668th Knowledge Seekers Workshop November 12, 2026

(Transcription, Editing and Proofing done by KF Brazil)
(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

K- Thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back, to another cycle of learning and teaching.

As we enter a dimension (D) of understanding of traveling in the dimensions of the Universe (U), we have to understand, (:16) now in more detail, how stars, planetary system, moons, galaxies are created. We have made a lot of assumptions, we have made a lot of 'think so,' .. as such. But we have never worked on the dimension of the magnetic (M) field and plasmatic field. And the life of the Man, or any life in the Universe, on any planetary system, or even in the space gaps of the Universe, all depends on the same factor. It's just that how these factors change, slightly, that they allow life to exist. And, as I said many times, plasmas are football players, opportunistic. They look, they wait and see what opportunity arises, that they can gather, accumulate, create, or sustain life in the fields, or in matter state.

As we have been going through the dimension of the understanding of the Plasma technology (T) over past years, and even in the teaching of the Wellness, we always said, "The bigger feeds the smaller." And this process carries on. The stronger feeds the smaller. The biggest is the size and magnitude of the magnetic fields, not the physical size. (:18) But what comes to be understood, that when you do understand the process of their travel in deep space, physically, or through the energy system, what we call, Magnetic field package system, what we call, the Plasma technology, the factors are the same. What I teach today, is in a way, combination of the development of the physical system and the energy system, what we call, Magnetic field in motion. Once entity creates a condition of confirmation of existence, as any given environment, then it has to sustain, it has to create a dimension of manifestation.

This is important for Knowledge Seekers to understand, that when you transmute, you might do a combination of transmutation and transportation. Because, while you're transmuting, suddenly you come across a field environment, that is at the field strength of the, materializing your field strength of the Soul. You have that capability yourself, but, environmental condition is different. Environmental is not like anything we know, we always compare the matter state. Rain comes, if it's warm enough it'll be rain, if it's slightly colder it'll be a hail storm, if it's going to be slightly colder it'll be snow, and if it's slightly it'll be all frozen. In the world of plasma, in the world of the energy transfer, such a thing does not exist. You don't create a condition of the change of weather, (:20) but, you create a condition of strength of the field. And, once the world of science understand this, the transportation, transmutation, in combination with each other, becomes a, what I call, 'beauties of the Creation.'

For Knowledge Seekers to understand, is that, they have to decide, the future space technology has to decide, in what energy field it manifests itself, and in what energy fields it transports itself. What this means is that, as we are developing on the edge of technology, transportation, transmutation system, we need to understand 'horses for courses.' Until we do not complete this process, we will not be able to jump the technological, scientific leap, that is needed for Man to travel the speeds, beyond the speed of light, as they put limitation on themselves, and to travel in energy conditioned magnetic fields, which has no limit, it's instantaneous. For this reason, as we talk about two dimensions of interaction, but in essence, (it's) the same thing. So, what is needed to be understood, is, as we said, the stronger in the plasma technology feeds the weaker, that it can bring to balance, that there is no motion, because then, as long as one is stronger, one is weaker, in feeding it, you create dimension of the motion for the receiver, or for the supplier, which means the demand. (:22)

This is why electrons move. The world of science has not understood why electrons move, why protons move. This is what we said, magnetic field and amplitude, when they change from one to another, they create the motion of the matter state or the field state. And if the world of science understands this, this, what I call, fine point, you then decide, you travel in the matter state, or you travel in the energy state. And, what would be the consequences of this position? How do we transport ourselves in a energy system, and then we convert ourselves to matter state, and then we can convert ourselves to energy system, this is what you do with Gans's. None of you have managed to convert Gans's into matter state. You created out of matter, but none of you up to now, have managed to convert it to a matter state. Because of the same system.

What is essential for the world of science to understand, is that the energy magnetic field strength of the higher order, feeds the smaller order. The Creator feeds the Universes, the Universes feed the Galaxies, the Galaxies feeds the Stars, and the Stars feed the planetary system, they, they feed the plants, and we see it, if it's a creative combination, they create life, the way we see on the Earth. So, our Soul, our physical magnetic field energy, is another step in the process of, what we call, lower strength. (:24) And this is why, if we look at the whole structure of the Creation from the Creator, higher strength, but lower field, it's a very fine game play. Then we understand, our life, our Soul, is another step down the line, creation of another position. But, all the way down the line, there is one common denominator, which goes from all, from the Creator to the ?? created, to the finite. We look at it now, as a Creator, the Unicos, the Galax... the Universes, The Galaxies, the Stars, the Planetary System, the Soul of the Man (STM), is somebody in middle, still going on.

Does this mean, when was promised to be the 'Day of Judgment,' does your Soul move further up, it has got enough energy, or goes further down in the strength? Which side is the Heaven? You go higher, you become creator of others, or you go down the line, you're weaker, you lead to be subservient to another. But, in all essences, two things exist in the Universe, and the world of science has to understand this. Connection of the Universes, in dimension of understanding, and connecting to each other, is done through

Hydrogen (H). But, what we said that, from the Creator point of view, to the Unicos, to the Universe, and down the line, is the line of the Hydrogen. Which means, we have to gather higher order, magnetic fields, to be able to move down the line. (:26) And the higher order we get, the smaller we get. This is why Black Holes exist in the center of the Galaxies. When you compare the whole size of a Galaxy with its Black Hole, the whole size of a system directional magnetic field conversion, we see this as what we call, the dimension of existence, the line of the connection. But, when we travel in the dimension of the matter state, we go to Carbon 14, which is the reflection of the Hydrogen itself, down the line.

So, if we look and understand, that the fields, the rays of the Sun, in losing their strength in interacting with the other field conditions, will carry on in the dimension of the fields, till they reach an environment, that that field strength, can match the field strength of the matter state, what we call, the Inertia. What this means is that the fields of the Universe can cross the whole Universe, and never ever manifest themselves, because they have not met the match, in reverse to its process of the creation, as themselves, that in entanglement of the two, create a condition of absorption, what we call, the Inertia. what we call, manifestation of physicality.

This is, if understood, allows Man to become the traveler of Universe, (:28) allows Man to become the, what we call, in the next progressive development of the transmutation. What does this mean? If you are traveling in a certain dimension, field strength, for you to be manifested, the Inertia of your Spirit (Soul of Physicality - STP) has to be equal, but opposite to the dimension of the field flow of the Soul. That the interaction of the two creates life. We see the fields of the Universe, we see the fields of the Sun, cross from these sources towards the Earth, till they are not chopped up, in a way, by interaction of the field of the Earth, and attracted by the field strength, of the Inertia of the matter state of the planet, there shall not be manifestation, or what we call, materialization.

Once the scientists understand this fine-tuning, the transportation and transmutation becomes a child's play. You take two magnets, similar pole, reject. Similar pole attract. Similar pole reject. Similar pole attract. This similar pole attract. This similar pole reject. (:30) Just because we've been told that two dissimilar pole attract to each other, we have accepted this fallacy. We have ignored that the fields within two dissimilar source of magnets, have opposite rotation within themselves, which they repel. Which is not dependent on the source of the matter state. What does this really mean? Is for the fields of the Universe, to become manifested, in the matter state of the conformation of existence, while you are traveling in the dimension of energy, is the interaction of, manifestation of, what we call, the dimension of energy Inertia matter state. Or energy Inertia, field state.

This is how there is a Soul in every cell, and there is a Soul in the STM, for the whole collection of the Souls. And then the collective STM becomes that part, in conjunction and connection to the Soul of the Planet and so on. If and when the world of science matures to the dimension of the field strength of the plasma, then Mankind will be able, not only to transport, not only to transmute, but to decide when to transmute, when to

transport, when, how to manifest itself. But, in all dimensions, the STM, the ?? motion of the Man, all dependent on the energy of what we call, dimension of the plasma of the Hydrogen. (:32)

Then, if you understand this, we understand as the fields of the Universe transport, transmute at the field strength of the Hydrogen, then we understand very easily. If we manage to understand the process of the attraction and the repulsion fields in each other, we can create the dimension of the Inertia of the matter state of the manifestation of the entity of the fields. Which means, we... if you look at the leg of a bee, and you see these little hairy points, Each hairy point has a magnetic field strength of its own, and if you can replicate each one, you can take the nectar which is of that, which is of totality, field strength, of what you need to connect to, to manifest yourself in the dimension of the fields of the environment, the Place, the Possession, and the Position. Which means, if you understand how the planetary system are connected, through the magnetic field of the Hydrogen, this gives you an insight that the center of every planet, has to contain Hydrogen. And the fallacy that the center of the planet is a metal hard disk, does not qualify. And the reason for that, and if I understood, this is the process of, then we understand that the Totality of the field strength of the Universe, in understanding the Totality of the work of the Universe, goes back down to connection to the line of the Creator. (:34)

So, we transmute at the line of the Hydrogen, we transport at the line of the Carbon. And if we can create, we can understand this point, in a very near future, Mankind will be able to transport, transmute, transport, transmute, and so forth. But, Man has to understand, the process of the connection of the STM, through different field strengths, because it's in transportation, and it's not in transmutation. Man can and gets stuck with the Carbon 12 in the Amino Acid, which is surrounding the Soul. But, the Carbon 14, it transfers itself, energy, to transfer and transport and transmute, in all dimensions of the Creation. If the world of science moves forward, we will understand why even the isotopes are created. We have accepted this fallacy of isotopes, just it is, you have a Carbon... Then we understand why even half-life is created. And if we understand this, we can estimate the life of the Man at the point of the birth. But I said before, half-life of us is fixed, depending on what field energy of Hydrogen was the cause, was the source, was the trigger point of the life of the STM, of the central energy of the Man? Then, all you need is to control the emotion. How much of that Hydrogen will be reflected to become Carbon 14, (:36) and how much of it will be reflected to be Carbon 12, and how much of it will be, to be the Soul of the Creator (STC)?

In a way, what we discussed all the time, through emotion, we decide which energy we take, and that energy become the source for us to live. When we lose this process, when we lose this misunderstanding, or this ?? understanding, then we will become the passengers of the Universe. We decide where to manifest, where we come to energy, when transport and when transmute. And this is part of the technological development of today. We watch, we create plasma. What I've said, very recently to many Knowledge Seekers (KS), the theory that how this planet rotates, the theory of how the fields around this planet are created, with the new knowledge, with a new understanding of the process

of the creation and created, and control of the fields, become impossible for humanity to understand. What is the source? How the source converts itself, and how we have played the game as before, whatever suits.

The STM, through the emotion and through the, what we call, the Spirit, can create, can use, can connect to every point of the Universe, If it's allowed and shown. Today's teaching is not jumping everywhere. Today's teaching is very precise. (:38) If you understand the fundamental part of the teaching, that you transmute through the dimension of the Hydrogen, you transport, manifest through the Hydrogen, at 12 level of strength of itself, what we call, the Carbon. But, we need that minimize, or what we call, balance field energy of the environment, what Mankind calls, Inertia, to manifest ourselves in a matter state, in presence of the others. If and when we understand the connection between the STM, the Spirit of the Man, the heartbeat of the Man, the operation of the every organ of the Man, then none of us shall ever die. It's a secret of life, long life. But, these secrets, very few have managed to achieve, to understand. It's not that you move, it's that you decide, pretend that you will be moved. And then it's the Soul of the Spirit, or Spirit of the Man, which will manifest, how and where, and what will be done to you, and how way. One we call, it the Inertia that leads to the manifestation of the element, one we call, the magnetic field, which becomes the Inertia of the STM. (:40) And all Souls will manifest themselves in respect to this field condition as the Inertia of the STM, and the Inertia of the physicality (P) of the Man as we see.

I wish I could explain more, because I understand from the hearing, the parts of the teaching, you have not even learned that part. Try to comprehend how the Hydrogen connects to another planet, and try to understand the production and manifestation of that, what we call, fields, in respect to that environment. When we develop technologies, which can measure the speed of the fields, not as we've seen, just call it the speed of light at the end of it, whatever it is. Once we understand how the fields move, how we can control it, how can we split it, what can we put in between them, it's a topic for Man to, what you call, work on, till that day of the manifestation. Matter state needs Inertia of the matter. Soul state for its manifestation needs the Soul energy of the matter, which is compositely is made of it. And, once we grasp the Totality of the picture, (:42) then we see how easily we can transmute, transport, transfer, and, at the same time, enjoy the beauty of the Creator. We go for a break, and we come back. But, if, as I always say, if you understand this part of the teaching, then we can move to the other, because next week, I'll try to ask you, "What you understood from this teaching?" We go for a break, and we come back.

>> BREAK >> 668 KSW November 12th … (:50).

K- … As usual, we got a few announcements. Some of you have reported that the Keshe (dot) Foundation is not working. It is working, it's getting revamped. They had to close it for a few more days, to reconnect all the last bits, that we can proceed without, while we are loading the other tamper with it. So, if you report to us that Keshe Foundation doesn't work, it works, It is a password, which is the, what you call, Internet, what you call, service people can change, and bring it updated, and to move on. This is part of the problem, not only Keshe Foundation is facing, but all the major systems with the AI, have become more or less, a big headache, for hacking, and the rest of it. So, we are not down. If you have a pass code, you can go into the website, and use the technology.

The number of you have started receiving the next cycle of ONN's, which has been distributed, we have, can you please call us back, send us a message that you have received your unit. It's important to us that we, by the end of this year, we start sending out the next cycle of the ONN's, once our team sees everything is fine, it works, and we can establish the next cycle, which is the wireless system, (:52) that we can go through without the communications, satellites and the rest of it. So, if you have received your ONN's, or you receive them in the next few days, please let us know that you received it, that we can do our work, but at the same time, our people will see, once you connect, that it's connected. Do not attach any computer to it, do not attach any other things to it, just plug it into the Internet and plug it into electricity, it does the rest of it itself. This brings us to a closer step by the end of the year, to release everything which we want to do, and for our operation worldwide.

We are asking directly to the Russian team, those of you who are in space, those of you who work in space, Russian Space Agency, or you have contacts, We would like you to get in touch with us to become part of the Space technology in collaboration with Chinese team, and the facilities will be made by your government to join us. We have started the structuring, and if you have any connection with the Russian Space Scientists who would like to join us in the Space Center, please join us. Please get in touch with us and the facilities will be made by the Russian government to rapidly join in to further development in the meeting and communication we had with the officials of the Chinese, what you call, Russians. And they would like to facilitate as many Russian scientists to join us in the next phase. If you are Chinese scientist, please in the next week or so, go back on the Chinese Space University, (:54) the notes which goes out, the scientists we are looking for, the facilities will be provided by the Chinese Space University in Beijing, to choose the scientists which will join in the Space Center.

This is an ongoing process that now has started and we start recruiting scientists from Russia and China in the space development. But the promotion of the choosing of the Chinese scientists starts next week, hopefully, in Beijing University. And if you are a Chinese scientist, go through the website of the, what we call, the job opportunities, in the Beijing Space University, you can only see it if you are an internal student, or have access to it, that the job, the conditions and everything else, has been put in. And, what we call, the next phase of the recruiting scientists from China and Russia, has kicked into it. We had meetings with the Russian, what we call, diplomatic corps, in very recent past and this is offered and we looked at the, what we call, Russian chat room of the Keshe Foundation and if you are in that chat room, get in touch with us directly and we facilitate through a collaboration between the four nations structure to, for you to join us in the development of the technology. If there are any questions, we try to answer.

R: One question that has come up is about the distributors and shops that might be handling some of the Keshe Foundation products. And you…

K- I sent you a link. (:56)
R: Yes, I've got the list.
K- You can post that list, people can see.
R: Yes, let me ... try to get that up here. I'll put it on the screen first. And, then I'll post it also in our chats, if I can. It's a little difficult in Youtube, but I think I can do it. Let me see here. Oops! That's not correct. Let me share.
K- Oh, we see other things on your thing, on the screen.
R: It's just a document. Okay, that should be the list here. And, it might be a little hard for people to see, but that's... I can make it a bit better like that. And, I'll also put it in our chats here. So, let me do that now. Just bear with me a minute. Okay, that should be in the, in the chat for Zoom, and let me do the more challenging Youtube one here, we got Germany, and Switzerland. (:58) Just be another minute or so here… So we have quite a few countries here represented.

K- We have two in Vietnam, Netherlands, Austria, Switzerland, Germany.

R: … I think that will more or less work out on Youtube there. It might be a little bit confusing, but yeah, I think it shows up okay. All right, great. So, that's clear and there's an opportunity for folks to do some shopping, if they would like. And Mr. Keshe, when do you think that the ... shop, or the general shopping for Keshe Foundation products, through, directly through the Keshe Foundation, when do you think that will take place?

K- Everything is ready, it's just... literally, it's a flick of a finger, a click of a button. That we are, we think this is all connected to a structure of bigger operation of the Keshe Foundation, is a legal side of the work, which is holding us back, in how and where we position and we move, (1:00 or we go, we position ourselves. It's just a, what you call, games played by governments And, in the past, more or less, 3-4 weeks, we're sitting on that, to see how certain government make decision, about the future of the Keshe Foundation. And, if the move is in our direction, we will open, if not, we move the Keshe

Foundation operation, to structure within the, what we call, the legal restriction or limitations of the everything else.

You got to understand, there is a huge pressure by the European government, to take the Keshe Foundation out of Europe. There is a unanimous decision made, somewhere in the EU, that the Keshe Foundation should not be in Europe. And, we are sitting and watching how they interact, And, even most of the people don't know how to structure it. And, if that takes place, a lot of work of the Keshe Foundation will move into a Third World Nation, out of EU, and then we'll ?? boycott EU ?? with the technology. As I said, we are watching what's going on. And, once this decision is made, as you see, it's a Central European Government decision, that the Keshe Foundation has to, what you call, not to be in the middle ??. It's become what we call, the 'Catholic game,' the Catholic club. And, scientifically, it's not there. So, we're waiting to, for a final decision of this, and then we decide how to place ourselves, how to position ourselves, in respect to everything else, (1:02) into operation, the way we are. This is the game played, we've seen this game before, now we see it very openly, they don't hide it anymore. And, the reason a few things are holding back, this is because we introduced, massively, the, what we call, the Keshe Coin (KC) and the ONN (One Nation Network), and it doesn't go with the way the Europeans have been ?? moving the rest of the nations around the world. and we become a point of conflict, in releasing, start releasing the Coins. Because, we do not obey, we are, we are decentralized, we are not conditioned to no government, and it's for the people to use it. And by next few weeks, we'll totally ??.

Any other question?

Q: … Thank you very much for your teaching, the time, precious time you put for us. And also, I hope you are very well, and doing very well as you wish. So, after that, it seems to me like everything is happening by placing magnetic fields by themselves between themselves, based on this original law. Then what about the thinking process, decision making determination, changing the distant destiny toward an equal where does it go in all these things. (1:04) And then also secondly, in the Koran says there is no one leaf from the tree falls unless God, unless God wishes this. So, where does it, so can you please clear where this thinking, intention comes into this game of the fields between themselves. What's our part of individuality and changing the way? I mean, it seems like material, non-material, stone and human being … ??.

K- You see, what you're trying to say, I was talking to Knowledge Seekers, last couple of days, says, you know what's the problem? Keshe Foundation will not be touched, will not be touched, if you would have not touched the religions and operation of the Soul. And, it would have been totally different. But, you cannot work with technology of the Creation, if you try to deny the source of the Creation. The rest of it, is the intention and condition and Position and Possession. You decide, through emotion, to change. When you have a Soul, it means you have a dynamic condition, which you decide how to interact with your environment. (1:06) And when you put the emotion into it, then it comes the rest of the process. When you say, or on Koran it says, "Even drop of a leaf." That's symbolic, that it controls everything else. But in fact, the system is set on the automatic pilot, this

condition, met at this condition, in this position, such a thing happens. You slightly bring the temperature to a certain point, this happens, the composition chemically changes, and then, this is the outcome.

So, a lot of the Creation is systematic, it become so much diversity and interaction, in a given condition, that automatically, due to interaction of the field strength, such a reaction, such condition, manifests itself. When it comes to the Human being, we have added, what we call, a sweetener to it, that the emotion does it. The trees do, they work with their emotion. But the stones, they've chosen not to, we stay, we go totally materialistic, we don't change anything, we don't take anything, we don't give anything. We stay put.

If we take the emotion out of the whole equation, the whole Universe is the same. Just the matter state, and sequence and consequences of field interactions, temperature, matter state, and the rest of it. But, when you add emotion to it, it's totally different ballgame, (1:08) because it's a 'side kick' into the whole structure of the decision making, or interaction of the fields. And nowadays our scientists are trying to explain everything. This is because of the physics of this and chemical interaction of... It's all pre-set, part of the structure of life is pre-set accordingly, and part with, if it has the emotion, it can change that pre-setting to others, to other things. Our emotion decides if we get a cancer. Our emotion decides, if we move. A stone doesn't have emotion to move, it has a Soul, but, "Sorry, I'm sitting here, if somebody moves here, I move." The trees do the same. And, they have emotion. But, as I said, they choose to stand where they are, so, their emotion does not act that much, but they can change a little. But, with the, what I call, living things, then the reaction comes to it.

If you read scientific, or go to children's scientific books, what they say, "What's the difference between the animals and plants?" And, it induces seven things. And, the only difference between the two, it says, is reaction. They all eat, they all grow, they all have waste, they all do same thing, seven are characteristics, but one doesn't exist. And, I thought, that's the wrong way to put to children, that reaction. Reaction is the emotion, that's how we react. The trees have their emotion as well. (1:10) But, how things happen, is become totally automatic. Because, you put a condition, and when that condition met, that happens. You create a gravity of the certain fields, the Earth absorbs that specific matter element. Nothing else.

And this is what I'm teaching of today, if you understood. In a very subtle way, if you understood, it confirms the existence of, confirmation of the existence of, hollow center, Hydrogen center, which is in a plasma condition of every planet. A solid, as they told us in physics, that the center of there is a metal core, It fitted the way they told us, that the oil will finish this, is from dinosaurs, and the rest of it. Today's teaching is very fundamental, if you understood. And it goes back to what you just asked a question of. It was a confirmation, that the center of every planetary system, every structure in the Universe, is a plasma of Hydrogen. if you didn't understand what was teaching about it. Then, the emotion of the fields interaction, on the transformation of that part of the energy, decides the manifestation, what we call, on Carbon 14 and Carbon 16.

This is what I said, "You travel on the Hydrogen." But, you, you, you travel the Hydrogen, but you exist through, they exist through Hydrogen, but you travel through Carbon 14, (1:12) in the dimension of the STM. (But) you travel in dimension of Carbon 12, in the physicality of the Man. The, the deeper structure of life, is amazing, If the Mankind understands this process, as I said a couple of teaching ago, we are going in a new direction. You will see how we gradually go into taking Man in the dimension of motion, through emotion, we give you the opportunity to control.

As I said, couple of Knowledge Seekers went over the board, couple of last week or so, and they tested the new flight system. And the gentleman who was sitting, and he's listening most probably today, he could control his heartbeat. And go back to the teaching, what I always said about the heartbeat. If you control your breathing, your heartbeat, you can control everything else. But this time, it's not the control the heartbeat through breathing, is the control of the heartbeat between emotion, which means the Soul is ready for transportation and transmutation at the same time. We put this in test with the Chinese military in a very recent, very, very, very near future. Which means, we have developed a technology that can interact with the Soul of the Man, that the STM, through Soul of Physicality (STP), can control the physicality, and the person controls the rate of the heartbeat, without physical interaction. (1:14) Without running, without breathing, change of breath. We never done this, and now we have the first case, the technology is so on the edge.

It's amazing how we, with the development of the new systems, we are going into the position that we have nothing to do with physicality. Through Magnetic field, plasmatic fields, we can change the heartbeat, which changes the Spirit of the Man, which can, allows Man to transmute, to transport. This is the, this is the, what you call, decision making. But decision making through the fields of the Soul, not the physicality of the Man. And, in the coming time, we will understand this clearly, much, much deeper. Which means, if you go back to the teaching, said, "You can control the heartbeat, you can control the, what you call, the Soul." How the Soul can be released, because this is what happens in your dream. Now we can control the heartbeat, without anything, which is through the dimension of the field of the plasma. And, in two different position on this planet.

I heard very recently that Mr. Musk wants to put one million new satellites in Space, that everything completely goes up there. If you understand what is coming, that you don't need. What is done physically, with the new technology, especially some of you receive the ONN's, now, in the past few days, (1:16) we don't need satellites in the sky, we have 7 billion computers as Humans on this planet. They interact with each other, the technology is there to be done. They decide collectively what we want to do. When I heard the news I said, "This guy is ?? dead, they don't understand what is to come."

We just need to connect enough of you Knowledge Seekers together. That, through the decision, you are the peacemakers, you have decided to become Man of peace, you will change the Humanity, 7 billion. You don't need satellites, and the thing is, it's exactly like

the ONN, ONN become part of that system, you become that computer. You'll become, what we call, collective decision of those, who actually trigger the first, who shoots the first shot, will decide the game. And, Knowledge Seekers are there, you just make a decision, and we'll see 7 billion Souls, plus all the animals, and the rest of it, will move to the dimension of the peace. You don't need a million satellites, you have 7 billion human brains on this planet. Do the same thing, and you don't need to go up there and drop ?? down. If you even understand the implication of what is being claimed, it's ridiculous. So many satellites every year fall back on Earth. What we're going to do with one billion of them up there, one million of them up there, dropping on top of us every day?

This is what decision making comes into it, and not systematic, because it's automatic. (1:18) The knowledge is there to change the humanity, and the systems are getting set in. And we don't need any more, what we call, matter state. That you, you fall in love and your heartbeat changes, you run and your heartbeat changes. You cannot bring your heart to zero, that you can allow the Soul to take over. Because, when you can bring your heartbeat to zero, it means now the Soul is at the point of death. And, in this trial, the person who was using it, clearly states, "I could stop my heart", which means I can travel through the dimension of my Soul. But the physicality is still there. And when you get to that point, you tap into the Knowledge of the Universe. And then, you understand what the next position is.

Q: So, how can this emotion of the Soul, can affect others around us, other Human beings or animals?

K- Emotion, if it's accepted through the Soul, to be the fair, it gets triggered. Correct. It's a choice of us, how that emotion is. I always said, "You kiss a person, you get a kiss back." (1:20) Somebody else kisses a person, you get a slap on the face. Somebody kisses the same person in a different way, and he gets a cuddle. It's the same face, it's the same kiss, but creator of different emotion, responds to that emotion. So, emotion is the factor of it, and this emotion is the controller of the every Soul. In the new technology, we will explain this in detail, which is coming up. If we bring, 30, 40, 50 of you online, I'm playing with the, with the thoughts, at the moment. And, see if we can emotionally connect all of you, because now the system is there. But, one person has the capability to go, and the rest will follow. And, the system has been made, that we can maybe 20, 30 of you, which you don't hear each other, but we can connect you emotionally, through one person, that collectively make the same decision. You all be hungry for an apple, you all be hungry for what you call, an orange. You collectively, we want to become peaceful. (1:22)

Q: What you said, I think I understood you said, "If there is one Human on Earth, becomes enlightened, it affects all Humans on Earth."

K- Yes, because we are connected. Now we can connect. Now we can connect. We have found that profound system, that we can connect. You know, we do a lot of tests, Knowledge Seekers in tests and everything, they tell me things, but they don't understand what they say, but when you sit outside, we do. We have discovered very recently, that,

for example, how the atmosphere of planetary system are created. It's amazing. Now, if the reason for it, which is going to bring us a knowledge, can we change the atmosphere through emotion? And then, can we create the atmosphere, according to the structure of the plasma? What they... we accepted we have a atmosphere, but we never understood how it's created. Even in the Book 1, I tried to explain it. But now, we have a system which creates atmosphere. It's not a magnetic field, it's a plasma field, which in its interaction, conversion, creates a matter state field, which is what we call, weather. And, you can control this, to create different atmospheric condition. (1:24) Now we understand why Earth has this atmosphere, and how it's created. It's not created in the outside. With all the things they say, "Oh, when the CO2 came to a level, and then the water happened, and then life started." No! The atmosphere is controlled by the center of the Earth. And, it's totally plasmatic. It's not that, "Okay, the Magnetic field comes out and creates the Magnetosphere." Magnetosphere is different than the, what we call, atmosphere of the planet. Plasmatic atmosphere. And, now we understand how to create this. and we can create it by emotion.

I was telling you one of the Knowledge Seekers, I said, "If I write, start writing again, like the Black Hole paper, it will change a lot of things in the world of science." The reason is, we have a system which does it, it's not just we say so. And, you can control it by emotion. What does this has to do with us in Space, if you want to be in a matter state? You change a condition within you, that it creates atmosphere around you. You live on the 1G, doesn't matter where you go. Creation of atmosphere has nothing to do, what we've been taught.

Q: They are primitive yet.

K- No, but we understood what we understood. We tried to justify. And because nobody else could say anything, they became the rules. (1:26) As I said, when there is enough fools, and they all laugh at the same thing, it becomes a norm. We've been those fools, and we've ?? never said anything, and we just accepted, because we had nothing else, nobody, we could, we didn't want to decide to interact, or to understand more of. In the past 3-4 weeks, the advancement in the technology, and even some of the system we built a month ago, but this knowledge are out to date, out of date, historical. Because it's just, we see it. We have a structure which confirms the existence. So we didn't go and build to prove anything. We built and we saw this was, comes out.

Q: Say that people who have, were artists, poets, the nation, who has to do with poetry, has more panoply, I mean, has more colorful emotion, and so we can understand and reach these goals faster than those who don't.

K- Oh, just because you are Iranian, you want to say that?

Q: Because emotion, the emotion I feel it's some kind of beauty of everyday life. Softening...

K- It is, it is, it's part of the being, a living thing. (1:28) It's not exclusivity of the Man. Dogs have emotion, cats have emotion, even the worms have emotion. But, the emotions control their own manifestation of the... Emotion creates the Inertia, if I put it that way. You understand? The emotion, you... you have a... other women. Women have a breast, which is created to feed the child, to... for next generation, for creation. Then, they have a problem with the husband, and they create a emotion, which gives them, changes the material inside to a solid, and you call it a cancer. So, that emotion has created Inertia, that the material comes, converts from plasma into matter state. So, this is what I keep on saying, the emotion, is not just what we call, psychosomatic. The emotion is creation of Inertia. Inertia does not ?? make ?? , that you become a stone, you have Inertia, because you have Earth, you have Inertia. You change condition of the Inertia. Emotions are, control the manifestation of the Inertia.

This is what I said, even in, when you travel in Space, the emotions of the Soul and the Spirit, decide, then you can manifest yourself, because you create that Inertia of manifestation, in the condition, the Place, Possession and Position. That's what emotion does. (1:30) It's... as I explained once in the lecture, emotion is the salt. As you know, like I was explaining to Knowledge Seekers, you have 12 Magnesium type of salt. Maybe more, what we scientifically think about 12, maybe 14. Which the salt connects, metal to non-metal. It's the agent, that's why we have the salt. And, what we call, the salt of the Soul, which connect the Soul and the Spirit together, we call it, emotion. It's another word, in physical dimension of the fields, we call it, emotion. In the matter Physics, Chemistry, we call it, a salt. Connects, what I'm... Salt is what connects two different level of structures together. A metal to a non-metal. Which is both of. So both can attack, attack themselves to it. And, that's what emotion is, connects the Soul to the STP, connects the STM to the Soul of the Universe. If you can create that salt of Inertia too, then you can travel this span of Universe, manifest yourself, and it goes back to the teaching. You create emotion, that emotion gives you cancer, you cure emotion, you fall in love, you get the emotion, you lose your breath, and all of it to do with emotion. So emotion is what we call, in the matter state, Inertia. And in a way, it's the salt, connects the two together. (1:32) ...

It's the same, as I always say, the humans, because they are understood, have chosen different names for the same process. You put an Inertia in the matter state, you put a salt in the chemical state, you put emotion in the, what we call, human state or life state, but it's the same process. No difference. It's the same mechanical system interaction of the magnetic field. And it's how systems work.

Any questions? Thank you very much.

Q: … A year ago I began creative artwork by combining Gans, Ash and Color. It all started as a fire, born from a deeply Human gesture, a gift. Through this process I triggered an overwhelming flow of love, that transcends biological needs, like food and sleep. This energetic intensity devastated me every single moment, as it finds no... it finds no... I think it means, it doesn't understand the STP, and the Human Soul. (1:34) From the perspective of Plasma Science, Where does this profound transformation process

lead? How can an artist balance and direct the power of this MaGrav field, when the Soul awakens to the source, but encounters resistance, within the physical dimension?

K- There's not much we can do. That this is what we call, the art, creates for many of us this position. And how can I put this? You know, there is a painter, in one of the European countries, that he realized people like what they, what he draws. He wasn't an artist, he was just a commercial. And, he drew so many pictures, so fast, that they didn't have time to dry, while the other painters were taking time for the painting. So, he used to put what we call, matchsticks, like, on the, on the painting, that they can do the next one, that he can sell more. And now we recognize his paintings as of the, if they are, the signs of matchstick, and he is trying to patch it up, but you see it in all of them. So, there was no emotion in it, but there is art. And this is part of what's in that art, what's in that paint. (1:36) Three, four years ago we asked the artist to add Gans's, and we started selling your arts in the Exhibition Center. But, what emotion was in it, when you did it, and what you put in it, that created you that dimension of emotion. You can't escape from it, because then you put your life into it, you put a lot of things into it. And some people, art for them is just copying machine. Some people are art, which is, puts a lot of emotion, that even the, what we call, the painting, carries emotion, and conversion.

There is, years ago, years and years ago, it goes back to 1990's. I came across a art collector in city of Antwerp and he collected art. He was a antique holder of art, and he collected enormous amount of antiques. Very, very, very, very old, very precious ones. And, that time, he commissioned us to sell all his ?? artwork, because his children got, because of his wealth, into drugs, and they were stealing the arts to feed their habits. And he said, "I don't want my life work to go." "So sell all these, and turn it into money that I can give it, than my children burning them to drugs." In that process, we got involved with ?? Salabi and all the art people in the world, (1:38) because it was a very special art, very collective art, from 2000, 3000 years ago, and all sorts of things.

And, he had a room of Japanese art, which is totally, I've never seen, I never knew, he opened my eyes into what it means, but it's all Japanese, black and white type thing, and it's nothing but erotic. He said, "Japanese don't think about anything." That their mind was just, whatever it was, sex. And then, he pulled me into pictures, which is drawn 600 years ago, 400 years ago. And, in the conversation, I asked him a few questions. And then, accidentally we came to the new artists. Because he had a few new artwork, and I stood in front of this art pieces. You look at the artwork of, let's say, 400 years ago, 600 years ago, sold for millions of dollars, it was amazing, this collection. And, we were commissioned to sell this. And, you stood in front of the present art. It was just like moving from wind into nothing. The present painting, the present paint has no emotions, all chemicals. The old painting was most of it done by the painter himself, it's natural color, it carries energy, and it was... it was... you could feel it. (1:40) You could feel what the painter, in how he brushed pigments, material, with the... there were flowers, whatever they used.

Today's painting has no emotion, when I stand in front of it, with the knowledge I gathered, they cannot carry anything. It's a mass production, they carry with a matchstick.

It's chemicals, nothing has gone into it. Paintings are 400, 600 years ago. It's most probably made by the painter himself, from natural material. It's Gans's. He carries his emotion, you feel his emotion in the painting. And now, you have these chemical colors, and you get Gans into it. And does it bring back the painting of 400 years ago? What experience do we carry with this? Does, does your painting, do your painting comes from natural colors? Then, you transfer your emotion into it. Master's painting, some of them, talk to you, because you feel the emotion of it. New paintings has no emotion, it's just, I draw something and it's just okay. It's the new art. I actually call it, 'New Fart' than 'New Art'.

But in olden days, you have, you made with emotion, when you put a paint on the canvas, carried your emotion, and paint carried it, because it was a live, living thing, because you put it there. And nowadays, (1:42) because, I had to think about this, it just stayed in my mind, between 30 years ago, when the Knowledge Seekers were bringing paints for our paintings, for us to sell in the Exhibition Center. Has no emotion, it's just colors put next to each other, when you stand in the Masterworks. It's, it's amazing how you feel when you look at the Masterworks, and you look at the present painting, and you just add Gans into it. Does it carry your emotion, did you make the Gans's yourself? Did you give life to a chemical product? Does it convey the emotion of peace? Life has taught us a lot, but what we gather in the dimension of it, is very important, how we perceive, we carry emotions with it. How we perceive, we carry our knowledge with it.

So, when you talk about these things, I had the pleasure, or I've been given the opportunity, I've been lucky enough to analyze these things out of the framework of what we call, scientific world, in the dimension of the, what you call, independent investigation of what the truth is behind it. I don't look at, I don't like to go to art galleries, especially new art galleries. But when you look at some of the drawings, even drawn hundreds of years ago, with Japanese, black and white, how did they create that ink, it carries emotion with it. (1:44) And he brought me back, I was telling the guy, you know, we were students in the school, we had to do, what's it called, technical writing, craft writing, and it was compulsory. And we had to do it once a week. And if you don't do it, then it was one of the things, could fail you to go further on. So, you had to do it. So, there was a pen, usually had to be from, like, a cane, and a small bottle of black ink. You bought it for that teaching, and then you dipped in, and the teacher taught you how to write, as you see the ?? Persian writing style, and writing. And then, it was very interesting, that at the end of the session, we knew these are natural, they used to make them from chalk. 80% of the children used to drink it. And we used to say, "How?" But, they always had a pleasure in drinking this ink. It wasn't you drank ink, you, you, you tasted the nature with it. It was like, maybe, ten milliliter of it, round. The Iranians know what I'm talking about with, they usually had a red cap on it. It's like a plastic red cap, or rather a red cap. And we used to call it, the drinking time. But, that ink carried a lot of energy. It was like a joy to drink the ink. And you always knew who had a writing session, because most of them had a, what you call it, a black mouth, because they drank the ink. (1:46) And those who didn't, it was spelt in their bags and everything, it was a joke. And that was, "Better to drink it than put it in your bag, and ruin all your books."

Any other question?

Q: … Is a measurable reduction in the CO2 content of the ambient air, actually observable during this process of the production of CO2 Gans? Or does the Gans energy form associated with CO2 arise independently of the existing CO2 concentration in the atmosphere, as soon as the appropriate field conditions are met. I think he's trying to... he says, "I'm particularly interested in whether a change in the atmospheric CO2 concentration, is demonstrably part of the process, or whether these are two separate processes."

K- For what process? For producing Gans?

R: For the production of CO2 Gans.

K- It changes the atmosphere, it changes the atmosphere.

R: It pulls it out of the atmosphere, correct?

K- Yes. Actually, it pulls the Carbon and the Oxygen in the water, and that's where it comes. You don't pull... (1:48) It's a very interesting position, because, when you reach a point, that the Oxygen level in the water changes, there is no more pull, because there is nothing to, to link up to. We did a, we did a test, with the SCK, Belgium Nuclear Center. They vacuumed a cube, 1 meter by 1 meter, 1 meter, glass ?? deck. And this was a few days test. And they wanted to see if the claim of absorbing CO2 is correct, if it's the absorption, what will be the change. And we measured it, it's the reduction in the Carbon. And, it's a very special way, because, we see reduction in the Carbon, which mixes with the Oxygen in the water. But, you have a Carbon freed from the Oxygen, the CO2, which links up back with the Hydrogen, which lost its Oxygen. It's not that you actually extract, we...

R: You mean from the air, back into the water, the ambient air, it gets, it does get pulled back into the water, when the water is kind of thirsty for CO2?

K- Yeah, yeah, yeah.

R: The water gets thirsty.

K- Yeah the water gets thirsty. But, the Oxygen which is with the CO2, which is extracted, (1:50) is of the different strength than the Oxygen which was in the water, and they just saturate, you cannot do it anymore. You have to have a matching one, or connected field strength of. Because, I stood in SCK for a long time, because it was part of another process, which we were testing at the SCK, that we showed we can produce nuclear radiation, gamma rays, without any nuclear material. And, after that test, they blocked anybody moving from any room to any room, because now we could develop nuclear materials. And, it's very, very easy. But, you have to understand the process. Because, in that process, you stand to create Tritium. It's very easy to create Tritium and

start producing gamma rays and go into a nuclear cycle of production. Because, I remember even the face of the guy standing there and he was shocked. He said, this is impossible. We see reduction in the Carbon, but we see the water standing the same, and we looked, if there is a release of Oxygen or a release of Hydrogen, there was no Hydrogen or Oxygen extra in the box. But, it reached the point of saturation, that there were no more changes of gas, because the CO2 was stabilized. (1:52)

Any other question?

K- You know, something very interesting, which I was explaining to one of the Knowledge Seekers. I worked in British nuclear industry and research. I worked with the Belgians in their nuclear research centers. And I always have to go to them. I work with the, our Italian friends know. I work with the Italian nuclear scientists in occasions in Italy. And my wish always was to create a center that the world scientists from all over come. And it's a lab where I bring scientists together. Not the lab I have to go belong to other people. And, walking in the labs, very recently, it brought me that feeling that, what I wished, has become reality. Where I had to go to the labs and they dictate the condition. I have created the condition, the labs, that the scientists dictate their own position. Their own research. There is no pre-set, you have to come up with an answer, you have to come up with the data. You have the freedom.

I was standing with one of the scientists, very recently, and I said to him, "What have you achieved in past two, three months?" He said, "This and this and this." And, it was there, that there is no obligation, a target, that you have to achieve. And, it's made possible for us, to create a laboratory without a condition. (1:54) And, scientists are there to share, to develop, to bring up what is there. There is no economical target that we have to achieve this to show something. And it's amazing how the talents are coming up. We have the pleasure in next few days, a number of Knowledge Seekers, searching into, into Space Center. And, hopefully we'll bring some more Chinese in, and it's amazing how things take shape, that we created a condition, that we don't have to create false data to confirm it works, but we create a structure that it works because, it's what it is, is not made up to be. And, with the help of you Knowledge Seekers, this has become an amazing. I said to a Knowledge Seeker, couple of days ago, "The biggest things I wish, has come true." An environment where the scientists come to work, to develop, in a peaceful way. There is no pressure, you have to come up with a target, no pressure that you have to be there, but it's the pleasure to be there, to do, to achieve and to, to maintain the process of the interaction. It's amazing how, as I said, "My wish is my command", always. I always wanted to build a laboratory where people come together to share the knowledge. They don't come there to hide. They have to because it pay their wages or whatever. And it's done with the help of your Knowledge Seekers, it's there. And still people come in, and the non-Knowledge Seekers become Knowledge Seekers, because they see the beauty of the knowledge.

Any other questions? (1:56)

Q: … Mr. Keshe, the level of gamma rays that you're talking about, that you reached by using Tritium, in this vacuum container. The, these two, compared to the other gamma, other radiation, are the, is the same strength that you have?

K- It's always more or less, yeah.

Q: It's harmful in the same way to the human body?

K- Yes, yes, yes, yes. You create a condition that we call... There's a big difference you have to understand. I think you're going the wrong way. Gamma ray radiation in the plasmatic level, is different than the gamma radiation in the matter state. Very, very different. Very different. In the Human body we have gamma rays as part of the process of our life, but it doesn't harm us, because it's a... it's the, what we call, plasmatic gamma ray. In the matter gamma ray, you disposition, because, in the matter gamma ray, you interact with the matter state, and you create disposition. (1:58) In plasma, because there is no matter, your field interacts with a field, and your gamma ray is part of another field, which can absorb it. And it's totally different. This is why, if you can convert, this is why I can handle nuclear materials as you carry fork and spoons. Because, I tune into the level of the plasma, not into the matter of the plasma. Into the Magnetic field of the radiation, as a plasma, not Magnetic field of the radiation, as a matter state. It's a big difference.

Any other question?

K- … Cosmic radiation is totally different than matter state radiation. Cosmic radiation has never killed anyone, it will not kill anyone. This is opposed to what it is. Cosmic radiation is a plasmatic radiation. Unless it's targeted in a different way. But matter state radiation is an energy package, which only interacts with the matter state magnetic field structure. It's a different technology, different knowledge. Nobody in Space will die of radiation, this is all hullaballoo.

Q: But the minute we create that kind of environment, let's say for Tritium, that kind of radiation that come out from this, is a, is another level, is, is not the plasma radiation that you're talking about before. (2:00)

K- You see, one thing I learned, one of the first things I learned about radiation. My father trying to explain to me how the X-ray is made. And, I said, "So, that's easy, if I, for example, hit anything hard enough, it would create X-ray. If I hit something fast enough, in the right angle, it creates a ?? gamma ray... the strength of it will be different. And that's only in the matter state. In the plasmatic state, I can turn the plasma in the field strength, of different depth of the strength of it, and literally absorb the radiation, doesn't matter what it is, or create the radiation, doesn't matter what it is.

I was with an X-ray engineer, a few days ago. And I said, "You know, I'm trying to get something sorted." And I used to know about everything, about the X-ray machines, everything. He says, "Do you know something, something new has come?" "It's been in the market about a year now, you can buy the second hand one, I've been for a few

thousand." He said, "There's a camera, it's not promoted because big organizations are going to lose money for it. And you take the camera, and you can take a X-ray with a normal camera." I said, "Do you know what we can do? Do you know how much it costs us?" "We have to do these things." He says, "He sent me a link." He said, "This woman sells them, but you can buy them, and you have a X-ray camera." But, how do we run this X-ray camera? You literally take a picture, and you see the bones and everything. Very soon, in the next few days, it will be in our laboratory, soon. (2:02) And, how did we use, how did we produce X-rays, and how do we produce X-ray images today? And, how would we produce X-ray images in plasmatic condition, which is actually the way our body is, in the coming time?

I was walking today, and I thought, you know something? I don't know if you ever seen the flies, which they create light when they fly. They call them fireflies. A lot of them in Italy. Can you imagine if you have a magnetic field strength detection or vision or whatever, and you're looking from outside the Earth onto Earth, can you see how many brain flies are moving everywhere? How many Souls are lighting up, and you just see the Souls, because they are interacting with the fields in their environment? Seven billion of them, plus all the animals on top of it.

Q: It is UBESUS 26. It will help you ask to, to the new vision, see through the eye of the Soul.

K- Oh, this is interesting, what comes up, what is coming up. I'm looking forward to have a Chinese scientist team joining us and others. Because, I have a vision, that in a very, very short time, we should be able to transmute hundreds and thousands of people, from one planet to another. It is possible, it's doable, (2:04) it's practical, and it's not something as it's never been done before, it's something that... But for Human race to be able to do it. Where we transmute the whole Soul structure across, and then they take the shape of their physicality. You cannot take a Man to the Moon and walk the Man the way he is, he dies. But I can take a Man, given the condition of the Moon, he converts to what he can exist, and still be a Soul, and enjoy his son and his daughter and the rest of it. Still, it's a memory of the Soul, not as a memory of the physicality. And we have the systems which is getting tried to confirm, it can be done.

Any other question, or shall I call it a day?

Q: … Respectable Professor Keshe, are eating disorders, such as anorexia, bulimia, obesity, addictions to alcohol and hallucinogens, (2:06) and even masturbation, all driven by existential emptiness, rather than simply by the sins of gluttony or lust? If so, shouldn't we eliminate this existential emptiness first, before addressing the killing of animals to provide food for the 20%? Could we, in an initial phase, feed only, only on meat, until animals learn not to kill other living beings, and become capable of receiving Universal energies, as the vertical beings do?

R: I think that was probably too long of a question.

K- Yeah, puts you to sleep, doesn't it?

R: Yes, I think we should have a restriction to...

K- How long is it, should be?

R: Whatever the question will fit in Youtube, without having to put it into three Youtube phrases, because it won't fit.

K- But it doesn't make sense by the time you get to the end of it, you forgot the beginning of it.

R: Yeah, basically...

K- Translate, translate, translate.

R: Do we need to take care of this emptiness that people feel, before we address this killing of animals to provide food.

K- Emptiness, in what sense?

R: Well people feel emptiness, so they try to fill it through different addictions, and drugs, and sex basically, various things that people use, to try to fill that deep feeling of emptiness, and it's usually because they are missing the connection between their physicality and their Soul. (2:08)

K- Oh, there are reasons for these things, we cannot say. The bulimic and the anorexia and these things, all have different reasons. The... some of it is psychologically, in one way, to attention seeking, some of them are psychologically, to release certain pains, and some of it is we are addicted to confirm we are whatever we are. It's... over years I've learned a lot about how to categorize.

I met a girl in early 2000. She was in late teens. She was bulimic and anorexia. And, I found out there was nothing wrong with her. It was the behavior of the father, who put her in that position. Or environment of us, condition of these things. There is a area in Beijing, near the embassy area. (2:10) This area is literally where we had the exhibition for three days, showing the production of materials, in that corner. It's literally in the corner, this hotel. It's become known as ?? sellington area ??. And, it's used to be a place where the Embassy people could buy something, in those days, and 30 years ago, 10, 15 years ago, there's a lot of like, you know, attracting spies and sharing, or whatever wants to be shared with the Chinese, whatever. Now it's become one of those places that people come to see. But, I've never seen so many anorexic people in one location. And every night after seven o'clock, six o'clock, you see, "Is this the Chinese society?" Saturdays and Sundays, girls come, boys come. I think the front stomach is stuck to the back stomach, if you look at it that way. Bunch of anorexics in thousands come and say, "Is this a Chinese society?" And you see nothing, and because you live in this area, you see

nothing but this... All the size 6 in China, come to this point. It's like a 'Mecca' and the, what do you call this, paparazzi. Tens of them with camera, and they deliberately dress to show how anorexic they are. And it's one of, become one of the most popular places in Beijing at the moment. (2:12)

And Saturday nights, maybe God knows, hundreds of thousands of people, like Friday, Saturday, Sunday night, pack into this area. They come from all over to be here. You can't even cross the road, you just jam-pack with them. The society has created a condition of anorexia, and a society of anorexic people. And they come to show how anorexic they are, how bulimic they are. When you live in this area, if you live in this area, I live in this area for a long time in Beijing, because of the proximity with security and the hotels, and what you call, embassies. When you leave this hotel, when you leave this area, when you move to the other area of China, It's like, "Oh my God, was this, I was, what you call it, conditioned to anorexic condition?" But, interesting is, how come so many, so many, are in one place, one position. And you can see it from their cheeks, they are anorexic and bulimic. They have, what you call, the cheeks for it. But, did they condition themselves into it, or they created that, because the society forces them to be?

If you go there and ask for size 9, or size 10 of it, they laugh at you, "You're too fat!" They literally call you fat. Small is fat, forget about medium. We don't have your size. Two things never ask in China, (2:14) never ask for a size shoe over 46, over 44, and never ask for, in this area especially, for size 12. You're too fat, and they don't have, Chinese men don't wear size 45, 46 at all. Not a single shop you find in China, high streets you can buy size 40, because they are short people, what shoes are, what you call it, size 44 is the highest, and some shops don't even have 44. And, the same with the clothing and the anorexic condition, bulimic condition. Chipmunk cheeks, the minute you see them, they all have chipmunk cheeks, because they put their finger in their mouth to vomit, and acidic, the cheeks. And, you see all of them wear a special make-up, around their lips, because the acidity of the stomach, they vomit, burns the edge of their lips, the connection between the skin and the lip.

R: Can you take a question from Jalal?
K- Who? Is he still alive? Okay, why not?
R: He's lively as always. Go ahead Jalal.
Q: Thank you Rick. Hello everyone. Hello Mr. Keshe.
K- Hi Jalal, how are you?
Q: I'm fine, thank you Mr. Keshe. I'm still alive.
K- That's good because I haven't heard from you in such a long time.

Q: You know Mr. Keshe, I'm always in the background and if I say hello you will say something, so it's better for me to be hidden.
K- And say hello. (2:16)

Q: Mr. Keshe, the situation now in the world is very, really critical. It's like a lava near the surface. Everyone threaten that use nuclear bombs and you know what that mean. So,

if this happen and I wish from God not to happen, but if this happen, what the plasma can do? How we can... you know.

K- We've been through this a few years ago, if you remember. … We've been through this a few years ago, but .. The guys who are behind this nuclear business, one is about to go to prison and spend the rest of his life in prison. And the other one is just about to go mental and put away. Possibility of nuclear war today is a fraction of what was 10, 20, 30 years ago. Unless somebody goes … through that. But there's so many patterns, there is no way ever. You see, this Blondie says, "We will not be using nuclear bomb." Because, the system of America is not like before, that you could press a button, the President decides. Now there are systems set, not to happen. You have to have three crazy people, and five total crazy people, for one nuclear warhead to go. This is why it's all threats, it's not before anymore. The only country that we could see releasing a nuclear bomb is North Korea. So, a possibility of nuclear war is far away from what they are trying to say. (2:18) Putin has no right, they have taken the right of him to war a nuclear attack. This is all games. British Prime Minister doesn't have that power. He needs a Parliament and he needs, the last thing before he launches one, the signing by the King. The King has to sign before British launch. French system security is changed. So, we are safer today, than we have ever been from a nuclear attack.

We've seen it, Putin twice tried to, three times tried to use it in Ukraine. His generals refused to fire. They have the sent the last command, not him. Trump talks where he says, "We are going to annihilate." No, American general hasn't approved up to now, the use of such a thing. Barking does not make, we are, I mean, it could happen, but we, compared to 1970s and 80s, we are level 1% chance, where those issues, 50% chance. The only lunatic is the guy in North Korea, who can do it. So, we are safe, but... if it happens, the only way it's going to happen, nuclear, but even that, it's again, condition back on the condition, if they hit the nuclear power station, runs out, whatever you call it. When there is a war, they shut down nuclear, so all the rods are in, in case they get hit. We do that in, in Iran regularly. Whenever these lunatics used to come, everything goes in the safety (mode), (2:20) which means, if they even hit, We don't have the three mile island, we don't have Fukushima. There are safety parameters built into this system.

And, you listen to the Western news, yes, because it keeps people busy, and they can gather their losses and, what you call it, take more from people. But, nuclear war could happen. But, the safety system has been put in by nations, makes it more or less impossible today, nowadays to do. But, Netanyahu had a chance to do it, but he didn't have what we call, the 'balls' to do it. And now he's, he's a 'Lame Duck,' and next few months he'll be, he'll be sentenced to, most probably Dan Hague, a prison for life, with his wife, They both will go, plus the Minister of War. One general in Israel decided, "I'm not listening, I'm not starting a war." And we've seen it, he just barks, if you listen to him yesterday, the day before. He knows he can't do it, and he says, we have to be ?? , we have to be blah, blah, not to let Muslims to, because they knows, all the same, it's lost everything now, Muslims control the bomb, and we see the peace will come back home, ?? again ?? will be there. Because his fear does not work, because there is one man who's

got 40 odd, and two men who's got the other 19, and they, they already, as I said to you, three, four weeks ago, we see the end of the wars, religious wars.

And the war between the Muslims, which is Houthis and Saudis, Again, it's religious war, because of the two sides. (2:22) Shias and Muslims are fighting with each other. Jews and the Christians are fighting with each other. Jews and Muslims are fighting with each other. They're ?? secting. And all this, what we saw, especially in the past few months, was because the son in law of President Trump took nearly $2 billion from the Saudis to start a war, and the money disappeared. And that wasn't even where their money went to. I mean it can happen. If the red flag was 50% in 1970's, at the moment it's not even 1%. The Presidents don't have the power to push the button anymore. Russia's brought it two, three times, especially in past... Putin wanted to push, but the generals refuse to.

Russia has a beautiful system, I worked with them for years. It's not the way we have, and Chinese don't have it either. They have a system that each General, each head of General, each division, or head of its division, is given a budget, and he runs his show. He is not dictated centrally. So, when he runs a show, all the nuclear weapons are in his hand. It's not in the hand of the President. President can say, yes, if he agrees, he presses. But, nobody in Russia, at the moment, does. And, the whole system changed, when we had the splitting of the Russia in 1990's, that the Generals learn they can make more money, in economically, with their soldiers, than they can actually do with the weapons. At the moment, Russia, militarily, is a business. It's a business. (2:24) Each army has its own shop, stores, has its own economical structure, And, Russian Generals, leaders, don't see anything for, no need for war.

I was sitting on the table with them, a matter of hours ago. They are not the Russians we used to know. Now, they look at the welfare of the soldiers and, we can... They are all become businessmen. Nobody wants to push that nuclear bomb and stop making money. So, and the lunatic Blondie, he has no power. He can ask for it, but the American Generals will not push it, give it, put a second code in. And the guy sitting on the desk will not press the button with a code on it. We are very safe from nuclear, but this is hype is made. It could be used. It's the only person who will, is the last soldier standing of the Jewish community. Netanyahu is gone. The hand of the son of President Trump, who was pushing all the wars, is tied up behind his back. There are things happening in the past few weeks. Mr. what you call it, murderer, they call him now. The Ukrainian Jewish President. And we lost the Jewish Prime Minister of England, so the Jews are off the board. And we start seeing change of the position. Very remote if you run into nuclear. There is possibility that in Ukraine, the Ukrainian President attack his own nuclear, to not for him to go. He will attack his own nuclear power station and not the others. And he might do, because the guy is a lunatic. (2:26)

Q: Yeah, I know that all these European societies now they are asking for sparing food and water and even money.

K- That has different reason, that's not to do with nuclear. That has a different reason, they're hiding it behind nuclear. I think it's 18th of October (November), something is

supposed to happen, and I think it's next week, something is supposed to happen, with central control, central command in the EU, which in the next few weeks, people lose all their computer connections and water connections, nothing to do with nuclear. This threat is not a threat, it is controlling the European Community. You don't hear it in China, you don't hear it in Africa, you don't hear it anywhere else. They lost control and we've seen what happened in France, we've seen what happened in Italy. They want to... You know they... themselves through 9/11, which has passed, yeah? They created 9/11 to control the world of finance. In Europe, you have this because they can't pay your pensions anymore. And they want to create a condition to clear a lot of books. Well, how come we don't have it? There is no alarm anywhere else, except the European Community. It's internal, trillions stolen by the governments, they cannot pay. We saw the riots in Paris, we saw the riots in other countries. (2:28) There is a revamp of your structure. This is very localized, it doesn't concern Asia, Africa, America or anywhere else. How come we don't have it anywhere else?

You have a big problem, they stole the moneys, they spend the moneys, and they went to rob, what we call, the Church of Russia, it didn't happen. Vatican has used all its money, now you have this threat, which is mainly Internet energy connected. And, they have it, they tried it on you, if you remember, a few, past few days, past 2-3 weeks, they cyber attacked your freezer shops. (Q: Yeah, we have it here in Sweden). Yeah, this is part of this program, to see how people react.

We know, I was sitting in a governmental meeting in China. And, one of the minutes is that the problem we had, or we have, is before, 20 years ago, we relied on people because people were holding food at home. Now, the economy has changed that all the foods are in the supermarkets. And, the minute we see anything wrong with the supermarkets, we see it can be a problem on the street. And, in Europe, you have moved from the supermarket to freezer life. And, they want to test what happened, that there is nothing, how you... This freezer defrosting cyber attack was organized for this purpose. Your whole is gone, what people could rely on, is gone. (2:30) What happened, you have all your foods in the freezer, we take your electricity out, no, and then we can condition you on the street, that we can do the rest, step up to you.

It's very clear what's happening here in Europe. Your governments don't have money to support. The luxury life by stealing from other nations is over. It's not a coincidental, only European freezer shops gets cyber-attacked. You moved storing food into freezers, we defrost the freezers, how much can you eat, and then what's the next step? They are preparing you for realigning the stealing of their funds and everything else. If it happens, 90 days water, whatever, it's three days to realign your computers, what you call, your Internet. Seven days to realign your, what you call, energy system. Nothing is planned, there is nothing left, all the things, the pot is empty. And it's only in Europe, nothing to do with ?? anywhere else.

Q: You know, here they will suffer a lot, because they are depending in these machines a lot.

K- The thing is, if you are Knowledge Seekers, collect, produce Gans's of materials you rely on. People used to freeze, people used to dry, now just mix energies. Get apples, pears, fruit, meat, and make Gans's of it, and hold the Gans's. And make sure you don't consume the Gans's, you replenish continuously with it. (2:32) You can feed yourself. We used to dry, we used to salt, we used to freeze. Now just produce the energy of the same material. You all know what to do.

Q: Now we Gans it.

K- We Gans it. Yeah, exactly. And have the energy at home. Lentils, fruits, you don't need to taste it because when you drink it, you know the energy is enormous. and in China they did it for a long time. The Knowledge Seekers were still just drinking Gans water, and they've been that life, they've been doing for 10, 15 years, 20 years. You used to have a... The problem is, when we had the Iranian Revolution at the beginning, there was a lot of shortages. People, not to get robbed, they put their jewelry and assets into chickens and they put it in the freezer. The thieves had nothing to eat, they came to freeze, they took the chickens to feed themselves, they found the jewelry in it. Do you understand? This has happened hundreds, thousands of times in Iran. They say in Iran, "Never put jewelry in the freezer, the thieves, because they can go for your freezer first." But, nobody touches water of different colors on the shelves. To them it's a decoration, to you it's a life line.

Q: You know what I hate Mr. Keshe? Everything happen only in winter time. And I don't like the winter time.

K- Well, move to Australia in the summer time.

Q: I don't know, I will move to Dr. Gatua, Kenya, better.

K- Oh, even better. You know in Africa, if you don't live in the big cities, outside the big cities, you walk on the street, God has given you everything on the trees. (2:34) You never go hungry. I've never seen anybody really dying in Africa from hunger, because the banana, the kiwi, God knows whatever is on the trees, people eat. And so, it's there, but you can do that. Save it and do it through the Gans's.

Q: You know one time Mr. Keshe you said, "If you fight for something you already lost it." You know they are already lost what that position they are fighting for.

K- One day I'll tell you something very interesting. At the moment it's not the time to tell you. It's not the time. We've seen things happening which is not normal, because like I said, because every crazy person says this is .. fun, everybody accepts it to be fun, but it changes. There's a lot of changes. There's a lot of changes. It's like you, nobody made (more) money out of this Strait of Hormuz than America. They stopped the blockage, they bankrupted the Saudis, the Chinese ran out of fuel, for the economy they were running, only place was exporting is America. America made, the oil companies have made more money than could ever imagine, 100 years.

This, and the people in Iran who holds the Strait of Hormuz, they're all American passport holder, but they get a share of the oil industry. If I open my mouth, what we know, you will be shocked. (2:36) Nobody got more benefit than the American oil company, 11 million barrel a day. They got the Saudis who pushed out of the production, Qatar, Iran, Venezuela, and the only person who has fuel and gas to give to the … to the Europeans and the Chinese is America. It used to be $40, now it's $60, now it's $110. Export 11 million barrel at $50 per day. profit, pure profit. Now you understand how fake this war is. And our Iranian friends, the Iranian, what you call it, people who push this, they all have American passport and they get a share of ?? the prize. Even this war is fake.

Thank you very much for today. Thank you very much, Jalal. Be happy. We'll see you next week, hopefully. And you might see some good things and some bad things. But thank you very much for being here. And if you understood the teaching of today, I opened a new channel of thoughts. And in a way scientific work. And it might help you in the future to understand more about how you travel the span of the Universe. Thank you very much and see you next week. See you next week.

R: Thank you, Mr. Keshe. Thank you.

K- Rick has sent you that video. You can play next week, the ??.

R: Yes, I saw that. Thanks.

K- Ok, thank you very much, indeed.

R: … (2:38) << Message from Universal Council.>> "Thank you so much, beautiful Souls, because you work on the back, you support the work of the Keshe Foundation. And thank you for that. I invite all the time, please give you freely, you Soul, to elevate all Souls, to eliminate all Souls, across the planet Earth, to understand the Knowledge of the Creator, Knowledge of the Creation, for, to be part of the Universal Community. And, invite particular, particular, specific time, at 9 PM, always time, always day, are the Central European, not summer time now, Central European time, and unify your Souls in one wish. Because we the Universal Council, (2:40) give from our Souls, so that this cycle of peace, may extend to the all beings on Earth, and throughout the Universal Community, forever. Please give your needs from your community to Universal Council for help to you and give your Soul for serve to your community or offer for serve your community to be part of the Universal Council or to be part to support the Universal Council work. Thank you so much again beautiful Souls. Thank you Rick again for the opportunity to talk to the community. Thank you."

668 KSW – November 12th, 2026
