call, galaxies, solar systems and Universes, there are those objects which are exactly like maybe many, many, many times even bigger than our Sun that have no light. (:26) They don't interact, they create no atmosphere. These are dark, dark energy field matter states. The world of science of today they call them 'rogue planets,' because we never understood what they are. These are planetary system, virtually amongst the galaxies, they have no light on them, they never shine. This is the place where the STM will not even smell. In a way, this is the biggest punishment a Soul can receive. On Earth, we imprison Man for what he's done wrong and we put him in solitary prisons (confinement). The Creator has created the condition that these Souls will never

shine, they never seen. They are objects that they live amongst the solar system but we have never understanding of their existence, because they don't contribute to the world of the Creation. They have no smell, they cannot because even it's Soul ?? dreaming that the life is not worth living to reach that point as what we call, the planet, the sun which never shines.

In the coming up papers I'll explain in detail. How you can how you create? How the smell of the Soul, you can change the dimension of the field the strength of the fields of the Soul to elevate your Soul to be able to reach a higher order. But you have to understand what you have done, how you treated the physicality that through the Soul of the Physicality (STP) you create that expansion dimension for the Soul to increase its strength, not in the expansion of dimension of the becoming bigger, (:28) but becoming a smaller but more effective. The smaller it becomes, the more powerful it becomes for the Soul. It's the reverse of the dimension of physicality, the bigger you are, the bigger you get, the more powerful you become. This is the problem when the Man has not understood. In dimension of physicality, the size makes you bigger, more powerful. In the dimension of energy, the smaller you become, the more powerful you are, the more punch you have, the more stronger feels as you have got rid of those attachments that was make you great, to make you bigger.

If Man come to understand the strength of how its Soul interacts with the field of the Universe, how does it smell, what emotion does it create, Man will know how to treat the physical life, detached from totality. As he knows what is saved in the field the strength of the essence of his energy, is more important that what he has gathered in the dimension of physicality. Man when he dies takes nothing except the Soul. So, what it's worth to attach to the dimension of physicality? You leave the life physical life, stripped of everything, even the gold ring on your finger stays behind. But the gold ring on the energy of understanding what we call, the dimension of the life of the Universe is carried with you across the dimension of energy level of your Soul.

Once we understand this, once Man comes to the point that understands how to in a way elevate his Soul to reach the higher dimension, (:30) which means becoming a smaller than becoming bigger, becoming a stronger than becoming weaker by expansion, then Man understands what it means to live in the dimension of energy. In a way, life of the Man is totally dependent on the existence of his Soul, not on his existence of physicality. And what you gather in the process of what we call, life, physical dimension, gathers the energy which allows you to live in the dimension of the energy, what we call, the STM. I made Man in the image of Myself, and when Man reaches the exact dimension of My image, then you understand I don't exist as everything exists within Me. I'm the Black Hole of the Creation and it created. Just because it can see itself has made itself black.

When Man understands the power of the dimension of the energy, Man will detach itself from the dimension of physicality, even though he uses the dimension of physicality to create the dimension of the existence in the energy levels of the Universe. Next time when you do something, ask yourself a question, am I, why, would I be a shining star, or a rogue planet amongst the planetary system. Never shine, no one knows of my existence,

and I leave that solidarity and I call, that ?? solidarity, Totality, individuality of me on my own without anything. (:32) I cannot contribute and nothing can contribute towards me. I lost totality of the Souls.

Now you understand how life works. How life will create its dimension to understand the totality of the dimension of his existence. As I said before, I have no eyes to see, I have no ear to hear, I have no mouth to talk, but I can and I do smell. But that's the smell of my Soul. This is the dimension that I exist in and because of it, being on the field strength of the life of the Universe, I know how you feel. This is the smell of the Man from planet Zeus, it's the smell of the (Man) planet from Earth and it carries the fingerprints of his crimes. As I said many times before, criminals work with criminals, doctors are with doctors, scientists work with scientists, and you always shine. Those who are no good and they are not at your level or not in understanding of your intellect, because this group understands different things than them. The same has happened to the race of the Man, its Soul will smell of blood. He has put his hand on what the Creator forbid. So the Universe and Universal Community has shown this Soul away. (:34) Till the Man reaches the point that understands he can use the fields of the Universe, what is given free, then committing itself to destruction of another fields, another plasma, another Soul, for it to have the joy that I can, I can kill, I can destroy, and I can, because of it keep myself away from the rest of the Universal family.

The benefit of physical dimension is a short life with misery of existing, failure of organs and 'bits and bobs' of what you call, physical body, where you can live a peaceful life in the dimension of the fields of the energy, what you call, the STM. We do not have cancers in the Soul and we do not have handicapped legs missing, and toes missing, and blind, as all the Souls are in essence the same. It's just the field strength of what carry according to the dimensions of their servitude in the dimension and the point of where they established and where they started as a dimension of physicality. In a way, the ?? travel and the journey of the STM starts in full when his book is balanced in the dimension of the World of the Creation of the Creator by itself. The Day of Judgment is the day when the Man closes his eyes and the book of the STM and the book of the STP of the Man balance each other off. If you have committed crimes, if you have committed wrong, your STP book is much thicker than what you have done, you achieved in the dimension of the STM, (:36) in the journey of times of the life of the Man, in the dimension of physicality. If you have surplus, you become that sun. You have in a way nothing left and below you become that rogue planet. In amongst the other stars when you see them shining and you have nothing to shine you cannot create another cycle. You become that what we call, nothingness. Even you're amongst everything else.

The world of science has to understand, and the Man has no choice, but to understand this process. In the coming time, in the Universities of the education of the Man, scientists have to teach Man, what is the smell of your Soul. Smells like the fields of blood, or does it smell like those who have committed themselves to peace? In the step by step, we teach Man and the process, the change is about to come. And every Soul gets the same chance to live a free life, unconditioned to kill, to access. And in a way, the Man will be given an opportunity to feed itself without killing.

In a coming week, Keshe Foundation will launch the Apps that you can feed yourself. We endeavor to complete this as soon as possible before the last week of October. That Man starts feeding itself through the channels provided and the technologies, which gradually will come in the coming months and years, that Man will not commit murder. We'll prepare the STM to join the World of Universal Community, through to feed the Soul, that the Soul feeds the Man, that Man does not need to kill in the dimension of physicality. We are the 'Messengers of God,' and we deliver our message, and we deliver our service in a very simple way. (:38) We are not cults, we create a dimension of creation. And in the coming weeks, and the coming years, gradually, what this planet could not give to elevate the STM, we deliver through the technology (T) which Man has become dependent on.

You do not need to kill. You remember your parents used to give you chicken and kebab and rice and everything else? Now the desires of your STP can be fulfilled without actually killing a single animal, and destroying a single grain, where your emotion will create that dimension of unique condition, that Man has never had the opportunity to tap into the energy of the Universe, and not into the dimension of physicality of this planet. And maybe, and maybe through this, we change the course of Humanity. It is not that we are not ready, we had to wait for the time to arrive. The most significant time is now, and this is the beginning of the change. Now where we feed the Man, we give in our finances to the Man, the Man never looks in the pocket of the other, if I have more or less, as he has enough to live a perfect life.

We deliver, and we are about to deliver this message. And the technology, it is thanks to those who created, that allows Man, to become independent and stop killing. If our team delivers the technology promised in the coming days, every single one of you should be able to access that, through a ?? single App. And then we provide the facilities in a plasma condition, that your Soul decides what is going to be. When the rays of the Sun leaves, the Sun has no identity, it's not going to be a gas on Jupiter, (:40) or has become gold on Earth. ?? When it comes across what Earth gives it, dictates what it's going to be. The dimension of emotion of the STM, will give the taste of the apple to the Man, and a feel of gold in the hand of the Man, that Man does not need to kill for it, and Man does not need to destroy an apple, to get his essence, as the energy essence of it. The smell of his creation to the dimension of the Soul, will bring that to the dimension of physicality of the Man.

How many times you dreamt that you're sitting in a restaurant, and they gave you the most delicious, sweet, most beautiful odor of whatever, and you smelt it, you tasted it, and you wake up, and you had nothing in your hand in the dimension of physicality, and you called it a dream. We bring your dream into reality, by you and not us. We provide the dimension of the Fields of the Universe, that you decide how you slice it, and how you use it, that every Soul on this planet, will live a dimension of Creation of the star, and not a rogue planet, on the dimensions of the Universe, to be imprisoned, and nowhere to live.

Understanding condition of the existence, understanding the process of the creation and dimension of energy, it becomes a responsibility of every Man. As I just before we start the session explained to Rick, it's very, very strange. Coincident. The day that the Jewish community is hoping that become the establishment of the what we call, the Promised Times in Torah, (:42) falls on 22nd of October 2026 next Thursday teaching and we delivered that and it's the beginning of the 666 which completes the cycle and Man is ready to move into the next dimension that the STM is ready to become the part of the Universal Community, as the pastimes of the Man mistakes, slowly and step by step, will be erased, that every Soul is free to become part of the beauty of the Creator. Welcome to our message, soon you'll understand. The cult is the love of the Creator, and the religion is of his religion, and nobody else's and you don't need no title. We go for a break, and we come back and try to answer your questions. Rick, can you take us for a break, please?

>> BREAK >> 664 KSW October 15th … (:49).

K- We have nothing to say. We wait and see. If there are any questions. We have said enough, it's time to see what happens and what comes.

R: Well I've got bad news for you there's no hands up and no questions in our Q&A.
K- Shall we call it, a day? It's the shortest teaching we ever had.
R: It's the first time ever, whoops we have a hand that just popped up. We might have to address that. (:50)
K- Maybe it's a mistake.
R: Were you serious about closing?
K- No, no I'm just joking.
R: Okay. So I'm not sure if you, I'm sure you have a very busy life and have things to deal with. So, a question just came up in the Youtube that was the exact question that I had actually. And now we have two hands up. So, well, I'm going to take precedence here first.

Q: … Can the number 666 refer to Carbon? Carbon alone expresses the idea of matter.

R: And I would continue a bit with that, that we have been convinced for probably hundreds of years, that somehow this number 666 is kind of connotations of evil, and we're supposed to, you know, reject it, and so on and so forth. But it seems to me that's what the authorities in power would like us to believe, and perhaps there's some hidden meanings that we're missing as a cultures around the world. Can you explain and elucidate a bit about that?

K- The 666 is completion. If you look at it numerically, it's three 6's makes 18, which numerically is 9, is completion. That's time, when we say, it'll come to that point. And it means one cycle is completed, (:52) and a new cycle starts. That's the only meaning of exist. Now you can read anything you like into it. It's the way. If you put the sixes in a special order, one locks into the other, and it completes a circle. In a way you hook on to the other. And it's the process of completion. And there is nothing, this is the only way it could be explained, it could be understood. It's not a bad omen, it's just moving on. One cycle is finished. I was a boy, now I'm a Man.

R: If you were authorities, then you would see that as something you'd want to control. It would be the end of your reign as a king, for example, and you would want to continue your reign if you could, in spite of being the end of that cycle. And so I could see it could sort of scare the certain authorities, and they would want to make everyone think it's an evil thing or something to be shied away from?

K- Not really, it's the end, it's the end of. It's either way you look at it. It's numerically, scientifically, physically. It's about... if you look at 666 in a way, it's a Star Formation (SF), which is hooked on to each other, that we are connected and what we create in becoming that completion balance, it's a new dimension. (:54) It is what we do in the Star Formation when we create the three bases. Then it leads to the creation of the fourth, which balances and everything else. This is when you, if you look at it even in the structure of the cell of the Man, in your amino acid (AA) which is the fundamental base of it. Look at the sugar, which gives you the fundamental, the original sugar, CH3, which is again 4. The 3 Hydrogen's connect and in that process they create a dimension of what we call, Carbon connection, which connects the Hydrogen into the Universal physical dimension manifest as a sugar. We see it with what we call, the amino acid of the Man. It's the COHN. Again you find the connection in balancing and just because it cannot create a balance, it attaches itself to the other matter. You attach your amino acid to calcium, to phosphor, to whatever, depends how the balances are and this leads to our ?? unbalanced condition, that leads to creation of every cell of the body of the Man.

We do not understand, I was explaining this to Knowledge Seekers (KS) yesterday, we do not understand a lot of things in the world of the physics and we have created a lot of fallacies with this, exactly in the, what we call, dimension of physicality and manifestation of physicality (P). When I was in university, and when it came, you know I've written, 'fusion is a dream which never comes true,' you cannot fuse two atoms, but if you change them into the plasma, the energy can amalgamate to create a more powerful plasma. (:56) But you cannot literally bang them together, they were trying to do. They created such a heat, high temperature, that they force a plasma, and then they call it this

fused. If you look at all this fusion technology of today, high, high temperature, that it destroys any physical barrier and it leaves a plasma. That's how they say we create fusion.

But one of the biggest problems I always had, in, even during the education, understanding of the nuclear physics of today, even our nuclear reactors. As I said before in a couple of teachings before, it's on the same pattern, it's the same understanding, that they say, neutrinos they managed to capture or seen the light of it because it's 47 kilometers from a nuclear reactor and that's why they captured it. And they've been looking at it, because they couldn't get it from the Cosmos now they relate it to a nearby nuclear reactor.

But in the world of the nuclear physics the biggest fallacy, the most rubbish thing you could ever hear is that, they say neutrons cross the wall of the nuclear reactor and then it stays in what we call, moderators and then we cool it, and then we create whatever boiling water and the electricity from the turbine. But if you understand the dimension of physicality under no circumstances a single neutron, a single electron can cross the wall of a cladding of this fuel, or the nuclear reactor, or the wall of the moderator containment and the moderator, and the rest of it. It's impossibility. And we've been fed to believe in this fallacy. (:58) This is what I always said in my time as a nuclear engineer and working in nuclear, doesn't make sense. It does not make sense.

But if you translate it in the dimension of energy it makes sense, as a dimension of plasma. The energy of an electron can cross any, because it's a plasma, it's a magnetic field and it can in a way leave through what we call, the pulse or frequency of the electron, cross any wall as an energy. A neutron can cross as an energy through any wall, and if you create a right trap, the same as neutrinos, they created near nuclear power station, you can convert its energy, slow it down, create dimension of the inertia of its matter state, and trap it. But when it leaves nuclear rods, till it appears in the moderator, or in the ?? coolant, it's in energy state. But what our scientists say, no it's an electron, or a neutron, or a proton, which crosses all these things and appears. No! And this is where our science is all wrong.

We transfer through as energy, but we cannot go through as matter. A neutron, the wall of a nuclear reactor, a cladding of the fuel rod, is like a concrete block. There is so many neutrons packed to each other, so many like, elements packed to each other, it cannot go through. But, if it's a magnetic field, yes it does. It's the same with our Soul, it's the same with everything else, in the world of physics, which we have accepted fallacies, because somebody said so, and we take it as a point of authority. (1:00) Now, if you understand this, we understand the rest of it.

Our structure, hidden knowledge, if you look at a 666, it's a connection of length. If you look in English language, look at the 6. It's got a circle, and then it's got a hook. Put these on the way they sit, it's a basis of a Star Formation, connected to each other in energy. Leads to creation of a new dimension. Those three do not exist anymore as three individuals, they become one. And in counterbalance of their fields, has to be another

field creation of the new dimension. We call it the fourth generation, a fourth reactor. If you understand this, then the World of Creation, understanding everything is put in the physical dimension, but in fact is in a dimension of energy, then a lot of riddles will be completed. And nobody can do anything with it, doesn't matter a king, a government, or the rest of it. It's just Man has created fallacies when things has been put in dimension of energy. And as I said, you are camel birds (ostriches), you don't know if you are a camel or you don't know if you are a bird. And this is the structure, this is the problem.

So when you look at a 666, or you call it whatever, look at the physical structure, what they have hidden. Don't we do this in our Space reactors, Star Formation? But the energy locks, but the physical dimension stays as a plasma. And that's what 666 is. (1:02) When you lock it and it completes, it has to create a common denominator field and every field has to have a counterbalance, which becomes the fourth one, and beginning of. In every shape or form, a 666 condition. Be it in, written in Arabic, written in Farsi, written in English, written in every other language, you end up with understanding of the completion. Three sixes is 18, becomes 9. Completion is the end. Next cycle has to start. When the three base reactors balance each other, the fourth one appears. The flight system takes off. Then you can read into anything you like. It's the end of, and the beginning of a new cycle. It's not the point of fear. It's a time of rejoicing.

But Man has to find a way, you know, it's like, you remember, in... from mid 1990's, they start saying that the computers don't have a digit to go to. On 2000, a lot of planes and everything else are not connected, they fall off the sky and everywhere, if you remember. Everybody was waiting for the new year of 2000, for catastrophic conditions in the computers, if you remember.

R: It's the end of the world, yes indeed.

K- End of the world. And I was in a party, in Gambia, in the garden, celebrating a birthday, and the New Year. And there was a plane going down South, towards South Africa. We could see it. And every was shouting, "It's 12 o'clock, you're going to fall!" And it was joking that planes were going to fall at 12 o'clock because the system doesn't work and the rest of it. (1:04) We can make this fallacy, the planes landed everywhere, nothing happened. But when you speak about the condition of the 666 is completion and the new start, and that's what there's nothing being afraid of. It's just to rejoice that there's a beginning, a completion and a new cycle, a new energy will come into position.

Any other question?

R: Well it certainly sounds more exciting than depressing, let's put it that way.

K- It shouldn't. Nothing in knowledge should be depressing, it's just Man what he takes out of it counts, and for him.

Q: … Good morning Rick and Mr. Keshe. Thank you Keshe for all the hard work that you are doing. I have a question. The question is, as humanity travels into space, how will

we navigate differences in cultures and how will we deal with differences in competence and understanding between different entities? Thank you for your time.

K- We don't need to, we just got to accept as it is. We choose the languages, races, nationalities, just to create that division that we are different. I was in a meeting earlier on today. A lot of children and .. it's just a celebration. (1:06) And every child had to carry the flag which is a representation of the passport he was carrying. And there were so many of them. There were about 16 nations plus flags from by children of one school, one education, they eat under the same roof and they were so joyful that they are together in one structure from 16 nations, and it was did not matter. Because the minute the flags are positioned, all boys want to play football, and all girls go and play whatever they do, and race, color, does not count. It's the way the race of the Man should be. I sat on a bench and I watched them, and I thought, how am I going to explain this to the Knowledge Seekers?" Our children are blind, we make them to become racist in the nation, the color, whatever, whatever. And these were children from young age to pre-university. The way they cuddle, and the way they joke and the way they live together, is the structure of the life should be. Blind. As our Soul does not have a passport, our Soul does not have a color, our Soul is not racist, why should we be in dimension of physicality? (1:08)

The interesting thing is, if you go to Moon and you want to live in the dimension of Moon of planet Zeus and another race comes and wants to live in the dimension of planet Zeus. You all to live together have to live in the dimension of energy what planet Zeus accepts. Does not ask which planet you came from. You are here and this is the structure you can live on me, within me, and I can give you life. So why do we have a problem? This racism, this color and how we're going to survive will disappear once the Man becomes that level.

I learned this the first time I went to ?? Biru Bahram, the school of the Zoroastrians in Tehran. Our principal, starting the first year, stood us all in the yard, as usually they gave us the speech of first day you are in the school. And this was then repeated every year. It was part of the structure of the beginning of the celebrating, beginning of the school. Which is 21st of September. And one of the first thing he said, he said, "You see that door? That's where you leave your religion. You see that door? This is where you leave behind it your races. You are from all religions in the school and this is the only school in Iran which is free of religions. We don't care from which part of Iran you come, we don't care what religion you brought up in. In this school, we are all Zoroastrians. In this school, we are all equal. (1:10)

This was about 50 years ago, and I sat today and watched it. So, message hasn't changed. It's just the Man wants to change it the way it suits him. We saw the most stupid speech ever done by a human race, by a human being. The most ridiculous, illiterate man on this planet, last week, the Secretary of American government bringing back that 2,500 years ago the Iranian did this, and the Iranian did that, and now we're going to do the same back. The man does not know which end his noise comes out of. This shows Man is not matured, especially the Jews. Jews have never matured, they stayed the most illiterate

people, and they stayed in the dungeons of the denial of their own existence. Now we heard a Jew state officer of the most powerful nation, (which) will not be very soon. As they think. Deliberating for a long time in how the Iranians and Persians did two and a half thousand years ago, and they are still the same as the rest of it. Not remembering that few hundreds, of decades ago they had nowhere to live and they go back to have nowhere to live, that they don't exist in that dimension. (1:12)

This is fed by governments, fed by people, who by division try to bring their selves important, making themselves whatever. What we see in American administration today is nothing but Jews running the state of United States. The son of the president has the biggest Arms company, biggest share, and sells Arms through Israel, for Israel and the rest of it. Secretary of State, and the rest of it, and the whole lot. Sometimes I was telling to one of my old relatives a few days ago, I'm ashamed I carry part of that blood within me. And why? Our Soul has no color, no race, nothing but the beauty of the Creator. Why do we do it with our skin and the words? We're born, Zoroastrian, we're born with the Ethos of Mitra, we should die with the Ethos of Mitra. And in a way, not to die, but to travel the span of the Universe, as our Soul does with it, Ethos of Mitra ?? so does, our physicality.

Any other question?

Q: … (1:14) I'm so honored to be on this call. This is the first time I take the courage to raise my hands and connect on Zoom. I'm connecting from Singapore and I've been following your work for quite a while now, Mr. Keshe. Unfortunately, I didn't discover it earlier, but still it changed my life completely. My question today is a little bit relevant to an ongoing unfortunate incident that is happening in Southeast Asia. As you may already know that there are forests that are burning in many parts of Sumatra in Indonesia and other islands and even Malaysia. And we are of course the local population and the villages are severely affected. Of course there's death and also death of wildlife like the orangutans, and the haze arrived all the way to Singapore and the pollutant index is very high it's about 200 now and they are now distributing masks and thinking of closing schools. The point of my question is looking at all catching up with all the workshops, it's a lot, but I have seen one of the CO2 capture videos that you have presented with the analogy of the leaf, which to me was almost like magic and miracle speaking. I wonder whether this kind of, you know, what looks now simple as you presented carbon capture, CO2 capture methodology can be used at scale to help in conditions like this, or around the world .. ?

K- Yes, you can, you can. (1:16) I remember years ago, we were collaborating with the American or Canadian firefighter, trying to find a solution for fires in America, goes back, God knows, maybe 8-10 years ago. And what we do in Keshe Foundation factories, we produce CO2 in a special room. We don't produce CO2 as part of the range with other materials. CO2 and Hydrogen (H) and Nitrogen and Amino Acids are produced in the separate room and with the CO2 we fan to extract as much as possible and what we call, CO2 from the environment that we can convert it into Gans's and it works. Way you can do is the same. But if you bring the CO2, what you call, the smoke and the smoke

whatever, feed it into a container of CO2, what we call, structure of the production of CO2 and let it to bubble up, you'll find out you take most of the contaminants out. You clean the air by huge factor. And most of the, what you call, air pollution, will be absorbed as the air blows through and goes through the process of conversion of the plates in the CO2 box. We tested it and it works. You don't need to let it come in to be absorbed, you can push it, force it into the system. And it's like air bubbles. (1:18)

There are ways you can soak, like, you know, glass (window) curtains you have, with a CO2, and hang it on the windows. You bring the combustion much faster in. You can add, depending on what is coming from these fires, add a layer or mix a Gans of CO2 with CuO in the curtains and hang it, on the windows, and where the inlet of the air is, and you breathe more or less, near clear enough, and you keep on moisturizing it. As you're moisturizing it, you keep the conversion and you will see material hanging on it. And you have to more or less wash it, or rinse it and repeat the process when the cloth is ?? about completed. Use your curtains in the house to cover, to do, and clear atmosphere where you can live. Is one of the best ways even when you come to viruses and contaminations. Soak your mask in a CO2 and a CuO and keep it moist. You block a lot of these adverse energies.

Q: Mr. Keshe, may I please clarify what you meant by soaking in the water of the plasma Gans?

K- Plasma Gans CO2, or with even Gans's on it, yes. We tested this, it gives a good result. It doesn't solve 100% but it gives a very, even it takes the odor of the smell of the burn away. We are working maybe in a very near future like this, the machines you have that it, (1:20) what you call it, the gas extinguisher, fire extinguishers you have in the houses or in the companies. Today I even was working on such a thing, that we create the plasma of the CO2, that immediately can put out the fire. In a way, suffocating the oxygen. Without touching the human being, you can work in it, but nobody… can actually literally walk into the fire. And in a way the fire has no power to burn. I don't know it because so many research going on at the moment.

It is the new technology development is to totally plasma technology is nothing to do with Gans's. It's another breakthrough in the world of science, And in a way we blow at you, we blow into the environment, the plasma wind of CO2 which converts itself due to the position into matter state, and literally fire within milliseconds dies off. It's a very complicated simple system and I was working on it this morning. Because it's not that we are producing, this is a by-product of another development in technology in space, deep space travel. It's like we reduce the CO2 that we say you can use in agriculture, we can use it in medicine or whatever, and this is one of the byproducts of it. (1:22)

And a lot of things, as I said, after next week, after the completion of 666, technologies will come out of the Keshe Foundation which revolutionizes everything we ever done. Everything which Man has got used to, Man has to start to learn, we can do it without endangering, and creating new life. These are all outcome of the new Space Center Research Centers coming up, scientists which we bring in, we join in, and the things we

have developed. I thank those who support us in the Research Center development, and we will see coming up. In next few weeks and months, we deliver a technology that the plants don't need nothing, not... not even... even to us, the Gans production has become obsolete gradually, because we go to the next stage of Universal Knowledge. We create the fields and the plant takes from it what it needs, and if the Man is there, Man will take the same. And part of this fire you're talking about and the smoke, we did a lot of work with this firefighter. I think it should be still as Knowledge Seeker somewhere in the background. We tried to find a solution and... I was sitting and watching in past two, three days, how to bring this and this is part of it. Yes, carry on.

Q: … Yes, Mr. Keshe. I was just thanking you for your answer and I look forward to the updates coming next week. (1:24) All I'm saying is that your technologies are needed more than ever in our times. I follow the reports directly, the local reports in Indonesia, in the Bahasa language, with the help of friends. There are many local reporting that the actual fires are not really natural and they are being fueled instead. Again you know, we don't know where the truth lies, but if we can find ways to help the local populations as soon as possible that would be incredible, it is something I would like to explore with your foundation if there is any way we can ?? get help.

K- We, the only ways, there are two things you have to understand. The forces of the nature. If it's natural fire, we get it regularly in America, we get it regular, God knows tornadoes and everything else. If we interfere with those, we create problems somewhere else. This has to happen. Because our planet works like this. One feeds another. But if it is done deliberate, then there's not much you can do with it. Because there is no control over it. It happens in South America. We've seen it for decades. They just burned the forest out because they want the minerals in it. What's the purpose of setting, creating the fires? We see that regularly in many countries done. Arsons or whatever, or people who are after land grabbing. Because especially in Indonesia and that part of the world, there's a lot of land grabbing going on, because there's a lot of minerals. (1:26) And they are encouraging it to be done, because it cannot be done any other way, because the mineral underneath is promised to different nations.

American government is causing a lot of problem. A lot of these things are done in the countries they have influence over. They cannot do it legally through registration. They do it illegally through fires and other destructions to access the rare Earth materials which they need for their economy. It's not just in Indonesia. I've seen this in the past two or three months. Deliberately condition created by the Americans to access the, what we call, rare Earth materials. I understand what's going on, but majority of these fires, natural fires, we cannot do, it's part of the process of creation. These new fires, we see a lot. They even started in Africa, in part of Africa, is to access minerals. It's the easiest way to do it, than bring a... cleaning a forest. And there's not much you can do. But you can protect yourself with it. And natural forest is part of our process. You look at the forest, the fires, you look at the hurricanes, if you look at the snows, and the heaviest snows, and what we get in two, three different parts of the world, without those snows washing the iron into the oceans, that lays the first ?? planks (plankton) and the rest of it, there will be no life.

We need these processes. But when it's overdone, it's a different thing, but you can protect yourself with it. (1:28)

Q: Thank you Mr. Keshe.

K- You're welcome, thank you very much.

This is part of the work of the Keshe Foundation, as it goes through our research centers, and in what we call, Space Center development, it's becoming a beautiful center to work in. Is the development of what we call, a material production, my target is, hopefully by early next year, or sometime next year, to deliver machines, size of a microwave, that you at home, you want to, whatever you need to do. If you have a, like a 3D printer, you don't need to go and find material, you set your machine, it produces the material you want, and you make what you need with it. It's because we've done it, it's just commercializing it. And this brings a lot of pressure out of the Africans. Or governments go to Africa to mine and deplete nations and play politics with it. But on the other hand, we already covered by the Africans, by the release of the Coin. That they don't have to worry about it, they can... everybody can play the Game.

Our target is, hopefully, if our team delivers the Apps, we deliver the Coins. We do not respect no government, we do not respect no economical sanctions, or restrictions, because it's yours, and we make it available immediately. Then we have to find a way for mass release, that you can through, working through the, what we call, Enlightenment Games, you can get access to the Coins. And yesterday and today, I've been working on the system, that how... to change the poverty very rapidly. (1:30) But, at the same time how do we play the right way, that is correct.

And, let's say you're three years old, we bring the Coins up today, and by any dimension you miss the first three years. Shall we pay you for the three years? So the... your parents, or parents of the child, will receive 30 Coins. And then, if you live in poverty, that brings a change. If you are in your, your 70 and the retirement point, they call the 65, you lived a harsh life for past 5 years to 70. Can we release 200 Coins, you, that it changes your life? To us, it's just a Coin, it's a freedom of delivery. And, we have enough that we can do this, but we can create the views of it. And this is the time when the Universal Council and Earth Council comes to make a decision, how we do this. How we change that we take the poverty out. The rich people don't care about 10,000, 20,000. But the people who are on the poverty line, it changes life for them, it's a life changer. And it's delivered as a Coin. You can do it anywhere.

And very soon, if our team will manage to be able to complete it within, hopefully, very short time, we connect the Keshe Foundation Store into the Game. You know what we call, that we can directly, you can directly buy our products through the Coins of the Keshe Foundation, (1:32) in what we can supply in that dimension. So, you have the Keshe Foundation Store, but you can access through our system through the, what you call, the Keshe Coin. And we start now a very aggressive development in this side that we can deliver and economically, scientifically, we'll be able to deliver step by step. And

we ?? pre-settle (pre-sell) the agricultural products of the Keshe Foundation, pre-season, it means we know what is coming, you can pre-order in advance to block to purchase. Things which is totally under our control. We give you the product range, oh like tea, coffee, herbs, and agricultural products, we can pre-buy the upcoming season. And slowly we structure this way with all the Knowledge Seekers and other products which are coming up. And this we can do through Keshe Coins and delivery of the Keshe Coins as a purchase of the product. We have to complete our App section that is accessible by everyone on this planet and doesn't become exclusivity of people who have computers or what we call, biggest big units.

R: See there's a comment from Eckmar in the chat about the App is already running on our beta server for testing. If no problems are recognized over the weekend, the App will be released next Monday. (1:34)

K- We decide yes, it is going for a test this weekend. It was supposed to be ready by 25th, but our team, which are working very hard in the background, tell us that they are going through a test. We try to release the App on 22nd, next Thursday, when the beginning of the change comes. And we did, we tried to release the Coins that day to number of people around the world, that we can start processing. All it needs is a lot of work to be done, it's a dedicated work with a lot of people in the background who are just making the shop to be ready, the Store to be ready, the last steps of it keeps on coming up to be completed. Connecting the Store to the Game and making able to be, to use the App both for Apple's and Android's and then at the same time to be able to process the system. It all takes, taking time but now gradually everything's becoming more or less complete. There's more are more to be done. But once you release the App, it's not what the Game is for access to the Coin that you can start playing the game and be able to receive your Coins through the game. It's more, in both ways it works. A lot of people you have to sign for the game to be able to access the Coins. And we release the Coins through the App, through the game. This is all getting done, hopefully. I thank the people who know who I'm talking about, for your massive work. And the hard work you've done in the past few weeks, to be able to make this to work.

Q: … Do we have to be in the Enlightenment Game, to access the App, to feed ourselves? (1:36)

K- The App is given that you can access the game. That's how it's set up. You don't need to be in the game to get the App.

R: But you have to be in the game to access the feeding part, I believe. Is that the way?

K- In a way, yes. Gradually, yes. This is all getting done.

R: There's rooms for that in the Enlightenment Game?

K- The process of the system that we can feed you, it'll take about another month or so. The systems are in process to be completed we have to test it and by the month two

months then through the App we can hopefully support you to be able to start step by step the feeding process.

R: And would that be something that works directly without being inside the game at that point?

K- In a way, yes but your App is connected to your game. The App, the way it works, you have to pay. You want an apple, or you want to see how an apple tastes. You go to the App, you purchase an apple, for example, it's one cent. That one cent comes from your Coin in the game, in the structure which is connected to the game. We don't use the game to... we don't use the Coin to push you to play the game. We push the game that you become Man of peace, with it you have the benefit of living peaceful life. That's the difference. We're not taking you to hostage that you have to play the game to get it. But in playing the game you become peaceful enough you understand what you're getting. This is another 2, 3, 4 years of development to, exactly to be what it is, what is the beginning of. (1:38)

But, we have systems in development, in progress, that hopefully will be tested for the same time. In next few days, we have asked from the military, to come in and test our system. And if they support us and they did not, if it's just that we're waiting for system, it's good to be in position, and to see how we detect the fields, how we transfer the fields, and what fields fits into what. And these kind of systems are not in the hand of people, and thanks to many Knowledge Seekers, our Knowledge Seekers in government and in military, will help us to do this. We have the, what you call it, everything is getting set up, and hopefully then we can measure, for example, when you want an App of the... from your App to get an apple, in pressing it, you're requesting for an apple, triggers a system that releases certain energies from our central command center, into the system that you can feel it, you can taste it.

We will show you the new system, what we call, the UBESUS 26, is completed and is still getting more developed. We will release the videos of it, once the testing is completed. And then we market it as UBESUS 26. It's a beautiful product, it's an amazing product. And it's physically made, it's not something as, you know, we research to do it. A number of them is made, they're just going through the phase of completion. And testing, hopefully with the military help us to do it. Then we see the emotion, (1:40) how we transfer water, how we transfer, and then we transfer it into the App, that you can access it.

It's very much like ONN's, we have to deliver so many of it around the world, that they can connect you, you actually, as we call it, like a... if you know what is tokens in Cryptocurrency, you don't have the currency, we create a token that's connected to it, we put that ONN's in, and we'll use our Apps to piggyback on the ONN's, into accessing the, what you call, the fields of the food and everything else. The new UBESUS 26 is getting set up, that when you have it, you can transmute with it, you call it you can fly with it, you can feed yourself with it, you can support yourself emotionally, you can receive your... what you need for your wellness, you can create a field around you, as you travel

in the, in that dimension. It's a beautiful unit, we, once it goes through the test, and as I said, we are receiving a great help from these people, then we should be able to, to release it totally. It's, it's, units are made, it's not something to be made. When we offered the UBESUS originally, we had to wait 2 or 3 years to build it. Now, with the UBESUS 26, it's already made, the numbers are made already, going through the test. If it needs any more adjustment, (1:42) we have recently readjusted everything, because we upgraded it before even complete it. And this is part of the whole structure of the knowledge which is moving so rapidly.

If, what I see (reads Chatr)… something came up, it says, "Some of us saw the App on our phone, when opening the game." "Mine is a table, and I assume we were helping in the..."

R: a Tablet that was Mr. Keshe.

K- … A tablet, yeah. Mine is a tablet. And I assume we were helping in the beta testing. There's some things going on. The testing team are developing it and it's completed. And, what you call, all this is taking time and it's taking a lot of, what you call, development. We literally change, develop things every day. Now we have a number of scientists, who are working in different parts and you bring different parts together and see how you can develop something using what we had before. And it'll be a new change.

In a way as Knowledge Seeker said in Singapore, you get the smell. With the new technology (T) we can, it's not a dream, we have tested, this is reality, we can feed the humanity in a long run, like through satellites, that create a plasma of the energy the Man needs. Instead of having 5,000 satellites with Mr. Musk, who now using it for military use, we use it for a peaceful use, (1:44) that we can create a calmer society, we can give the energies to Man that he needs the ?? plasma, ?? need the... we don't... ?? we pass an apple, we don't need it, we just enjoy its beauty, because it's still an apple, it is on the tree, it is (?? remains) on the tree. As I said, we become citizens of Sicily. In Sicily, when I was there a few years ago, we went through yards, fields, across the island, full of oranges, and nobody was touching them. And I said to the gentleman, "What's going on?" He says, "The cost of the labor is so much that we don't, it's not worth picking it." Now the Man is so full with, with the pleasures, and as he receives that, the apples, the oranges, the lamb in the farm, is a beauty to watch, not to eat. And it's possible to do.

Technology has leaped so much, it is possible. I spent whole yesterday and today, testing it, that 100% I'm sure, it can be done. And it can be done. The wind of food, as you breathe air, you breathe in the energy, which you need for your cell of the body, we don't call it the lamb, we don't call it an apple, it's energy that your body, your Soul can absorb, it's at the Soul level, that then you can feed your physicality. It's not a dream. I have the system running on my table. And it costs less than 10 dollar. (1:46) Once you learn to walk, running has become easy. We have learned how to walk the energy of the Universe.

Any other question?

Q: … Good morning everybody, good morning Rick, good morning Mr. Keshe. I would like, understand better, the function of the two eyes. One is magnetical and one is gravitational. And if you would like, expand a little bit on this.

K- You explain to us, what do you mean, what is magnetical, one is gravitation.

Q: One is, one eye is receiving and...

K- Who says that? Who says that?

Q: You, you Mr. Keshe.

K- Yeah, but how did you understand it? How do you understand it?

Q: How I understand this? My interpretation you mean?

K- Yep.

Q: I don't know. I'm asking you because...

K- No, no, if you... Let me explain to you something very simple. When... Have you seen the shape of your eye? It's like a ball. And the energy or energy which comes into it and leaves it, it arrives into it on its equator level and it leaves it at its equator level. It is North and South, it's like any other magnet. (1:48) Just because it's socketed in your eye, does not mean, doesn't function as a plasma and it has a North and a South. You understand? And North Pole is not releasing magnetic fields, it's receiving magnetic fields too. It's a fallacy that everything comes through the North and it goes through the, sorry, comes through the South and it goes through the North. Opposite fields in direction to keep the rays of the fields moves in from the North as much as it moves from the South, opposite direction. As you have a clockwise rotation, as we call it, in the planetary system, we have an invisible anti-clockwise, which is the energy level. We have the same in magnetic fields. You have the magnetic fields and you have the Eddy Current, which is the opposite direction of the flow of it. This is why you have a space gap.

In the eye of the Man, it works the same, but we adjust it. Our brain has computerized itself, it's processed itself, programmed itself to which dimension it does. One of the biggest problems for Keshe Foundation is doing anything to do with the eye, because it sits too much close to the Soul. You receive fields on the equator, your eye opens up, you receive energy at the... on the equator level of the eye. And if you look at your nervous system, in the back of the eye, leaves at the equator. What crosses the eye, as fields, and what comes from the North-South Pole of the eye, if you call it, in interaction with your physical, you don't see that, (1:50) because that's the emotion, that's the dimension, which interacts with the Soul energy, not the physical energy of the observation. This is how, when you dream, it comes to you to be real. Because, if you look at it, you have the eye, one magnet, spherical magnet, sitting not very far from the Soul, which is another

spherical magnet. Your eyes is closed, you're asleep. So, there is no such fields moving in, to move on the equator line. It comes from North and South, to North dimension of rotation with the STM. And the energy created, released in that, is absorbed by the neural system, and it becomes an image in your life. You see your mother. This is how we convert our energy in our dream, into the reality of the vision.

So, both of our eyes depends how we receive it, and how we send it, in what... in which way, which fields coming from North or South, is much stronger. And how we are connected to the Soul. Just draw the side way, not front way. Draw a side way picture of your eye and your Soul, and see how they interact. And why you see the images in the, in your dream. You share the fields which comes from the Soul, which is in fact in the field strength of the salt of the eye, which converts it into image. (1:52) We don't get something coming to brain and crossing. As I said before, the Soul comes through the same way. This is why we see the light at the end, when we die, we see that flashing light, because that field expands and it crosses the salt of the eye, we call it. The liquid in the eye creates that flash, because there's so much information, it's like a, what we call, when you have an epileptic attack, pulses of it, it's such a big pulse, which as it goes through, it covers the sphere of the eye, that creates a flash, and then you see that flash, and then we know the process has end. The Soul is free.

Q: It's more or less the same phenomenon of the astronauts when they...

K- When they see the flashes in their eyes, yeah? But this time, this the... At that time the flashes, the energy comes from outside and we see it, how we observe it, the... this time comes from inside out.

Q: But Mr. Keshe, in so many ways, there is... there must be one eye stronger than the other one.

K- One eye is the stronger in receiving the fields from South to North and one is a stronger receiving it from North to South. As the position of...

Q: How do I understand this?

K- One day I'll teach you. Because you Knowledge Seekers make a lot of mistakes, because of what I say. And it has to be very clear. In a way, in a way, in a way, we use this property, knowingly, but unknown to our developers, (1:54) in UBESUS 26. We used it in those units which you took as a copy of your Soul, you... the replication units. It's the cornerstone of our work. Because the dimension... I can release you the picture of the UBESUS 26 now, even the video of its promotion. But it's something we would like to keep away for a time being from public, till we do all our tests. And with UBESUS 26 you should be able to do things which Man thought was never possible. We can structure it that what you hold in your hands, gold, silver, anything you wish will appear which then it has no value because you are in the process to do it. It's becoming very advanced. Through your emotion, through your energy of the Soul you can move yourself. It's a

system, it's a technology, it's not a dream. And a number has been produced. Now we have to perfect it and I'm sure we'll develop it more and more in different ways.

I usually release things to you that you can see. But this time with the UBESUS 26 we would like to hold back till we... we have first of all with the UBESUS 26 we have to come to an agreement with number of leading governments. Because it will change a lot of things. (1:56) We have to come to an agreement with structure of how is used and released because it brings new dimensions into work. I know what it can do and how it can be set. And the systems are getting so advanced. The... then you understand how the system, the fields of it, interacts with your Soul and then what your image... you see the image of the apple and then you... because you've seen that energy of apple, it creates the emotion of the pleasure I have to if I could receive it then the system locks to the mother system asking for the energy that it can create. And when the energy comes just doesn't come by its emotion, it comes by its totality of the taste in the energy of the eating and everything else. Then before, as I said, you ate 20% of the food and 80% comes from the environment. Now your Soul triggers that 20% which with it feeds the rest of the body with the 80%. We just change and this is where this planet has let Humanity down, all its creatures down. And it's... it's becoming... it's possible.

Any other question?

Q: … (1:58) You have already told us, that the background sound is different in each location on the Earth's surface. So, does each of the 10,000 Units need to be sized according to that specific background sound, or is that not necessarily the case?

K- No, no, they suit themselves, they suit themselves.

R: Do they have to be a certain distance from each other?

K- Nope. No, no, no, no, no, no.

Q: …. Are headphones necessary?

R: I think that might be in reference to the feeding references. Sorry, did you hear... did you hear that Mr. Keshe?

K- Yes, pardon?

R: Are headphones necessary, Doug had asked.

K- Yes. It's a combination of headphones is needed, but we have to deliver a lot of it. I presume very soon commercial side of the technology, like you know, like people like Sony and the rest will produce these kind of headphones which fits into this App.

Q: … Thank you for all the love you gift us through knowledge. (2:00) Each person in the family registers with the Association, and those who are able to do so participate in

the game. Are the winnings from the game a part of the Keshe Coins that are gifted to each individual?

K- Pardon?

R: Are the winnings from the game, is that part of the Keshe Coins that are gifted to individuals?

K- No, no, no, no, this stays separate.

R: The Cash Coin is the winnings in the game and the Keshe Coins are separate from that, although they're...

K- It's separate, totally separate. The Coins you'll... As they say, it's (Cash) Coin and Keshe Coin. The Coin, the Cash Coin, the Coins you win in the game, it's nothing to do. You can convert it, exchange it, but nothing to do with it. It's an internal game system.

R: AI's going to have a hard time with that Keshe Coin and Cash Coin thing. It already says 'Cash Foundation' quite often. It's quite annoying. But ... it'll, it'll work it out.

Q: … (2:02) Hello Mr. Keshe, can these replicators also convert the produced products back into the Plasma plane to reform waste management?

K- What do you mean?

R: I think that when something gets replicated, or when matter gets made, or manifested on, can that matter be put back into the plasma state, for waste management? Nowadays we put them in the garbage can and they end up in a landfill.

K- Long term I can see that can be done. If you understand the process of plasma dilution, yes, it can be done, it's possible, yes. All you need to do is, these are the developments which has to come over time. At the moment we put, let's say, matters in fire, or we put them in chemicals to dissolve them. Understanding the new structure of the work, we know even the chemical process is part of the magnetic field spectrum. (2:04) So, yes, we can produce systems that opens up the field structure, the way we are doing with Gans's, with Copper, into the Gans of Copper. Field structure, molecular structure, that there is no more hazardous. I could see this can be done, and I developed this technology in early 2010. This is why, the technology is not something to be developed.

It's developed and I developed in... and it was really in 2000 and... 10, 11, whatever, where I was carrying this system in my suitcase to Mexico, for the Gulf of Mexico oil disaster. That we could put this system in the ocean, and the oil was changing to its energy. If you, any of you remember what happened with the BP (British Petroleum) and the oil disaster of the Gulf of Mexico. That's because of, I was carrying this system with me. I spent 11 days in incarceration in the nation of Canada. It can be done. You don't

do... when you have a oil disaster, you deliver a number of these on the ocean, and you just change the compos... you open the oil, oil is a Carbon-Hydrogen bound, other material attached to it. And then you just... the... energize or divert the energy of the Hydrogen and the Carbon in the oil, as part of this Amino Acid structure of it, to another dimension and then there is nothing left. More or less you end up with a bunch of Gold, at the end of it, whoever it is, there you go to the bottom of it, you just collect, (2:06) usually, the minerals which was washed to the basin, that it created the oil. There is no hazards, but then you go back to what is structurally left, and what you can release. It's a technology developed years ago… You don't burn the material, you don't have a waste, you put it in the machine, this machine creates certain dynamic plasma fields which disassociates the energy and dissipates energy in the environment, or converts it to something else.

R: They do have a device in waste management that uses a high amperage spark basically that converts the material to its basic plasma products and you end up with some useful gases, Carbon Monoxide, CO2 and other gases that can be put in a tank basically. And the only waste product is this glassy brick that kind of makes everything solidified and that even radioactive products that way can be at least isolated and dispersed into these useful construction bricks apparently.

K- Yeah, it is, but (in Plasma Science) if you do it magnetically, as a plasma field, you, you, you have a very easy conversion to what you like. (2:08) This is part of the structure that you, you work with the fields, then losing the energy.

R: So that's the difference between the electric fields and the magnetic fields in a way I guess.

K- Yeah. Yeah. But you should be able to deliver. We need... this technology wasn't delivered or developed for the oil leakage. It was oil leakage was that we could test it. Proof of concept in a way. This energy, this system was, is built actually, that when we enter into Space, there are spaces in Space, which are energies, which are dangerous for us. But, the power is so immense, that in a way absorbs us, (so) we have to go through it. Shielding does not work in a way. Or, you come across structures like viruses, which we, we can put them in and dissociate, if you understand the work of the, the way the viruses work. We dissociate their fields, the way we've done in Corona. And it works more mainly on that side, than actually bending it or, creating kind of plasma with the fires or electric current. Electric current is too high, in Plasma, because it converts moving matters. With the Plasma you have to go much lower, to be able to do. Plasma is like water, when you put sugar in it. (2:10) Slow, if you put the H2O and you put the sugar, you see the lower strength of the water dissolves, opens up the physical structure of the sugar. And this is the way Plasma Technology should work. It should be lower that you dissolve with you, it becomes part of you, diluted it.

R: Rather than melting the sugar with fire for example.

K- Yeah. You have to learn to be with less, to live with less. And this is against the grain of the life of the Man. Man always have to have more and be bigger and everything else.

Shall we call it a day, or do we still have a question?

Q: … The human Soul is a gift from the Creator. (2:12) The Soul is a spark of his own being. Why then is it caged within matter? It seems that matter and the Soul are incompatible substances. Could matter be converted into light? Why does this not happen at birth? Why must these dimensions remain separate? Perhaps to protect that which is incorruptible?

K- Can I answer this and then I think we stop? You got to understand when it comes to the energy of the matter, or energy of the Soul, they themselves are categorized, as I mean, different strength. And some of the strength of the Soul drops into the field strength of the matter. And that is how you feed the Soul, feeds the physicality, can move across. And the same is with the STP. Some of the food you eat, so some of the energy to consume from this planet, or whatever in the Universe, is at the energy level, which can fall, can be used, can connect, into the field level of the STM. Then, if you understand this, all the questions you have in this manner, answers itself. And our Soul, in releasing energy, that energy matches the energy of the field of the matter state, which comes through the STP. At the same time, you have to remember, that Soul needs of the lower strength, lower, what we call, Magnetical, but higher order of Gravitational, that it absorbs inside. The tighter you become, the heavier the Gravity becomes. (2:14) So, you cannot, let's say, you eat greens and the field strength of it is very loose, but you eat meat and the field strength is very tight, so you feed this higher strength, in the body of the Man, to build muscles, that gives you energy. It is the opposite in the dimension of the Soul. And if you understand this, you can, you can, you can actually live with it throughout the Universe. You take a higher order in matter state, to take the lower energy of the higher strength in the Soul level. Then the two, that's how the two interact. One tries to balance the other one and they feed each other.

Let us call it a day. Thank you very much for being here. And hopefully we'll learn a little bit more next time. But I put one question to you. You know the odor of your physical body. Have you ever known the odor of your Soul? Thank you very much and see you next week.

R: … (2:16) … (2:18) << Message from Universal Council.>> “We invite you and connect all the time and give freely your Soul to elevate all Souls and systems. In particularity, invite all day, every day at 9 p.m. Central European Summer Time. To give from our Souls and invite all humanity to elevate the Soul of every leader. In every nation in every community to work as one Soul, and one direction to achieve peace as One Nation, One Planet, One Race. At the same time, invite all communities, because we need, the Universal Council needs all communities represented like being part of the Universal Council. It's as you showed, it's time for new service, for serving the humanity, for serving the whole base, for serving the community, and go right to the info@keshefoundation.org and say, "Okay, I'd like to be part of the Universal Council

member." "You are 61 and less, more than 61, sorry. You offer to support the Universal Council."

664 KSW – October 15th, 2026
