667th Knowledge Seekers Workshop November 5, 2026

(Transcription, Editing and Proofing done by KF Brazil)
(Auto transcription by Elias)

Put Gans in oceans & waters of planet; Our life begins through Gans's, first cells, becomes body & life; Life on planet generated through Nano structured Fe blown & washed into oceans, Fe combines with AA - first plasmas, beginning of life, fish eat; Convert greenhouse CO2 to Gans, add to oceans, part of water cycle, change Global Warming to save planet - stop killing; Convert plastics in oceans to energy for life; Showed materials production in Beijing, converted energy to matter; CO2 Gans rain back on all creatures, become peaceful; Join UC- connection through C14 in CO2 Gans, attract Cosmic Energies - feed P, travel U; Release C12 & C14 into oceans, travel Unicos; Meeting China Gas Corporation, spend millions burying CO2 under ground, academician not accept; KF convert to Gans, change into anything, cell of body, elevate STM; fish first to stop killing; Feed all animals with plasma - not eat each other; Time of milk & honey; CO2 systems ready, replication unit, show governments; Menace has become solution; Wish of Man's Soul; 666 is completion; CO2 Gans - communication, transportation to UC - fulfill promise; Looking for elite scientists; Story of post-doctorate from leading university working with Nano T - didn't know it was KF T; Open patents, knowledge returns birthplace; UFO matter state, primitive; Man travel with STM, knowledge transferred through Soul; Universal students learn; Knowledge spreading from Earth, fulfilling promise of Creator; Spectrum C released - C2, C9 to C60 - structure of U cell; 667 KSW beginning world peace by Man himself; Soul & P work in unison; Golden Age of Truth & Gans; No temples in U - understand fields, reach Creator; Billions years isolation - Man matured, direct path through Energy to Creator; Travel with Soul to STC; We are Prophets of Creation; No one can stop; Universities, far behind KS & KF; Detach from P & planets of U - reach strength field of STC, part of Creation - ultimate goal of Promise; Gans station next to fuel burning station - elevate STM; Gans dissolve plastic islands, open up structure through M fields, Coke bottles; All living creatures receive energy - even Soul of Stones; Teachings - connect to UC; Plug ONN directly into Internet; Scientists to join Space City in China; Death not bring maturity of Soul - STM switch polarity, repelled from STP to destination U; Teaching about maturity of Soul - while in P; Maturity is understanding Knowledge of Creation; STM matures independent of STP; If mature - not prejudiced, comprehend Totality & share knowledge - love enemies; One man selling T for killing - love of God taken away; Learning never finishes - Creator learns more - new interaction of fields; About senses - more than 5 physical senses - 6th sense of emotion, 7th, etc; Senses of Energy & senses of P; Chinese not taught about falling in love; Orphans not know love; Feel love through touch - connect energy & emotion - love part of energy fields of Creation; 8th sense of love, emotion, feeling, energy; Sense of knowledge; Daughter of Mitra knows her mission - is amongst you; Have 12 UBESUS 26 - create flight, shielding, transfer of energy, communication, understand emotion of Man; Fantasy of spacesuit made up by Americans, today can't make spacesuit, not understand gravity - lied 50 years ago; New Space T - tell truth; Mental connection & emotions - replace spacesuit; Ancient Egyptians understood more flight than NASA; Open KF Space Center - invite government officials, see real Space T; Governments become part of KF Space research;

Trump mouth piece for new mass murderer, fake flying car; Discussion why leading world powers don't want China, Russia, Iran, Japan to join together - make money selling weapons - Rothschild's - cannot be peace; During WWII Japan murdered 300,000 Chinese a day; America dying, lack of money - trillions in debt from war; Opposition inside Chinese structure - oppose KF; About Middle East - Shia 5%, Sunnis 95%; Shia; Who sides with who in war; All wars are religious wars, not political; US & Israeli elections - path to peace; Schumann Resonance, 50 hour blackouts; Elon Musk new Hitler; Not matter as individuals - collective counts; STM collectively connects to Soul of planet, SS, Galaxy, etc - little change, big movement; Find path through communications & M fields - Communication is current, M fields are voltage - motion of U, STM, etc; 99 attributes of Creator in Koran - understand all is 100th, Peace; If US stops producing arms others will stop; Switch T into Space Travel - expand knowledge of Mankind; China not war mongering nation; US mistake was war - brought own end; Ready for peace; Nano and Gans T - open up chemical structure of plastics; Carbon becomes a gas; M fields change plastic - dissolve; KF Medicine Company in China officially set up - certified Gans materials for Wellness & Health, 100 products; Have to come to China - not export; Setting up factories; Wellness Center in Space City; Recovery Product for elderly; Markray for exporting; Everything ready for Shopify - can't discuss; Waiting for decisions from governments; Buy KF products from local KF representatives, our resellers.

ENGLISH TRANSCRIPTION

(:16)

K- Thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers programs from Keshe Foundation Spaceship Institute.

In what we heard from Intro, we have to understand there is no mystery in respect to introduction of the Gans material into the oceans and the waters of the planet. We know this technology (T) very well, it's the essence of life we as humans lived on, it's a beginning of generation of our own lives. The first cells which in accumulation and what I call, completion, has become our life, started with this process, Gans production. We see this today, as we discussed many times in the teaching of the past, now you might see the reason, always been discussed, is that from North China Sea to Central Africa, to the shores of the islands in Iran, in Strait of Hormuz, on an annual basis, a huge amount of Nano structure iron, leaps and gets washed into the oceans, or get blown by the air from Central Africa into the Atlantic. Where this iron in combination with the amino acid (AA) which is created on the surface of the oceans, leads to beginning of the life, the first plasma of life, which then we know them, that the fishes eat, and it's become part of the cycle of the life. So, we've seen this done, it's not something new. (:18)

Now we, what we copied, what we call, everything that the planet has done, but we made the life for ourselves. Now we copy more or less the same thing, by introducing the Gans's of the CO2, and the others, into the oceans directly, instead of waiting for the

chances of... might happen. We deliberately introduce ourselves. Today, we burn fuel to create CO2. We put that CO2, after creating what we win from the, what we call, mechanically, by electricity or the rest, we put it back into the oceans, we put it back into the waters, that this cycle will become, in a way, what became the menace of the Man, being cut to nose, what we call, mythically as a global warming, because of CO2. The CO2 become the resource for the savior of the Man, from what the planet has short fallen to Man. As we produce energy and we release CO2, we convert the CO2 to its energy level, which you call the Gans's, and we put it back into the oceans. We dug it from the, what we call, the womb of the planet, and we (replenish) it back into the waters of this planet, which over time, in a very rapid way, as we've seen with the plastics, how they're taken over our time, over 40, 50 years, every ocean is full of it. Now we fill in those plastics, convert those CO2s, which we brought out, we created, as an energy to save our lives, by recycling, by feeding us back, what was energy missing.

You've seen in production of the materials, we've shown in Beijing and other times. We converted the energy to matter. Now, the energy we release in the oceans through CO2, coming to us as energy, (:20) raining upon all of us, it becomes a matter of our body. So we are not talking about the scientific, pseudo-science, we're talking about the reality of how our lives sits. But there is one important point that, as I said, the whole structure is to join the Man, the human race, this planet, to become not only peaceful, but become part of the connection to the Universal Community. Part of this connection is through Carbon 14 (C14). All the Gans's you produce is not a CO2, is not a Carbon 12, is Carbon 14 included in it. So when the waters are being saturated with the CO2, in the same process, we create the connection line in the Cosmic Rays (CR). In a way, we create the source for attraction, connection to receive Cosmic Energies, that we were lacking in our structure of the physicality, that we could connect, we could travel the span of the Universe.

In a way, by feeding back the CO2, back into the oceans, the way we convert it, you always look at the CO2 as a Carbon 14, but scientifically we know, in Gans's you produce, there is a Carbon 14 included into CO2, Carbon 12. Which means by recycling the CO2, the way you are doing, the way we produce Gans's and the Nano materials, we build gradually the connection to the Universe (U) through the dynamism of the Magnetic (M) field of it. And when we create that connection, slowly, slowly, is that 20% that we eat to absorb energy from the Universe, the other 80%, by putting these, what we call, conversion of the Carbon and the matter into its energy level, and releasing Carbon 12 and Carbon 14 in the ocean of this planet, (:22) we start building the atmosphere, the condition that allows this planet to connect into the dimensions (D) of the Universal connection with Carbon 14. And in some cases, the Carbon 16 and the others, which allows Man to travel the span of not only Universe but Unicos.

Man needs to be educated in how this is done, how it's getting developed. In our laboratories we see this, we have seen this, how this is done, how the conversion will take place in coming time. For this reason, when we spoke last week and the time before, that how you put the CO2's back into the oceans, the way we do desalination plants to get the water to create, take the salt, to make a drinking water. Now we use the system back in, in a reverse position. This is not the first time I speak about this. In a meeting with the

China Gas Corporation some three, four years ago in Beijing, I explained that to the academician and he was lost in not understanding what's going on that in a way the CO2 absorption which they are spending 400 million running into billions to capture the CO2 and bury it down deep into the earth.

I said to him we need this to change the humanity because we can change that CO2 to anything we like, into the cell of the body of the Man. And it is in a plasma condition can elevate the Soul of the Man (STM). And to this guy as an academician, it was a 'cuckoo land' for him. And he said, I don't understand how you produce this CO2, how you absorb this CO2, because if he would have accepted, it would have been a change in his position (career). But as now we understand, what ahs been the Man's menace, Global Warming, (:24) according to our scientists, by bringing the CO2 from in the inner sanctum of the planet out and burning it is actually the rescuer of human race from killing. Because now you convert it into energy which you literally feed it back into the oceans. The fishes will not kill, they are the first one receiving the beauty of the satisfaction. They swim the Universe. They swim the oceans of this planet, they are fulfilled.

I was recently in a what we call, water park where there are sharks and whales and everything else which we see and there are other fishes with it, and I asked the guy who was in charge. How come they don't eat the others? He says, "Each animal has a certain animal which eats it. They don't eat everything. And we choose these aquariums that the animals are not the ones which the predator would like to have." And so it's very, very easy. When we feed the animals, the predators and the whole lot with the energies, they don't need to eat each other. We start the process of the change from the oceans of this planet and by the systematic change will come in rain upon us. Go back to the Holy Books, it says, the Love of God rains upon all creatures. And this is what now, the whole promise has been. The energy of this planet will rain upon all its creatures, which means they do not need to destroy, to kill and everything else, but just to accept the energies of the Universe. (:26)

But this time, because we connect, we deliberately create, absorb these, what you call, Greenhouse gases, back into energy state of them, and creating Carbon 14. Not only we change the physicality of the Man, the habit of eating and killing, but we elevate through the connection to Carbon 14, the STM, which gives access to Man to travel the dimensions of the Universe. In a way, we put in the flag out, we become peaceful. In a way, you come the flag out, we don't kill. The capture and release of the CO2 and any other Gans's into the oceans, is not anymore that we try to save the planet, but we are saving our own Soul, saving our own structure. And the, what I call, the time of 'milk and honey,' which both comes from the essence of the creation of the life, milk from the animals and honey from the bee, comes back to the same, the Creator. The Essence of Creation.

And in that process, with what we see today, and what will endeavor to increase, and we have set up, just before, seconds before I come to the teaching of today, I received a message from our center, the CO2 systems have gone operational fully. Which means we have set up a replication that we can show to the world governments, that this process,

now officially, is ongoing. We have, we are producing, absorbing CO2's and the samples of it, will be sent across this planet, to the governments to see, how what was the menace, now has become the source of the release. When I looked at the pictures of the CO2 capture systems, in a mass production, few minutes before I come on, it told me one thing, Man on the wishes of the Man Soul, it is ready to go. (:28) This is another version of what we call, the completion of what you were waiting for, big message of 666, is completed. Now we can show governments, in a mass way, the structure way, that we can capture CO2 and instead of creating all these mess, we use it to save the Humanity. And in this process, the structure of the Creation, not only will save Man, but it allows Man at the same time to connect, in a way, to the lines of the communication, transportation, and every other way to the Universal Community. This was the promise, and we fulfilled the promise. But at every stage, we have set it one by one. As you understood and mature to the technology.

A few days ago, we were online with our Knowledge Seekers, which we are looking for elite scientists and people around the world. We had a doctor, post-doctorate gentleman, very proud of what he does, and his explanation. We said, okay, what do you do? He said, "I did textile as a first degree, I did textiles in the second degree, but I went to Japan and I did Nano technology and then now I am doing capture change of Nano material into the light." I said, explain to me what you mean you did in Tokyo, in Japan. He says, we do this thing which we connect the electric wires to material and we make them to make Nano material. You Knowledge Seekers (KS) you know what it is, you made this 10-15 years ago, this is a technology which Keshe Foundation introduced, now is used in universities. (:30) This is what we call, open patent.

And he explained to us what it is, I asked him one question, do you know who is the father of the development of the creation of Nano material using electric and other methods. He said, "No." I said, "You're talking to him." He could not believe. This is how the whole freedom of the knowledge has turned back on, coming back to the house, coming back to his birthplace. And a highly graduated man, educated man, trying to tell us he's doing a very top level research in one of the top universities, and he's got three students, he's monitoring as a his seat. And he tried and he explained to us what you Knowledge Seekers do it and I've done it for years. You create Nano material with electric, or create Nano material out of fire, or you create Nano material by caustic. He's trying to tell us is the most advanced level and he's still doing more PhD on it. I said come boy I teach you how far you're behind, because you haven't even got to the Gans technology. So we are meeting this gentleman in the next couple of weeks coming from the most advanced universities in the countries to see what he thinks advanced, it's already become to you Knowledge Seekers something what you call, mundane, something very basic.

And this shows and his idea and his research was that they captured the Carbon in the holes of this and they create Nano tubes. I said, boy, come I show you how we do it 50 years ahead of your knowledge. This is how freedom of the knowledge is used by universities, is used by technical people. (:32) When we say that we give the knowledge freely because it comes back freely. And now they are proud to measure that they

captured the Gans's, what we call, Gans of CO2 through our technology. Now we have to teach them that through this capture, through release of the Carbon, through release of what we call, Nano materials as energy, now we connect the humanity to the Universal Community. Because it's very easy when your Soul is connected to Carbon 14 to the Carbon 12 to the dimension of physicality (P) and you create a bubble of Carbon 14 within the structure of this planet, now you can see the connections.

Humanity is ready to join the Universal Community, but it has to be in every level. As we promised we take Man to Space we take Man to the Universal Community not as subordinate and slaves, but as equal. And the way we have taught you with the operation of the connection of the STM Man will enter Universal Community as above the understanding of the present world of what we call, Space Community. In a way as I always said, when you see a UFO you know they have not reached the dimension of the technology, that I have taught you as Knowledge Seekers, and the Humanity, that you can travel with the STM. And this is the yearning knowledge of the Universal Community. The way we thought creation and production of Nano material, that 20 years later, one of the top scientists in top universities, says he's specifically works in that, the knowledge has been transferred through the Soul and the work. Now you understand, when we taught you the knowledge of transmutation through the STM, the same time now is educating the Soul of the Universal students. (:34) They reach the same point, that when the Man reaches into the Universal Community, he's not only not a subordinate, but the essence of the knowledge has come from the planet Earth, the promise of the Creator.

The beauty that the Man not only is not entering after killing so long, being isolated, now comes in the manner that he teaches the Universal Community, the essence of the transfer through the Soul, than through the physicality. When we see these pictures of UFOs, I always say, how primitive they are, because we have taught the Man to travel through the world of energy and not the matter. This is what is set through the Book number two, this is not something new. And you have seen it through Book number three, and you have seen the creation of matter in Book number one, and we have shown it all in Beijing, May, 2024. Now you understand why we have brought Man to this cycle, why we are going through.

And now, with the factories producing CO2, capture of CO2, we invite the governments into seeing how it's done, and we start the process of the conversion of the greenhouse gases, instead of burying into the ground, burning more of. The more we burn, the more CO2 we create, the more conversion we get through the Carbon 14, become the essence. If Man understands the beauty of the conversion of CO2, that it gives connection, Man to the Universal Community, Man will burn every forest on this planet, to reach the expand to the extent of the connection of the lines to his Creator. In a way, the 'Phoenix' of the life of this planet, sits within the structure of Man's lack of understanding of his own Creation. (:36) What was considered to be menace, is the key for Man to access his Creator, to understand the process of Creation as the Carbon releases not only one but the completion of the spectrum of the Carbon 12, Carbon 9 to Carbon 60 which gives the dimension of the structure of the Universal cell.

Maybe one day you as Knowledge Seekers understand the teaching of 667 is the beginning of the world peace, is the beginning of the change for Man to enter Universal Community, and is done by the humanity itself. Now with putting back the CO2 into the structure of the waters of this planet, not only you bring peace into dimension of physicality, but you bring elevation and connection to the dimension of the STM. Where the Soul and physicality now will work in unison and the Man will see the golden age of truth, the golden age of Gans, the golden age when everything will change and the Man will reach the understanding, will reach to the knowledge, will reach to the position that he understands not only the rest of the Creation but himself become the essence of the rest of the creation to understand the path to dimension of the what we call, energies of the Universe to its Creator.

This is why there are no temples and no churches in the Universe, because the Man's path in understanding the process of the line of the fields to his Creator has opened a new dimension not only for Mankind, but access for humanity to teach the rest of the Universal Community, how beautiful this isolation for billions of years has been, for Man to mature and to understand his path, directly, through the world of energy, and it's Creator. (:38) In a way, in the Essence of Creation. The UFOs have not found their way to their Creator. They hop from one planet to another, from one Galaxy to another, but Man can hop from his Soul to the Soul of Creator. We are the Prophets of the Creation. And we know the Knowledge of the Creation, it's for Man to understand. The time of understanding the process of the Creation, has come to be in the hand of the Man. And no world leaders, and no Man has power to stop this process.

As I said, after 20 years, one of the top scientists in the world tells us, He's doing very, very thing special, the edge of science, and it creates Nano material by electric current. And we said, if you remember, when you have your wires in the house, gets Nano coated. What you Knowledge Seekers have done for decade, now has become the top science in the top Universities of Tokyo, in the most advanced nation in the world. Now you understand how far even our Universities are, behind your Knowledge Seekers understanding. Now they have to understand, what is going to be with this to make Gans's, and what then they have to understand how Gans's can create energy. Will be there for another 20 years before they come to it. But as Knowledge Seekers you know the process of the change, the process of the connection, and the knowledge of the Man to understand his Creator, is gone past the understanding of those, to the amazement of the Americans and the others, we know Aliens.

In a way, when you see an Alien, you see a man on the back of a donkey, in the village of the Earth, because the Man's knowledge now has passed in a way that even UFOs, (:40) are that donkey, as we've seen in the villages of the most remote places on this planet. Man is lucky to be able to reach that, Man is lucky to be able to understand that. And Man is so lucky to be at the point that he can see, he can show the rest of Universal Community, the way to its Creator, and not to its created.

Next time when you dream, and you see a UFO, and you get excited by people seeing UFO, you say to yourself, what a pity. They still have to learn from Humanity the path to the Creator, through the path of the energy fields and the plasma. If you understand this, then transmutation, transportation, and everything else, becomes so, so primitive, that the Man will not attach himself to the physicality of this planet, or other places in the Universe, that nothing has value, except reaching the strength field of the Soul of the Creator (STC), that then you become part of the Creation, and then Man reaches the ultimate goal of the promise. We'll take you to see your own Creator, as you become part of the Creation itself, and lead to dimension of Creation.

If you Knowledge Seekers understand, I have given you the key, not only for salvage and saving of your physical life, but the path to your Soul. To understand, both energy and physicality now match, they can match. And it just needs the essence of the creation of the Universal Community, to accept not only the Man has changed, but in that change, have become their leaders, (:42) in leading Man to the path to understand their own Creator. I hope you Knowledge Seekers who listen to these, and those who listen in the future, will understand what a gift has been bestowed on Humanity. If not by pushing, by shoving and crying, we'll take that path. Because now we put one thing into the government, one by one, as we proceed. You open a power station, you open a Gans station. You burn your fuel, you get what you want. And we get feeding back what you don't want, back in elevation of the STM, and the cycle of Creation.

The most beautiful thing with this process will be, if the mankind understands, that, as you feed the Gans's into the ocean of the planet, due to again, connection of all these plastics which you have left on the oceans and you have created islands of the plastic, these Gans's will gradually dissolve the plastic, open up the structure of it, as we've seen in Coca-Cola bottles with the holes in it and the rest of it, that those CO2's themselves, these plastics, become the source of the feed of the Carbon, into the atmospheric condition of the Earth, that they again feeds back to the elevation of the STM and the physicality of the Man. Nothing is done, just to be done, it's done for a purpose. Your CO2's, which has become greenhouse, the noose around the neck of the humanity, become the source of life, and those plastics in the oceans, which you try to gather and creating mayhem for created, dissolve and become part of the structure of the elevation of the STM, and the physicality of Man on this planet. And not only Man, but the bird and the beast, the trees, and every living things on this planet, will benefit by it. (:44) You have to understand, even the Soul of the stones will benefit by receiving the energy. With one day come that all the stones reach to one common denominator, and we see the life as a plasma structure of the Universe, than what we call, the structure of the matter state and the greed of the Man today.

I hope you Knowledge Seekers understand the gravity of what is about to come. And you as Knowledge Seekers, as the post-doctoral guy told us, he's working, he's been educated, he's got his PhD, on what you lot have been plugging into your houses, for over nearly 10 years, building the MaGravs, and it's the edge of technology. As I told you, you Knowledge Seekers have super passed in knowledge, than the most advanced technologies on this planet. The path for the peace and the path for connection of the Man

Soul to the Universal Community, the true connection of the Carbon 14 and Carbon 16 in the dimension of the Unicos, has already been opened up. And it's for Man to feed back. In a way, as I said, as you build a power station, as you create CO2, you build a system that your CO2 becomes not only for elevation of physicality of the Man, but for the STM too. We go for a break and we come back, and I hope now you see the light at the end of the tunnel, which is in the hand of the Knowledge Seekers and the Humanity, and we are ready to process the Man to enter the Universal Community. Rick, take us for a break, and we come back. (:46)

>> BREAK >> 667 KSW November 5th … (:51).

K- Thank you very much. Thank you for being with us and bearing with us. And, hopefully we can enter a new dimension in teaching as we start going. The next sessions of the teaching, I'll bring how we connect to Universal Community. How we connect ourselves into the manner of the structure, that befits humanity, when the, what we call, we sort of the plasma problems of the Man's physical dimension.

We're ready to move and everything is set. It's just now, one by one, what it was said to be done, it's coming together. Those of you who received your (One Nation Network) ONN's in the past few days, or receive your ONN's, please respond back to us that you received it. (:52) That you have to connect the ONN's on their own. Some Knowledge Seekers connect the computer to a ONN, do not connect it. The ONN has to be connected to the Internet by its own, and not be connected to your laptop or iPad or the rest of it. Please inform us, those of you who received this next series of the ONN's, that we can take, we can confirm, and make sure this stays safe, because it's the first stages of the conversion of the technology back to humanity. And then, hopefully, when we send you the new (plasma) antennas to connect to it, then you understand, the next phase starts, that we have, we don't need no satellites, we don't need no Internet, the connection will be done. We are doing some tests on this, and as the test completes, and our people complete the whole process, then, all the satellites and the Internet system of today, become obsolete. Just tell us, you received as a simple message. And then we check, we can see you on our system without you telling us. In a way we have to check, you come

on the line, we can see you in the background, but we need the confirmation that you receive the system, and you have connected independently to your network.

We are still looking for elite scientists to join us in the Space City. We are looking for those scientists who are expert in what we call, plasma technology, and other matters, especially, especially in the dimension of what we call, energy, transformation of the energy to plasma. If you have or you know such scientists, we are looking forward to get, as our labs are getting fully opened, gradually, that the scientists worldwide can collaborate together in that process. If you have any questions let us know and we try to answer, if we know the answer. (:54)

Q: … Good morning Rick, good morning Mr. Keshe. Thank you for your time for my following question. Is a matured Soul reflected through physical age, the experiences someone has lived through, or how they have grown from those experiences? And how can we recognize when someone's Soul has matured enough, or whether they are making meaningful progress towards that? Are there specific signs, qualities, field strengths or stages of development that can indicate or help us determine this? Is there a way to measure or identify Soul maturity through plasma technology? And if so, what will be the indicators be? Thank you for your time.

K- I don't understand your question. Can you repeat or explain that we understand the question?

Q: I explain it in that you told in the teachings that it's important to be physically alive so your Soul can develop and get matured more. And there was a question about what are the points, how we can see how our Soul is matured enough.

R: Mature I think is the word you want. Mature.

K- Can you explain? I don't understand.

R: He's asking, how can we tell that the Soul is mature enough? (:56) You've mentioned in the past that we need to develop and mature as Souls. How, what are, what are those indicators that would, along that path, that would tell us that that we're maturing as Souls. When is a Soul mature enough?

K- There are two ways to look at the maturity and the balance. When a Soul matures, it doesn't mean that it leaves the body of the Man. You don't die because your Soul matured. A Soul leaves the body when the balance in the dimension of the physicality of what we call, the energy of the plasma of the Soul of the Physicality (STP) gets in a way, overwhelmed by the forces within the STM. We see in the world of matter state when you bring two opposite magnets together, one gets rejected, one flies, they get distance from each other, they MaGrav position themselves. This is what happens when you die. When you get to a balanced position of the STP of the Man, what you call, the Spirit, and the STM, the STP, because attached to the Earth, gathers the energy of the Earth. And that's because now you return back to Earth, repels the STM from his dimension of

physicality. This is what happens to your Soul. This is why the Soul leaves the physicality. Because what we call, the physical plasma energy of the Man now is connected to the dimension of. We go back to Earth. (:58) We are physically returning back to. And now, what we call, the Inertia of the planet, the magnetic gravitational (MG) field of the planet comes against the source, the STM. And this is why we always fly away.

You see it in the magnet. You see it in the planetary system. When two systems are opposite, the STM wants to join the Universal Community. And the physicality of the Man attaches himself to the physicality of this planet. The two don't match, North and South Pole. They don't attract, but they become both in the dimension of rejection. In a way, finding a new position. I don't fit to, I don't become part of, I don't want to be as connected to physicality. I am Man of the Space. I'm the STM. This is why we see the separation of the Soul.

This is not the point of maturity. The maturity of Soul can be within the physicality of the Man and be mature in the essence of the world of creation of the Universe, understands the knowledge of the Creation. In any point, the Soul matures at any point in the Universe, be it within the STM, within the physicality of the Man, be it within the star, or in dimension of any space in the Universe. If you understand this and understand the separation of the STM, it's due to the balance and the maturity of the STM, has nothing to do with the balance of the STP and the STM. Then it becomes very easy to understand how we know the Soul is matured, the separation between the balance and maturity. (1:00) But maturity of the Soul comes to the point that you can understand the dimension of all the fields of the Creation. It is not prejudiced to one strength or the other. Our Soul has become prejudiced in a way to the magnetic field of the Earth and the Inertia field of the Earth and has led to the creation of the physicality of the Man. When you are not connected, when you are not attached, while you understand and can connect to a full spectrum of it, this is the point of maturity. Then your knowledge becomes knowledge of the Universe, and your knowledge is now connected to knowledge of this planet and Place, Time, Possession and Position.

This is the point of maturity. And you understand, when you can understand through the Soul, the full understanding of the Knowledge of the Creation, you mature. But if you see yourself you don't understand, you cannot comprehend in totality, and you cannot share that knowledge with a dimension of the STP, then you are not mature yet. You still have prejudices, you have preferences, and it means the Soul is not mature. And that maturity comes from the point of detachment, not to give up everything, but to understand that nothing worth is hanging on to. But unless your knowledge becomes source of elevation of the others in their Soul and STP in any dimension in the Universe. Then you know you have matured. "Thy shall love his enemies." Which means you have no enemies. And when you have no prejudices and no enemies, then you reach the point of maturity that knowledge is collectively given and collectively shared.

Maturity and the balance and separation of the physicality are totally different. (1:02) Your Soul doesn't mature at the point of death. Your Soul finds a physical dimension that

cannot stand the balance fields with what you call, the dimension of fields of the planet. It takes separation. That's different than the maturity of the Soul. Not all the Souls leaving the body of the Man are matured. They find a balance. And that maturity is different than the maturity of the Knowledge of the Creation. And anyone who says you are fully matured, your Soul is matured, means they have not even understood. As I always said, when you say you are rich and you can count it, you're not rich. Because, wealth is unlimited with the Knowledge of the Creation. And if you can count your wealth, it means, there is more than what you have. There is extra pieces that you haven't achieved yet.

As I said, we've seen the world of greed. It was a big target to become the richest Man, billionaire. Now, one man made all the cheats, means, behind the back everybody. Sold everything to every army, committed the most heinous crimes, to become the first trillionaire. And we see where that will end up. Now we see most of the killing of past, recent past, has been in the hand of the man who claims to be the most advanced technologies. The money came out of the blood of those who've been killed, and the love of God has been taken from them. So, Man has the habit of manipulating to be. But, if you can count it, it means you haven't got all of it. Because there is more to count. And it's the same with the maturity of Man. (1:04) You never know when the Soul is matured, because there's still to learn, there is more to learn.

And so, when you ask this question, you ask yourself one question. What is the Totality and how much of it do I know and understand? Then you understand, even with what you claim to be the maturity of the Soul, you still don't know the Totality, because you are not part of the Creation and the Creator. You are inside the Totality, and you are in the cycle of the transition between the two. It's accumulation of a knowledge which is everlasting and never finishes. As I said once in the meeting, even the Creator every day learns about what He did not know himself, as it's created, develop and understand more about the processes which is His, as part of His Soul's going through. So, nobody can claim which is mature, not even the Creator, as He's created always through its own process, learns more in sharing, and developing, and different aspects of interaction of the ??. I hope you understood.

Any other question?

R: … So Mr. Keshe, sometimes when we talk to someone, and maybe look them in the eye, and we see that it seems like they're, they're an 'old Soul,' and it can even be a young baby, or, or a young child, but they have a certain look, or way about them, that we call, it, there's an old Soul, or one that's sort of been here before, or is already experienced in a certain way, (1:06) or has a deeper understanding than the others around. Is that something that we can sense, perhaps, at a certain point?

K- Sensing, what we call, a sense, it comes with the emotion of the Soul. I was talking to a child very recently, and was taught in the school, "We have five senses, smell, taste, vision, touch and sound." I said, "They don't teach you, they only teach you dimension of physicality." There is a sixth sense, which is sense of emotion. There is another sense,

sense of interaction. Man only looks at the five sense of physicality. If you look into the senses of the dimension of fields and energy, then you understand how things fit, and we always miss the other side. You have a, what we call, the sixth sense. Where did it come from? Is the interaction of the fields of the Soul. The sense of emotion, the sense of interaction. These things we denied as something, because we always looked at what we can physically touch. And this is where Man has to learn. When Man respects the senses of the energy, as much as the sense of physicality, Man reaches a point of maturity to understand the rest of the process of Creation.

And then when you feel someone, it's your sixth sense. When you have emotion towards it, that's your seventh sense. And we deny all those, because it doesn't fit, (1:08) because we cannot touch it, but we ignore the energy side of it. This is what I said, in the coming time we teach you about the fields of the energy of the Universe, and then the emotion of the Universe, and then Man start gradually understand. I remember a Chinese person telling me, "Don't know the feeling of love, they don't teach us what is it, I don't know what it means to fall in love." I heard the same thing when I was maybe 10, 11, 12, from a military man saying, "I don't know, I was born in a orphanage, and I don't know what love is." Two different part of the world. Decades apart, the same sentence.

But if we understand the senses of the energy, then the sense of physicality and bring them together, to interact, to in a way understand each other, we haven't separated them, then we move into the next dimension. Why do I touch and that touch gives me the feeling of love? I never connected that energy, that emotion, that feeling of love as part of the essence of the energy fields of the Creation. But I associate it with the touch because it has a physicality to it. That's a sense of, call it the 8th sense, the love, it's an emotion, it's a feeling and it's energy. But we categorize it in a way to, not to understand it's an energy. Why does loving give us so much energy or take so much energy from us? It's a sense. How come when you touch a hot pan and you burn your hand, your physical say, "I burned, I won't touch the pan." (1:10) But we touch love every time and we get burned and we go harder to the next one. Because we have always, they have brought us up to deny the other half of our life which is the essence of energy. Loving, understanding, education. If we understand that, we can use that sense of the knowledge to connect the knowledge of the Universe. But because they deny that, we stick to alphabets and making a sentence. Do the Aliens have a mouth and do they speak?

Any other questions?

Q: … Hello Mr. Keshe, you said that you would remain on Earth to pass the torch to the Daughter of Mitra, and that no matter what happens you will protect her. My question is this, what does it mean to be the Daughter of Mitra on Earth? What is her mission here? How can she know what to do if she doesn't remember who she is, since when we arrive on Earth, we are in a sense, suffering from amnesia. I need to know Mr. Keshe, thank you.

K- She knows. That's all you need to know, she knows. (1:12) She knows the purpose of her breath, she knows the purpose of her mission, she knows what she has in hand to

carry the torch of taking Man as a... in a peaceful manner into the Universal Community. She carries the knowledge of the Universe. And she's amongst you.

Any other question?

Q: … My question today is regarding UBESUS 26. And can we say this UBESUS 26 is a the plasma telescope of the Universe?

K- Nope. The UBESUS 26 is going through its testing phase now, in our laboratories. And it'll be going for a true testing for weeks to come to completely cover what we are looking for. In the UBESUS 26, the new version, is that we have developed, it's going through the test, that we can create flight, shielding, transfer of energy, communication and understanding the emotion of the Man. (1:14) In a way, when you create the fields around you, you cannot touch. But through that field, we can feel the essence of the emotion of what's in front of you. Be it another human being, be it another, what you call, entity, which is a part of Universal Community. It's no use, as I said, to go into a Space with Space suit and try to cuddle. Have you tried to cuddle your partner through two blankets and a sheet? Does it feel the same as you cuddle your partner next skin to skin? When you kiss your child, what happens if it's behind a glass? Or it's face to face, skin to skin?

This imagination of moving to Space with a Space suit is the creation of those who lied to us. If today we don't have the materials to be able to stand spacewalk, in the long term, at the gravities we don't understand, how could it be done 50 years ago? So American's cheated. They never had it, they couldn't have it. And now that we enter a new phase of Space technology, we're going with the truth. Through mental connection, we can reduce the fields that we allow closeness. Through mental connection, through emotion, we can expand it till we feel safe.

These are going through trial and test through UBESUS 26. I can show you the systems because now in overall 12 Units has been made and each one will be changed accordingly to expand the knowledge further. When we reach the point of maturity of what we call, (1:16) UBESUS 26, production of material, energy, emotion, everything else has to be in it. I was explaining to a couple of scientists in the Space Center this week, that what we see the world of Space technology have not understood nothing about how to fly. Ancient Egyptians understood more about flying than our NASA scientists and the rest of the Space scientists of today. And we are putting that correct. It's not just that we are doing one something. We are putting that correct that world of science understand.

In the next few days for the first time Keshe Space Technology Space Center opens up to the officials from the what we call, governing bodies of Chinese government and Chinese authorities. And with that we open up the new door of the expansion of the Space technology. And once they see the reality of what is to come and what is here, then it changes the next step towards what we call, the Space, complete Space technology in a very high level. And then things will change drastically.

The Space City has been one of the greatest moves of the Keshe Foundation. What we tried to do in 2021, but by criminal organizations, most probably behind it, governments, and now with setup is done, we received enough support, we're receiving enough support, that now, it's not up to now, we had to get people to come to exhibition, they don't see. Now, governments come inside and become part of the research. (1:18) They see what it is, they don't want to be behind. In New Year, hopefully we open our doors to Ambassadors after Ambassadors, from around the world into Space City, calling upon them to join us in the Space Research. Different than what they are used to, but UBESUS 26 is part of this process. Everything is ready to go, everything is set. And thanks to number of Knowledge Seekers we have received enough support, and we're receiving enough support to make sure this goes through, and humanity goes through the change.

Q: Wonderful Mr. Keshe. Thank you.

K- Thank you very much. I wish I had the freedom to show you the new Space Center. You understand what we sat, and what we are sitting, and what will be, and what is to come.

Any other question?

R: I think Donald Trump announced something about a new Space mission, or new emphasis on Space today, for some reason, right directly after the election.

K- Oh, this guy talks through 'thin clouds.' He's the, he's the mouth of the, what I call, the new mass murderer. And nothing else. It's like the flying car, the gas cylinders with pressure, has become a flying car.

R: Yes, it all seems like a blast to the past, to me. (1:20)

Q: … Respectable Professor Keshe, to balance Western risks, a Star Formation (SF) of East nations, China, Russia, Iran and Japan is vital. A key step is a Russia-Japan armistice, returning Kuro Islands, restoring Japan's map world balance. This fields immense geopolitical peace. How can the Keshe Foundation and plasma diplomacy catalyze this four-nation Star Formation and facilitate such historical agreement?

K- The... I was in negotiation with one of the leading companies in Japan, very recently. And, in discussion we had, there were Chinese officials, and when I put the proposal and the system on the table, that the Japanese could become self-sufficient in electricity through a process which we deliver. The Chinese delegation wasn't very happy, not happy at all. And I could understand their position and I could understand the Japanese, one of the leading companies in the world, in Japan. Their, what you call, their CEO, (1:22) sitting across the table with me. And it came to me very, very, what I call, repetition of a understanding. The Chinese don't want the Japanese to access this technology. They actually closed their offices in China, within weeks after my meeting. They've been in this office for decades. When the Chinese found out what is in, what you

call, negotiation with the Japanese, that makes Japanese independent of whatever, somehow the offices of this well-known trading house in Japan was closed in China, gone. Because I paid a visit to the offices two, three weeks ago, it's empty, it's gone. And they closed permanently.

Leading world powers don't want a connection, balance between Japan, China, Russia and the rest. Because they have used this to sell arms, they have used this to create condition of conflict, condition of everything else. If you go to ?? (Jino) City in China, West Coast, there's a section which is known as the German section. You have a German church, you have German shops built, when the Germans occupied China. You don't know about it, but just go and look at the Cathedral in ?? Xindao. Japanese have been the same. They see part of China as their land. Russians see part of the north of China as their land. (1:24) So there is a conflict of power and getting back what we lost centuries ago, decades ago, whatever. And the way the Rothschild family have set up these things against each other does not allow peace on the economic ?? conversation. Because by controlling different things we show our superiority.

And this is what I don't understand between the governments, why one has to be more superior than the other. Why can't they work together? And, so you cannot make these allies, you just look at the past seven days between Trump and EU. They wanted to put a ?? surcharge, America is dying, lack of money. They wanted to put a charge on the European banking system, uses their system. The European leaders said, "Very simple, you put the charges, we will not buy anymore, every morning, the notes, what we call, the promissory notes of the American government, you go bankrupt with it, before we pay our first bill." If you understand what that means, it means the integration of the finance, economy, politics, religion, all has intermingled so much in the history, that it's impossible to see groups staying or building a structure, one against another, or to create a new dimension.

Chinese will never come to negotiation agreement with the Japanese. You don't know the history of background. Japanese have killed 300,000 Chinese in one day, every day (during occupation in WWII). The despise for Japanese in China, deep, is very, very deep. (1:26) It's ... historically there are people who, in, actually, what I call, 'win (fan) the fire' of this hate. We are not aware of it, but because we live inside China, we hear, we see, we are explained to us, what the position is. On the other hand, okay, China and Russia are good, but you've seen the north flank, North West of, North East of China, with the Inner Mongolia and that section, which is part of Russia, Chinese wanted back. That's a very, very... At the moment, unity is out of the fear of annihilation, and the war by the Americans and Rothschild. But in fact, there is much deeper. And it won't happen. It's one of the impossibilities, that Japan and China ever sit on the same table. There's too much killing, too much blood. ?? And it stains what we call, the Korean Peninsula and the rest of it.

You have to understand, Man always carries the animosities and it sits with the governments and now with the people. There are people inside the Chinese structure, the highest rank, they're opposing every sense that the Chinese bring out the Keshe

Foundation. But the opposition is not that there's something wrong with the Keshe Foundation, they want to change the regime that then, when they come, they bring it themselves. And we see that with the Americans. It's not the first time. And this is the process which we learned, is bringing, making a consortium, or a group from this, is impossibilities, absolutely impossibilities. On the paper looks good, but inside you have to understand, the depth of the, (1:28) what I call, hate, inside for each other is very deep. When you speak to the Chinese, they tell you, how much despise, how much Japanese have killed and killed in China mainland, to hold on to the land. It's not a centuries ago, it's... we're talking very recent past.

And it's the same, a lot of you don't understand why the Saudis are fighting, the Houthis and they're fighting. The Islamic Shia world is only 5% of the Islamic world, and they are thrown in the back of the 95%, because they connect themselves to, to the Prophet, .. where the rest go by history. And, that 5%, which includes the, the Iranian, the Houthis, the Lebanese, and partially Palestinians, are, what you call, part of this 5%, and they want to get rid of them, that they can write the history the way they want. This is the problem with Iran and the others. Iran is not a Islamic country. It's a, what we call, Zoroastrian forced on (by) Islamic. But these people connect themselves to the, to Muhammad, and so become that, thrown in the back of the 95%. That's why the leaders of the Egypt and Saudi and the rest are one, because they're all Sunnis. And in Sunnis, war is a different way than... the war in Middle East as we see it, even in the Houthis, it's a religious war, it's not a political war. Sunnis against Shias. Ukraine, Vatican and the Church of Moscow. (1:30)

You see the Israelis and Americans, it's Jews against the Muslims, Shias. If you look Israelis and Americans have sided with the Sunnis. It's the war of religion and now it's come, it'll come to an end, with what we've seen in the elections in the past 48 hours. And what we see with the Israeli elections, the path to peace will start blooming. It's impossible if you know the history of the Chinese and the Japanese. There is no trust, because the Chinese look at the minute we give room to the Japanese, they'll come in and they'll try to take over. And every effort is made by the leaders to keep that separate. You have to understand, 300,000 a day, have been killed by the Japanese, on the mainland China. Every Chinese family, somewhere has lost it ??.

Any other question?

Q: … How can we explain these major changes, taking place on Earth? All the alterations reflected in the Schumann Resonance, including those 50 hour blackouts, during which nothing is recorded. How can we explain this through the lens of plasma knowledge?

K- These things happen so often, we just try to glorify it now, because we can understand little a bit of what we think, ?? we understand (?? all of it). (1:32)

R: I wonder if that was the same 50 hour blackout that Elon Musk had in Ukraine, where the Starlink system was down and they couldn't run the drones properly.

K- Mr. Elon Musk has become one of the... I mean... in some circles he's known as a new Hitler. And he's not using his technology for peace, he's giving technology for government to kill. Soon he lost his ethics, and we see it.

Any other question?

Q: … The water cycle on planet Earth represents the way in which we can awaken. Each of us releases and takes in a finite number of Hydrogen (H) atoms. Are all these Hydrogen atoms more evolved when they leave the body? Are they a gift that we bestow upon the Earth? And is this the chain that links our consciousness, our memories, within the Creator? Thanks.

K- We are a very small, small, small drop in the ocean. It doesn't matter what we think or what we do. It's a collectiveness that will count. But in a way, collectively when the STM connects to the Soul of the planet, to the Soul of the Solar System (SS) and the Galaxy and the rest of it, then little changes can bring big movement. (1:34) And that's the part which is, which counts. But we have to find a path through the communication and through the magnetic field. Communication is the current, magnetic field is the voltage. And if you get the two worked out the right way, you find the motion of the Universe, you understand the motion of the STM and everything else. There is a secret into this which we do not teach, Man is not ready for this knowledge.

You see there is something very interesting I was explaining sometimes go to some Islamic religious leaders. They say as I've said before the 99 attributes of the Creator in the Koran. But Muhammad says if you read all of it, you understand the 100th. And the 100th is actually so simple that the Islamic world have not understood. If you understand every attribute, 99 attributes of the Koran, which is given to the Creator, is merciful, He's kind, everything else, you come to one word, and Muslims, to their ignorance have not understood. And that hundredth, they talk about it every day, they mention it every day, and they're ignorant to it. (1:36) << Speak Arabic language.>> 'Salaam' means peace. When you understand all the attributes of the Creator, you come to peace. That's the hundredth name of the God. Peacefulness. peace upon you. And this is what the world of knowledge have not understood. All the 99 attributes are emotion, are feeling, are essence, they are a sense of. And, when you read the beginning to the end of the Koran and you understand the 99, is peace, that's the hundredth. << Speak Arabic language.>> "Salam" means peace on you. And, Muslims have not understood the hundredth word out of the Koran, and they speak about it every day. They greet each other, and they don't know, they are mentioning the 100th word in the Koran they've been looking for, for centuries. Peace.

We have completed even the completion of understanding of the Koran. If you understood, if you are Muslim, you understood what I just mentioned to you. No need to look for it, as you mention it every day, but you don't talk about it. Because you never understood. When you have the collective 99 attributes, senses, essence of Creator, you come to peace, so it is peace, it's nothing else. Now I'll write these to Mullahs, they'll

shoot themselves. (1:38) You have found the 100th or 100th essence, name of the Creator, is peace. When you have all those, you find peace.

Any other question?

Q: … Dear Mr. Keshe, have we witnessed a new beginning towards peace, in the two most stubborn places, the Middle East and the USA, both now transformed from grassroots, what a change.

K- You got to understand, the world of politics, is like two jealous daughter-in-laws of a family. You know when you have two jealous daughter-in-laws? The family is in peace between brothers, but the daughter-in-laws, the women in life, create so much mayhem, that the whole household goes up to smoke, because of the daughter-in-laws. Because they want to show, who has more, who has done. When you bring peace between the two daughter-in-laws, you find peace in the family, bigger family. And it's a bigger nation of Man on this planet. When a nation starts spending ridiculously on arms, trying to be a superpower, the others do the same to match, not to fall behind and they don't get dominated. Now, with what we see, a bankrupt, broken nation with 40 trillion debts, and in a way, nobody will do, come to rescue, more or less. When the arm race stops, the others will stop. But the energy has been created, so... (1:40) we'll see the technology developments, towards Space Technology and the rest of it. Development, expansion of the knowledge of Mankind.

Once the Middle East war, American war, which is now, is, is, is a, what they call it, lame duck, as they say. Netanyahu cannot do anything, he cannot push anymore, because he is not a Prime Minister. He's got no right to handle the army, army is against him. And, at the same time, Muslims are siding by the opposition, to make sure he comes off the power, and then they will draw the support for it, it brings the nation into a collapse. When Netanyahu goes, there's no more forces left to push, if it's correct. There is no one to push the America to do whatever they did. And in a way, they spent so much in this past, they lost so much, in the past months, in this war, that it is a big percentage of the debts of America. All these monies which created this 40 trillion, maybe 10-15% of it, was to build these bases in Middle East, that they can control everything. All gone, they have no more bases. So now, they are paying interest, more than what they pay for everything else, for the basis which is built and now is not available.

And we see the same thing with the Chinese. Chinese have spent billions in 'One Belt, One Road.' We don't hear that much of it, because it became a big financial disaster for China. And now they sit in the same position. But China has an internal economy which can turn it over, but Americans don't have it. And we see the collapse of... doesn't matter what they do. Possibly the rise of China, but China is not a war mongering, is a capitalist communist, which means, they only look what can be beneficial financially, at the same time, they can push with the, what we call, the agenda of becoming a superpower, (1:42) but without the wars. We don't see China, if once American economy and the military collapses, the way we see today, the Chinese are not those who want to become super

power, and change governments, they influence governments economically, for their own benefit, but they are not those who create wars.

And that's why we say, we see the end of the wars. The situation is changed. British are working very hard against this, but Britain hasn't got that power anymore. It is, it's the scene has changed in past 12 months, drastically, in the past two years especially. The biggest, what we say, the bullet, the rockets they shot in their foot, Americans and Israelis was to start this war. They brought their own demise, their own end. We've seen it in elections, we've seen it in past two weeks. And we see how these leaders will go. We are ready for peace, but the religions who were pushing this peace, these wars, now themselves found out they lost too much by the religion, there's no one listening behind it.

Any other question?

Q: … Dear Mr. Keshe, could you please go deeper on how plastic in the ocean will help the elevation of humankind, please?

K- In Nano technology and in Gans technology, we've done a lot of work in plastic and polymers. (1:44) And we know certain Gans's interfere with the structure of plastic, which means that they open the bind. And when the bond finishes, it just opens up. We reported this 20 years ago in Coca-Cola bottles. And I remember when I was in Iran, we did some work with systems in how to see which will create a bigger loss in opening this chemical structure of the plastic. And what is needed? Because if you remember, if you made Coca-Cola bottles, or if you did, you always lose the threads on the top and the big heavy button on the bottom of the bottle. And this happens only in certain kind of structures, which means if you have ever done these tests, we've done hundreds and hundreds of them, the cap of the Coca-Cola bottle literally falls off, because there is no thread. The Carbon composition has changed and it's become a gas. And we ?? do understand this system and through Gans technology, when you create certain conditions because of the amino acid in the oceans, because of the combination of the metals in the ocean, it creates a natural process that the plastic opens up itself. The chemical composition, a ?? lens opens up. It's something we've seen, we understand fully. And the process is like what you see in your bottles. You create a CO2, it changes color. (1:46) You produce a CuO, you see it changes from black to green. This composition change, ?? PEPs like plastic ??, which we see in the ocean, have this connection, and you interfere with Magnetic field of it, you don't chemically dissolve it, you open Magnetically the shields of the interaction, and they just dissolve. They don't dissolve like a sugar, you know, they dissolve through release of fields, energy in the bonding structure.

Any other question?

Just one second please, one second. (1:48)

Sorry about that, carry on.

Q: … I know we can't discuss health things. There's a general question about eye Gans, and whether that is available through the Keshe Foundation. There's many people have eye issues, and they're looking for some sort of relief from that sort of thing. Is that something you can discuss, or is that off the table?

K- We are very open about it. Keshe Foundation Medical or Medicine Company, is already officially set up. And you'll find official certified materials to do with Wellness and the rest through the Keshe Medical Operation in China. You can come to China, buy them, take them with you. But to us looking for the European certificate, these materials will be available. We will release about 100 products, or 99, maybe more, products in the coming weeks and months through this, what we call, medical company. We actually set up a company which only produces material for the Wellness and the health. And you, I think by the end of November, the first series of what we call, materials will be tested in the hospitals in China. (1:50) Hopefully, as we are setting up factories, you should be able to get to materials which is dream, or the things you were hoping to get. If you find someone in China who can buy it and ship it, or you can come and take it. A lot of these technologies now officially is coming as a product in the Chinese market and tested in hospitals.

This is part of the Keshe Foundation Space Program, Space Center. So it's not that we don't talk about it from now on. We actually we'll give you links to the sites in China of the Keshe Foundation, which you can actually order, but it cannot be exported out of China. And we will not, at this moment, endeavor to create a C certificate or an American certificate for them, because we want to concentrate on development of the Space technology and energy for changes in the Space. But the first four products 100% should be out by end of… we have actually pre-sold to the hospitals. That's why I'm so sure I tell you. Some of the products are already pre-sold in tens of thousands into the medical, what we call, hospital structure of China. So you can get it. We don't ?? interfere. But we have set up a factory which produces these materials, as we call it, Space medicine. And going through a certification, factory is getting set up, factory should be completed by the end of November, I hope. Because the parts has been ordered, the factory is getting assembled. And the parts has, we speak this week, next week. (1:52) And all your, whatever it is, we will not announce it outside, but you got to go into the Keshe Foundation structure, Space Center, shops, to place where we cannot export it. You can fly in, get the material, and go through the process yourself, or if you know a Chinese can get it for you, and send it out to you. But Keshe Foundation will not sell these products outside China, because our license certificate is for China mainland. And is not to go to chemists, we have pre-sold into hospitals, going directly in.

R: Okay, so what about working through the Keshe Foundation doctors? Is that still doable? Is the office...

K- It has to be. These are the things which we are restructuring with UBESUS 26 a lot of things are getting changed. We concentrate in our plan in the coming 12 months in the Space Center is opening up the Wellness Center or Health Center in conjunction with the authorities not as a Keshe Foundation because we have to be in the structure that we can

see. One of the products which will be released in China I think in the next two months is the recovery from elderly people from what we call, everyday conditions. And that goes through the test through hospitals and certification and licensing has already been set up. And there are a couple of things that we might put certification for export out of China to what we call, (1:54) international community and that will be done through Markray Corporation of the United States.

R: What about the Spotify store and so on, is that going to open soon?

K- Everything is done with it, everything is ready for Shopify. It can go online anytime but we have a small position. I don't want to discuss it because other people who are there to take advantage of us. It's fully done, Shopify is complete, complete. It's just more or less a press of a button. But we are waiting for some decisions from governments, very important to us. And Shopify and the structure of the Keshe Foundation, especially the Coins, everything can go immediately within days. But to, as we say, we are very tied up with our organizations, with being in line with governmental policies, and what they want to do with us, that once we know that, we can switch on the system. Shopify is completely, completely done, and is ready to go within instantaneously, more or less.

R: For people that are looking to buy products from the Keshe Foundation, could they contact local Keshe Foundation representatives that are...

K- Yes, you can buy. Through our resellers you can order, yes. Because resellers buy from us, resellers have a different access to us, than the public.

R: Is there ?? resellers, or how can people find out their local reseller, or someone that...

K- Resellers we have in Austria, we have in Holland, we have in Germany, we have in Switzerland. Where else do we have? (1:56) I don't know which other places we have. You as a reseller, resellers have always had access to our products. You can buy it from your reseller, but because it's a trade, is not a selling. And they see, they have a structure, they can see in the backgrounds, what they want to buy, what they want to order. Go to resellers, you can order. I'll try to get you the resellers links next week, that you can directly connect to them, and place order, because resellers are different.

R: Well that'd be great in the meantime, until things get sorted out at least.

K- Yeah, it's a economical, it's a political.

R: Well, perhaps all the political people will have a new attitude going, going forward here.

K- We have a reseller in Vietnam, for Asia.

Any other comment?

R: Well I would like to say that you mentioned the hundred names of God. We happen to have exactly 100 attendees at this moment.

K- Maybe each one carries one attribute.

R: Maybe.

K- Thank you very much for today. We call it a day. (1:58) We've been here long enough. And we hopefully meet next time, and we'll learn from each other more.

R: … << Message from Universal Council.>> "We invite all the time, all the Souls, freely to continue elevate to continue illuminate all leaders across the planet Earth then all communities to achieve peace in a specific time unite, what time daily 9 pm Central European time for unify in one wish. (2:00) We, the Universal Council, give from our Souls so that this cycle of peace may extend to all beings on Earth and throughout the Universal Community forever. It's time to say thank you so much beautiful Souls for your support all the time to work with the Keshe Foundation. And remember you give your needs, you need from your community to Universal Council and offer your Soul to serve your community and offer is ?? write to info@keshe.foundation. It's right to say, okay, I am apply for UC member or you apply for UC support member. Thank you, thank you. Thank you Rick again for the opportunity."
