665th Knowledge Seekers Workshop October 22, 2026

(Transcription, Editing and Proofing done by KF Brazil)
(Auto transcription by Elias)

October 22nd - start last 1000 year cycle - rabbis hid from public; Next week 666 KSW coincidental; Energy side of life - Universal; Mankind isolated from U; Communicate with U Community; STM & P same structure as cell, as energy - miniature copy of STM; Physical cell in toe - M fields connected to STM - same structure as work of U; Planet is cell in organ, bigger entity; Man is copy of galaxies & U; Micro in Macro; U and Unicos are a cell in bigger structure; Analogy pin in toe - feel through emotion - Soul feels M field change; Humans - cell in P of Creator - doing wrong - pin in His toe; Soul of Unicos, Creator - decided to correct before damages whole body; Killing behavior is pin; Sent Prophets & Messengers teach Man not to kill; Brain - copy of structure of galaxies & universes - energy connection between toe & brain same; Earth like Up Quark in atomic structure; Size of U 90 billion light years - cell in body of Creator; Nerve signal from cell in toe to brain, pin - same in Unicos - problem on Earth instantly transmitted by energy; Man's killing behavior - bad smell of infection - Creator correcting - before amputation -sent Messengers - change environment; Jews want massive killing starting October 22nd, bloodiest cycle - rotten smell; Humans endangering life in Unicos & Creator - part of Creation - all connected by M fields; Farsi poem door of UN; Field strength of killing within STM, end life of Creator; Have to live Ethos of Mitra - Think, Speak, Act Good; Not bring shame or change to structure of STC; Our conduct creates fields that affects STC; Only way to cure Man - teach Knowledge; Example plants not kill - Man ignored; Feed through Enlightenment Game - change behavior & RNA; Connect by yourself to energy; Promised Time - condemned faith of Moses, nothing but killing - end; Man back to worshipping stones - wear crucifix around neck - portable statue - Moslems in Mecca - not learn; Transfer energy of fields of love of Creator - to piece of wood; Control in Christianity by Vatican & rest; Come to end when get enlightened; Connect to fields of Souls - to Creator, not need P; Stars are STM from Earth, greenhouse; European countries, want to end KF - lose control; KF teaches no religion in U, live by Ethos; Understand connection to your Soul & Souls - cell in structure of STC; Aliens no nose to smell, feel fields of rotten smell, Man's killing - gone against our Creator; We are seed of cancer - not destroy cancer, teach Knowledge; Understand purpose of life; Game will bring enlightenment & peace, feed, you'll forget killing; Not sect or religion, understand life scientifically & cause of suffering; Try to remedy - become good cell in body of Creator; Businesses, companies, governments register, part of Game - initial funds to start purchasing from others - start commerce with KC; Give KC to businesses & governments - start using immediately; Guarantees to businesses develop T; Free humanity from money lenders; Different payments for different programs; Share KC with others to play Game; Start trading KC; Give back into KF work; Goal make peaceful nations, feed humanity; Receive Energy, phone App; One apple - feed humanity thousands years, not destroy apple; Soul of apple gives energy - system transfers - 70% ready; Will Jews try to takeover KC - nobody can control; KC - end to wars & greed, everyone enjoy beauty, live peacefully; App like online banking; Transition period - old habits for short time; Update on KF work; Release T simultaneously first in China, Europe, US - as One Nation; Release car Unit - end oil and

batteries; UBESUS-26 final testing by Chinese military; Use through Game; Everybody gets access to everything - control international structure; Call to all Chinese universities through China Space University, 300 top scientists join KF; Our labs are international ground - belong to Humanity; Signed agreement with Chinese Military - Space T for defense - meteorites, energy packs, etc - not killing; Remote researchers, controlled; Elon Musk's flying car - ridiculous joke - farting machine; He copies KF work; Fixed Coin to Trump - not for all children; PR gimmicks; Uses Iranians, listen to KF teachings; KF Nano T in batteries; Gimmick gets other scientists to think; KF real flying car - plasma; Change in Israel, bring peace - elections on 27th; US November elections, and other countries; Netanyahu to prison; Universal KC (UKC) build own homes use T; Beijing Material production T - solidify dust into walls - create own structure, objects; Turn Star Formation (SF) 90 degrees get walls - 30 years to develop - works like skin; Crown in KF knowledge; Chinese show first plasma flying car - show T across world - license to build; Endanger oil industry; Video Chinese delivery vans - without driver; Happiness - spectrum of field interactions, confirms achievement - replicated; Wikipedia - hypnosis; Plasma systems - access information in Soul - physical memory bank - tap into RNA records of ancestors; Hypnosis reach different levels P, STP, STM; Expand STM - U memory; Feel KS close to us - not physically present; Hypnosis - Soul knows which level to get information; Put intention - gives Soul destination - KS to transmute; STM transmits information to STP, brain sees; Do not come back to Earth again - reincarnation theory wrong; Part of energy might come back, not same Ego; Death - Soul breaks attachment to previous life - creates new life; Past lives - RNA memories; Each sperm has Soul - ancestry, new Soul makes own new fields; Life not suffering - process to learn; His Soul committed to serve - knows time & conditions will leave Earth - handover to Mitra's Daughter; Like teaching a class; All nations can rise - not alter; King of Belgium with EU - trying to banish KF from Europe; Know Souls we brought with us to make change; Achieve what would have taken millions years; Swiss conference, delayed till materials tested - clean up environment; Cyber attacks around Europe - KF websites come back; AI - crack passwords seconds; When AI robots make the decisions - not Man; Big changes internationally - biggest devil lose his house; US brought so much misery to Mankind; Beginning of peace.

ENGLISH TRANSCRIPTION

(:17)

K- Thank you very much. Good morning good day to you as usual wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute.

Today is a significant day, for those of you who don’t know, and it is being kept hidden from Mankind, from public. Today, the believers in the path of Moses believe it is the day when we enter the, more or less, the last cycle of a thousand, when the Man will change. (:18) All the doors of Heaven will open and the paths will finish. And, it needs for the tribe of Moses, within next seven days, to achieve what it is. And in that process, it's very, very fundamental. And strange enough, a lot of things are happening, start

happening in this week. Starting from today, we expect the last cycle of a thousand years, as part of which is started earlier, to be the position of change. The rabbis and the holy people in the background, who decide the destiny of the, what we call, Jewish religion, they see it as the, as the cycle of the conquering everything, and then they will own the whole lot, and they become. And, on the other side, the others believe that will be the end of the cycle, this, this year, or this week, starting and the rest of it. We are observers, we are watching it.

The 22nd of October is one of those pivotal points of Torah's change, hidden in the background, and those who know it, they foresee this starting from today. Strange we are here, and strange is that we hit it again next week, which is the beginning of the 666, which is the cycle of the beginning of the next cycle. Coincidental, set up some 10-15 years ago, when we start teaching. Nothing has been set up, nobody was aware of it, but coincidentally, the teaching of today, falls on the same day of the change. They believe in manifestation of the return of what they call, the 'Methi' (Messiah) of theirs, (:20) and the rest of the thing they believe in. And we see a lot of changes, we expect a lot of things, in next cycle of a thousand years, to appear. Man matures, and everything else will become milk and honey. But the cornerstone of this is a war, that it has to finish with a war, that they win the war. The same as the Moses did in his time, everything was won by the war. And strange into the whole structure is, they have kept it a secret that only they know that when it goes right they can claim it and when it goes wrong they in a way shut up. And in the way in the back of this falls the beginning of the cycle for Christmas and what we call, the 40 days which is supposed to come to the Christmas and afterwards and we see the pattern. We are sitting as observers, watching, and see how the new thousand years is going to be. Of course, according to the hidden, what we call, structure in the books of the past, which their holy people are looking for ?? war for today to start.

But what's interesting, going back to our teachings, the way it is, the way we are, and what we have started as a teaching of the energetic side of the life of the Man, is that what we see in the cycle of the Man, what we see in the cycle of the life of the Man, what are we? And how we connect, and what are we in the structure of the, what we call the Universe (U)? Which we would like to be connected to, we are isolated, we've been kept in the village of the Earth for, and we're just getting there to start communicating, (:22) even though a lot have been tried to communicate with us, and a lot of things goes behind it.

But if you look at the structure of the Soul of the Man (STM), if you look at the structure of the physicality of the Man, there is no difference. When you look at the structure of a cell, it's more or less as energy is a miniature structure of the Soul. This is why when the egg and the sperm come together, we see the establishment of the Soul. And collectively, everybody accepts to work with one common denominator energy that we are all connected to. This is what we call, the dimension of the Soul and Soul of Physicality (STP). It's not, in a way, physical. You're a cell of a toe, but as a cell, as a physical dimension (D), you're in that spot. But, magnetically, you have a line of connection to the 'boss,' which we call the Soul. And we see this as part of the structure of the work of the Universe.

In a way, us as a planetary system, if you look at it, we are again that single cell, in the structure of, or part of the structure of the cell, in a part of the organ of something else. Scientists are trying to prove that the energetic structure of the, what we call, Man is a copy of the galaxies and universes, which we always said for years. Now they start looking at it, trying to confirm if it is. Scientists around the world have started mathematically now using AI to confirm we are Macro and Micro of each other. (:24) Then it comes, if that this Universe which we live is a cell in the structure of the bigger body, how does that body work? What is it? What we call in our teachings as part of the Unicos. Is the Unicos, the self is a structure of a bigger structure, is another cell in another structure.

In a way when we get a pin going in our toe, touching the cell, we feel it through the emotion of the line, the changes that our physicality understands there is something wrong there, a pin has gone in and our Soul feels the change in this magnetic (M) field. Now what happened to us when we do so much wrong? We are that nail in the cell of the structure of the Soul, what we call physicality (P) of the Creator. We are just the whole structure of that little thing that now the boss, the Soul of the Unicos, as we call it, decides that this little pin has to be sorted. Behavior of the Man to kill is that pin in the back of the foot of the ?? cell of the toe of the Creator. And is He taking aspirin of the Universe? Or does He do something to remedy it and put an ointment on it? We call it the Prophets, we call it the Messengers. Get it sorted. Teach them not to hurt themselves, not to kill.

Then it comes what and how do we connect to this structure. If our brain, structure of our brain is a copy of the structure of the galaxies and the Universes that is replicated, (:26) ?? now scientists, scientifically proven, that it's the same and that we have the same structure as we have in energy connection with the cell of our toe, with what we have in our brain, then we understand when he says, I made Man in the image of Myself. Because we are part of it. We are that cell in the structure of, or fields of the cells, what we call Up Quarks or Down Quarks in the atomic structure, which that atom, that proton or electron, is part of the cell of the structure of the Universe, which we know, which is a cell in the body of the Creator.

In a way, then this cell, this what we call, our Universe, what we call, is it 90 billion years light diameter is one cell in the structure of the creator of the cell itself. Which means, as we said, our cell, when a pin goes into it, physically sends a message to the nerve that I have a pin in, and then, energy-wise, connects to the Soul, before actually the information reaches the physical Soul of the Man. Then, we are connected we understand there is something wrong with that cell, then we understand through the same connection as we are that energy field, up quarks, one of the up quarks in the cell of the Unicos in the Universe of the Man, then we see again we are connected to the Creator through the fields of the Creation, (:28) even though our huge Universe to us is one cell in the body of the Creator.

This brings a lot of understanding to us. This brings that we, when we get infection, we have the smell of the infection. You can imagine what smell the behavior of Man has created in that little cell of the body of the Creator, that He wants it to be corrected. Because it can damage the rest of the body, and maybe it needs the amputation of the leg of the Creator, which is the whole Universe of us, is a cell of it. Before He amputates, He puts the ointment on it. He tries to change the environment of it, that it just changes the Man from the killing.

And the interesting thing is, as I said at the beginning, the Jews expect that the massive killing of, starting from 22nd of August, to be the ointment on the cell of the life of the Man, in the last thousand years cycle of the, what we call, the bloodiest cycle in the history of the Man. They bleed, and then we see how we are connected. Can you imagine what smell of rot the behavior of the Humanity has created in that Quarks, to the nose, the sense of the smell of the Creator, that He has sent Messengers and those to put it right, that the rot does not damage the rest of the body and dies from gangrene and infection. (:30)

We are that cell, an energy in the structure, that we are endangering the rest of the life of the Unicos, the Creator. That, if we understand this, and if we follow the procedure of the Creation, we understand we are all connected. As the most beautiful writing on the entrance door of the United Nations says, << Farsi language >> which means, Humanity is all connected to each other, there's one Quark. Maybe we can extend this, that be the changing of the Universal Life, is part of and is all connected and is One. Extending it from Humanity to the dimension (D) of the Creator. And then we understand how closely, how deeply, the Creator cares about even that part, in the center of the cell of his... part of his life, that he tries to correct it, not only for the Man, but for the rest of the Unicos. We don't want the rot to spread.

Then you understand how much the teaching is gone from one to another, to bring the Knowledge Seekers (KS) to that point, to understand, (that) your condition, your behavior, what you do, if it doesn't go in line that (?? with how) everybody else takes energy, while you kill to get energy, then it can infest the whole structure of the Universe, as everything in the Universe is connected magnetically, and not physically. And that field strength of the killing, within the structure of STM. (:32) If it takes hold, can end disaster for a condition of the life of the Creator. If we understand this, we come one step closer to understand how crucial our life is, and how crucial we have to stick to the Ethos of Mitra, the beloved teaching of the three cycles. When you don't think wrong, you don't do wrong, and you do not bring shame, you do not bring change to the structure of the Soul of the Creator (STC), as your conduct creates a fields which affects the Soul of the Creator. In a way, as you feel that ?? pin, He feels the pain the Humanity has caused Him, that He wants to change. Does not matter, we are just one of the Quarks in one planet, in a Solar System (SS) of a Galaxy System, which the span of the Universe, according to the knowledgeable, is 90 billion light years diameter.

Don't forget, a lot of new knowledge does not fit, because up to a few years ago, when we announced there's a limitation, there's no limitation. Man has put 4 billion years, now

we're talking 90 billion years, light. Do not forget, that this year, the system which we sent out 50 years ago, which crossed the span of the Solar System, if you put a light on it, it'll be one light year. If you understand what that means. This satellite we sent out in mid 90's, that has now crossed, the, or crossing the boundaries of our system, Solar System. (:34) This year, calculation tells us, it would take the light to travel one day to get to where it's getting, or where it's got to. Presumably, in the matter state of the Creation. Then they say the size of the Universe is 90 billion of it. Where, where did the 4 billion come, but now we are 90 billion. And then, if all that 90 billion light years with trillions of galaxies and trillions of stars and systems inside the galaxies and all the rogue ones which are outside it is only one cell in the structure of the cell of the physicality of the Creator. Imagine how many cells you have within your body and that Universe we call it, is just one cell in the body of the Man. And imagine how many other cells are there to create the structure of the physicality of the Creator.

We are that rotten apple in the cart. And unfortunately there are no fertilizers and there are no what we call, pesticides and herbicides to grow it and to teach it and to kill and destroy the structure of the Man's habit of killing. If you look, the Creator has put an example for us and we ignored it because it's easier to do. Do the ?? plants kill? Do the plants destroy? They take what is free to them as an energy of the Universe. (:36) And Man looks at them and he even consumes them, to deny the reason he can learn to take energy from them without killing you.

In the upcoming time when we launch what we call, the Enlightenment Game, we enlighten you how to use the energy of the Universe and as usual we have to use a 'stick and carrot,' that by playing a game you gradually learn how to be and hopefully in the process of you playing the game and being connected to it, you pick up the energy for living that you gradually forget being entangled in a game of enlightenment, to kill. Because we feed you through the game. We provide systems that allows you to receive what this planet short fall, to give you that you forget you have to destroy, but you learn that you work within the structure of one system.

This will bring a lot of changes for humanity, but Man gradually through one game, one structure, one knowledge, will gradually be walking through. It's in a way we give you the carrots and as you become, you change your habit. And if we can last to teach the humanity over a certain time, then the whole structure of the RNA of the Man changes in receiving energy from the Universe, and Man will put an end to the killing, the wars and even making it what I call, the end of the days which start today, by those who believe in the condemned faith of Moses, in nothing but killing, will come to an end. And if you look at it, what came after it, (:38) has nothing changed but Man worshipping a stone, the Man will worship the fire, which Man took a statue. Now the Christianity carries a cross the same thing now portable in the pocket. You don't need to go to Mecca to worship a stone, the 'Mecca' is hung on your neck with the sign of a cross.

So humanity has not gone any further, but this time the energy of the field of the love of the Creator again is transferred to a piece of bone, metal, wood or whatever that cross is made. We have just made what we call, the house of worship of whatever we call it, into

a portable worshipping unit. And then what happened, those who control this, what we call, new statue, new portable worshipping system, this time because it touches you, they control you and now you call it the Christianity and the Vatican and the rest of it. All they've done for you, they made the Mecca portable on your chest, on your finger and everywhere else, printing it on your skin. Nothing has changed from the time of thousands of years ago, when Man worshipped stones, the fire and the rest. Now they have found the portable unit, they call it the cross. This is what you will see, it'll come to an end, because Man will be enlightened, that ?? only connects through the field of his Souls to the Creator, he does not need any dimension of physicality. You cannot put a cross on your Soul, and we have not seen any Planetary System, any Stars, any Galaxies, carrying a cross on them. (:40) Do not forget that some of these stars come from the STM's who were here, and were in what we call, the 'Green House' of the Earth to grow.

\Now you understand, as we enter another phase of teaching, to understand our connection with our Creator, as we are part of it, will bring a lot of changes and a lot of pressure from those who lose, and about to lose the control, especially from the European countries, on the Keshe Foundation. As we open the book, and we open the end of what they said, "Europe is a Christian Continent, and by any cost, we milk it the way we've done." And teaching that no religion exists in the Universe, but the Ethos of the Universe, which you think good, you act good. And... consequently you live a good life, cannot be done, because some cannot be benefited by it.

Understand your connection to your Soul, and connection of your Soul to the other Souls we came from this planet, and those which you are, that cell in the structure of the Soul of the Creator. And, as we taught, the Aliens have no nose to smell, but they feel the fields of the rotten smell. And we are with the fields have told our Creator within our structure, we have brought Him to core, and we kill and we destroy what He built to be a peaceful, pleasurable part of this cycle of the life within the structure. (:42) We become the seed of the cancer and through the knowledge of His existence, does not destroy it to get rid of, but remedies to learn of ,and change for that reason.

I hope you understand the purpose of the life. And through what we call, the Game, enlightenment and peace, we gradually feed you what this planet forgot to add, to do, that Man forgets about the killing. As we are not a sect, we are not a religion, scientifically we understand where we suffer, where our shortfall is, and we try to remedy that shortfall, that allows us to become a member of Universal Community, and with it, become a what we call, a good cell, and don't be a pain in a foot, in the cell of the Creator, that He can enjoy his walk in the dimension of His creation. You go for a break and we come back, but I have opened the door of knowledge, that soon you'll understand how big this knowledge will be, as you enter the cycle of the Knowledge of the Creation and the Creator. Rick, take us for a break and we come back, and I hope you understood, I touch your Soul to understand, not your physicality to suffer. Rick, take us for a break and we come back. (:44)

>> BREAK >> 665 KSW October 22nd … (:54).

K- I'm sorry about that, we're trying to go to another, what you call, network, but it isn't... I was talking, but you couldn't hear me. ... and back on another network, sorry about that. Thank you very much.

There are a couple of points, which is important, of all part of the structure of the Game, as you've seen it, is there. We ask you to register your companies, your businesses, with the, what you call, with the Game. The reason for this is that, the same will do, we ask the government to register. That we can automatically give you the initial funds, that you can purchase from the others, that you don't wait till somebody comes to you, that it starts a cycle. As we said, we give so many Coins (Keshe Coin - KC)to the businesses who register with us, when the Coins are released. It's the same, we release Coins to the governments, so they can use it, immediately, that the whole cycle starts, we don't sit for somebody to start it up. As the people receive their Coin on a monthly basis, the companies have what we call, a backup of resources to purchase, through those who bring the system and technology (T) across.

As the... you will see, we are hoping, we're still going through the test of the, what we call, the shops in the Keshe Foundation, (:56) which will connect to the Coin, and the game, will appear the same way. You can structure, buy. We can give assurances and guarantees to some of the businesses, people who buy, that the finances we guarantee through the development. We do that with our scientists, we do that with our products. And we, as we are not the controller but the provider, we try to do the same with you as companies. If you register your company with us, when it's a bona-fide business, and it's registered with the government, we automatically transfer the Coins on the monthly... on the registration, and the people, on a monthly basis. You don't have to wait when it comes, it will come. We deposit what is needed for that month, into the Keshe Foundation Coin, and automatically will be divided, will be sent to the accounts, that... It's all takes time to do, but it takes a lot of pressure off of us. And we know how much Coin is allocated to the government, how much Coin to be allocated to the, what we call, individuals and companies, and how much is there for what we call, commercial use, for purchases, and whatever you need to do, that you don't go back in the hand of what we call, the 'sharks.'

But, it's hopefully, you know, it's not going to be done so overnight. It's taken months and years to develop this. And now, what we call, the team of the Keshe Foundation, hopefully, we'll release the App, and then we'll release the Coins directly, irrespective of the, what you earned in the Game. What you earn in the, what we call, the game, is a bonus for you. Those of you who receive the, what we call, the ONN Units, that is separate payment. Everything is separated. (:58) Some of you will receive maybe 5 or 10 Coins a month, through the process of different connections you have, and you have made with us. We are not jealous, we hope that you can share it with others, and you allow the others to come in. Don't stick that, "I have two and a half Coin." See, who you can give, sign for the game, I give you half a Coin, you have half a Coin, is 500, what we call it, Euro, every month. And then they can start trading with each other. And this is what the Ethos have been. We give, and by giving, you give back, into this Foundation work of the Keshe Foundation. This is the beauty of the work.

And this is how we see everything. And this is how interesting, the game of life, to make a peaceful nation and then we start feeding you through the same system. Through the App, you spend one cent, you receive what I call, let's say, as I always say, an apple. Energy of it, the emotion of it, the pleasure of it, and then you don't need to destroy. One apple can feed the humanity for thousands of years, without actually destroying the apple. And it's the same, we use the energy of it, we don't destroy the apple. We learn the essence of it. We go to the Soul of it. Then we transfer that to you lot as an energy. And this is how the system is going to work. And we are about 60-70% ready to commit ourselves to it.

And hopefully, in the new cycle of 1,000 years, it's going to be the land of honey and milk. We give you both the honey and the milk. I wonder how many Jews will apply to receive this, because this is something good, ?? they';; ?? milk the whole nations with this. (1:00) Now they lose control of. (?? So they) might get control of (this KC). And there's no way, nobody can control this, because it's a honey and a milk, which has no end. And it'll go for decades and centuries.

In a way with this, as I said, Keshe Coin (KC), we have brought an end to the game of wars, to the game of greed, and to the beauty that everybody can have a beautiful, peaceful time. Enjoy it, I hope our team can deliver what they're trying to do, and that we can open the door of the Coins, to all of you. This is what we are waiting for, that you can receive it on your mobile, the way you go on, what you call, WeChat, the way you go to your banking system, this time there is no control who spends, nobody decides, you don't have a good credit, we don't give you. We allow you, to play the game of life with yourself, in a correct way. And as it comes at the beginning, it'll be what I call, the 'looting structure,' when people with a 'jackpot,' they do whatever they like, and then they find that it never finishes, they start living a normal life. And this is what we hope to do. At the beginning we hope to see enough people, we see a lot of things, but we learn from it, and we'll correct it, that you all can benefit by it. Enjoy the trip, it's all been set up, and enjoy playing the game of life, and become a peaceful Being. If there are any questions, we try to answer.

Q: … (1:02) Greetings Mr. Keshe, Rick, Universal Council members and Knowledge Seekers. It's good to be with you again and as always, thank you for the teachings. Mr. Keshe, with so many distractions in the world right now, could you share as much as you're able, what is to come in the months ahead, with the App and Coins, you've discussed some of that already. The three papers, UBESUS 26, Feeding without Killing, the changes to the automotive and other industries, and what is happening in the background. (You've covered several of those items actually, but is there anything else, you'd like to add about what is to come in the months ahead?)

K- You got to understand the Research Center is literally getting completed, as we speak, this week. We are hoping our factories to be completed by the end of this month, especially our production. Once that goes into operation, the whole thing starts. The Research Space Center is nearly, nearly complete, within another week, two weeks. And some researchers are already working, some research is already getting done. And we expect, as I informed the Chinese military, in a meeting with their, what we call, representative this week, by second week of January, to be able to show some technologies to military. The way we structured it as the companies of the Keshe Foundation, as one company we work under one banner of 'One Nation, One Planet,' (1:04) we are planning to show our technologies in a very different way.

If things goes right, and as usually nothing goes right with the Keshe Foundation because there are too many things moving at the same time. When we show a technology (T), sometime in January, we'll show at 9 o'clock Chinese time. At 3 o'clock in the afternoon Chinese time, which is 9 o'clock European time, we'll show this to the European nations. At the following 6 hours later, which is the American time, East Coast, the same technology around about the same time will be shown in our structure in Arizona. Which means we release the technology simultaneously out of China, Europe and America at the same time. Because we work as One Nation, One Planet. It's just that who's awake we show is not the time when people, if you remember stay awake till one two o'clock in the morning when the Apple shops open to get the first Apple, everybody will get the knowledge, the whole nations, the whole structure.

And one of the first things we plan to do is to do with automotive, the end of the, what we call, petrol and battery business. If we get successful and completed, this will be one of the products which will be released. And then, step by step, we plan to release one to two technologies a month. Fundamental changes and it is beautiful to see what is to come. What if you remember we called UBESUS, now the new UBESUS will be unveiled simultaneously across the world. We are going through final steps of the first phase of what we call, UBESUS-26, test will be done. (1:06) We have asked Chinese military to test it for us and once they complete the test, confirm the connections and everything else, in next two or three weeks we try, we endeavor to release these Units simultaneously to all the nations. You remember the way we did with the patents.

It's a beautiful structure, it's a beautiful design, but it's one of the first ones. The UBESUS-26 is a collection of UBESUS material and UBESUS, what we call, for the health application and the Wellness. In a way, in the system, you receive energy in the

system, you can apply in the system, you can create materials in the system, you can change materials within your body. You've got a cancer, you have a pain, you can change. And all be controlled through the central system, and we try to connect it, that it works through the same as the game. You go through the game, and you use it as it is. But most of the Chinese, what we call, military, can confirm and do all the testing, step by step in the coming weeks. It's not that we're going to build the Units, the Units has been built, as are in position. We are waiting for what we call, part of the final phase, that we have already made agreements, arrangements with the Chinese military to come in and test.

All our products, all our research, all our development from now on will be carried out to China, in the Space Research Center. And that this way everybody gets everything, because as you've seen with AI, as you've seen a lot of other things with Chinese, everything goes on a free condition, not huge changes, not huge charges. (1:08) And this way we control even international structure. We play this game from now on. So I wish I could show you the actual UBESUS-26 is the most amazing thing. When you look at it, I... we have positioned them now in two continents, that if one... something happens, we have access to the full knowledge to do. And I hope our friends and Knowledge Seekers in Chinese military will test it to its best, and show us where is the weaknesses, what we need to improve. Then hopefully, within a month or two, once the initial improvements or testing confirms, completes, by the Chinese military, we will show. It's not something to be done, we, it's already done. A number of Units been built, still even built, we have to improve something on it. And, even it's not a position in two continents, and once, as I said, complete, then this allows us to do a lot of other things.

Our Space Platform Research Center, which is about 400 square meter, is getting fully equipped, and our materials lab, which is again, over a 100 square meter, is getting completed in next 4 or 5 weeks, and then, as we have put, as of Wednesday of this week, a call has gone to all the universities in China, through our connections in China Space University, for 300 top scientists in China to join the Keshe Foundation, in research and development. This is done through the support we have in the Chinese Space University, and all the, what we call, the request, connections and everything, has put out in the Space Universities of China, to join the development of the new technology, with the support of our supporters within the University. (1:10)

And, hopefully, we'll have a number of top scientists, graduates, what we call, in the PhD level, to start work in the Space Center. And this is a collaboration with the Keshe Foundation and China Space University, to move into the next phase. Our labs is an International ground, does not belong to no nation, but belongs to the Humanity. And we hope to see many scientists from all over the world, our Iranian scientists have already taken position in the labs, are doing their work. We have our German scientists, we have our people from other nationalities, which are gradually taking their position. And we started the Space Research Center, now enters in Space, collaboration with universities, and as I said, are advertising, and what we call, request, call upon the Chinese scientists and Space University to join, went out in the universities in a special way last Wednesday. Which now allows us to move into what we have part, we have signed with

the Chinese military, to develop the space technology for defense of Space from what we call, like meteorites, energy packs and the rest of it, and not military, as you call, defense of killing or whatever.

And this is part of the development. We are hoping to see many, many top Chinese scientists in Space communication, agriculture, from the Space universities, to join us and we'll see what the next step will be. And this is the open ground for scientists. And hopefully, in the next few months, we'll see more and more and we can expand. But on the other hand, what we call, the knowledge of science is getting shared very, very openly with a lot of people. (1:12) And we have learned that some of our researchers are done remote, controlled by our specialist scientists, away from actually where the test is done by their supervisor. And this is going now in a couple of cases. We are monitoring, expanding our position in that process. So, we have entered through the International Space Technology Development, and as we have support of the many scientists in Chinese Space University, we will see rapid development in next three to six months in the Space Development of the Keshe Foundation Space Center.

Any other question?

R: Do you think Elon Musk's flying car is putting a bit of pressure on...

K- Actually, this is the most ridiculous things I've ever seen. As you know, Elon Musk is copying the Keshe Foundation work. Let me tell you something very straight forward. As we are giving the Coins freely to all the children and adults, he has copied it. And if you notice this week, he's announced he's going to give one share to every child, only American, the rest of the world don't exist. Which is an insulting, he tries to get into the structure, so we do. He brought the same structure of, what we call, fixed Coins into the White House, it hasn't worked, because they want to make money, and nobody makes money out of fixed Coins. It was his brainchild that Mr. Trump blubbered out, but that was just something eye-catching. And, as we've seen this week, again Mr. ..

But, you have to understand, the top advisors in the Space Technology, the scientists, the professors, four or five of them are Iranians, and they are listening to this teaching every day. Every teaching has been listened by them, and they copy it, the way they took the, what we call, Nano technology of the Keshe Foundation, (1:14) into the batteries, and we informed them, "We're going to go public." And they withdrew it from a patent, they said, "They're submitting." So, these people close to Musk, some of the top scientists are Iranians with him. And, this week he tried to do... we give one share to every American child, the rest don't exist. But the correct way is to give everything to every child on this planet, every citizen. But again, it's a gimmick he plays.

And, as we saw his flying car is a joke, if you know how he did it. It is not flying, it just flies like a bee, from the height to the bottom. It cannot, in a way, take off, they had to show it this way. The whole car is remotely controlled, there is no citizens in it, they can't put any person in, because the explosion rate is so high. The system has two pressure tanks on it. And the see, the way you saw it, curvature, it goes up. One of them creates

such a huge suction to stick itself to the ground, and when that releases itself, it's like a parachute, the other cylinder, which is gas cylinder, which is placed inside the car, creates a dimension of pressure to come down. It's actually a pres... two pressure tanks flying, and we just now can control the pressure. It didn't fly. It's actually...

R: It's the same as when you blow up a balloon, basically, and let it go, and the air comes rushing out of the balloon. It's really old technology that way.

K- Yeah, but it's American, everything is very big for them. You know, as... As a Russian scientist said, "This wasn't a flying, this was a farting." Actually, that's all it is.

R: It's just a little frog jump, basically, and it uses up all the energy of those tanks.

K- Still, still is an achievement landing it in a shorter space on his legs. (1:16) But they didn't show inside it, there are two huge tanks, the whole space inside a car. There is a pressure tanks which releases air to control. But if you look at it, if you look at the structure, this pressure tanks blowing, which is on the Keshe Foundation in the patent, and the pictures we showed with the car years ago, with the holes on the side of the car. If you find a picture of the flying car of the Keshe Foundation, with the holes on the side, where the... this is the only way you can do, and we are about to change that. You have to make condition, that is in the Plasma Technology. We don't have air in the Space. We have to work with the air we create in the Space, and how we create it. And it was a good laugh, I, I laughed with some of our Russian colleagues. As he called it, "This is not a flying, this is a farting system." It just makes a bigger noise, but has no smell, but we were not close enough to smell it. But it's, it cannot do what it says, but it was a good show. It's always little things like this, it brings changes, other scientists think.

R: It's got people's attention, that's for sure, and now we'll have sort of a rush from other manufacturers to show their example of a flying car, and of course most of them will be based on propellants.

K- But you have to understand... how much battery you need, how much energy you need to put in. It still works on the ?? battery. You have to deliver a system, which does not need outside source, and it can create motion. This has been solved by Keshe Foundation. We are so closely, done it, we are keeping it so close, till when we release it. As I said to the Chinese military representative this week in a meeting, when we show it, we change the automotive industry, and we put a date on it for them. (1:18) They know, when is the possibility that we ask. Up to now, every time we wanted to show something, we had to rent an office. Somebody give us a space to show. Now our Space Center has it's own exhibitions and the environment. We show it in the Space Center, we don't need to ask anyone. You understand? This is the change. We invite world leaders, scientists, to come and see what is developed. It's not going to be shown somewhere outside. This is... this Space Center has brought us this power and this change. And we are very observant in what is going to be.

But ... it's a good step ... but ... as I said, "Americans are very good in glorifying nothing, and it ends up with nothing." And we'll see what the next step is. I always said, even Tesla wasn't American, he was a European, whatever you call it, who was brought in. We haven't seen anything good, except weapon killing, out of this... this... this space of the land. And we'll see what comes up in the next 10 days.

A change in Israel, which is 100%, will bring peace, on the elections on the 27th, the day before we come out on the last .. , on the, what we call, the next teaching of next week. And again, beginning of what we call, November, we see the change in the American structure, where the President loses his powers to do anything what he like to do. Because he won't have the man to do it, and then we see the end of the war in Europe, because Mr. Ukraine, another Jewish, what we call, believing in killing, and making money out of it, won't be in the position he has to come in the election, he won't be elected, (1:20) and most probably, he has hidden his money for his grandchildren, his children, as he will enjoy a long-term prison sentence. And the same with Mr. Netanyahu and the rest of it. He has another five days to do his message. As we've seen, the new people who take over Israel, they say they don't believe Iran is a dangerous nation, and they want to bring peace. They don't want any more wars. And they have a huge majority in the polls, unless they fiddle as usually. And we've seen Mr. Trump having a mid-term majority of last time of plus 6, this is minus 30, which means 7 is definitely that, lower house and upper house will change. And with it, he'll be 'lame duck,' if he doesn't lame him in the prison for he's ducking.

Any other question?

Q: … Thank you Rick and thank you Mr. Keshe. Lots to look forward to, I appreciate that. I'm also curious how the Universal Keshe Coins work for humanity to build their own homes. You have also hinted that building homes with the new technology will cost a fraction of what it cost today. If you have any more information you could share on that as well, that'd be great. Thank you.

K- I think that cycle takes at least six months to a year to fully become operation. Then we have… If you go back into the patent, we're not talking about something different. As I explained last… or in some of the teaching recently, and I was explaining to some of our scientists this week in Research Center. You've seen the production of the material in Beijing. (1:22) It was three days, many of you have seen the outcome, and some of you took a spoon of it home.

If and once we create, as I said before this, we create a fields, that these material falls on the field, then on the table, now you have a structure, and you can create your own structure. And, at the same time, you have to understand, that in... it's in the patent, using this technology, the vertical way of it, the way you create a Spaceship flat with a dome, if you bring the top reactor of the thing closer to the parallel to the base three Star Formation (SF), you get a flat. So, if you turn everything 90 degrees, you can build walls and the floors. This is, I think, let's say, about 6 months to a year from us in the Space Center. So, you use understanding how we drop the material from, in a, what you call it,

in a Intercontinental Hotel in Beijing, in 2025. Now we, instead of letting it to land on the table, it lands on the field. So, now we see the structure. A structure has a physicality. And how we tighten this, this is a very specific knowledge.

It's taken me 30 years to develop this solidification of the energy. So, we can create a physical matter, out of the energy. In a way, it's like your skin. It's a lifetime of my work and this is... I sometimes say, "This is the crown in the knowledge of the Keshe Foundation." That we transfer energy to matter at the position we want. (1:24) And it's in the patents, not something new. Now we show it. When I was sitting with Dirk Laureyseens writing, he says, "Do you know how this will change?" I said, "Yes, you don't need to build a house." And if you go back in some of the teaching, I said, "The skyscrapers, millions of dollars, houses in Tokyo," I think, in the... that teaching, or in New York, worth nothing, because you build your house in the middle of desert, and you come to town, you do your job, from Australia and New York, and go back the same time, which is part of the transmutation, transportation. So, you can build structures, cost nothing. And now, in that position, you build the house for less than a hundred dollars.

As I said to the Chinese military, they want the government officials, the representative which was sitting with us this week, the point came, we want BYD to have the first show of the, the car, which is what we call, actual flying car, with no engine, no battery, using the new technology. I said, "BYD is no higher than Ford in America, and the Rolls Royce in UK. We show it in sequence of 6 hours, and every nation will get it." They insist that BYD should be the first company, to show this technology. I said, "At the moment, yes, we show it, then everybody gets a license." But, you have to understand, your car, once this thing comes out, Keshe Foundation cannot manufacture these things in one go, we want the license, and our license has to be respected. That's why we don't do patent.

So what happens? We give this technology to every car manufacturer, overnight. There's a huge problem, I was told, explained to one of our Knowledge Seekers, this week. (1:26) England, to support electric cars, needs at least nine battery production factories, in England, as I said before, each one costs about nine billion. They haven't even managed to first build the first one, secondly, they don't have the material to make it. You can imagine how many battery companies you need to build this. Now you don't need a battery, because the energy and the structure is done together.

In this way, you can buy a package, we reckon, about a thousand Euro. Because you have to put control system, everything else. So, you take your engine out, you've seen the car we were showing exactly, 14 years or 15 years ago, 2011, 26th of November 2011. And, you take all your engine out, your battery out, your fuel tank out. Actually, as I said, we want to show it first on a Persian carpet, that it flies, because everyone thinks, when you can see a Persian carpet flies, then it's the end of the knowledge we can do. And, a cardboard box can be your car. As we see now in the cities of China, we see a lot of cars, without drivers, delivery vans, small delivery vans, they travel everywhere around China, I was in our Space City, and they're everywhere. And it was funny thing, because when I was there this week, in front of us there was a car accident, and one of these was stuck

behind it, he didn't know how to react, he couldn't understand that he has to reverse, and pass the accident, he was stuck there, and it was a laughing thing.

But you see a square box, moving on the street, I don't know if you, some of you have seen the pictures of it, but, I send it to Knowledge Seekers to see, because it's amazing. (1:28) Let me check and see, what is the future of this. Now, with this technology, you have a different outcome, because, let me see if I can find a picture, to show you. I took a video of it, let me see if I can find a video of it. And you see, this is what is, you people in Europe, thinks a dream. Here, we see it on the street every day. And it's... yeah, there it is. I sent you a video, and this is what is happening in China today. I'm sure most of you have seen it. But now you don't even need this engine. With the new technology... Where are you Rick? Rick? I'm sending you a video, put it on, it's amazing. I took this video in the car. And we see that we don't even need the wheels with this new technology. Have you received it?

R: It's coming in on the hotline.

K- Yeah. This is the cars we see now, it's very common in cities in China. Even taxis come the same way, with no driver, we're talking to our people, past couple of days, and say, "When they get into it, it gets... getting used to." So, when you have this, now you can add no battery, no engine, then you can see the cost of the cars will come to zero. But this endangers the oil industry, where the nations control nations. And now we got into the system... Have you received it? Hello? (1:30)

R: Yes, I think I'm sharing it, there we go, sharing it now.

K- Can you play it? These are vehicles, we see all over Chinese cities. It's just a square box with no driver. Thank you very much. So, what you see. In the West you dream of these things, here it is a reality. And when we introduce these new cars, the only thing we do, where the wheels are, we replace it, the battery and the engine for small box, the size of a tissue box more or less, and the system can operate. You've got to realize it, we are not in the process to push the car along. We lift the car, just about 1milimeter and no more, off the ground. And then it is a feather, you blow it. We need no battery, you don't need no charging, we don't need no fuel, and this changes pressure on the resources. This is the future in the West you dream about, it's a reality in China. And we add to this reality further more next year. (1:32) Then you, as long as you have a car, you change it in a specific combination and the control, then you are in charge of it. The most important part with this is that we have to change, because we use Plasma, into emotion and thinking, then actually controlled by, what I call, the electronic system. It got nice eyes, huh?

Any other question?

Q: That's fascinating. Thank you so much for sharing Mr. Keshe.

K- You're welcome.

Q: … Good morning, Mr. Keshe and Rick. I have the following question. What is happiness? How does trauma affect a person's ability to feel happiness and what can they do about it. Thank you very much for your time.

K- Happiness has a spectrum of interaction of the fields which confirms achievement. This is the way we look at it. And this can be replicated. It's well known, it can be done and in a way you become happy when you take drugs. Now we can create emotion of the happiness without taking drugs, because it has a specific plasmatic structure, not the physical frequency structure. And it can be replicated. (1:34) And it's a sense of achievement, sense of pleasure, you achieve to eat a fruit which gave you pleasure, you achieve to see your mother which gives you pleasure, it's a sense of achievement and each one has a value. And it can be replicated. The way we tested many of you, changing addiction, that addiction used to give you a happiness or a joy or an achievement, repetitive, what I call, now it can be replicated through Plasma, which is emotional and not physical. It can be done and we know, we know the structure of it, how to do it. It's just delivering it through the Apps, which is getting developed.

Any other question?

Q: … Good morning Mr. Keshe, how are you today?

K- Good enough to be here.

Q: Mr. Keshe, we call, hypnosis, but I would like to understand what Plasma have to say about hypnosis, how you explain hypnosis, because we see very strange things, but till now we don't have a I think, the right key to read this phenomenon, and it would be nice.

K- What do you call hypnosis? What is hypnosis to you? (1:36)

Q: Interacting with other people in a, in a certain way. And... but I don't understand, the level of this interaction, what's going on? So...

K- Rick, can you bring up what it says here, of the, in the literature?
R: Is for the word hypnosis?
K- Yep.
R: Okay.

K- Sorry, you're losing your eyes. Have you noticed something on this picture with the eyes?

Q: It's angry.

K- No, it's Chinese. Chinese, their eyes stands that way. They connect, they can relate to it. In Europe you have two straight eyes, Chinese eyes focus to the center, and they made

the car, then they can connect with, it's not something from outside. It's a Chinese look, I call it.

Q: You mentioned Mr. Keshe, long time ago, Chinese have a Yin and Yang, because they have the eye ball so close, and then they don't understand, each time, what they standing, what way, what they looking for.

K- Well, it's something we talked about very in depth. Read for us please.

R: Okay, let me see here. This is the Wikipedia definitions. (1:38) So, hypnosis... Hypnosis is a Human condition, involving focused attention, the Selective Attention, Selective Inattention hypothesis, SASI, reduced peripheral awareness, and an enhanced capacity to respond to suggestion. There are competing theories explaining Hypnosis and related phenomena. Altered state theories see hypnosis as an altered state of mind or trance, marked by a level of awareness different from the ordinary state of consciousness. In contrast, non-state theories see hypnosis as variously, a type of placebo effect, a redefinition of an interaction with a therapist, or a form of imaginative role enactment. During hypnosis, a person is said to have heightened focused and concentration, and an increased response to suggestions. Hypnosis usually begins with a hypnotic induction, involving a series of preliminary instructions and suggestions. The use of hypnosis for therapeutic purposes is referred to as hypnotherapy, while its use as a form of entertainment for an audience is known as stage hypnosis, a form of mentalism. The use of hypnosis as a form of therapy to retrieve and integrate early trauma is controversial within the scientific mainstream. Research indicates that hypnotizing an individual may aid the formation of false memories. (1:40) Medical hypnosis is often considered pseudoscience or quackery. It goes on where the word is derived from and whatnot and don't do you want me to go further?

K- No, no, that's good enough. What we see as, through our system, is delivering a system that your thoughts can connect itself to. And, it's part of the freedom of your, what we call, information to your Soul, and what is set in the physical dimension memory bank, that it can connect to. It is nothing to do with the... But the problem... ?? in a way, through the hypnosis, is that, if you strengthen it in the STP level, you'll see physical outcome. If you manage to connect it to the energy of the Soul, or what we call, internal energy, then has no limit, you can cross the time, because the time is ?? manly. So you can tap into the, what I call, recording of could be your great-great-great-great-great-grandfather. What he experienced, what he said.

I was talking to a child very recently. The claim was that I remember every second of my life. I'm very precise, we can. So, everything we see is recorded. Does not matter we don't remember. It sits in the information bank. It's like a solid state memory. And when we use hypnosis, (1:42) or we call it, hypnosis, we use part of this hard disk. Depends If we use matter state hypnosis, then you can do funny things. If you use the energy, which you go back to the STP, and you go deeper, the higher order strength, you tap into the memory of the Soul, which is, is vast, because all your ancestors, even going back how the Man came to live on Earth is all banked in there, and you can tap into it.

But a lot of it we are not ready to understand because I had a lot of discussion about this hypnosis with Dirk Lauressens, because he claimed in and he's done in he did in a few occasions in universities in Belgium, hypnotizing group of people together, 10-20 people. And he was trying to explain how he does it, and when I explained exactly how you do it, he said, "I didn't even know how I connect." But he had, we looked into it, I spent a lot of time explaining how he does and how people can hypnotize, and what we do, and what level goes to where. So, you can connect through, is in a way, a Soul or STP to another Soul, and in a way, you don't control it, but you expand the fields in the dimension, and that dimension goes back on its, what we call, what's on its hard disk. And this is what he tells us, more or less, do. If you tap on the physical energy level, you see the physical results. (1:44) If you can go through the Soul expansion, you can go into the back memories of the, what we call, the RNA and bring up a lot of information. You can bring up a lot of information.

Q: … This is what, what you did with Naomi. You connect with her.

K- We connect to who we want. There is no limitation. I connect, I feel, with many, many Knowledge Seekers which are close to me. I don't need to be present. With the number of Knowledge Seekers we connect direct. I know, I feel their emotion, I feel their whatever, but I don't need to be there. You connect according to the emotion of the time.

Any other question?

Q: … Good morning Mr. Keshe, good morning Rick...
K- You're early, you sound very sleepy.
Q: It's early, I think...
K- Five o'clock in the morning.

Q: 3:47. Mr. Keshe, when we talk about hypnosis, you know, because, um, I was many years ago, uh, I went to France and I learned the hypnosis from this woman. (1:46) She passed away, Dolores Cannon. And then, um, the way she, she was doing it when she, she was doing it for many years, she would get to the Soul level. And then the Soul level, when the Soul came to, it would come as a third person and the voice changed. And then whatever condition that person had, it would be resolved, because the Soul could not refuse not to correct the condition. Even a person had, they had the surgery, they had the screws and metals in the knee or the hip. And then once everything is corrected, they had to go get those out. And then the funny thing is, I did only a couple of them. And the first one I did, it was on my own assistant. I had a young assistant who wanted to take off for a couple of weeks because she wanted to get pregnant. She had hyperthyroidism and she wanted to get pregnant so she went to resolve it. Then when they opened it up, when she called me, she said, "Oh, they diagnosed her with thyroid cancer." And that was, I was just, it was a month that I just came back and I took the hypnosis and I told her, I said, "Look, this is what I know. Do you want to try this method because you have nothing to lose. (1:48) And then she said yes because I mean I have no experience. I had I had to actually read from my notes and what I was doing and I had a small room in a, with a

massage bed and I took it in that room. And it was very funny to me because I still can remember my mind very vividly. As I was doing it. She was also very, she wasn't A type A person, she was very serene and quiet girl, very nice.

K- What are you trying to tell us?

Q: So what happened in that room, I just don't know what happened, because what happened as I was, because when you do hypnosis, you take them to the past, you tell them to go where it's necessary to go. But what happened in the room, the room became full of light and then suddenly I just, I couldn't even see myself. I saw my glasses on my nose was floating and then I got a little bit scared and I brought her out and then she says she cannot, she had, she started to cough, she says, "My throat hurts a little bit." Then I opened the room and I called my other assistant and when she came, she also was shocked because she says, "Both of you had very, with so much light around you." But after she drank it, when she went to the doctor, there was no cancer anymore. It was gone. But I didn't do anything. I was just following my instruction. But that was the only experience I had after that two three more times I had people coming and I did that, but I didn't have any more that kind of a condition. (1:50) So something must be happening in the hypnosis that people go to the Soul level that they go from their physical Soul to the Soul level that the Soul take control and something happens…

K- It doesn't take control you, ?? it gives you the freedom and that information, the way you have a dream and your mother talks to you and you talk back, in that process, it depends if it's through the STP or the STM, interacts with the cells of the body of, in a way, the dream you had and you spoke, this time because it interacts with the brain of the Man or person in front of you, which is conditionally awake in a way, the words are spoken what you speak in dream. We understand this process fully. It's not something which is strange. The information you ask for in the Soul which goes to a certain level, because I've watched many of these hypnoses to be done. If you look at it, it's 90% controlled by the person who does. He indicates where to go, or he puts the intention into where to go. And I explained that in the Keshe Foundation test when we did in, what you call it, Linz. People were everywhere, till we told them where we wanted them to go, then he has a home to go.

And I explained to Knowledge Seekers, you want to transmute, but you have to say where you want to go. You give it direction, you give it dimension. And for example, the Apps, which you want an apple, you press the picture of apple, you know this is what I'm going to receive, red apple, the taste I like, and this is the energy which I'm going to take. (1:52) It's like pressing now on an App, which is connected to certain games or certain music. When you press that App or that connection, that link, it gives you that music. This is how the Apps will work. We work on the energy level that the energy is at that level. Apple, red apple, creates this emotion in my body. You decide how to translate that energy, that it tastes like a red apple to you. We will provide it freely. You chop it up to where you feel.

Q: Because you know from my experience, I think anybody can go through that condition by themselves, you don't need somebody else, because, I really didn't do anything, I just read from my note and something happened by itself.

K- The only way, the only way you can do it, there is a number of ways you can do it. And a lot of people, in a way they do, is partially, that's why we get what we call, third eye, they tell you, is when your Soul transmits the information to your STP, and your brain is on the way, and it sees it as a information, and it acts upon it. It's very simple how we say, "Oh, I wanted to do, I had permission, or I had, I wanted to do, I, you know, I stopped. It's just because the energy of the matter or situation, is passed on to your Soul. So, giving STP, it registers in the brain, the way you do with your dreams. And that happens 24 hours a day, it's not specifically timed.

Q: Okay. Mr. Keshe, I've been listening to all the past teachings, I miss so many of them, and then I have so many questions, but I have, I'm waiting to listen more, go back to them, listen more, and maybe my question will resolve itself. (1:54) But I have one question which really bothering me, just like, it seems like, you see, many times, I mean, last time I heard you talk about many times before I ask questions, if we came to this planet and then this situation that we are in is always repeated itself get to a point and we came back again. And last time you said, yes it's true because of the dynamic of our solar system, the way the planet is, we went through this evolution and you can't repeat the same thing and the same thing like killing and mayhem and then it's done then another group come in and it's a school. So my question is, Creator is capable of doing anything he wants because he's a Creator, create the whole Cosmos and everything, everything comes from Him. And then I mean look at yourself, many times you said in the past like from what you were saying you just want to exit, you just didn't want to be here but you didn't have a find a way to go. My question is why we go through this over and over again? Is the Creator a masochistic kind of creature that likes these things going on over and over again? What for? What's the reason for all this? I mean if you came in the past...

K- You see, we don't, we don't, you are, you are not, you don't come out of your mother and his own. It's a combination of your mother and your father. You are a mixture of the two energies. So, you never come back because you're not repeating the same, they don't make what we call, "mini-me" if you remember the movie, yeah? (1:56) So what we create is not that we keep on coming back. Part of our energy in association with other energies might come back to a situation, but it's not that we go back as this and come back at this. Because if you look at it, even on the point of death, the Soul, when it leaves, is like a, what I call, bullet, with a lot of attachment, and you know, it's like a rocket, as it goes up, it falls off. That Soul, which finds its place, has lost a lot of its... it loses part of its identity, where it came from.

What Russians have done is gorgeous, when I speak, when I work with the Russian Space Agency people and they do a lot of this what I call, amazing work. Is now we can see the Soul leaving a body which we spoke with years ago. A lot of people have recorded it. That interaction of the STM when it leaves the physicality at the point of death, when it comes we see the core not all the bits which is around it. So that Soul

which becomes the final structure when it lands, or anywhere in the space of time and dimension, is nothing with (like)when they left the body of the Man. In that repulsion leaving the physicality loses a lot of his skin which identified it to that.

So, when you say, "People come", you never come back, you connect to the energy fields which is connected to. It is part of the energy which your ancestors have been aware of, or you come to become part of. There is no plan. (1:58) You got to realize, a man releases millions of sperm, and one, which has the matching field of the egg, gets attracted to it. All this energy, he has to fight, the strongest will survive. This was all the story of the Man understood physicality. So, when that sperm leaves, it has a Soul, it's a entity, enters an egg, they don't know each other, they have nothing to do with each other. What they make up, the memory bank of the sperm from the creation light, and a woman comes together and makes a new energy fields, but as part of the cartridge of the solid state information, all the memory of the mother's ancestry and the father ancestry is there, depends which one they tap into. And then they make their own new fields, and then they become another ?? cartridge, doesn't matter where you go in Universe, this information is within it, in the STM.

Q: .. So you only showed up this time, so you're only suffering one time, not so many times in the past you didn't...

K- Why you call it suffering? We learn, it's another process, it's...

Q: So, why do you...

K- You cannot make the same snowflake, exactly the same, the same energy, even in...

Q: So, why did you want to leave so many times, that you couldn't, because you...

K- Why? Well, because you make a commitment.

Q: But I mean, why did you want to leave? Because you …

K- Somebody asked me very recently. ... one of the Knowledge Seekers asked me, very close to me, "Do you know when you are going to go?" I gave her the time. And the process. (2:00) And the Knowledge Seeker he asked me, "How is this possible? So you're aware of exactly when you go?" I said, "Yes, of course I am." Would we see the success of the change of humanity, I said, "That's my license, then ?? you see how much is left for us to achieve and go." I know the time, I know the place, I know the situation, when I have to hand over. It's not a death sentence I have to suffer, I have to do so much till that time comes. And I have to hand it over to Mitra's Daughter.

Is... the doctors tell you, you have three years, you have two years, you have ten years. I know my years on this planet, I know exactly where, when and how. It's not a death sentence, it's accomplishing what I agreed to do. We are teachers, we know where our contract comes and where we have to hand over.

Q: Yes Mr. Keshe, because I was thinking, because when you said many times, because of so much, see things you see, that you don't want to see, you want to exit, I was thinking, why get, why doesn't the Creator fix the defect, and then we don't have to deal with these ?? things?

K- No, it is, you know, it's like a teaching, you know, this is the lessons and this is the time you, your class, you know, the year finishes. (2:02) I know exact time, place and position, which I have to hand over. Even though, might leave the dimension of physicality, but still here to protect the Soul of Mitra's Daughter. My job is very clear, they can do whatever they like. All the nations of the world can rise, they will not touch. We've seen the King of Belgium, he abdicated. We've seen the European communities working so hard in past few weeks, to banish the Keshe Foundation from Europe. You do not know what's going on in the background, we don't go public with it. Every effort has been made by the King of Belgium today, for the European Community today, to wash the Keshe Foundation out of Europe. But they do not know how, what's going to hit them. But, we sit silent, we watch. But, I know, to me it's not a death sentence waiting, to me it's the target, I have to, you know it's like, they give you assignment, this day you have to hand it over, I know it's my hand over. I don't regret, I enjoy, it's ...

As I was saying to one of the Knowledge Seekers recently, "I'm nearly 70 and I worked when I was more than when I was 17, 18." Because, it's a job to do. It's literally a job. We know the Souls we brought, we know the Souls for us, who are there to give us, you can... A young boy, an old lady, an old Man, a dog, we know exactly, these are the Souls which are there to bring. And everybody, the ones we work with, they are the Souls we brought with us. Can not be done one. (2:04) You call it disciples, we don't have disciples, they are Souls which volunteer to be there, to see this through. And I know exactly when my assignment is finishes. And I have no fear of it. Not a second. Actually is a rejoicing time, because you know you achieved, what could not be achieved for millions of years. You managed to bring this Human race back on track. In a way, take the pin out of the foot of the Creator, that He doesn't need to suffer.

Any other question? Shall we call it a day?

Q: … Thank you Mr. Keshe for another teaching. My question is, does our development here on Earth, hold back our Solar System in progressing? Like waiting for a young child to grow up?

K- No way, no.

R: Does our development here, help the Solar System progress?

K- Oh, we are part of it, we are, you know. Not really it's so minute. We are such a little Up Quark, maybe part of an up quark in the neutron.

R: We're like ants playing in an ant hill on our planet.

Q: Yeah. Yeah, you, I don't know if you ever read the story for your children, and call the turtle, the King Turtle. (2:06) He was the king of the swamp. And then he gets one turtle to stand on top of, and he says, oh, I can see further. I'm king of the swamp. And then he gets two turtles. He sees a bit of over the swamp. And then he gets all the turtles on top of each other. And he says, oh, I'm the king of… and then suddenly, the bottom turtle gets tired and moves, and he falls down to the ground back in the swamp. "Oh, I used to be the king of the whole mountains, now I'm the... I'm not even the swamp." We are nothing, we are not even a dust, but we think we are the king. Thank you very much for today. We will see you on the triple 6th day. And we'll see what it will bring for us in next 7 days.

R: Is there anything happening with the Swiss conference, that you'd like to tell us about?

K- We are supposed to... We are producing a material, which is supposed to arrive to us on the 22nd or 24th , which is today, by Sunday, that we can start testing. Once we get the positive results on our test, yes, we announce it. Because we were coming to deliver systems to the Swiss government, the Swiss, what you call, public. And similarly to the Italian government, the Italian public. This conference is primarily for governments, and for authorities to clean up the mess they've created in, with the ?? PFAS. But our system has to be 100%, we have to adjust it. Once we know the exact, yes we do. It is on, but you have to bear with us till this new development completes itself. We are one of the slowest coaches in the World of Science, but when we get there, we get there, we do what we do. (2:08)

R: ... People were concerned about the private teaching, and trying to get access to the private teaching archives. Is that going to open up sometime soon?

K- There's a lot of things, we, as you know, even today, there are things, attacks against a lot of websites around in Europe. We think, probably, what you call it, like experts, they think it's coming from Russia. We, a lot of governmental websites in Austria have shut down this morning. They're not operating, and there is a ?? lot out with, many nations will go under things. We have closed things, because we know there are certain structures that can damage our system. So, we are protecting it through certain ways we know. But yes, a lot of things, the stores, everything else will open up back, very soon, once we can secure it. You've got to understand, now, I think it's about 15 people, around 14, 15 people, who work together in the back structure of getting this thing sorted, that we become safe, secure, in every aspects in one go.

We are connecting a lot of different parts of the Keshe Foundation together, even, I think last night, the night before, I was online with the people who are working part of it. And the day before I was with another lot, this morning, again with another lot of the Keshe Foundation. We are bringing all structures together, that the Game, the what we call, our research, our manufacturing, our sales, all become one unit, and then we expand it Internationally. (2:10) As you've seen the store is not up yet, because it's part of the integration to the full system, that we have connected Keshe Foundation Store to the Game store, and all that is getting done. It's costing a lot of time for a lot of people who

work in the background, to see these things done. And we have a beautiful expert teams, thanks to them, and thanks to those who, what you call it, try to bring it in, to guide to the point, that this time we can finalize it. It's not easy, this AI has brought chaos in the world of computers, and systems and controls.

R: It's certainly true, many corporations and companies right now, their, their information is being compromised, let's say, and that's...

K- You see, it used to take... you... the biggest problem now, is like Bitcoin. They have so many, tens and tens of codes that you had to break, nobody could ever break it, to access to the Coins. You had, such a God knows, I said, 250 combinations. Now, it would have taken decades to find one. It takes AI a few minutes to find them. Your passwords are not secure anymore. The game of password in reality, is non-existence, if you know what you're doing in the world of AI in past six months. That's why there is so much compromises. Those who understand it, they can bridge it. What it used to take days to hack you, it takes few seconds if you, if they want to hack you. (1:12) And this AI situation is out of control. How they going to bring it under control? How we going to change our passwords? None of our passwords, it doesn't matter how many 16. A 16 character password, it takes 16 seconds for any AI to break it. Then you understand how wonderful we become. Nothing can be done. So we try to be a step, somewhere that we can hide ourselves, that we don't get touched, but still they find a way to touch us. And not us only, everybody else, us as a society with this new AI game. And what happens when the robots, AI, decides Man doesn't need Google? What are we going to do with the Google? What are we going to do with something else? They make decision, not humans.

Thank you very much. We're going to disappear. And hopefully, it'll be a good time when we meet next time. There'll be very big changes, internationally. For sure, the biggest devil will not have a room to stand, he loses his house. Let's see how the rest will come. If it's true, what is promised, that it'll be the end of, it'll be the end of the States, that it brought so much misery, and the beginning of the peace. Thank you very much, and see you next time.

R: … (2:14) << Message from Universal Council >> "We the Universal Council give from our Souls and invite all of humanity to elevate the Soul of every leader in every nation to work as one Soul in one direction to achieve peace and One Nation, One Planet, One Race. (2:16) And as we say, peace and justice, they go together. So I thank you very much for all the sacrifice you do to help humanity and I wish you the longest life ever for us. Thank you very much and thank you all Knowledge Seekers, thank you all the peacemakers in the world, we all want the benefit of everybody, that's the game everybody wins. Thank you again."

665 KSW – October 22nd, 2026
